(1) Federal grantor agencies shall recommend and submit to GSA the names of non-Federal grantee screeners. The sponsoring Federal agency recommending the designation of a non-Federal grantee screener shall prepare a request covering each such designation and forward it for evaluation and approval to the appropriate GSA regional office serving the region in which the intended screener is located. (See § 101–43.4802 for GSA regional offices, addresses, and assigned areas.) The request shall state the applicant's qualifications to screen excess personal property for use on grants; indicate the name, number, and termination date of the specific grant to which the screener is to be assigned; and list the Federal installations which the grantor agency wishes the applicant to visit. Since GSA certification of screeners will be made on a regional basis, the list of installations shall be limited to those located within the boundaries of the GSA regional office in which the screener is located. Requests by Federal grantor agencies for screeners to visit holding activities located in a GSA region other than the region in which the screener is located shall be a matter of separate handling by GSA, and any such requests will require special approval by the involved GSA regional offices. Requests for approval of such interregional visits shall include the name of the installation(s) and the specific reason for the visit. Information shall also be included on whether similar requests for interregional visits have been sent to other GSA regional offices. Requests for interregional visits shall be forwarded to the GSA regional office representative serving the region in which the screener is located who will coordinate the request with the regional office in which the installation is located and advise the requestor of the action taken on the request.

(2) Federal grantor agencies shall include with each non-Federal grantee screener request a GSA Form 2946, Authorization Certificate to Select/Freeze Excess Personal Property. (See § 101–43.4902–2946 for illustration.) The GSA Form 2946 must contain the typed name of the sponsoring Federal grantor agency, the signature of the grantor agency representative, and the typed name and signature of the proposed non-Federal grantee screener.

Subpart 101–43.4—Utilization of Abandoned and Forfeited Personal Property

Section 101–43.402–6(a) is revised as follows:

§ 101–43.402–6 Transfer to other Federal agencies.

(a) Normally the transfer of forfeited or voluntarily abandoned personal property shall be accomplished by submitting for approval a Standard Form 122, Transfer Order Excess Personal Property (see § 101–43.4901–122), or any other transfer order from approved by GSA, to the Regional Administrator, General Services Administration (3A), Region 3, Washington, D.C. 20407.

* * * * *

Subparts 101–43.6 – 101–43.47 are reserved as follows:

Subparts 101–43.6—101–43.47—[Reserved]

New Subpart 101–43.48 is added as follows:

Subpart 101–43.48—Exhibits

§ 101–43.4800 Scope of subpart.

This Subpart 101–43.48 exhibits information referenced in the text of Part 101–43 that is not suitable for inclusion elsewhere in that part.

1. Section 101–43.4901 is redesignated as § 101–43.4801, and the text of the section is amended as follows:

§ 101–43.4801 Excess personal property reporting requirements. [Redesignated from § 101–43.4901]

* * * * *

(b) * * *

(2) Items in classes 1510 and 1520 held by the Department of Defense or other agencies shall be reported to the General Services Administration (9FW), San Francisco, CA 94105.

* * *

(d) * * *

Group No.	Group identification	Federal supply classification: Classes	Not reportable to GSA	Reportable to GSA	Minimum reportable condition codes
15	Aircraft; and airframe structural components.	All except	X		
		1510 aircraft, fixed wing, as specified by § 101–43.4801(b).		X	N4, E4, O4, R4.
		1520 aircraft, rotary wing, as specified by § 101–43.4801(b).		X	
		1560 airframe structural components, as specified by § 101–43.4801(b).		X	
16	Aircraft components and accessories.	All, as specified by § 101–43.4801 (b), except.		X	N2, E2.
		1670 parachutes and aerial pickup, delivery, and cargo tie down equipment.		X	N4, E4, O4, R4.
23	Ground effect vehicles, motor vehicles trailers, and cycles.	All except		X	N4, E4, O4, R4.
		Armored vehicles in 2320 trucks and truck tractors.	X		
		2350 tanks and self-propelled weapons.	X		
28	Engines, turbines, and components.	All except	X		
		2805 gasoline reciprocating engines, except aircraft; and components.			N3, E3, O3.
		2810 gasoline, reciprocating engines, and components; as specified by § 101–43.4801(b).		X	
		2815 diesel engines and components.		X	
		2840 gas turbines and jet engines, aircraft and components as specified by § 101–43.4801(b).		X	
58	Communication, detection, and coherent radiation equipment.	All		X	N4, E4, O4, R4.
74	Office machines, visible record equipment, and data processing equipment (see § 101–43.4801 (c)).	All		X	N4, E4, O4, R4.

2. Section 101–43.4802 is added to read as follows:

§ 101–43.4802 Regional offices addresses and assigned areas.

Region	Office address	Regional areas
1	General Services Administration, John W. McCormack, Post Office and Courthouse, Boston, Mass. 02109.	Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont.
2	General Services Administration, 26 Federal Plaza, New York, N.Y. 10007.	New Jersey, New York, Commonwealth of Puerto Rico, Virgin Islands.
3	General Services Administration, Region 3, Washington, D.C. 20407.	Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia.
4	General Services Administration, 1776 Peachtree St., NW., Atlanta, Ga. 30309.	Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee.
5	General Services Administration, 219 South Dearborn St., Chicago, Ill. 60604.	Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin.
6	General Services Administration, 1500 East Bannister Rd., Kansas City, Mo. 64131.	Iowa, Kansas, Missouri, Nebraska.
7	General Services Administration, 819 Taylor St., Fort Worth, Tex. 76102.	Arkansas, Louisiana, New Mexico, Oklahoma, Texas.
8	General Services Administration, Building 41, Denver Federal Center, Denver, Colo. 80225.	Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming.
9	General Services Administration, 525 Market St., San Francisco, Calif. 94105.	Arizona, California, Hawaii, Nevada, Pacific Ocean areas.
10	General Services Administration, GSA Center, Auburn, Wash. 98002.	Alaska, Idaho, Oregon, Washington.

3. Section 101–43.4905 is redesignated as § 101–43.4803 and is revised as follows:

§ 101–43.4803 List of Government corporations (31 U.S.C. 846, 856).

Wholly owned and mixed ownership Government corporations are not necessarily limited to those listed below.

WHOLLY OWNED GOVERNMENT CORPORATIONS

Commodity Credit Corp.
Export-Import Bank of the United States.
Federal Crop Insurance Corp.
Federal Housing Adm.
Federal Prison Industries Inc.
Federal Savings and Loan Insurance Corp.
Government National Mortgage Assn.
Overseas Private Investment Corp.
Panama Canal Co.
Saint Lawrence Seaway Development Corp.
Tennessee Valley Authority.
Virgin Islands Corp.

MIXED-OWNERSHIP GOVERNMENT CORPORATIONS

Central Bank for Cooperatives and the Regional Banks for Cooperatives.
Federal Deposit Insurance Corp.
Federal Home Loan Banks.
Federal Intermediate Credit Banks.
Federal Land Banks.
The National Railroad Passenger Corp.
The Rural Telephone Bank.

Subpart 101–43.49 is revised as follows:

Subpart 101–43.49—Illustrations of Forms

§ 101–43.4900 Scope of subpart.

This subpart illustrates forms prescribed or available for use in connection with subject matter covered in other subparts of Part 101–43.

§ 101–43.4901 Standard forms.

(a) The Standard forms illustrated in this section show their text, format, and arrangement, and provide a ready source of reference. The subsection numbers in this section correspond with the Standard form number.

(b) The Standard forms illustrated in this § 101–43.4901 may be obtained by submitting a requisition in FEDSTRIP/MILSTRIP format to the GSA regional office providing support to the requesting activity.

§ 101–43.4901–120 Standard Form 120, Report of Excess Personal Property.

§ 101–43.4901–120A Standard Form 120A, Continuation Sheet (Report of Excess Personal Property).

§ 101–43.4901–120–1 Instructions for preparing Standard Form 120.

§ 101–43.4901–121 Standard Form 121, Annual Report of Utilization and Disposal of Excess and Surplus Personal Property.

§ 101–43.4901–121–1 Instructions for preparing Standard Form 121.

§ 101–43.4901–122 Standard Form 122, Transfer Order Excess Personal Property.

§ 101–43.4901–365 Standard Form 365, Annual Report—Disposal of Foreign Excess Property.

§ 101–43.4902 GSA forms.

(a) GSA forms in this section show their text, format, and arrangement and provide a ready source of reference.

(b) GSA forms in this section may be obtained initially from the General Services Administration (3FNDD), Union and Franklin Streets Annex, Building 11, Alexandria, Va. 22314. Agency regional or field offices should submit future requirements to their Washington headquarters office which will forward consolidated annual requirements to the General Services Administration (BRO), Washington, D.C. 20405.

§ 101–43.4902–1539 GSA Form 1539, Request for Excess Personal Property.

§ 101–43.4902–1539–1 Instructions for preparing GSA Form 1539.

§ 101–43.4902–2946 GSA Form 2946, Authorization Certificate to Select/Freeze Excess Personal Property.

PART 101–44—DONATION OF PERSONAL PROPERTY

The table of contents for Part 101–44 is amended to delete §§ 101–44.4903 and 101–44.4904 and to revise the following entries:

Subpart 101–44.49—Illustrations of Forms

Sec.

101–44.4901 Standard forms.
101–44.4901–123 Standard Form 123, Application for Donation of Surplus Personal Property.
101–44.4901–123A Standard Form 123A, Application for Donation of Surplus Personal Property — Continuation Sheet.
101–44.4901–123–1 Instructions for preparing and processing Standard Form 123.
101–44.4902 GSA forms.
101–44.4902–18 GSA Form 18, Application of Eleemosynary Institution.
101–44.4903 [Deleted]
101–44.4904 [Deleted]

AUTHORITY: Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c)).

Subpart 101–44.3—Donation for Educational, Public Health, and Civil Defense, Including Research or Public Airport Purposes

1. Sections 101–44.306 and 101–44.307 are revised as follows:

§ 101–44.306 Application for donation.

All donations of surplus personal property for educational, public health, civil defense, service educational activities, and public airports shall be accomplished by use of Standard Form 123, Application for Donation of Surplus Personal Property (illustrated at § 101–44.4901–123), and Standard Form 123A, Application for Donation of Surplus Personal Property—Continuation Sheet (illustrated at § 101–44.4901–123A). The original and three copies of Standard Form 123 shall be forwarded to the appropriate GSA regional office for approval, with an informational copy to the holding agency.

§ 101–44.307 Preparation and processing of applications.

Applications for donation shall be prepared and processed in accordance with the instructions illustrated at § 101–44.4901–123–1.

2. Section 101–44.321 (b), (c), and (d) are revised as follows:

§ 101–44.321 Drugs, biologicals, and reagents other than controlled substances.

* * * * *

(b) Whenever drugs, biologicals, and reagents are considered for donation, a letter of clearance shall be obtained from the Food and Drug Administration (FDA) indicating which items may be safely donated. The Department of Health, Education, and Welfare, Office of Federal Property Assistance (OFPA), shall obtain the letter of clearance and ensure that the letter accompanies Standard Form 123, Application for Donation of Surplus Personal Property (see § 101–44.4901–123). Items which do not fall within the purview of FDA, or which FDA indicates are unsuitable, will not be considered by GSA for donation.

(c) For purposes of obtaining the letter of clearance from FDA, DHEW–OFPA shall be responsible for obtaining and providing samples of any item when required. Any payment of costs for laboratory examinations for quality assurance of such samples shall be arranged by DHEW–OFPA. Before laboratory examinations are undertaken by FDA, an estimate of the expected cost of the quality assurance shall be furnished by FDA to DHEW–OFPA.

(d) In addition, the application shall also contain a statement from DHEW–OFPA that (1) for any quantity of those items approved for donation which are to be stored in a State agency warehouse prior to distribution, DHEW–OFPA shall obtain from the appropriate State agency a certification that adequate facilities are available to effect full accountability and proper storage of the items in accordance with Federal, State, and local statutes governing the acquisition, storage, and accountability of the items requested; (2) the facilities shall be used for the protection of the items including protection against theft and pilferage; (3) the items shall be distributed only to institutions licensed and authorized to administer and dispense such items or to civil defense organizations authorized to store such items; and (4) in addition to the normal certifications required to be executed by responsible officials of donee institutions or organizations when property is acquired by donation, the State agency shall obtain a certification from the donee indicating that (i) the items transferred to the donee institution or organization will be safeguarded, dispensed, and administered under competent supervision; (ii) adequate facilities are available to effect full accountability and proper storage of the property in accordance with Federal, State, and local statutes governing the acquisition, storage, and accountability; and (iii) the administration or use of the property requested will comply with the provisions of the Federal Food, Drug, and Cosmetic Act, as amended (21 U.S.C. 301–392).

Subpart 101–44.6—Donation of Abandoned and Forfeited Personal Property

Section 101–44.601–2 is revised as follows:

§ 101–44.601–2 Establishment of eligibility.

Eleemosynary institutions desiring to obtain available distilled spirits, wine, and malt beverages shall submit GSA Form 18, Application of Eleemosynary Institution (see § 101–44.4902–18), to the General Services Administration (3FW), Region 3, Washington, D.C. 20407.

Subpart 101–44.7—Donation of Foreign Excess Personal Property

Section 101–44.703(b) is revised as follows:

§ 101–44.703 Donation approval.

* * * * *

(b) Standard Form 123, Application for Donation of Surplus Personal Property (see § 101–44.4901–123), prepared in accordance with the instructions prescribed in § 101–44.4901–123–1 and signed by a duly authorized official, shall be forwarded to the appropriate GSA office for approval for property covered by this subpart. An information copy shall be forwarded to the holding agency.

* * * * *

Subpart 101–44.8—Reports

Section 101–44.801 is revised as follows:

§ 101–44.801 Performance report of donations.

(a) An annual report of the donation of surplus personal property shall be submitted in duplicate to GSA within 60 calendar days after the close of each fiscal year, using Standard Form 121, Annual Report of Utilization and Disposal of Excess and Surplus Personal Property. Sections 101–43.4901–121 and 101–43.4901–121–1 illustrate Standard Form 121 and provide instructions for its preparation.

(b) An annual report of the donation of foreign excess property shall be submitted in duplicate to the President of the U.S. Senate and to the Speaker of the U.S. House of Representatives within 90 days after the close of each fiscal year using Standard Form 365, Annual Report—Disposal of Foreign Excess Property. Section 101–43.4901–365 illustrates Standard Form 365 and provides instructions for its preparation.

Subpart 101–44.49 is revised as follows:

Subpart 101–44.49—Illustrations of Forms

§ 101–44.4900 Scope of subpart.

This subpart illustrates forms prescribed or available for use in connection with subject matter covered in other subparts of this Part 101–44.

§ 101–44.4901 Standard forms.

(a) The Standard forms illustrated in this section show their text, format, and arrangement, and provide a ready source of reference. The subsection numbers in this section correspond with the Standard form number.

(b) The Standard forms illustrated in this § 101–44.4901 may be obtained by submitting a requisition in FEDSTRIP/MILSTRIP format to the GSA regional office providing support to the requesting activity.

§ 101–44.4901–123 Standard Form 123, Application for Donation of Surplus Personal Property.

§ 101–44.4901–123A Standard Form 123A, Application for Donation of Surplus Personal Property—Continuation Sheet.

§ 101–44.4901–123–1 Instructions for preparing and processing Standard Form 123.

§ 101–44.4902 GSA forms.

(a) GSA forms in this section show their text, format, and arrangement and provide a ready source of reference.

(b) GSA forms in this section may be obtained initially from the General Services Administration (3FNDD), Union and Franklin Streets Annex, Building 11, Alexandria, Va. 22314. Agency regional or field offices should submit future requirements to their Washington headquarters office which will forward consolidated annual requirements to the General Services Administration (BRO), Washington, D.C. 20405. (GSA Form 18 may be obtained upon request from the General Services Administration (3FW), Region 3, Washington, D.C. 20407.)

§ 101–44.4902–18 GSA Form 18, Application of Eleemosynary Institution.

PART 101–45—SALE, ABANDONMENT, OR DESTRUCTION OF PERSONAL PROPERTY

The table of contents for Part 101–45 is amended to delete §§ 101–45.4904 through 101–45.4927 and to add or revise the following entries:

Subparts 101–45.9—101–45.47—[Reserved]

Subpart 101–45.48—Exhibits

Sec.	
101–45.4800	Scope of subpart.
101–45.4801	Instructions for the preparation of advance notice to the Department of Commerce.
101–45.4802	Sample format—irrevocable letter of credit.
101–45.4803	General instructions for preparation of irrevocable letter of credit.
110–45.4804	Sample format—draft drawn against irrevocable letter of credit.
101–45.4805	Sample format—transmittal letter to accompany letter of credit.
101–45.4806	Outline for preparation of explanatory statement relative to negotiated sales.
101–45.4807	Equal Opportunity clause.
101–45.4808	State health agencies.
101–45.4809	State radiation control agencies.

Subpart 101–45.49—Illustrations of Forms

101–45.4901	Standard forms.
101–45.4901–28	Standard Form 28, Affidavit of Individual Surety.
101–45.4901–97	Standard Form 97, The United States Government Certificate of Release of a Motor Vehicle.
101–45.4901–97–1	Instructions for use of Standard Form 97.
101–45.4901–114	Standard Form 114, Sale of Government Property—Bid and Award.
101–45.4901–114A	Standard Form 114A, Sale of Government Property—Item Bid Page—Sealed Bid.
101–45.4901–114B	Standard Form 114B, Sale of Government Property—Item Bid Page—Sealed Bid.
101–45.4901–114C	Standard Form 114C, Sale of Government Property — General Sale Terms and Conditions.
101–45.4901–114C–1	Standard Form 114C–1, Sale of Government Property — Special Sealed Bid Conditions.
101–45.4901–114C–2	Standard Form 114C–2, Sale of Government Property — Special Sealed Bid — Term Conditions.
101–45.4901–114C–3	Standard Form 114C–3, Sale of Government Property—Special Spot Bid Conditions.
101–45.4901–114C–4	Standard Form 114C–4, Sale of Government Property — Special Auction Conditions.
101–45.4901–114D	Standard Form 114D, Sale of Government Property — Amendment of Invitation for Bids/Modification of Contract.
101–45.4901–114E	Standard Form 114E, Sale of Government Property—Negotiated Sales Contract.
101–45.4901–114F	Standard Form 114F, Sale of Government Property—Item Bid Page—Spot Bid or Auction.
101–45.4901–126	Standard Form 126, Report of Personal Property for Sale.
101–45.4901–126A	Standard Form 126A, Report of Personal Property for Sale (Continuation Sheet).
101–45.4901–150	Standard Form 150, Deposit Bond—Individual Invitation, Sale of Government Personal Property.
101–45.4901–151	Standard Form 151, Deposit Bond—Annual, Sale of Government Personal Property.
101–45.4902	GSA forms.
101–45.4902–27	GSA Form 27, Notice of Award (Sale of Government-Owned Personal Property).
101–45.4902–27A	GSA Form 27A, Notice of Award—Continuation.
101–45.4903	Optional forms.
101–45.4903–15	Optional Form 15, poster, Sale of Government Property.
101–45.4903–16	Optional Form 16, Sales Slip, Sale of Government Personal Property.
101–45.4903–20	Optional Form 20, Notice to Surety—Deposit Bond—Annual, Sale of Government Personal Property

AUTHORITY: Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c)).

Subpart 101–45.1—General

Section 101–45.105–3(b) is revised as follows:

§ 101–45.105–3 Exemptions.

* * * * *

(b) GSA regional offices, after consultation with a holding activity, may on a case-by-case or blanket basis, authorize sale by the holding activity of perishable items or small lots of limited value property at isolated locations. Optional Form 15, poster, Sale of Government Property (see §101–45.4903–15) and Optional Form 16, Sales Slip, Sale of Government Personal Property (see § 101–45.4903–16) are prescribed for use by holding activities for the sale of such property. These forms may be obtained as stated in § 101–45.4903. Procedures for conducting such sales are set forth in § 101–45.304–3.

Subpart 101–45.3—Sale of Personal

1. Section 101–45.303(b) is revised as follows:

§ 101–45.303 Reporting property for sale.

* * * * *

(b) *Nonreportable property.* Property not required to be reported for utilization screening and for which any required donation screening has been completed shall be reported to the appropriate GSA regional office on Standard Form 126, Report of Personal Property for Sale (illustrated at § 101–45.4901–126). Standard Form 126A, Report of Personal Property for Sale—Continuation Sheet, shall be used if additional pages are required. Standard Forms 126 and 126A are stocked as five-part carbon interleaved forms and may be obtained by submitting a requisition in FEDSTRIP/MILSTRIP format to the GSA regional office providing support to the requesting activity.

2. Section 101–45.303–3 is revised as follows:

§ 101–45.303–3 Delivery.

(a) After full payment has been received from a buyer, the GSA regional office will notify the holding activity by copy of the GSA Form 27, Notice of Award (also GSA Form 27A, Notice of Award—Continuation), that property may be released to the purchaser. (See §§ 101–45.4902–27 and 101–45.4902–27A.) Upon completion of a sale, holding activities will be provided additional copies of GSA Form 27 for use as an internal accounting document. If a purchaser fails to remove property within the period specified, the GSA regional office shall be advised of this fact immediately in order that appropriate action may be taken.

(b) Delivery of motor vehicles to purchasers shall be evidenced by submission to the purchaser of a completed copy of Standard Form 97, The United States Government Certificate of Release of a Motor Vehicle. The form shall be signed in accordance with requirements established by the head of the agency selling the vehicle. Proper precautions shall be exercised by agency heads to prevent blank copies of Standard Form 97 from being obtained by unauthorized persons. Instructions for the use of this form are in § 101–45.4901–97–1. Standard Form 97 is illustrated at § 101–45.4901–97.

3. Section 101–45.304–2 is amended as follows:

§ 101–45.304–2 Negotiated sales and negotiated sales at fixed prices.

* * * * *

(c) * * *

(3) An outline for the preparation of the explanatory statement is shown in § 101–45.4806.

4. Section 101–45.304–3 is amended as follows:

§ 101–45.304–3 Small lots sales.

* * * * *

(a) *Optional Form 15, poster, Sale of Government Property.* This dual purpose form (see § 101–45.4903–15) may be used as a direct sales announcement or as a poster to be displayed in prominent locations in public buildings. It requires only fill-in data to indicate the selling agency, sales location, time of sale, and type of property. When the form is used as a sales announcement, it may be either mailed in an envelope or the mailing data printed on the reverse side. The posting of the form or mailing of the announcement should be made in advance of the proposed sale. The period of time between posting or mailing the announcement will vary according to the type and quantity of property being offered; usually, a 7-day period is adequate.

(b) *Optional Form 16, Sales Slip—Sale of Government Personal Property.* This four-part form (see § 101–45.4903–16) is provided for simple documentation of sales and is similar to cash sales slips utilized in over-the-counter sales in private retail stores. The form functinos as an invoice, cash receipt, permanent accounting record, or a property release document as required by individual agency procedures. It may be used to record over-the-phone quotations in the case of negotiated sales.

5. Section 101–45.304–7(b) is revised as follows:

§ 101–45.304–7 Advertising.

* * * * *

(b) *Advance sale notices to Department of Commerce.* In order that the Department of Commerce may publish regularly a synopsis of principal proposed sales of Government personal property, the sales office shall, when the acquisition cost of the property to be sold at one time at one place is $250,000 or more, forward a notice of each proposed sale to the U.S. Department of Commerce, Room 1300, 433 West Van Buren Street, Chicago, IL 60607. Where the acquisition cost is less than this amount, the notice may be transmitted when considered desirable. The notice shall be sent as early as possible in advance of the sale but at least 20 days prior to the date when the bids will be opened, or, in the case of spot bid or auction sale, when the sale will be conducted. The notice shall be transmitted by fastest mail available and shall be in synopsis form suitable for printing directly from the text as transmitted without editing or condensing. Instructions for the preparation of advance sale notices, including form and content thereof, are set forth in § 101–45.4801. The failure to comply with the advance notice of sale requirements of this § 101–45.304–7(b) shall not, in and of itself, affect the validity of a sales award which is otherwise valid.

* * * * *

6. Section 101–45.304–8 is amended as follows:

§ 101–45.304–8 Forms prescribed.

Standard Forms 114, 114A, 114B, 114C, 114C–1, 114C–2, 114C–3, 114C–4, 114D, 114E, and 114F (illustrated at §§ 101–45.4901–114 through 101–45.4901–114F) shall be used, where appropriate, in sales of personal property except that Standard Form 114C is not applicable to those sales conducted by GSA involving any strategic metals, minerals, and ores which have been determined surplus pursuant to the Act. These forms will be stocked by GSA as cut sheets only. Authority for the use of such forms in styles other than cut sheets may be granted when requests for such deviation are submitted in accordance with § 101–26.302.

* * * * *

(c) *Description of Standard forms—(1) Standard Form 114, Sale of Government Property—Bid and Award.* (i) Standard Form 114 has spaces to be completed by the issuing sales activity and the bidder. Some of the information furnished by the issuing sales activity is as follows: Invitation for bids number; name and address of issuing sales activity; person to contact for sales information; address to which bids should be mailed; place, date, and time of bid opening; whether or not bid deposit is required; and the number of days for payment to be made and property to be removed. In addition, the form provides that the Standard Form 114C, General Sale Terms and Conditions, and the Standard form of special conditions applicable to the method of sale being employed are made a part of the invitation for bids by reference. The block indicating the Standard form of special conditions for the appropriate method of sale must be checked by the issuing sales agency. If special terms and conditions in addition to those contained in the prescribed Standard forms are to be made a part of the invitation by reference, such additional terms and conditions should be identified by a form number and so indicated in the appropriate place on Standard Form 114. Special terms and conditions that are not identified by a form number must be included in the invitation and not made a part thereof by reference. Standard Form 114C and the applicable Standard form of special conditions may be attached to the invitation for bids at the option of the executive agency. Information to be furnished by the bidder is as follows: Number of days (not less than 10) for Government's acceptance of the bid, if desired; total amount of bids; amount and form of bid deposit, when required; whether or not property was inspected; small business representation; and contingent fee representation. Standard Form 114 shall be made a part of sealed bid sales and may be used in auction and spot bid sales.

* * * * *

(2) *Standard Form 114A, Sale of Government Property—Item Bid Page—Sealed Bid.* Standard Form 114A requires entries to be made by the bidder prior to submission of bid. It provides for the bidder to enter the item number of the property on which he is bidding, his offered unit price bid per item, and his total price bid per item. Except as provided in subparagraph (3) of this paragraph, Standard Form 114A shall be made a part of sealed bid sales.

(3) *Standard Form 114B, Sale of Government Property—Item Bid Page—Sealed Bid.* Standard Form 114B may be used in lieu of Standard Form 114A only when:

(i) The number of items of property being sold can be described sufficiently on one page;

(ii) Property is offered on an "as generated" basis (term-type sale);

(iii) Bidding on an increment basis is permitted by the terms and conditions of the sale; or

(iv) The use of Standard Form 114A might not be appropriate, in which case a short, accurate, and to the extent feasible, commercially clear description shall be prepared for each item offered for sale.

(4) *Standard Form 114C, Sale of Government Property—General Sale Terms and Conditions.* Standard Form 114C is applicable to all sales of personal property (including sales by negotiation) and shall be made a part of all sales invitations, either by reference or by attachment thereto, or both.

(5) *Standard Form 114C–1, Sale of Government Property—Special Sealed Bid Conditions.* Standard Form 114C–1 is in addition to the Standard Form 114C and is applicable only to sealed bid sales (other than term-type sales) and shall be made a part of all such sales invitations, either by reference or by attachment thereto, or both.

(6) *Standard Form 114C–2, Sale of Government Property—Special Sealed Bid-Term Conditions.* Standard Form 114C–2 is applicable only to sealed bid term-type sales and is in addition to the Standard Form 114C. The form shall be made a part of all such sales invitations, either by reference or by attachment thereto, or both.

(7) *Standard Form 114C–3, Sale of Government Property—Special Spot Bid Conditions.* Standard Form 114C–3 is applicable only to spot bid sales and is in addition to the Standard Form 114C. The form shall be made a part of all sales announcements, bidders registers, and bid cards, either by reference or by attachment thereto, or both.

(8) *Standard Form 114C–4, Sale of Government Property—Special Auction Conditions.* Standard Form 114C–4 is applicable only to auction sales and is in addition to the Standard Form 114C. The form shall be made a part of all sales announcements and bidders reg-

isters, either by reference or by attachment thereto, or both.

(e) *Standard Form 114D, Sale of Government Property—Amendment of Invitation for Bids/Modification of Contract.* Standard Form 114D is applicable to all sales of personal property and shall be used as required.

(f) *Standard Form 114E, Sale of Government Property—Negotiated Sales Contract.* Standard Form 114E is applicable only to negotiated sales and is used to confirm quotations received from offerors contacted by the selling activity and constitutes the sales contract upon execution by the purchaser and by the Government. Standard Form 114E shall have attached thereto, or made a part thereof by reference, Standard Form 114C, General Sale Terms and Conditions, and those additional special terms and conditions applicable only to the specific negotiation concerned.

(g) *Standard Form 114F, Sale of Government Property—Item Bid Page—Spot Bid or Auction.* Standard Form 114F is used only when mailed-in bids are authorized in connection with a spot bid or auction sale.

7. Section 101–45.304–10 is amended as follows:

§ 101–45.304–10 Deposits and final payments.

(b) Whenever a bid deposit is required by the terms and conditions of the invitation for bids, the deposit shall be in U.S. currency or any form of credit instrument other than a promissory note, made payable on demand in U.S. currency, except as provided for in condition number 4 of Standard Form 114C, General Sale Terms and Conditions. Postdated credit instruments are not acceptable. Deposit bonds submitted on Standard Forms 150 and 151 (illustrated at §§ 101–45.4901–150 and 101–45.4901–151) may also be accepted when provided for in the invitation for bids.

(c) Irrevocable commercial letters of credit issued by a bank established in the United States, payable to the Treasurer of the United States or to the Government agency conducting the sale, may be used in lieu of the foregoing forms of deposit. Such letters shall be substantially in the format shown in § 101–45.4802. General instructions relating to the preparation of letters of credit are also contained in § 101–45.4803.

(d) Any draft drawn against a letter of credit shall be substantially in the format shown at § 101–45.4804. The draft shall be accompanied by a transmittal letter and certification substantially in the format shown at § 101–45.4805.

8. Section 101–45.304–11 is amended as follows:

§ 101–45.304–11 Deposit bonds.

(a) * * *

(1) Standard Form 150, Deposit Bond—Individual Invitation, Sale of Government Personal Property. (See § 101–45.4901–150.)

(2) Standard Form 151, Deposit Bond—Annual, Saleof Government Personal Property. (See § 101–45.4901–151.)

(3) Standard Form 28, Affidavit of Individual Surety. (See § 101–45.4901–28.)

(b) * * *

(2) Standard Form 151, Deposit Bond—Annual, contains the following provision:

Upon the making of an award to the principal, or within a reasonable period of time thereafter, the Government shall transmit, in writing, the following information to the surety at the above address:

(i) Name and address of the principal(s); (ii) number of the invitation for bids; (iii) name and address of the department or agency making the award; (iv) date of the award; and (v) total purchase price covered by the award. The phrase, "or within a reasonable period of time thereafter," shall, for practicable purposes, be construed to mean within 15 days following the making of the award. Optional Form 20, Notice to Surety—Deposit Bond—Annual (illustrated at § 101–45.4903–20) is a form of written notice available for this purpose.

9. Section 101–45.308 is revised as follows:

§ 101–45.308 Performance reports.

(a) An annual report of the sale or other disposition of surplus personal property shall be submitted in duplicate to GSA within 60 calendar days after the close of each fiscal year, using Standard Form 121, Annual Report of Utilization and Disposal of Excess and Surplus Personal Property (illustrated at § 101–43.4901–121).

(b) An annual report of the sale or other disposition of foreign excess property shall be submitted in duplicate to the President of the U.S. Senate and the Speaker of the U.S. House of Representatives within 90 days after the close of each fiscal year using Standard Form 365, Annual Report—Disposal of Foreign Excess Property (illustrated at § 101–43.4901–365).

10. Section 101–45.309–8(f)(4) is revised as follows:

§ 101–45.309–8 Bedding and upholstered furniture.

(f) * * *

(4) A list of State health agencies to receive information on sales of surplus bedding and upholstered furniture is provided in § 101–45.4808.

11. Section 101–45.309–11(d) is revised as follows:

§ 101–45.309–11 Certified and noncertified electronic products.

(d) Within 30 calendar days following award, the selling agency shall provide the State radiation control agency for the State in which the buyer is located (see § 101–45.4809) with a written notice of the award that includes the name and address of the purchaser and the description of the item sold.

12. Section 101–45.313–3 is revised as follows:

§ 101–45.313–3 Representation and covenant.

(a) *Representation.* Except as provided in § 101–45.313–7, each selling agency shall inquire of and secure a written representation from prospective purchasers as to whether they have employed or retained any company or person (other than a full-time employee working solely for the prospective purchaser) to solicit or secure the contract, and shall secure a written agreement to furnish information relating thereto as required by the sales contracting officer. The form of such representation shall be that contained in Standard Form 114, Sale of Government Property—Bid and ward (illustrated at § 101–45.4901–114).

(b) *Covenant.* Selling agencies shall include in every negotiated or advertised contract for the sale of Government-owned personal property the "covenant against contingent fees" as contained in the Standard Form 114C, General Sale Terms and Conditions (illustrated at § 101–45.4901–114C).

13. Section 101–45.315 is revised as follows:

§ 101–45.315 Equal opportunity clause in contracts.

The Equal Opportunity clause prescribed by Executive Order No. 11246 of September 24, 1965 (30 FR 12319, 12935) (as amended by Executive Order No. 11375 of October 13, 1967 (32 FR 14303)), as set forth in § 101–45.4807, shall be included in all contracts for the sale of personal property when the contract exceeds $10,000, and an appreciable amount of work by the purchaser required by or for the Government is involved. When a sale is planned and the probability exists that the foregoing conditions will be present, the Equal Opportunity clause shall be included in the contract provisions of the invitation as a special condition of sale.

Subpart 101–45.7—Submission of Bids

1. Section 101–45.701(b) is revised as follows:

§ 101–45.701 Responsiveness of bids.

(b) Telegraphic or telephonic bids shall not be considered unless otherwise provided in the invitation for bids. (See § 101–45.4901–114C, item number 3 entitled "Consideration of Bids.")

2. Section 101–45.703–1 is revised as follows:

§ 101–45.703–1 General.

Bids received by the contracting officer after the exact time set for bid opening

are late bids. (See §§ 101–45.4901–114C–1, 101–45.4901–114C–2, and 101–45.4901–114C–3 for item entitled "Consideration of late Bids, Modifications, or Withdrawals.") Late bids shall not be considered for award except as authorized in this § 101–45.703.

Subparts 101–45.9 through 101–45.47 are reserved as follows:

Subparts 101–45.9—101–45.47—[Reserved]

Subpart 101–45.48 is added to read as follows:

Subpart 101–45.48—Exhibits

§ 101–45.4800 Scope of subpart.

This Subpart 101–45.48 exhibits information referenced in the text of Part 101–45 that is not suitable for inclusion elsewhere in that part.

1. Section 101–45.4910 is redesignated as § 101–45.4801 as follows:

§ 101–45.4801 Instructions for the preparation of advance notice to the Department of Commerce [redesignated from § 101–45.4910].

2. Section 101–45.4912 is redesignated as § 101–45.4802 as follows:

§ 101–45.4802 Sample format—irrevocable letter of credit [redesignated from § 101–45.4912].

3. Section 101–45.4913 is redesignated as § 101–45.4803 as follows:

§ 101–45.4803 General instructions for preparation of irrevocable letter of credit [redesignated from § 101–45.4913].

4. Section 101–45.4914 is redesignated as § 101–45.4804 as follows:

§ 101–45.4804 Sample format—draft drawn against irrevocable letter of credit [redesignated from § 101–45.4914].

5. Section 101–45.4915 is redesignated as § 101–45.4805 as follows:

§ 101–45.4805 Sample format—transmittal letter to accompanying letter of credit [redesignated from § 101–45.4915].

6. Section 101–45.4919 is redesignated as § 101–45.4806 as follows:

§ 101–45.4806 Outline for preparation of explanatory statement relative to negotiated sales [redesignated from § 101–45.4919].

7. Section 101–45.4925 is redesignated as § 101–45.4807 as follows:

§ 101–45.4807 Equal opportunity clause [redesignated from § 101–45.4925].

8. Section 101–45.4927 is redesignated as § 101–45.4808 and is revised as follows:

§ 101–45.4808 State health agencies.

STATE HEALTH AGENCIES (FOR BEDDING AND UPHOLSTERED FURNITURE INFORMATION)

ALABAMA

Director, Division of Environmental Health, Alabama State Department of Health, State Office Building, Montgomery, AL 36104.

ALASKA

Chief, Branch of Environmental Health, Division of Public Health, Alaska Department of Health and Welfare, Pouch H, Juneau, AK 99801.

ARIZONA

Director, Division of Sanitation Environmental Health Services, Arizona State Department of Health, 4019 North 33d Avenue, Phoenix, AZ 85017.

ARKANSAS

Director, Bureau of Environmental Engineering, Arkansas State Department of Health, Little Rock, AR 72201.

CALIFORNIA

Chief, Bureau of Furniture and Bedding Inspection, Department of Professional and Vocational Standard, 1021 O Street, Room A–198, Sacramento, CA 95814.

COLORADO

Senior Sanitarian, Colorado State Department of Health, 4210 East 11th Avenue, Denver, CO 80220.

CONNECTICUT

Factory Inspection Deputy Commissioner, State Department of Labor, 200 Folly Brook Boulevard, Wethersfield, CT 06109.

DELAWARE

Director, Bureau of Environmental Health, Delaware State Board of Health, Dover, DE 19901.

DISTRICT OF COLUMBIA

Chief, Bureau of Community Hygiene, District of Columbia Department of Public Health, 801 North Capitol Street NE., Washington, DC 20001.

FLORIDA

Director, Office of Registration and Drug Administration, Florida State Board of Health, Post Office Box 210, Jacksonville, FL 32201.

GEORGIA

Director, Industrial Hygiene Service, Georgia Department of Public Health, 47 Trinity Avenue SW., Atlanta, GA 30334.

HAWAII

Executive Officer, Environmental Health Division, Hawaii State Department of Health, Post Office Box 3378, Honolulu, HI 96801.

IDAHO

Chief, Sanitation Section, Idaho Department of Health, Statehouse, Boise, ID 83707.

ILLINOIS

Chief, Sanitary Engineer, Division of Sanitary Engineering, Illinois State Department of Public Health, Springfield, IL 62706.

INDIANA

Chief, Sanitary Bedding Section, Division of Weights and Measures, Indiana State Board of Health, 1330 West Michigan Street, Indianapolis, IN 46206.

IOWA

Secretary, Iowa State Department of Agriculture, State Capitol Building, Des Moines, IA 50319.

KANSAS

Director, Food and Drug Division, Kansas State Department of Health, State Office Building, Topeka, KS 66612.

KENTUCKY

Director, Environmental Services Program, Division of Environmental Health, Kentucky Department of Health, 275 East Main Street, Frankfort, KY 40601.

LOUISIANA

Director, Bedding and Upholstered Furniture Inspection Division, Louisiana State Department of Health, Post Office Box 60630, New Orleans, LA 70160.

MAINE

Director, Division of Bedding, Upholstering, Furniture, and Stuffed Toys, Maine State Department of Labor and Industry, Augusta, ME 04330.

MARYLAND

Chief, Bedding and Upholstery Section, Consumer Protection Division, Maryland State Department of Health, 2305 North Charles Street, Baltimore, MD 21218.

MASSACHUSETTS

Director, Division of Food and Drugs, Massachusetts Department of Public Health, Statehouse, Boston, MA 02133.

MICHIGAN

Chief, Section of Environmental Health, Division of Engineering, Michigan State Department of Public Health, 3500 North Logan, Lansing, MI 48914.

MINNESOTA

Chief, Section of Hotels, Resorts, and Restaurants, Minnesota State Department of Health, 435 State Office Building, St. Paul, MN 55101.

MISSISSIPPI

Director, Division of Sanitary Engineering, Mississippi State Board of Health, Jackson, MS 39205.

MISSOURI

Director, Division of Industrial Inspection, Division of Health of Missouri, Broadway State Office Building, Jefferson City, MO 65101.

MONTANA

Director, Division of Environmental Sanitation, Montana State Department of Health, Helena, MT 59601.

NEBRASKA

Chief, Environmental Health Services, Nebraska State Department of Health, Statehouse Station, Box 94757, Lincoln, NE 68509.

NEVADA

Chief, Bureau of Environmental Health, Nevada State Department of Health and Welfare, 790 Sutro Street, Reno, NV 89502.

NEW HAMPSHIRE

No need to notify.

NEW JERSEY

Director, Division of Environmental Health, New Jersey State Department of Health, John Fitch Plaza, Post Office Box 1540, Trenton, NJ 08625.

NEW MEXICO

Director, Environmental Services Division, New Mexico State Department of Health and Social Services, Post Office Box 2348, Sante Fe, NM 87501.

NEW YORK

Director, Division of Licensing Services, New York Department of State, 270 Broadway, New York, NY 10007.

Subpart 101-45.49 is revised to read as follows:

Subpart 101-45.49—Illustrations of Forms

§ 101-45.4900 Scope of subpart.

This subpart illustrates forms prescribed or available for use in connection with subject matter covered in Part 101-45.

§ 101-45.4901 Standard forms.

(a) Standard forms illustrated in this section show their text, format, and arrangement, and provide a ready source of reference.

(b) Standard forms illustrated in this § 101-45.4901 may be obtained by submitting a requisition in FEDSTRIP MILSTRIP format to the GSA regional office providing support to the requesting activity.

§ 101-45.4901-28 Standard Form 28, Affidavit of Individual Surety.

§ 101-45.4901-97 Standard Form 97, The United States Government Certificate of Release of a Motor Vehicle.

§ 101-45.4901-97-1 Instructions for use of Standard Form 97.

§ 101-45.4901-97A Standard Form 97A, Agency Record Copy of the United States Government Certificate of Release of a Motor Vehicle.

§ 101-45.4901-114 Standard Form 114, Sale of Government Property—Bid and Award.

§ 101-45.4901-114A Standard Form 114A, Sale of Government Property—Item Bid Page—Sealed Bid.

§ 101-45.4901-114B Standard Form 114B, Sale of Government Property—Item Bid Page—Sealed Bid.

§ 101-45.4901-114C Standard Form 114C, Sale of Government Property—General Sale Terms and Conditions.

§ 101-45.4901-114C-1 Standard Form 114C-1, Sale of Government Property—Special Sealed Bid Conditions.

§ 101-45.4901-114C-2 Standard Form 114C-2, Sale of Government Property—Special Sealed Bid—Term Conditions.

§ 101-45.4901-114C-3 Standard Form 114C-3, Sale of Government Property—Special Spot Bid Conditions.

§ 101-45.4901-114C-4 Standard Form 114C-4, Sale of Government Property—Special Auction Conditions.

§ 101-45.4901-114D Standard Form 114D, Sale of Government Property—Amendment of Invitation for Bids/Modification of Contract.

§ 101-45.4901-114E Standard Form 114E, Sale of Government Property—Negotiated Sales Contract.

§ 101-45.4901-114F Standard Form 114F, Sale of Government Property—Item Bid Page—Spot Bid or Auction.

§ 101-45.4901-126 Standard Form 126, Report of Personal Property for Sale.

§ 101-45.4901-126A Standard Form 126A, Report of Personal Property for Sale (Continuation Sheet).

§ 101-45.4901-150 Standard Form 150, Deposit Bond—Individual Invitation, Sale of Government Personal Property.

§ 101-45.4901-151 Standard Form 151, Deposit Bond—Annual, Sale of Government Personal Property.

§ 101–45.4902 GSA forms.

(a) GSA forms in this section show their text, format, and arrangement and provide a ready source of reference.

(b) GSA forms in this section may be obtained initially from the General Services Administration (3FNDD), Union and Franklin Streets Annex, Building 11, Alexandria, VA 22314. Agency regional or field offices should submit future requirements to their Washington headquarters office which will forward consolidated annual requirements to the General Services Administration (BRO), Washington, D.C. 20405.

§ 101–45.4902–27 GSA Form 27, Notice of Award (Sale of Government-Owned Personal Property).

§ 101–45.4902–27A GSA Form 27A, Notice of Award—Continuation.

§ 101–45.4903 Optional forms.

Optional forms illustrated in this § 101–45.4903 show their text, format, and arrangement and provide a ready source of reference. The numbers in this subsection correspond with the Optional form numbers. Optional forms illustrated in this § 101–45.4903 may be obtained by submitting a requisition in FEDSTRIP/MILSTRIP format to the GSA regional office providing support to the requesting activity.

§ 101–45.4903–15 Optional Form 15, poster, Sale of Government Property.

§ 101–45.4903–16 Optional Form 16, Sales Slip, Sale of Government Personal Property.

§ 101–45.4903–20 Optional Form 20, Notice to Surety—Deposit Bond—Annual Sale of Government Personal Property.

PART 101–46—UTILIZATION AND DISPOSAL OF PERSONAL PROPERTY PURSUANT TO EXCHANGE/SALE AUTHORITY

The table of contents for Part 101–46 is amended to include the following new or revised entries:

Subparts 101–46.5—101–46.47—[Reserved]

Subpart 101–46.48—Exhibits

Sec.
101–46.4800 Scope of subpart.
101–46.4801 Property ineligible for exchange/sale.
101–46.4802 Exchange/sale category list.

Subpart 101–46.49—[Reserved]

Authority: Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c))

Subparts 101–46.5 through 101–46.47 are reserved as follows:

Subparts 101–46.5—101–46.47—[Reserved]

Subpart 101–46.48 is added as follows:

Subpart 101–46.48—Exhibits

§ 101–46.4800 Scope of subpart.

This Subpart 101–46.48 exhibits information referenced in the text of Part 101–46 that is not suitable for inclusion elsewhere in that part.

1. Section 101–46.4901 is redesignated as § 101–46.4801 and is revised as follows:

§ 101–46.4801 Property ineligible for exchange/sale.

Items which are found in any of the Federal supply classification groups listed below are not eligible for handling under the provisions of this Part 101–46.

FEDERAL SUPPLY CLASSIFICATION GROUP NUMBER AND IDENTIFICATION

10 Weapons.
11 Nuclear ordnance.
12 Fire control equipment.
14 Guided missiles.
15 Aircraft; and airframe structural components.
16 Aircraft components and accessories.
17 Aircraft launching, landing, and ground handling equipment.
20 Ship and marine equipment
22 Railway equipment.
31 Bearings.
32 Woodworking machinery and equipment, except lathes, milling machines, and saws, circular or band.
34 Metalworking machinery, except drill presses, lathes, milling machines, and saws, circular or band.
40 Rope, cable, chain, and fittings.
41 Refrigeration, air-conditioning, and air circulating equipment.
42 Fire fighting, rescue, and safety equipment.
44 Furnace, steam plant, and frying equipment; and nuclear reactors.
45 Plumbing, heating, and sanitation equipment.
46 Water purification and sewage treatment equipment.
47 Pipe, tubing, hose, and fittings.
48 Valves.
51 Hand tools.
53 Hardware and abrasives.
54 Prefabricated structures and scaffolding.
55 Lumber, millwork, plywood, and veneer.
56 Construction and building materials.
68 Chemicals and chemical products, except medicinal chemicals.
71 Furniture.
75 Office supplies and devices, except cards, tabulating.
83 Textiles, leather, furs, apparel and shoe findings, tents and flags.
84 Clothing, individual equipment, and insignia.
14. Machines, addressing and mailing.
15. Machines, dictating and transcribing.
16. Machines, duplicating.
17. Machines, punched card, bookkeeping, tabulating and accounting.
18. Milling machines.
19. Mixers, concrete, portable or truck mounted.
20. Pile drivers.
21. Plows, snow, motorized.
22. Road rollers, wheeled and sheepsfoot.
23. Saws, circular or band.
24. Scrapers, earth moving, self-powered.
25. Scrapers, earth moving, towed.
26. Sedans, station wagons, coupes, limousines.
27. Shovels, power.
28. Spreaders, aggregate and lime.
29. Tractors, warehouse.
30. Tractors, wheeled or crawler, with or without special attachments, up to 65 h.p.
31. Tractors, wheeled or crawler, with or without special attachments, 65 h.p. and up.
32. Trailers, general purpose, multiple axle.
33. Trailers, general purpose, single axle.
34. Trailers, tank mounted.
35. Trucks, forklift.
36. Trucks, general purpose, cargo and construction, 12,500 GVW through 28,000 GVW (including truck tractors, dump, multiple drive, etc.).
37. Trucks, general purpose and utility, up to 12,500 GVW (including suburbans, carryalls, and sedan deliveries).
38. Trucks, straddle.
39. Trucks, tank (special purpose trailer of which the tank is an integral part of the construction).
40. Trucks, warehouse, platform, electric and gasoline powered.
41. Typewriters, manual and electric.

Subpart 101–46.49 is deleted and reserved as follows:

Subpart 101–46.49 [Reserved]

NOTE.—The forms that are referenced in Parts 101–43, 44, and 45 are filed as part of the original document and do not appear in the FEDERAL REGISTER.

(Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c).)

NOTE.—The General Services Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: August 1, 1977.

JOEL W. SOLOMON,
Administrator of General Services.

[FR Doc.77–23161 Filed 8–11–77;8:45 am]

CHAPTER 105—GENERAL SERVICES ADMINISTRATION

PART 105–63—PRESERVATION AND PROTECTION OF AND ACCESS TO THE PRESIDENTIAL HISTORICAL MATERIALS OF THE NIXON ADMINISTRATION

Special Access Regulations

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This rule provides procedures for preserving and protecting the Presidential historical materials of the Nixon Administration and for providing access to these materials. The Administrator of General Services is required by law to issue these regulations.

EFFECTIVE DATE: August 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Donald P. Young, Assistant General Counsel, General Services Administration, 18th and F Streets, NW., Washington, D.C. 20405, 202–566–1460.

SUPPLEMENTARY INFORMATION: On January 14, 1975, the General Services Administration issued regulations (40 FR 2670) in compliance with the requirement of Section 103 of Title I of the Presidential Recordings and Materials Preservation Act (Public Law 93–526): "The Administrator [of General Services] shall issue at the earliest possible date such regulations as may be necessary to assure the protection of the tape recordings and other materials referred to in Section 101 [i.e., the Nixon Presidential historical materials] from loss or destruction, and to prevent access to such recordings and materials by unauthorized persons * * *." Section 102 of the Act requires further that the recordings and materials be available for certain specified purposes: For use in any judicial proceeding or otherwise subject to court subpena or other legal process; to any agency or department in the executive branch of the Federal Government for lawful Government use; to former President Richard M. Nixon or his designated agent; and to the Office of the Watergate Special Prosecution Force (WSPF). The closing of the Office of the WSPF, the lifting of applicable court orders, and the relocation of certain of the materials required revision of Part 105–63. Regulations pertaining to public access, which are required under the Act to be submitted for congressional approval, will be published at a later date.

Accordingly, the General Services Administration hereby revises Part 105–63 to read as follows:

Sec.
105–63.000 Scope of part.

Subpart 105–63.1—General Provisions

105–63.101 Purpose.
105–63.102 Application.
105–63.103 Legal custody.
105–63.104 Definitions. [Reserved]
105–63.105 Requests or demands for access.

Subpart 105–63.2—Preservation and Protection

105–63.201 Responsibility.
105–63.202 Security.
105–63.203 Archival processing.
105–63.204 Access procedures.
105–63.205 Extraordinary authority during emergencies.

Subpart 105–63.3—Access to materials by Former President Nixon, Federal Agencies, and for Use in Any Judicial Processing

105–63.301 Access by former President Nixon.
105–63.302 Access by Federal agencies.
105–63.303 Access for use in judicial proceedings.

Subpart 105–63.4—Access by the Public [Reserved]

AUTHORITY: The provisions of this Part 105–63 are issued under Sec. 205(c) of the Federal Property and Administrative Services Act of 1949, as amended, 63 Stat. 390; 40 U.S.C. 486(c); and Sec. 103 and 104 of the Presidential Recordings and Materials Preservation Act, 88 Stat. 1695; 44 U.S.C. 2107 note.

§ 105–63.000 Scope of part.

This part sets forth policies and procedures concerning the preservation and protection of and access to the tape recordings, papers, documents, memorandums, transcripts, and other objects and materials which constitute the Presidential historical materials of Richard M. Nixon, covering the period beginning January 20, 1969, and ending August 9, 1974.

Subpart 105–63.1—General Provisions

§ 105–63.101 Purpose.

This Part 105–63 implements the provisions of Title I of the Presidential Recordings and Materials Preservation Act (Public Law 93–526; 88 Stat. 1695). It prescribes policies and procedures by which the General Services Administration will preserve, protect, and provide access to the Presidential historical materials of the Nixon Administration.

§ 105–63.102 Application.

This Part 105–63 applies to all of the Presidential historical materials of the Nixon Administration in the custody of the Administrator of General Services pursuant to the provisions of Title I of the Presidential Recordings and Materials Preservation Act (Public Law 93–526; 88 Stat. 1695).

§ 105–63.103 Legal custody.

The Administrator of General Services has or will obtain exclusive legal custody and control of all Presidential historical materials of the Nixon Administration held pursuant to the provisions of Title I of the Presidential Recordings and Materials Preservation Act (Public Law 93–526; 88 Stat. 1695).

§ 105–63.104 Definitions. [Reserved]

§ 105–63.105 Requests or demands for access.

Each agency which receives a request or legal demand for access to Presidential historical materials of the Nixon Administration shall immediately forward the request or demand to the Administrator of General Services, General Services Administration (N), Washington, D.C. 20408.

Subpart 105–63.2—Preservation and Protection

§ 105–63.201 Responsibility.

The Administrator of General Services or his designated agent (hereinafter the Administrator) is responsible for the preservation and protection of the Presidential historical materials. He may arrange with other Federal agencies, acting pursuant to appropriate Federal authority, for assistance in their preservation and protection.

§ 105–63.202 Security.

The Administrator is responsible for providing adequate security for the Presidential historical materials.

§ 105–63.203 Archival processing.

When authorized by the Administrator and until the commencement of archival processing in accordance with Subpart 105–63.4, archivists may process the Presidential historical materials to the extent necessary for protecting and preserving the materials, and for providing authorized access to the materials pursuant to Subpart 105–63.3.

§ 105–63.204 Access procedures.

(a) The Administrator will receive and or prepare appropriate documentation of each access authorized under this Part 105–63.

(b) Entry to the records storage areas will be provided by the Administrator only to archival, maintenance, security, or other necessary personnel or to Mr. Nixon. Two persons, at least one of whom represents the Administrator, will be present at all times that records storage areas are occupied.

(c) The Administrator will determine that each individual having access to the Presidential historical materials has a security clearance equivalent to the highest degree of national security classification that may be applicable to any of the materials examined.

(d) The Administrator will provide former President Nixon or his designated attorney or agent (hereinafter Mr. Nixon) prior notice of, and allow him to be present during, each search necessary to comply with an authorized access under §§ 105–63.302 or 105–63.303.

(e) Only GSA archivists shall conduct searches necessary to comply with authorized accesses under §§ 105–63.302 and 105–63.303.

(f) Prior to releasing Presidential historical materials in accordance with an access authorized under §§ 105–63.302 or 105–63.303, the Administrator will give Mr. Nixon notice of the nature and identity of, and at his request allow him access to, those Presidential historical materials which the archivists have determined are covered by the subpena, or other lawful process, or request. The notice will also inform Mr. Nixon that he may file a claim with the Administrator objecting to the release of all or portions of the described materials within 5 workdays of his receiving the notice described herein. The claim should detail the alleged rights and privileges of Mr. Nixon which would be violated by the release of the materials. The Administrator will refrain from releasing any of the materials to the requester during this period, and while any claim of right or privilege is pending before him, will refrain from releasing the materials subject to the claim.

(g) The Administrator will notify Mr. Nixon in writing of the administrative determination on any claims filed in accordance with (f), above. In the event the determination is wholly or partially adverse to the claim, the Administrator will refrain from releasing the materials to the requester for an additional 5 workdays from Mr. Nixon's receipt of the determination.

(h) Whenever possible, a copy, which shall be certified upon request, instead of the original documentary Presidential historical materials shall be provided to comply with a subpena or other lawful process or request. Whenever the original documentary material is removed, a certified copy of the material shall be inserted in the proper file until the return of the original.

§ 105–63.205 Extraordinary authority during emergencies.

In the event of an emergency that threatens the physical preservation of the Presidential historical materials or their environs, the Administrator will take such steps as may be necessary, including removal of the materials to temporary locations outside the metropolitan area of the District of Columbia, to preserve and protect the materials.

Subpart 105–63.3—Access to Materials by Former President Nixon, Federal Agencies, and for Use in Any Judicial Proceeding

§ 105–63.301 Access by former President Nixon.

In accordance with the provisions of Subpart 105–63.2, former President Richard M. Nixon or his designated agent shall at all times have access to Presidential historical materials in the custody and control of the Administrator.

§ 105–63.302 Access by Federal agencies.

In accordance with the provisions of Subpart 105–63.2, any Federal agency or department in the executive branch shall have access for lawful Government use to the Presidential historical materials in the custody and control of the Administrator to the extent necessary for ongoing Government business.

§ 105–63.303 Access for use in judicial proceedings.

In accordance with the provisions of Subpart 105–63.2, and subject to any rights, defenses, or privileges which the Federal Government or any person may invoke, the Presidential historical materials in the custody and control of the Administrator will be made available for use in any judicial proceeding and are subject to subpena or other lawful process.

Subpart 105–63.4—Access by the Public [Reserved]

NOTE.—The General Services Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107

Dated: August 9, 1977.

JOEL W. SOLOMON,
Admnistrator of General Services.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[No. 36314]

PART 1051—INFORMATION REQUIRED ON RECEIPTS AND BILLS

Petition to Institute Proceeding To Amend Rule CFR 1051.1(b)

NOTICE OF RULE CHANGE

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: Modifies the existing rules governing information to be shown on freight bills by requiring the issuer to show either a remittance address or the address of its own principal place of business. This was sought by a shipper in aid of claim filing; it has the approval of the parties and is said to represent the current practice of 90 percent of the carriers. The new requirement will aid in filing claims and in the timely remittance of transportation charges.

EFFECTIVE DATE: October 11, 1977.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak, Deputy Director, or, Harvey Gobetz, Assistant Deputy Director, Section of Rates, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, (202–275–7693).

SUPPLEMENTARY INFORMATION: The Interstate Commerce Commission, in the above-entitled proceeding, has amended 49 CFR § 1051.1(b) to require that the issuer of a freight or expense bill furnish either a remittance address, generally that of a local or regional terminal, or the address of its own principal place of business, at the issuer's choice.

This action was taken as a result of a petition filed by Emmett Allred, seeking this addition to the requirements of 49 CFR § 1051.1(b). Notice of the proposed rulemaking proceeding was published in the FEDERAL REGISTER on May 11, 1976, and representations were filed by interested persons. The Commission adopted the requirement described in this notice in order to facilitate the filing of claims by shippers or consignees; the requirement is said to reflect current business practices of 90 percent of the carriers.

This regulation is issued under authority of 49 U.S.C. 301, 302, 304, 316, 317, 318, and 319, 5 U.S.C. 552, 553, and 559.

§ 1051.1 [Amended]

49 CFR 1051.1(b) was modified as follows:

By adding as the words between the words "shipment moved," and "and a record", the following: "either the address where remittance must be made or the address of the principal place of business of the issuer of the freight or expense bill, or both, at the issuer's option;".

H. G. HOMME, Jr.,
Acting Secretary.

SUBCHAPTER B—PRACTICE AND PROCEDURE

[Ex Parte No. MC 82 Sub. No. 1]

PART 1104—PROCEDURES TO BE FOLLOWED IN MOTOR CARRIER REVENUE PROCEEDINGS

Subpart B—Intercity Bus Industry

Correction

AGENCY: Interstate Commerce Commission.

ACTION: Correction.

SUMMARY: This action corrects errors and omissions in the final rules in Ex Parte No. MC–82 Sub. No. 1 as published in the FEDERAL REGISTER on Monday, June 27, 1977 at 42 FR 32541–52. That rulemaking established rules of procedure governing the type of evidence to be submitted in intercity bus motor carrier revenue proceedings. Corrections made herein refer only to the rules as published in the FEDERAL REGISTER.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak, Deputy Director, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, 202–275–7693.

SUPPLEMENTARY INFORMATION: Page two of Appendix I of the order in Ex Parte No. MC–82 Sub. No. 1 was omitted from publication in the FEDERAL REGISTER June 27, 1977 at 42 FR 32541. As a result, § 1104.20(b), as published therein, is incorrect; § 1104.21 was omitted in its entirety; and § 1104.22 was omitted in part. In addition, certain minor errors were contained in the FEDERAL REGISTER's publication of schedules contained in Appendix I. Accordingly, §§ 1104.20(b) through 1104.22 are published immediately below to correct the omission and corrections to the schedules follow immediately thereafter.

§ 1104.20 Application.

* * * * *

(b) When filing tariff schedules other than those described hereinabove, the carriers or their tariff publishing agencies shall be required to comply with such procedures as the Commission may direct in the event an investigation is instituted. Nothing stated in this part shall relieve the carriers of their burden of proof imposed under the Interstate Commerce Act.

§ 1104.21 Study carriers.

(a) For the purposes of this proceeding the "study carriers" shall consist of those Class I motor common carriers of passengers which are members of NBTA and which, during the latest calendar year available preceding the filing date of the proposed increase in fares and/or charges, derived $500,000 or more in annual operating revenues from the issue traffic, or 1 percent or more of the total annual operating revenues received by all Class I carriers from the issue traffic. Issue traffic is defined as that traffic (services) directly affected by the proposed increases in fares and/or charges.

(b) To corroborate the selection of the above study carriers, and to provide a data base for a continuing evaluation of the validity and usefulness of those carriers as a study group, respondents shall submit, as a part of their verified statement (justification), a list of all Class I motor common carriers of passengers participating in the issue traffic (services). For the above specified calendar year, the dollar amounts of total system operating revenues for each such carrier shall be arraved in descending order; and, there shall be shown the amount of annual operating revenues received by each carrier from the total traffic at issue. Also, to be shown is the percent that each such carrier's total issue traffic revenue is to its total system revenues, and the percent that each carrier's total issue traffic revenue is to the total issue traffic revenues for all Class I carriers indicated in the above list. This list of carriers and the carrier's applicable revenues shall be referred to as Schedule A, Class I Participating Carriers' Revenue Data.

§ 1104.22 Revenue data for study carriers.

(a) The study carriers, as identified above, shall submit the revenue data called for in Schedule B herein, the purpose of which is to determine the amount of increased revenues which might be expected under the proposed increase in fares and or charges on the issue traffic, and to evaluate the revenue aspects of the non-issue traffic, including that traffic subject to Interstate Commerce Commission rate regulation but not here at issue, and that traffic which is intrastate in character and under the jurisdiction of state public commissions.

* * * * *

OTHER CORRECTIONS

42 FR 32545—Schedule C, Part II

Under the "Source" column (b), Line No. 2, "Pt. L. * * *" is changed to read "Pt. I * * *"

42 FR 32547—Schedule D

Under the "Item (a)" column, Line No. 6, the word "association" is changed to read "associated" and at Line No. 9, "Pretax income (loss from continuing operations." is changed to read "Pretax income (loss) * * *"

42 FR 32548—Schedule E

Line 1 of Schedule E includes the "Source" reference "Sch. 2998, L. 47, col. (b)" which should be moved down to the next line, and the spelling of "cap8tal" should be corrected as follows

Line No.	Item (a)	Source (b)
	Sources of Working Capital	
	Working capital provided by operations:	
1	Net income (loss) before extraordinary items	Sch. 2998, L. 47, col. (b).

H. G. HOMME, Jr.,
Acting Secretary.

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of the Missisquoi National Wildlife Refuge, Vermont, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Missisquoi National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 8, 1977, through November 27, 1977.

FOR FURTHER INFORMATION CONTACT:

George O'Shea, Missisquoi National Wildlife Refuge, R.D. No. 2, Swanton, Vt. 05488, telephone No. 802–868–4781.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game, for individual wildlife refuge areas.

The public hunting of deer on the Missisquoi National Wildlife Refuge, Vermont, is permitted only on the areas delineated on maps available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Mass. 02158. Hunting shall be in accordance with all State regulations covering the hunting of deer, subject to the following special condition: During the regular season, only shotguns may be used on that part of the refuge lying east of the Missisquoi River.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

HOWARD D. WOON,
Acting Regional Director, U.S. Fish and Wildlife Service.

PART 32—HUNTING

Opening of the Montezuma National Wildlife Refuge, New York, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Montezuma National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 1, 1977, through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Gene Hocutt, Montezuma National Wildlife Refuge, R.D. I, Box 1411, Seneca Falls, N.Y. 13148; telephone No. 315–568–5987.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of migratory waterfowl on the Montezuma National Wildlife Refuge, New York, is permitted on the areas designated by signs as open to waterfowl hunting. The waterfowl hunting area known as the Tschache Pool comprises 1,340 acres and is delineated on maps available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Mass. 02158.

Hunting shall be in accordance with all State and Federal regulations covering the hunting of migratory waterfowl subject to the following special conditions:

1. Hunting is permitted on Tuesdays, Thursdays, and Saturdays.

2. Steel shot shells will be used for all waterfowl hunting. Hunters will be limited to 15 steel shots each, with shot size

no larger than No. 1 fine shot. No person shall have lead shot in his possession during the hunt.

3. Applications for hunting reservations must be received no later than two weeks before the opening date of the waterfowl season. Reservations for permits will be selected by random drawing. Hunting will allowed on the designated days from the opening of the State season to the end of the first part of a split season or until the third Saturday in November—whichever comes first. Successful applicants must appear in person at the refuge waterfowl check station prior to one hour before legal shooting time on the date reserved. Unreserved and forfeited permits will be awarded by a drawing on the morning of the hunt to hunters without reservations.

4. The first two Saturdays of the season will be reserved for the Young Waterfowler's Training Program hunt. A brochure describing this program is also available.

5. No more than two persons per permit will be allowed.

6. All hunting ends each hunting day at 12 noon local time, and all hunters must check out at the waterfowl check station no later than 1 p.m. local time.

7. Hunters who have completed the New York State Waterfowl Hunter Training Course will be given preference for reservations on Tuesdays.

8. Hunters when requested by Federal or State enforcement officers, must display for inspection all game, hunting equipment, and ammunition.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

HOWARD D. WOON,
Acting Regional Director,
U.S. Fish and Wildlife Service.

PART 32—HUNTING

Opening of the Montezuma National Wildlife Refuge, New York, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Montezuma National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 1, 1977, through February 28, 1978.

FOR FURTHER INFORMATION CONTACT:

Gene Hocutt, Montezuma National Wildlife Refuge, R.D. 1, Box 1411, Seneca Falls, N.Y. 13148; telephone No. 315-568-5987.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

The public hunting of gray squirrels, cottontail rabbits, raccoons, foxes, and unprotected mammals is permitted during regular State seasons on the Montezuma National Wildlife Refuge, New York, except on areas designated by signs as closed. Maps are available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Mass. 02158.

Hunting shall be in accordance with all State regulations governing the hunting of the above mammals.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

PART 32—HUNTING

Opening of the Moosehorn National Wildlife Refuge, Maine, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Moosehorn National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: November 7, 1977, through November 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Stanley McConvey, Moosehorn National Wildlife Refuge, P.O. Box X, Calais, Maine 04619; telephone No. 207-454-3521.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of deer on the Moosehorn National Wildlife Refuge, Maine, is permitted except on areas designated by signs as closed during the State firearms season. This open area, comprising approximately 21,000 acres, is shown on maps available at Refuge Headquarters, and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Mass. 02158.

Hunting shall be in accordance with State regulations covering the hunting of deer.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107

PART 32—HUNTING

Opening of the Parker River National Wildlife Refuge, Massachusetts, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Parker River National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 1, 1977, through January 31, 1978.

FOR FURTHER INFORMATION CONTACT:

George Gavutis, Parker River National Wildlife Refuge, Northern Blvd., Plum Island, Newburyport, Mass. 01950, telephone 617-465-5753.

SUPPLEMENTARY INFORMATION

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of waterfowl and coots on the Parker River National Wildlife Refuge, Massachusetts, is permitted only on the areas designated by signs as open to hunting. These open areas, comprising 1,900 acres, and known as the Pine Island Hunting Area (Area A), Parker River Hunting Area (Area B), Nelson's Island Hunting Area (Area C), and the Youth Hunting Area (Area D), are delineated on maps available at refuge headquarters, or from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of migratory game birds, subject to the following special conditions:

1. Hunters will be required to have taken and passed the refuge open book Waterfowl Hunters Qualification Examination prior to hunting on the refuge. These hunters must have a valid Certification Card with them while hunting on the refuge and must display it upon request.

2. The number of hunters on the Pine Island Area will be limited to 75 each day, Parker River Area to 25 each day, and the Nelson's Island Area to 50 each day. Participation will be on a first-come, first-served basis. Hunters using Area B must each bring and set out at least two (2) waterfowl decoys and hunt within 50 yards of these set decoys.

3. Hunters on all three areas are limited to 15 shotshells per day. Steel shot is required for all 12-gauge shotguns. Persons using 12-gauge shotguns may not have in their possession lead shotshells. Lead shotshells may be used in shotguns other than 12-gauge.

4. The Youth Hunting Area will be open during the regular State waterfowl season for Young Waterfowl trainees on selected days except Sundays under the provisions of this special program. Literature describing this program is available at the refuge headquarters.

5. Boat access is prohibited on Area C and required on Area A. Boats may be landed only during the open season on waterfowl and only by persons authorized to participate in refuge hunting programs. Access to Area C must be from the refuge parking lot.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

HOWARD D. WOON,
Acting Regional Director,
Fish and Wildlife Service.

PART 32—HUNTING

Opening of the Presquile National Wildlife Refuge, Virginia, to hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Presquile National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 14, 1977, through November 5, 1977.

FOR FURTHER INFORMATION CONTACT:

Harold Olsen, Presquile National Wildlife Refuge, Box 620, Hopewell, Va. 23860, telephone 804-458-7541.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of white-tailed deer on the Presquile National Wildlife Refuge is permitted on the entire refuge except within 200 yards of all buildings. Hunting shall be in accordance with all State regulations governing the hunting of white-tailed deer, subject to the following special conditions:

1. A Federal permit will be required at no charge to the applicant. Permits issued to bow hunters will be for a two consecutive day period; permits issued to gun hunters will be for one day only. Bow hunters who provide proof by September 24 of having successfully completed the National Field Archery Association Bow-hunter Education Course and the weapons qualification test described below will be automatically issued a permit. Gun hunters who provide proof of having passed a state hunters safety course by September 24 will also be automatically issued a permit. The permits remaining will be issued to hunters selected from a public drawing to be held on September 26 in the refuge office, Hopewell, Virginia. Applications must be printed or typed and contain the following information: name, address, specify gun hunt or archery hunt, up to three other names and addresses of members in party, preference dates, and whether hunter prefers a swamp or field stand. Permits are nontransferable and will be mailed to selected applicants after the drawing. Alternates will also be selected from standby hunters at the ferry landing to fill any vacant slots if permittees do not show up. Bow hunters must pass a qualification test which will consist of placing 3 out of 5 arrows in a 9 by 14 inch chest area of a standard deer size target at 25 yards. In order to be in the drawing for an archery permit, archers must submit a certification statement to the refuge office by September 24. The statement must bear the name and address of the archery range and signature of range official who actually witnessed the qualification.

2. Only white-tailed deer may be taken from one half-hour before sunrise to one half-hour after sunset with bow and arrow only on October 14, 15, 21, 22; and with shotgun on October 29 and November 5, 1977.

3. Bag limits: One deer per day, either sex.

4. All hunters must enter the refuge on the ferry at 6 a.m. e.d.t. (5 a.m. e.s.t.) except that boats will be permitted only for those hunters desiring to hunt in the swamp. All boat occupants must wear a life jacket. Only small boats will be permitted with outboard engines no larger than 10 h.p. There will be an official State checking station at the refuge headquarters. Hunters must be checked out by refuge officials before leaving the island and leave the refuge by 7 p.m. e.d.t. (6 p.m. e.s.t.)

5. All travel on the refuge will be on foot or by refuge vehicles. Boats will be permitted in the swamp creeks. Horses and dogs are prohibited.

6. Possession of firearms on the refuge during the bow and arrow only hunts is prohibited.

7. All arrows in the possession of each hunter must be marked with the stand number issued to the hunter.

8. Only buckshot is permitted during the shotgun hunts.

9. One-hundred twenty stands corresponding to the allowable number of hunters on each day of the bow hunts and 70 stands corresponding to the allowable number of hunters on each day of the gun hunts are located throughout the refuge. Each hunter will be assigned the stand corresponding to his permit number. Shotgun hunters will remain on their assigned stand throughout the day's hunt. Bow hunters will remain on their assigned stand from one half-hour before sunrise to 10 a.m. From 10 a.m. to one half-hour after sunset, they may hunt anywhere within the open area. Gun hunters must wear fluorescent orange (144 sq. inches min.) at all times; bow hunters must wear fluorescent orange when going to and from their stand, and when hunting away from their stand. Boats must be moored throughout the day. Boats leaving the creek during the day cannot return that day.

10. All hunters under 18 years of age must be accompanied by an adult.

11. Scouting will be permitted on October 7 and 8, 1977. The refuge ferry will take passengers to the island at 8 a.m. e.d.t. and return to the mainland at 10 a.m. and 12 noon.

12. Special regulations and maps are available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Mass. 02158.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

HOWARD D. WOON,
Acting Regional Director,
Fish and Wildlife Service.

PART 32—HUNTING

Opening of the Montezuma National Wildlife Refuge, New York, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Montezuma National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable nautral resource, and will provide additional recreational opportunity to the public.

DATES: November 1, 1977, through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Gene Hocutt, Montezuma National Wildlife Refuge, R.D. 1, Box 1411, Seneca Falls, N.Y. 13148. Telephone No. (315–568–5987).

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of deer on the Montezuma National Wildlife Refuge, New York, is permitted except on the areas designated by signs as closed. The open area, comprising 3,874 acres, is delineated on maps available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Mass.

Hunting shall be in accordance with all State regulations covering the hunting of deer subject to the following special conditions:

1. Archery deer hunting is permitted Monday through Friday during the firearm season selected by the State.
2. Only longbows may be used. No gun hunting will be allowed.
3. Successful hunters must register their kill at refuge headquarters.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

HOWARD D. WOON,
Acting Regional Director,
U.S. Fish and Wildlife Service.

PART 32—HUNTING

Opening of the Eastern Neck National Wildlife Refuge, Maryland, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Eastern Neck National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 22, 1977, through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Marion Ireland, Eastern Neck National Wildlife Refuge, Route 2, Box 225, Rock Hall, Md., 21661. Telephone No. (301–639–7415).

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of white-tailed deer on the Eastern Neck National Wildlife Refuge, Maryland, is permitted on all areas except county roads, parking areas, and areas designated by signs as closed to hunting. This open area, comprising 2,169 acres, is delineated on maps available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Mass. 02158. Hunting shall be in accordance with all State regulations governing the hunting of white-tailed deer, subject to the following special conditions:

(1) White-tailed deer may be taken from sunrise to sunset during the following open seasons.—Shotgun only: October 22, 26, 29 and November 2, 1977. Archery only: November 5 and 9, 1977. Muzzle-loading longarm only: November 12 and 16, 1977.

(2) Bag limits: One deer, either sex.

(3) All participants in the deer hunt must check in and out at the refuge check station before entering or leaving the refuge. All deer killed must be presented for examination at the refuge check station on the day killed.

(4) Hunters may not enter the refuge before sunrise and must check out no later than one hour after sunset.

(5) Possession of loaded firearms, including arrows notched in bows, is not permitted on county blacktop roads, in parking areas, in or on vehicles, and before shooting hours.

(6) All hunters must enter and leave by way of State Road 445 only. Entry by boat is not permitted.

(7) During all refuge hunts, hunters must furnish and wear, so as to be readily noticeable, daylight fluorescent orange caps or hats and a minimum of 144 square inches of fluorescent orange material worn on the chest and on the back above the waistline.

(8) Hunters under 18 years of age must be accompanied by a hunting, permit-holding adult.

(9) Contained fire cooking devices will be permitted within fifty (50) feet of legally parked vehicles and in the Bogle's Wharf and Ingleside Recreation Areas.

(10) All hunters must exhibit their hunting equipment, game Federal permit, Federal qualification certificate, State hunting license, and deer-turkey stamp to Federal or State officers on request.

(11) A completed proficiency certificate will be required of all hunters. Valid proficiency certificates will be honored for three (3) years. The certificate will contain identification of shooter, identification of certifying individuals and identification of bows and firearms with which the hunter is proficient. Required proficiency levels for muzzle-loading firearm and shotgun hunters are placement of three (3) consecutive shots in a twelve (12) inch bullseye at a fifty (50) and thirty (30) yard distances respectively using an off-hand firing position. Bow hunters must successfully complete part IIB of the Bow Hunter Education Course given by the National Field Archery Association requiring the placement of three (3) out of five (5) consecutive shots in a twelve (12) inch diameter circle in the chest area of a standard deer target at varying distances from ten (10) to thirty (30) yards. All firearms, ammunition, load sizes and arrows must be legal for the taking of deer in the State of Marvland and the bows and firearms used to hunt must be the same as those used to qualify.

(12) All arrows in possession of archery hunters must have the hunter's full name and address legibly and permanently affixed with indelible ink, paint or etched into the arrow shaft.

(13) Use or possession of alcoholic beverages by hunters is not permitted during the hunt.

(14) A Federal hunt permit will be required of all participants in the deer hunts. Permits will be issued in advance of the season to hunters selected by lottery. Permits will be limited to seventy-five (75) per day for gun hunts, and one hundred (100) per day for archery hunts.

(15) The permit must be returned to the refuge at check-out or, in the case of persons unable to hunt on the day selected, the permit must be returned prior to December 31, 1977. Noncompliance with this and other regulations will subject hunter to regular penalties and, in addition, will be grounds for non-selection in future hunts.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally and which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

HOWARD D. WOON,
Acting Regional Director,
U.S. Fish and Wildlife Service.

PART 32—HUNTING

Opening of the Missisquoi National Wildlife Refuge, Vermont, to Hunting of Migratory Game Birds

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Missisquoi National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 30, 1977, through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

George O'Shea, Missisquoi National Wildlife Refuge, Swanton, Vermont 05488, telephone 802–868–4781.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

The public hunting of migratory game birds on the Missisquoi National Wildlife Refuge, Vermont, is permitted only on the areas delineated on maps available at refuge headquarters, and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158. Hunting shall be in accordance with all Federal and State regulations covering the hunting of migratory game birds. On those areas open to the public hunting of migratory game birds for which a permit is not required, stake blinds may be constructed in accordance with State regulations. Blinds must be removed by May 25, 1978.

That portion of the refuge, known as the Webb Marsh, which includes Long Marsh Bay and channel, Brush Creek, and Metcalfe Island, will be reserved for young waterfowl hunters only. Hunting by youths who have completed a Federal waterfowl hunter training program is permitted on Saturdays, Sundays, and legal State holidays from the beginning of the State waterfowl hunting season through November 6, 1977. Shooting is permitted from designated blinds from legal shooting time until 11:00 a.m. local time. Youth waterfowl hunters will be limited to the use and possession of 25 shot shells each.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

HOWARD D. WOON,
Acting Regional Director,
U.S. Fish and Wildlife Service.

PART 32—HUNTING

Opening of the Great Swamp National Wildlife Refuge, New Jersey, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Great Swamp National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: December 6, 1977, through December 14, 1977.

FOR FURTHER INFORMATION CONTACT:

John L. Fillio, Great Swamp National Wildlife Refuge, R.D. 1, Box 148, Basking Ridge, New Jersey, 07920, telephone 201–647–1222.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of deer of either sex with shotguns on the Great Swamp National Refuge, New Jersey, is permitted, except on areas designated by signs as closed, during the period of December 6, 1977, to December 10, 1977, inclusive, and December 14, 1977. Hunting of deer with firearms shall be in accordance with all State and Federal regulations subject to the following special conditions:

Deer may be taken throughout the hunt between the hours of 7 a.m. E.S.T. and 5 p.m. E.S.T. Participation will be limited to the 400 hunter permittees randomly selected for the special Great Swamp hunt. Only 150 hunters will be allowed to hunt on any given day during the hunt period. Armbands and parking area permits will be issued and must be displayed as designated. Armbands and permits must be surrendered prior to departure from the refuge. Hunters must furnish and wear a minimum of 200 square inches of blaze or hunter orange. All deer taken must be checked out at the refuge check station. Vehicles are restricted to public roads and areas designated by parking permits.

A shotgun not smaller than 12 gauge will be permitted for hunting deer, and buckshot not smaller than Number 4 nor larger than Number 000 will be permitted in possession during the hunt. Hunter permittees will be required to have shotguns and loads certified prior to the hunt. Target practice or test firing is not permitted, and guns must be unloaded when in areas posted as "closed." Baiting or hunting with the aid of bait is prohibited.

Regulations, summaries, maps delineating open hunting areas, and shotgun and load certification forms and requirements are available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 1700, Newton Corner, Massachusetts 02158.

The refuge will be closed to the general public during the above hunting dates. Other than on the days of the hunt, permittee entry will be allowed only on approved Public Use Areas as designated by signs.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in 50 CFR, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

AUGUST 3, 1977.

HOWARD D. WOON,
Acting Regional Director,
Fish and Wildlife Service.

SUBCHAPTER C—INTERNATIONAL PACIFIC SALMON FISHERIES COMMISSION

PART 371—FRASER RIVER SOCKEYE AND PINK SALMON FISHERY

Fraser River Sockeye and Pink Salmon Regulations

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Amendment to emergency regulations.

SUMMARY: This document amends the current emergency regulations which implement the Sockeye and Pink Salmon Fishing Act of 1947. The amendment requires fish receivers and purchasers to permit inspe tion by enforcement officers of records and reports required by State regulation regarding catch statistics, because timely reporting is essential to fishery management.

EFFECTIVE DATE: August 10, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Donald Johnson, Northwest Regional Director, National Marine Fisheries Service, Seattle, Wash. 98109, 206-442-7575.

SUPPLEMENTARY INFORMATION: On June 17, 1977 National Oceanic and Atmospheric Administration published emergency regulations to carry out its obligation under the Sockeye and Pink Salmon Fishing Act of 1947, 16 U.S.C. §§ 776-776*f* to enforce the Convention between Canada and the United States for the protection of Fraser River Sockeye and Pink Salmon, the regulations of the International Pacific Salmon Fisheries Commission, and the Sockeye Act.

Timely and accurate catch reporting statistics are essential for effective fishery management and are required under State regulation. Compliance with these State regulations is required by NOAA's emergency regulations, 50 CFR 371.5. This emergency regulation supplements enforcement of those provisions. Because the fishing season is currently in progress and this regulation is necessary to meet the obligations of the United States under the Convention, the National Marine Fisheries Service finds for good cause that the advance notice, public procedures and delayed effectiveness provisions of 5 U.S.C. 553 are impracticable and contrary to the public interest. This regulation is effective 0001 hours, local time on August 10, 1977.

Therefore, Part 371.5 of 50 CFR is amended by the addition of subparagraph (c) which reads as follows:

§ 371.5 Reporting requirements.

* * * * *

(c) No person receiving or purchasing sockeye or pink salmon caught in U.S. Convention waters during the time the Commission exercises control over U.S. waters shall fail to permit enforcement officers to inspect records or reports required by WAC 220-69 or to inspect fish landing, holding or storage areas under the control of this person.

Issued on August 4, 1977, at Washington, D.C.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

[FR Doc.77-23274 Filed 8-11-77;8:45 am]

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

ACTION

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: One position of Staff Assistant to the Associate Director for Domestic and Anti-Poverty Operations is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: August 12, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling (202-632-4533).

Accordingly, 5 CFR 213.3359(w) is added as set out below:

§ 213.3359 ACTION.

* * * * *

(w) One Staff Assistant to the Associate Director for Domestic and Anti-Poverty Operations.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954-1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant
to the Commissioners.

[FR Doc.77-23389 Filed 8-11-77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Agriculture

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment excepts under Schedule C one position of Confidential Assistant to the Secretary because the position is confidential in nature.

EFFECTIVE DATE: August 12, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling (202-632-4533).

Accordingly, 5 CFR 213.3313(a)(5) is amended as set out below:

§ 213.3313 Department of Agriculture.

(a) Office of the Secretary. * * *

(5) Five Confidential Assistants to the Secretary.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954-1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Exective Assistant
to the Commissioners.

[FR Doc.77-23390 Filed 8-11-77;8:45 am]

PART 213—EXCEPTED SERVICE

Federal Energy Administration

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The following positions are excepted under Schedule C because they are confidential in nature: one Staff Assistant to the Assistant Administrator for Conservation, and one position of Special Assistant for Policy Analysis.

EFFECTIVE DATE: August 12, 1977.

FOR FURTHER INORMATION CONTACT:

William Bohling (202-632-4533).

Accordingly, 5 CR 213.3388 (g)(3) and (j)(4) are added as set out below:

§ 213.3388 Federal Energy Administration.

* * * * *

(g) *Office of the Assistant Administrator for Conservation.* * * *

(3) One Staff Assistant to the Assistant Administrator.

* * * * *

(j) *Office of the Assistant Administrator for Energy Resource Development.* * * *

(4) One Special Assistant for Policy Analysis.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954-1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant
to the Commissioners.

[FR Doc.77-23391 Filed 8-11-77;8:45 am]

PART 213—EXCEPTED SERVICE

Federal Energy Administration

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment changes: a headnote from Office of the Deputy Administrator (Policy Planning) to Office of the Deputy Administrator (Policy) due to an organizational redesignation; and, changes the title of an existing Schedule C position from Special Assistant, Office of the Deputy Administrator (Policy Planning) to Executive Assistant, Office of the Deputy Administrator (Policy) because the new title describes the duties of the position more appropriately

EFFECTIVE DATE: August 12, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling (202-632-4533).

Accordingly, 5 CFR 213.3388(l) is amended to read as follows:

§ 213.3388 Federal Energy Administration.

* * * * *

(l) *Office of the Deputy Administrator (Policy).*

(1) Executive Assistant.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954-1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant
to the Commissioners.

[FR Doc.77-23392 Filed 8-11-77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Health, Education, and Welfare

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment excepts from the competitive service under Schedule A, health care positions of the National Health Service Corps, Public Health Service, because examination is not practicable for these positions.

EFFECTIVE DATE: August 12, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling (202-632-4533).

Accordingly, 5 CFR 213.3116(b)(10) is added to read as follows:

§ 213.3116 Department of Health, Education, and Welfare.

* * * * *

(b) *Public Health Service.* * * *

(10) Health care positions of the National Health Service Corps for employment of any one individual not to exceed 4 years of service in health manpower shortage areas.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954-1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant
to the Commissioners.

[FR Doc.77-23354 Filed 8-11-77;8:45 am]

PART 213—EXCEPTED SERVICE

National Commission for Manpower Policy

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The position of Special Assistant to the Director, National Commission for Manpower Policy is excepted under Schedule C because the position is confidential in nature.

EFFECTIVE DATE: August 12, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling (202-632-4533).

Accordingly, 5 CFR 213.3366 is added as set out below:

§ 213.3366 National Commission for Manpower Policy.

(a) One Special Assistant to the Director.

Title 7—Agriculture

CHAPTER I—AGRICULTURAL MARKETING SERVICE (STANDARDS, INSPECTION, MARKETING PRACTICES)[1]

PART 68—REGULATIONS AND STANDARDS FOR INSPECTION AND CERTIFICATION OF CERTAIN AGRICULTURAL COMMODITIES AND PRODUCTS THEREOF

Revised U.S. Standards for Rice

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The Department is revising the U.S. Standards for Rice by (1) Providing rice inspection applicants with an optional grade designation for rice certification, (2) deleting total broken kernels as a grade-determining factor in brown rice for processing, (3) changing the limits of "other types" of rice in U.S. No. 5 and U.S. No. 6 milled rice so that it applies only to whole kernels, and (4) making editorial revisions which are intended to improve the clarity and consistency of the standards. The revisions are intended to further facilitate the marketing of rice.

EFFECTIVE DATE: August 28, 1977.

FOR FURTHER INFORMATION CONTACT:

N. Gail Jackson, Acting Director, Standardization Division, Federal Grain Inspection Service, Room 0624-S, 1400 Independence Avenue SW., Washington, D.C. 20250. Telephone 202-447-9329.

SUPPLEMENTARY INFORMATION: The Agricultural Marketing Act of 1946, as amended, provides for the issuance by the Secretary of Agriculture of standards with respect to the quality, condition, quantity, grade, and packaging of agricultural commodities. It further provides for their voluntary use by producers, merchandisers, processors, and consumers in the marketing of these commodities and payment of a fee to cover the cost of the service.

Pursuant to sections 203 and 205 of the Agricultural Marketing Act of 1946, 60 Stat. 1087 and 1090 (7 U.S.C. 1622 and 1624) a notice was published, according to the administrative procedure provisions of section 553, of Title 5, United States Code, in the FEDERAL REGISTER (42 FR 33753) on July 1, 1977, concerning a revision of the U.S. Standards for Rough Rice, Brown Rice for Processing, and Milled Rice.

[1] Including matters within the responsibility of the Federal Grain Inspection Service.

Interested persons were given 30 days to submit written comments, suggestions, or objections regarding the proposed rulemaking. More than 900 reprints of the proposed rulemaking showing changes in the standards were distributed to interested trade and Government organizations. Two letters, one representing a California rice producer cooperative and another representing four rice producer cooperatives and 27 individual rice milling companies, were received by the Hearing Clerk. Both responses supported the proposed changes. No objections have been received.

OPTIONAL CERTIFICATION PROCEDURE

Rice sales contracts generally specify the minimum quality of rice to be delivered. At times, sellers find when preparing to load rice for shipment that the supply of a particular grade of rice may be insufficient to meet the quality and quantity requirements specified in the sales contract. When this happens, the shipper may find it necessary to ship rice of a better quality.

Certain segments of the rice industry have stated that current inspection procedures do not give them the necessary flexibility to substitute rice of better quality for that specified under the sales contract. They have also stated that delivery of rice of a better quality than that specified in the sales contract is not objectionable to most buyers, and most rice sales contracts already contain the words "or better" following the agreed-upon rice grade.

The Department, in response to these concerns, is providing for an optional grade designation in the United States Standards for Rice.

The new optional certification procedure is applicable to all grade designations of rice. The applicant for inspection can obtain the optional certification procedure by requesting it on the application for inspection. The request for the optional certification must be filed prior to the beginning of inspection so the inspector knows how the lot will be certified and can immediately notify the applicant of any certification problem. If no request for either is submitted prior to the beginning of inspection, the current method of certification (option 1) shall be applicable.

Option 1 (Current method). Under the current method, rice offered for inspection is certificated as a specific quality (U.S. grade); e.g., "U.S. No. 2 Long-Grain Milled Rice," "U.S. No. 3 Long-Grain Brown Rice for Processing," etc.

For example: If the sales contract grade specification is for "U.S. No. 3 Long-Grain Milled Rice" and during the inspection of that rice lot the rice inspector finds a portion (sublot, carlot, etc.) of the lot that grades "U.S. No. 2 Long-Grain Milled Rice, the rice would be certificated as follows:

a. The U.S. No. 2 portion would be considered "distinctly different" and would be certificated separately from the remainder of the lot, i.e., "U.S. No. 2 Long-Grain Milled Rice."

b. The remainder of the lot would be certificated "U.S. No. 3 Long-Grain Milled Rice."

Option 2 (New method). Under the new method, the rice offered for inspection would be certificated as being a particular quality (U.S. grade) "or better"; e.g., "U.S. No. 3 or better Long-Grain Milled Rice". By requesting this option, the rice shipper would be allowed an unlimited opportunity for delivering a better quality rice. The applicant for inspection, rather than risk separate certification under Option 1, can request inspection and Option 2 certification. For example, if the applicant for inspection requested Option 2 on the lot with a contract grade of U.S. No. 3 Long-Grain Milled Rice and 50 percent of the lot graded U.S. No. 2 and 50 percent graded U.S. No. 3, the lot would be certificated as follows:

a. "U.S. No. 3 or better Long-Grain Milled Rice" would be shown as the grade designation on the inspection certificate.

b. No qualifying statement about the lot's uniformity would be necessary, provided that the lot meets the minimum uniform loading requirements for a "U.S. No. 3" load order grade.

BROWN RICE REVISION

Most brown rice for processing contracts specify a certain milling yield[2] which must be met. The milling yield is important to the miller, beacuse it can be used to predict how the brown rice for processing will perform in the milling process. The milling yield contains the percentages of whole kernels and the percentage of total milled rice. From the difference of the two figures, the miller can calculate the percentage of broken kernels. Therefore, to perform a test and report the percentage of total broken kernels on a brown rice for processing basis is redundant and unnecessary when the milling yield is reported and contains the percentage of broken kernels which can be expected after milling. However, in the event that the percentage of total broken kernels is needed on the basis of the brown rice for processing, the Department will show the percentage on the inspection certificate when requested by the applicant for inspection. The current limits for broken kernels removed by a 6 plate (southern production) or a 6½ sieve (western production) would remain in effect. The amount of such material in brown rice for processing provides the miller with needed information about the amount of small broken kernels in the sample.

[2] Milling yield is defined as an estimate of the quantity of whole kernels and total milled rice (whole or broken kernels combined) that are produced in the milling of brown rice for processing to a well-milled degree.

Source: Rice Inspection Handbook, HB 918-11, effective October 1976, U.S. Department of Agriculture, Federal Grain Inspection Service, Inspection Division, Rice and Commodity Branch, Washington, D.C. 20250.

"OTHER TYPES" CHANGE

In performing an inspection of rice, the inspector examines milled rice samples for the presence of "other types" of rice. "Other types" may be in the form of whole kernels and/or broken kernels. When whole kernels of a type differing from the balance of a sample are found, they function against the "other types" limit. In the case of broken kernels of "other types," a special provision is in effect which specifies that only long-grain broken kernels shall function as "other types" when found in medium- or short-grain milled rice. It further states that only medium- or short-grain broken kernels shall function as "other types" when found in long-grain milled rice. This provision has functioned in a satisfactory manner for some time, because broken kernels of different types (medium- and short-grain broken rice) but of similar size and appearance perform alike in end use. The Department now believes that broken kernels of long-grain should, because of their similar size, appearance, and end-use performance to medium- or short-grain broken kernels, be included in the special provision for milled rice grades of U.S. No. 5 or 6.

The current limits of 35 percent and 50 percent for the factor "Broken kernels (total)" will remain in effect for milled rice grades of U.S. No. 5 or 6, respectively. However, most contracts for grades U.S. No. 5 or 6 contain a maximum limit of 20 percent "Broken kernels (total)." Under the new standards, the "Broken kernels (total)" could be of any type up to the limit allowed by the grades of U.S. No. 5 or 6, or the contract requirements.

The Department believes that the change is desirable because: (1) A mixture of broken kernels of "other types," but of similar size and appearance, would not adversely affect the quality of U.S. No. 5 and 6 milled rice; (2) the combining of broken kernels of "other types" will permit more efficient utilization of storage space by millers, and (3) the change, in many instances, should reduce inspection costs by reducing the time required to perform the inspection.

Based on the information stated above, the Department is revising the milled rice standards so that the determination of "other types" in grades U.S. No. 5 and 6 milled rice be limited to whole rice kernels.

CHANGES APPLICABLE TO THE ROUGH RICE, BROWN RICE FOR PROCESSING, AND MILLED RICE STANDARDS

1. In § 68.202(h), Part (1); § 68.252(i), Part (1); and § 68.301(j), Part (1); change the wording to remove redundancy and provide clarity while retaining the same intended meaning.

2. In § 68.211(a), § 68.211(b), § 68.262(a), § 68.262(b), § 68.313(a), and § 68.313(b), renumber and add a new number (3) to allow the applicant for inspection to request use, in advance of inspection, of the Option 2 grade designation when he wants to fulfill a rice sales contract with "better" quality rice than that specified in the contract.

3. In § 68.212(a), § 68.263(a), and § 68.314(c), add words to help clarify and prevent confusion in the inspection application of the special grade "Parboiled rice."

4. Provide editorial and format changes to add clarity and consistency to help prevent misinterpretations of the standards.

CHANGES APPLICABLE TO THE ROUGH RICE STANDARDS

In § 68.202(h), Part 2 under "Note" and § 68.211(b)(6) add wording; and in § 68.211(b) insert a new (8).

When inspecting and certificating mixed rough rice, only whole and large broken kernels are analyzed. It is difficult and unnecessary to distinguish rice types in small and medium-sized broken kernels.

CHANGES APPLICABLE TO THE BROWN RICE FOR PROCESSING STANDARDS

In § 68.261, remove the grading factor "total broken kernels" from the grading chart. Since total broken kernels are included in the expression of "milling yield," the Department feels it is not necessary to make an additional total broken kernel determination, unless such a determination is specifically requested by the applicant for inspection.

CHANGES APPLICABLE TO THE MILLED RICE STANDARDS

1. Under "Terms Defined" rearrange § 68.301 "Definition" into two sections—§ 68.301 "Definition of Milled Rice" and § 68.302 "Definition of Other Terms." Renumber the sections, add a new § 68.304 concerning temporary modifications in equipment and procedures, and reword § 68.307 "Percentages." The above changes are editorial in nature and are intended to make the format of the milled rice standards consistent with those of rough rice and brown rice for processing.

2. In § 68.309 (Milled rice grading chart), § 68.310 (Second head milled rice grading chart), § 68.311 (Screenings milled rice grading chart), and § 68.312 (Brewers milled rice grading chart), change the column designated "Color and Milling Requirements" into two separate columns—one for "Color" and the other for "Milling Requirements." This change is editorial in nature and is intended to emphasize that color and milling requirements are two separate factors.

3. In § 68.301(j) *"Other Types,"* Part 2, change the wording; in § 68.309 (Milled rice grading chart) delete the present "other types" column and replace it with a two-column approach; and in § 68.301 (1), (2), (3), and (4) change the wording to limit the determination of "other types" in U.S. No. 5 and U.S. No. 6 milled rice to whole rice kernels only.

The U.S. Standards for Rough Rice, Brown Rice for Processing, and Milled Rice are hereby adopted as shown below:

U.S. STANDARDS FOR ROUGH RICE

TERMS DEFINED

Sec
68.201 Definition of rough rice.
68.202 Definition of other terms.

PRINCIPLES GOVERNING APPLICATION OF STANDARDS

U.S. STANDARDS FOR ROUGH RICE[1]

TERMS DEFINED

§ 68.201 Definition of rough rice.

Rice (*Oryza sativa L.*) which consists of 50 percent or more of paddy kernels (see § 68.202(i) of rice.

§ 68.202 Definition of other terms.

For the purposes of these standards, the following terms shall have the meanings stated below:

(a) *Broken kernels.* Kernels of rice which are less than three-fourths of whole kernels.

(b) *Chalky kernels.* Whole or large broken kernels of ric which are one-half or more chalky.

(c) *Classes.* The following four classes:

Long-Grain Rough Rice
Medium-Grain Rough Rice
Short-Grain Rough Rice
Mixed Rough Rice

Classes shall be based on the percentage of whole kernels, large broken kernels, and types of rice.

(1) "Long-grain rough rice" shall consist of rough rice which contains more than 25 percent of whole kernels and which, after milling to a well-milled degree, contains not more than 10 percent of whole or large broken kernels of medium- or short-grain rice.

(2) "Medium-grain rough rice" shall consist of rough rice which contains more than 25 percent of whole kernels and which after milling to a well-milled degree, contains not more than 10 percent of whole or large broken kernels of long-grain rice or whole kernels of short-grain rice.

(3) "Short-grain rough rice" shall consist of rough rice which contains more than 25 percent of whole kernels and which, after milling to a well-milled degree, contains not more than 10 percent of whole or large broken kernels of long-grain rice or whole kernels of medium-grain rice.

(4) "Mixed rough rice" shall consist of rough rice which contains more than 25 percent of whole kernels and which, after milling to a well-milled degree, contains more than 10 percent of "other types" as defined in paragraph (h) of this section.

[1] Compliance with the provisions of these standards does not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or other Federal laws.

(d) *Damaged kernels.* Whole or large broken kernels of rice which are distinctly discolored or damaged by water, insects, heat, or any other means, and whole or large broken kernels of parboiled rice in nonparboiled rice. "Heat-damaged kernels" (see paragraph (e) of this section) shall not function as damaged kernels.

(e) *Heat-damaged kernels.* Whole or large broken kernels of rice which are materially discolored and damaged as a result of heating, and whole or large broken kernels of parboiled rice in nonparboiled rice which are as dark as, or darker in color than, the interpretive line for heat-damaged kernels.

(f) *Milling yield.* An estimate of the quantity of whole kernels and total milled rice (whole and broken kernels combined) that are produced in the milling of rough rice to a well-milled degree.

(g) *Objectionable seeds.* Seeds other than rice, except seeds of *Echinochloa crusgalli* (commonly known as barnyard grass, watergrass, and Japanese millet).

(h) *Other types.* (1) Whole kernels of: (i) Long-grain rice in medium- or short-grain rice, (ii) medium-grain rice in long- or short-grain rice, (iii) short-grain rice in long- or medium-grain rice, and (2) Large broken kernels of long-grain rice in medium- or short-grain rice and large broken kernels of medium- or short-grain rice in long-grain rice.

NOTE.—Large broken kernels of medium-grain rice in short-grain rice and large broken kernels of short-grain rice in medium-grain rice shall not be considered other types.

(i) *Paddy kernels.* Whole or broken unhulled kernels of rice.

(j) *Red rice.* Whole or large broken kernels of rice on which there is an appreciable amount of red bran.

(k) *Seeds.* Whole or broken seeds of any plant other than rice.

(l) *Smutty kernels.* Whole or broken kernels of rice which are distinctly infected by smut.

(m) *Types of rice.* The following three types:

Long grain
Medium grain
Short grain

Types shall be based on the length-width ratio of kernels of rice that are unbroken and the width, thickness, and shape of kernels of rice that are broken as set forth in Inspection Handbook HB 918–11.[2]

(n) *Ungelatinized kernels.* Whole or large broken kernels of parboiled rice with distinct white or chalky areas due to incomplete gelatinization of the starch.

(o) *Whole and large broken kernels.* Rice (including seeds) that (1) passes over a 6 plate (for southern production), or (2) remains on top of a 6 sieve (for western production).

(p) *Whole kernels.* Unbroken kernels of rice and broken kernels of rice which are at least three-fourths of an unbroken kernel.

(q) *6 sieve.* A metal sieve 0.032-inch thick, perforated with rows of round holes 0.0938 (6/64) inch in diameter.

(r) *6 plate.* A laminated metal plate 0.142-inch thick, with a top lamina 0.051-inch thick, perforated with rows of round holes 0.0938 (6/64) inch in diameter, and a bottom lamina 0.091-inch thick, without perforations.

PRINCIPLES GOVERNING APPLICATION OF STANDARDS

§ 68.203 Basis of determination.

The determination of seeds, objectionable seeds, heat-damaged kernels, red rice and damaged kernels, chalky kernels, other types, color, and the special grade Parboiled rough rice shall be on the basis of the whole and large broken kernels of milled rice that are produced in the milling of rough rice to a well-milled degree. When determining class, the percentage of (a) whole kernels of rough rice shall be determined on the basis of the original sample, and (b) types of rice shall be determined on the basis of the whole and large broken kernels of milled rice that are produced in the milling of rough rice to a well-milled degree. Smutty kernels shall be determined on the basis of the rough rice after it has been cleaned and shelled as set forth in Inspection Handbook HB 918–11,[2] or by any method that is approved by the Administrator as giving equivalent results.[3] All other determinations shall be on the basis of the original sample. Mechanical sizing of kernels shall be adjusted by handpicking as set forth in Inspection Handbook HB 918–11,[2] or by any method that is approved by the Administrator as giving equivalent results.[3]

§ 68.204 Temporary modifications in equipment and procedures.

The equipment and procedures referred to in the rough rice standards are applicable to rice produced and harvested under normal environmental conditions. Abnormal environmental conditions during the production and harvest of rice may require minor temporary modifications in the equipment or procedures to obtain results expected under normal conditions. When these adjustments are necessary, Inspection Division Field Offices, official inspection agencies, and interested parties in the rice industry will be notified promptly in writing of the modification. These modifications shall not include changes in interpretations of identity, class, quality, or condition.

[2] The following publications are referenced in these standards. Copies will be made available upon request to the Inspection Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue SW., Washington, D.C. 20250.

(a) Equipment Handbook, effective September 25, 1968, as amended, U.S. Department of Agriculture, Federal Grain Inspection Service.

(b) Inspection Handbook HB 918–11, effective October 1976, U.S. Department of Agriculture, Federal Grain Inspection Service.

[3] Requests for information concerning approved devices and procedures, criteria for approved devices, and request for approval of devices should be directed to the Standardization Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue SW., Washington, D.C. 20250.

§ 68.205 Interpretive line samples.

Interpretive line samples showing the official scoring line for factors that are determined by visual examinations shall be maintained by the Standardization Division, Federal Grain Inspection Service, U.S. Department of Agriculture, and shall be available for reference in all inspection offices that inspect and grade rice.

§ 68.206 Milling requirements.

In determining milling yield (see § 68.202(f)) in rough rice, the degree of milling shall be equal to, or better than, that of the interpretive line sample for "well-milled" rice.

§ 68.207 Milling yield determination.

Milling yield shall be determined by the use of an approved device in accordance with procedures prescribed in Inspection Handbook HB 918–11, and the Equipment Handbook.[2] For the purpose of this paragraph, "approved device" shall include the McGill Miller No. 3 and any other equipment that is approved by the Administrator as giving equivalent results.[3]

NOTE.—Milling yield shall not be determined when the moisture content of the rough rice exceeds 18.0 percent

§ 68.208 Moisture.

Water content in rough rice as determined by an approved device in accordance with procedures prescribed in the Inspection Handbook HB 918–11,[2] for the purpose of this paragraph, "approved device" shall include the Motomco Moisture Meter and any other equipment that is approved by the Administrator as giving equivalent results.[3]

§ 68.209 Percentages.

Percentages shall be determined on the basis of weight and shall be rounded off as follows:

(a) When the figure to be rounded is followed by a figure greater than 5, round to the next higher figure; e.g., 0.46, report as 0.5.

(b) When the figure to be rounded is followed by a figure less than 5, round to the next lowest figure; e.g., 0.54, report as 0.5.

(c) When the figure to be rounded is followed by the figure 5, round to the nearest even figure; e.g., 0.45, report as 0.4; 0.55, report as 0.6.

All percentages, except for milling yield, shall be stated in whole and tenth percent to the nearest tenth percent. Milling yield shall be stated to the nearest whole percent.

GRADES, GRADE REQUIREMENTS, AND GRADE DESIGNATIONS

§68.210 Grades and grade requirements for the classes of rough rice. (See also §68.212.)

Grade	Maximum limits of ___						
	Seeds and heat-damaged kernels		Red rice and damaged kernels (singly or combined)	Chalky kernels 1/		Other types 2/	Color requirements 1/
	Total (singly or combined)	Heat-damaged kernels and objectionable seeds (singly or combined)		In long grain rice	In medium or short grain rice		
	Number in 500 grams	Number in 500 grams	Percent	Percent	Percent	Percent	
U.S. No. 1	4	3	0.5	1.0	2.0	1.0	Shall be white or creamy.
U.S. No. 2	7	5	1.5	2.0	4.0	2.0	May be slightly gray.
U.S. No. 3	10	8	2.5	4.0	6.0	3.0	May be light gray.
U.S. No. 4	27	22	4.0	6.0	8.0	5.0	May be gray or slightly rosy.
U.S. No. 5	37	32	6.0	10.0	10.0	10.0	May be dark gray or rosy.
U.S. No. 6	75	75	15.0 3/	15.0	15.0	10.0	May be dark gray or rosy.
U.S. Sample grade	U.S. Sample grade shall be rough rice which: (a) does not meet the requirements for any of the grades from U.S. No. 1 to U.S. No. 6 inclusive, (b) contains more than 14.0 percent of moisture, (c) is musty, or sour, or heating, (d) has any commercially objectionable foreign odor, or (e) is otherwise of distinctly low quality.						

1/ For the special grade Parboiled rough rice see § 68.212(a)
2/ These limits do not apply to the class Mixed Rough Rice
3/ Rice in grade U.S. No. 6 shall contain not more than 6.0 percent of damaged kernels

§ 68.211 Grade designation.

(a) The grade designation for all classes of rough rice, except Mixed Rough Rice, shall include in the following order: (1) The letters "U.S."; (2) the number of the grade or the words "Sample grade," as warranted; (3) the words "or better" when applicable and requested by the applicant prior to inspection; (4) the class; (5) each applicable special grade (see § 68.213); and (6) a statement of the milling yield.

(b) The grade designation for the class Mixed Rough Rice shall include, in the following order: (1) The letters "U.S."; (2) the number of the grade or the words "Sample grade," as warranted; (3) the words "or better," when applicable and requested by the applicant prior to inspection, (4) the class; (5) each applicable special grade (see § 68.213); (6) the percentage of whole kernels of each type in the order of predominance; (7) the percentage of large broken kernels of each type in the order of predominance; (8) the percent of material removed by the No. 6 sieve or the No. 6 sizing plate; (9) when applicable, the percentage of seeds; and (10) a statement of the milling yield.

NOTE.—Large broken kernels other than long-grain, in Mixed Rough Rice, shall be certificated as "medium or short grain."

SPECIAL GRADES, SPECIAL GRADE REQUIREMENTS, AND SPECIAL GRADE DESIGNATIONS

§ 68.212 Special grades and requirements.

A special grade, when applicable, is supplemental to the grade assigned under § 68.210. Such special grades for rough rice are established and determined as follows:

(a) *Parboiled rough rice.* Parboiled rough rice shall be rough rice in which the starch has been gelatinized by soaking, steaming, and drying. Grades U.S. No. 1 to U.S. No. 6, inclusive, shall contain not more than 10.0 percent of ungelatinized kernels. Grades U.S. No. 1 and U.S. No. 2 shall contain not more than 0.1 percent, grades U.S. No. 3 and U.S. No. 4 not more than 0.2 percent, and grades U.S. No. 5 and U.S. No. 6 not more than 0.5 percent of nonparboiled rice. If the rice is: (1) Not distinctly colored by the parboiling process, it shall be considered "Parboiled Light"; (2) distinctly but not materially colored by the parboiling process, it shall be considered "Parboiled"; (3) materially colored by the parboiling process, it shall be considered "Parboiled Dark." The color levels for "Parboiled Light," "Parboiled," and "Parboiled Dark" rice shall be in accordance with the interpretive line samples for parboiled rice.

NOTE.—The maximum limits for "Chalky kernels," "Heat-damaged kernels," "Kernels damaged by heat," and the "Color requirements" shown in § 68.210 are not applicable to the special grade "Parboiled rough rice."

(b) *Smutty rough rice.* Smutty rough rice shall be rough rice which contains more than 3.0 percent of smutty kernels.

(c) *Weevily rough rice.* Weevily rough rice shall be rough rice which is infested with life weevils or other insects injurious to stored rice.

§ 68.213 Special grade designation.

The grade designation for parboiled, smutty, or weevily rough rice shall include, following the class, the word(s) "Parboiled Light," "Parbolied," "Parwarranted, and all other information boiled Dark," "Smutty," or "Weevily," as warranted, and all other information prescribed in § 68.211.

U.S. STANDARDS FOR BROWN RICE FOR PROCESSING[1]

TERMS DEFINED

§ 68.251 Definition of brown rice for processing.

Rice (*Oryza sativa L.*) which consists of more than 50.0 percent of kernels of brown rice, and which is intended for processing to milled rice.

§ 68.252 Definition of other terms.

For the purposes of these standards, the following terms shall have the meanings stated below:

(a) *Broken kernels.* Kernels of rice which are less than three-fourths of whole kernels.

(b) *Brown rice.* Whole or broken kernels of rice from which the hulls have been removed.

(c) *Chalky kernels.* Whole or broken kernels of rice which are one-half or more chalky.

(d) *Classes.* There are four classes of brown rice for processing.

Long-Grain Brown Rice for Processing
Medium-Grain Brown Rice for Processing
Short-Grain Brown Rice for Processing
Mixed Brown Rice for Processing

Classes shall be based on the percentage of whole kernels, broken kernels, and types of rice.

(1) "Long-grain brown rice for processing" shall consist of brown rice for processing which contains more than 25.0 percent of whole kernels of brown rice and not more than 10.0 percent of whole or broken kernels of medium- or short-grain rice.

(2) "Medium-grain brown rice for processing" shall consist of brown rice for processing which contains more than 25.0 percent of whole kernels of brown rice and not more than 10.0 percent of whole or broken kernels of long-grain rice or whole kernels of short-grain rice.

(3) "Short-grain brown rice for processing" shall consist of brown rice for processing which contains more than 25.0 percent of whole kernels of brown rice and not more than 10.0 percent of whole or broken kernels of long-grain orice or whole kernels of medium-grain rice.

(4) "Mixed brown rice for processing" shall be brown rice for processing which contains more than 25.0 percent of whole kernels of brown rice and more than 10.0 percent of "other types" as defined in paragraph (i) of this section.

(e) *Damaged kernels.* Whole or broken kernels of rice which are distinctly discolored or damaged by water, insects, heat, or any other means (including parboiled kernels in nonparboiled rice and smutty kernels). "Heat-damaged kernels" (see paragraph (f) of this section) shall not function as damaged kernels.

(f) *Heat-damaged kernels.* Whole or broken kernels of rice which are materially discolored and damaged as a result of heating and parboiled kernels in nonparboiled rice which are as dark as, or darker in color than, the interpretive line for heat-damaged kernels.

(g) *Milling yield.* An estimate of the quantity of whole kernels and total milled rice (whole and broken kernels combined) that is produced in the milling of brown rice for processing to a well-milled degree.

(h) *Objectionable seeds.* Whole or broken seeds other than rice, except seeds of *Echinochloa crusgalli* (commonly known as barnyard grass, watergrass, and Japanese millet).

(i) *Other types.* (1) Whole kernels of: (i) Long-grain rice in medium- or short-grain rice, (ii) medium-grain rice in long- or short-grain rice, (iii) short-grain rice in long- or medium-grain rice, and (2) broken kernels of long-grain rice in medium- or short-grain rice and broken kernels of medium- or short-grain rice in long-grain rice.

NOTE.—Broken kernels of medium-grain rice in short-grain rice and broken kernels of short-grain rice in medium-grain rice shall not be considered other types.

(j) *Paddy kernels.* Whole or broken unhulled kernels of rice.

(k) *Red rice.* Whole or broken kernels of rice on which the bran is distinctly red in color.

(l) *Related material.* All by-products of a paddy kernel, such as the outer glumes, lemma, palea, awn, embryo, and bran layers.

(m) *Seeds.* Whole or broken seeds of any plant other than rice.

(n) *Smutty kernels.* Whole or broken kernels of rice which are distinctly infected by smut.

(o) *Types of rice.* There are three types of brown rice for processing.

Long grain
Medium grain
Short grain

Types shall be based on the length/width ratio of kernels of rice that are unbroken and the width, thickness, and shape of kernels of rice that are broken as set forth in Inspection Handbook HB 918–11.[2]

[1] Compliance with the provisions of these standards does not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or other Federal laws.

[2] The following publications are referenced in these standards. Copies will be made available upon request to the Inspection Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue SW., Washington, D.C. 20250.

(a) Equipment Handbook, effective September 25, 1968, as amended. U.S. Department of Agriculture, Federal Grain Inspection Service.

(b) Inspection Handbook HB 918–11, effective October 1976, as amended, U.S. Department of Agriculture, Federal Grain Inspection Service.

(p) *Ungelatinized kernels.* Whole or broken kernels of parboiled rice with distinct white or chalky areas due to incomplete gelatinization of the starch.

(q) *Unrelated material.* All matter other than rice, related material, and seeds.

(r) *Well-milled kernels.* Whole or broken kernels of rice from which the hulls and practically all of the embryos and the bran layers have been removed.

(s) *Whole kernels.* Unbroken kernels of rice and broken kernels of rice which are at least three-fourths of an unbroken kernel.

(t) *6 plate.* A laminated metal plate 0.142-inch thick, with a top lamina 0.051-inch thick, perforated with rows of round holes 0.0938 ($^{6}/_{64}$) inch in diameter, and a bottom lamina 0.091-inch thick, without perforations.

(u) *6½ sieve.* A metal sieve 0.032-inch thick, perforated with rows of round holes 0.1016 ($6^{1}/_{2}/64$) inch in diameter.

PRINCIPLES GOVERNING APPLICATION OF STANDARDS

§ 68.253 Basis of determination.

The determination of kernels damaged by heat, heat-damaged kernels, parboiled kernels in nonparboiled rice, and the special grade Parboiled brown rice for processing shall be on the basis of the brown rice for processing after it has been milled to a well-milled degree. All other determinations shall be on the basis of the original sample. Mechanical sizing of kernels shall be adjusted by handpicking as set forth in Inspection Handbook HB 918–11[2] or by any method which gives equivalent results.

§ 68.254 Temporary modifications in equipment and procedures.

The equipment and procedures referred to in the brown rice for processing standards are applicable to rice produced and harvested under normal environmental conditions. Abnormal environmental conditions during the production and harvest of rice may require minor temporary modifications in the equipment or procedures to obtain results expected under normal conditions. When these adjustments are necessary, Inspection Division Field Offices, official inspection agencies, and interested parties in the rice industry will be notified promptly in writing of the modification. These modifications shall not include changes in interpretations of identity, class, quality, or condition.

§ 68.255 Broken kernels determination.

Broken kernels shall be determined by the use of equipment and procedures set forth in Inspection Handbook HB 918–11[2] or by any method which gives equivalent results.

§ 68.256 Interpretive line samples.

Interpretive line samples showing the official scoring line for factors that are determined by visual observation shall be maintained by the Standardization Division, Federal Grain Inspection Service, U.S. Department of Agriculture, and shall be available for reference in all inspection offices that inspect and grade rice.

§ 68.257 Milling requirements.

In determining milling yield (see § 68.252(g)) in brown rice for processing, the degree of milling shall be equal to, or better than, that of the interpretive line sample for "well-milled" rice.

§ 68.258 Milling yield determination.

Milling yield shall be determined by the use of an approved device in accordance with procedures prescribed in Inspection Handbook HB 918–11[2] and the Equipment Handbook.[2] For the purpose of this paragraph, "approved device" shall include the McGill Miller No. 3 and any other equipment that is approved by the Administrator as giving equivalent results.[3]

NOTE.—Milling yield shall not be determined when the moisture content of the brown rice for processing exceeds 18.0 percent.

§ 68.259 Moisture.

Water content in brown rice for processing as determined by an approved device in accordance with procedures prescribed in the Inspection Handbook HB 918–11.[2] For the purpose of this paragraph, "approved device" shall include the Motomco Moisture Meter and any other equipment that is approved by the Administrator as giving equivalent results.[3]

§ 68.260 Percentages.

Percentages shall be determined on the basis of weight and shall be rounded off as follows:

(a) When the figure to be rounded is followed by a figure greater than 5, round to the next higher figure; e.g., 0.46, report as 0.5.

(b) When the figure to be rounded is followed by a figure less than 5, round to the next lowest figure; e.g., 0.54, report as 0.5.

(c) When the figure to be rounded is followed by the figure 5, round to the nearest even figure; e.g., 0.45, report as 0.4; 0.55, report as 0.6.

All percentages, except for milling yield, shall be stated in whole and tenth percent to the nearest tenth percent. Milling yield shall be stated to the nearest whole percent.

[3] Requests for information concerning approved devices and procedures, criteria for approved devices, and requests for approval of devices should be directed to the Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue SW., Washington, D.C. 20250.

GRADES, GRADE REQUIREMENTS, AND GRADE DESIGNATIONS

§ 68.261 Grade and grade requirements for the classes of brown rice for processing. (See also § 68.263.)

Grade	Maximum limits of —									
	Paddy Kernels		Seeds and heat-damaged kernels			Red rice and damaged kernels (singly or combined)	Chalky Kernels 1/	Broken Kernels Removed by a 6 plate or a 6½ sieve 2/	Other Types 3/	Well-Milled Kernels
			Total (singly or combined)	Heat-damaged kernels	Objectionable seeds					
	Percent	Number in 500 grams	Number in 500 grams	Number in 500 grams	Number in 500 grams	Percent	Percent	Percent	Percent	Percent
U.S. No. 1	---	20	10	1	2	1.0	2.0	1.0	1.0	1.0
U.S. No. 2	2.0	—	40	2	10	2.0	4.0	2.0	2.0	3.0
U.S. No. 3	2.0	—	70	4	20	4.0	6.0	3.0	5.0	10.0
U.S. No. 4	2.0	--	100	8	35	8.0	8.0	4.0	10.0	10.0
U.S. No. 5	2.0	--	150	15	50	15.0	15.0	6.0	10.0	10.0
U.S. Sample grade	U.S. Sample grade shall be brown rice for processing which (a) does not meet the requirements for any of the grades from U.S. No. 1 to U.S. No. 5, inclusive; (b) contains more than 14.5 percent of moisture; (c) is musty, or sour, or heating; (d) has any commercially objectionable foreign odor; (e) contains more than 0.2 percent of related material or more than 0.1 percent of unrelated material; (f) contains live weevils or other live insects; or (g) is otherwise of distinctly low quality.									

1/ For the special grade Parboiled brown rice for processing, see § 68.263(a).
2/ Plates should be used for southern production rice and sieves should be used for western production rice, but any device or method which gives equivalent results may be used.
3/ These limits do not apply to the class Mixed Brown Rice for Processing.

§ 68.262 Grade designation.

(a) The grade designation for all classes of brown rice for processing, except Mixed Brown Rice for Processing, shall include in the following order: (1) The letters "U.S."; (2) the number of the grade or the words "Sample grade," as warranted; (3) the words "or better," when applicable and requested by the applicant prior to inspection; (4) the class; and (5) each applicable special grade (see § 68.264).

(b) The grade designation for the class Mixed Brown Rice for Processing shall include in the following order: (1) The letters "U.S."; (2) the number of the grade or the words "Sample grade," as warranted; (3) the words "or better," when applicable and requested by the applicant prior to inspection; (4) the class; (5) each applicable special grade (see § 68.264); (6) the percentage of whole kernels of each type in the order of predominance and when applicable; (7) the percentage of broken kernels of each type in the order of predominance; and (8) the percentage of seeds, related material, and unrelated material.

Note.—Broken kernels other than long grain, in Mixed Brown Rice for Processing, shall be certificated as "medium or short grain."

SPECIAL GRADES, SPECIAL GRADE REQUIREMENTS, AND SPECIAL GRADE DESIGNATIONS

§ 68.263 Special grades and special grade requirements.

A special grade, when applicable, is supplemental to the grade assigned under § 68.262. Such special grades for brown rice for processing are established and determined as follows:

(a) *Parboiled brown rice for processing.* Parboiled brown rice for processing shall be rice in which the starch has been gelatinized by soaking, steaming, and drying. Grades U.S. Nos. 1 to 5, inclusive, shall contain not more than 10.0 percent of ungelatinized kernels. Grades U.S. No. 1 and U.S. No. 2 shall contain not more than 0.1 percent, grades U.S. No. 3 and U.S. No. 4 not more than 0.2 percent, and grade U.S. No. 5 not more than 0.5 percent of nonparboiled rice.

Note.—The maximum limits for "chalky kernels," "Heat-damaged kernels," and "Kernels damaged by heat" shown in § 68.261 are not applicable to the special grade "Parboiled brown rice for processing."

(b) *Smutty brown rice for processing.* Smutty brown rice for processing shall be rice which contains more than 3.0 percent of smutty kernels.

§ 68.264 Special grade designation.

The grade designation for parboiled or smutty brown rice for processing shall include, following the class, the word(s) "Parboiled" or "Smutty," as warranted, and all other information prescribed in § 68.262.

U.S. STANDARDS FOR MILLED RICE [1]

TERMS DEFINED

§ 68.301 Definition of milled rice.

Whole or broken kernels of rice (*Oryza sativa L.*) from which the hulls and at least the outer bran layers and a part of the germs have been removed and which contain not more than 10.0 percent of seeds, paddy kernels, or foreign material, either singly or combined.

§ 68.302 Definition of other terms.

For the purposes of these standards, the following terms shall have the meanings stated below:

(a) *Broken kernels.* Kernels of rice which are less than three-fourths of whole kernels.

[1] Compliance with the provisions of these standards does not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or other Federal laws.

(b) *Brown rice.* Whole or broken kernels of rice from which the hulls have been removed.

(c) *Chalky kernels.* Whole or broken kernels of rice which are one-half or more chalky.

(d) *Classes.* There are seven classes of milled rice. The following four classes shall be based on the percentage of whole kernels, broken kernels, and types of rice:

Long-Grain Milled Rice
Medium-Grain Milled Rice
Short-Grain Milled Rice
Mixed Milled Rice

The following three classes shall be based on the percentage of whole kernels and of broken kernels of different size:

Second-Head Milled Rice
Screenings Milled Rice
Brewers Milled Rice

(1) "Long-grain milled rice" shall consist of milled rice which contains more than 25.0 percent of whole kernels of milled rice and in U.S. Nos. 1 through 4 not more than 10.0 percent of whole or broken kernels of medium- or short-grain rice. U.S. No. 5 and U.S. No. 6 long-grain milled rice shall contain not more than 10.0 percent of whole kernels of medium- or short-grain milled rice (broken kernels do not apply).

(2) "Medium-grain milled rice" shall consist of milled rice which contains more than 25.0 percent of whole kernels of milled rice and in U.S. Nos. 1 through 4 not more than 10.0 percent of whole or broken kernels of long-grain rice or whole kernels of short-grain rice. U.S. No. 5 and U.S. No. 6 medium-grain milled rice shall contain not more than 10.0 percent of whole kernels of long- or short-grain milled rice (broken kernels do not apply).

(3) "Short-grain milled rice" shall consist of milled rice which contains more than 25.0 percent of whole kernels of milled rice and in U.S. Nos. 1 through 4 not more than 10.0 percent of whole or broken kernels of long-grain rice or whole kernels of medium-grain rice. U.S. No. 5 and U.S. No. 6 short-grain milled rice shall contain not more than 10.0 percent of whole kernels of long- or medium-grain milled rice (broken kernels do not apply).

(4) "Mixed milled rice" shall consist of milled rice which contains more than 25.0 percent of whole kernels of milled rice and more than 10.0 percent of "other types" as defined in paragraph (i) of this section. U.S. No. 5 and U.S. No. 6 mixed milled rice shall contain more than 10.0 percent of whole kernels of "other types" (broken kernels do not apply).

(5) "Second-head milled rice" shall consist of milled rice which, when determined in accordance with §§ 68.303 and 68.304, contains:

(i) Not more than (*a*) 25.0 percent of whole kernels, (*b*) 7.0 percent of broken kernels removed by a 6 plate, (*c*) 0.4 percent of broken kernels removed by a 5 plate, and (*d*) 0.05 percent of broken kernels passing through a 4 sieve (southern production); or

(ii) Not more than (*a*) 25.0 percent of whole kernels, (*b*) 50.0 percent of broken kernels passing through a $6\frac{1}{2}$ sieve, and (*c*) 10.0 percent of broken kernels passing through a 6 sieve (western production).

(6) "Screenings milled rice" shall consist of milled rice which, when determined in accordance with §§ 68.303 and 68.304, contains:

(i) Not more than (*a*) 25.0 percent of whole kernels, (*b*) 10.0 percent of broken kernels removed by a 5 plate, and (*c*) 0.2 percent of broken kernels passing through a 4 sieve (southern production); or

(ii) Not more than (*a*) 25.0 percent of whole kernels, (*b*) 15.0 percent of broken kernels passing through a $5\frac{1}{2}$ sieve; and more than (*c*) 50.0 percent of broken kernels passing through a $6\frac{1}{2}$ sieve; and (*d*) 10.0 percent of broken kernels passing through a 6 sieve (western production).

(7) "Brewers milled rice" shall consist of milled rice which, when determined in accordance with §§ 68.303 and 68.304, contains not more than 25.0 percent of whole kernels and which does not meet the kernel-size requirements for the class Second Head Milled Rice or Screenings Milled Rice.

(e) *Damaged kernels.* Whole or broken kernels of rice which are distinctly discolored or damaged by water, insects, heat, or any other means, and parboiled kernels in nonparboiled rice. "Heat-damaged kernels" [see paragraph (g) of this section] shall not function as damaged kernels.

(f) *Foreign material.* All matter other than rice and seeds. Hulls, germs, and bran which have separated from the kernels of rice shall be considered foreign material.

(g) *Heat-damaged kernels.* Whole or broken kernels of rice which are materially discolored and damaged as a result of heating and parboiled kernels in nonparboiled rice which are as dark as, or darker in color than, the interpretive line for heat-damaged kernels.

(h) *Objectionable seeds* Seeds other than rice, except seeds of *Echinochloa crusgalli* (commonly known as barnyard grass, watergrass, and Japanese millet).

(i) *Other types.* (1) Whole kernels of: (i) Long-grain rice in medium- or short-grain rice, (ii) Medium-grain rice in long- or short-grain rice, (iii) Short-grain rice in long- or medium-grain rice, and (2) broken kernels of long-grain rice in medium- or short-grain rice and broken kernels of medium- or short-grain rice in long-grain rice, except in U.S. No. 5 and U.S. No. 6 milled rice. In U.S. No 5 and U.S. No. 6 milled rice, only whole kernels will apply.

Note.—Broken kernels of medium-grain rice in short-grain rice and broken kernels of short-grain rice in medium-grain rice shall not be considered other types.

(j) *Paddy kernels.* Whole or broken unhulled kernels of rice and whole or broken kernels of brown rice.

(k) *Red rice.* Whole or broken kernels of rice on which there is an appreciable amount of red bran.

(l) *Seeds.* Whole or broken seeds of any plant other than rice.

(m) *Types of rice.* There are three types of milled rice as follows:

Long grain
Medium grain
Short grain

Types shall be based on the length-width ratio of kernels of rice that are unbroken and the width, thickness, and shape of kernels that are broken, as set forth in the Inspection Handbook HB 918–11.[2]

(n) *Ungelatinized kernels.* Whole or broken kernels of parboiled rice with distinct white or chalky areas due to incomplete gelatinization of the starch.

(o) *Well-milled kernels.* Whole or broken kernels of rice from which the hulls and practically all of the germs and the bran layers have been removed.

Note.—This factor is determined on an individual kernel basis and applies to the special grade Undermilled milled rice only.

(p) *Whole kernels.* Unbroken kernels of rice and broken kernels of rice which are at least three-fourths of an unbroken kernel.

(q) *5 plate.* A laminated metal plate 0.142-inch thick, with a top lamina, 0.051-inch thick, perforated with rows of round holes 0.0781 ($\frac{5}{64}$) inch in diameter, $\frac{35}{64}$ inch from center to center, with each row staggered in relation to the adjacent rows, and a bottom lamina 0.091-inch thick, without perforations.

(r) *6 plate.* A laminated metal plate 0.142-inch thick, with a top lamina 0.051-inch thick, perforated with rows of round holes 0.0938 ($\frac{3}{32}$) inch in diameter, $\frac{5}{32}$ inch from center to center, with each row staggered in relation to the adjacent rows, and a bottom lamina 0.091-inch thick, without perforations.

[2] The following publications are referenced in these standards. Copies will be made available upon request to the Inspection Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Washington, D.C. 20250.

(a) Equipment Handbook, effective September 25, 1968, as amended, U.S. Department of Agriculture, Federal Grain Inspection Service.

(b) Inspection Handbook HB 918–11, effective October 1976, U.S. Department of Agriculture, Federal Grain Inspection Service.

(s) *2½ sieve.* A metal sieve 0.032-inch thick, perforated with rows of round holes 0.0391 (2½/64) inch in diameter, 0.075-inch from center to center, with each row staggered in relation to the adjacent rows.

(t) *4 sieve.* A metal sieve 0.032-inch thick, perforated with rows of round holes 0.0625 (4/64) inch in diameter, ⅛ inch from center to center, with each row staggered in relation to the adjacent rows.

(u) *5 sieve.* A metal sieve 0.032-inch thick, perforated with rows of round holes 0.0781 (5/64) inch in diameter, 5/32 inch from center to center, with each row staggered in relation to the adjacent rows.

(v) *5½ sieve.* A metal sieve 0.032-inch thick, perforated with rows of round holes 0.0859 (5½/64) inch in diameter, 11/64 inch from center to center, with each row staggered in relation to the adjacent rows.

(w) *6 sieve.* A metal sieve 0.032-inch thick, perforated with rows of round holes 0.0938 (6/64) inch in diameter, 3/32 inch from center to center, with each row staggered in relation to the adjacent rows.

(x) *6½ sieve.* A metal sieve 0.032-inch thick, perforated with rows of round holes 0.1016 (6½/64) inch in diameter, 13/64 inch from center to center, with each row staggered in relation to the adjacent rows.

(y) *30 sieve.* A woven wire cloth sieve having 0.0234-inch openings, with a wire diameter of 0.0153 inch, and meeting the specifications of American Society for Testing and Materials Designation E–11–61, as set forth in the Equipment Handbook.[2]

PRINCIPLES GOVERNING APPLICATION OF STANDARDS

§ 68.303 Basis of determination.

All determinations shall be on the basis of the original sample. Mechanical sizing of kernels shall be adjusted by hand-picking, as set forth in the Inspection Handbook HB 918–11,[2] or by any method which gives equivalent results.

§ 68.304 Temporary modifications in equipment and procedures.

The equipment and procedures referred to in the milled rice standards are applicable to rice produced and harvested under normal environmental conditions. Abnormal environmental conditions during the production and harvest of rice may require minor temporary modifications in the equipment or procedures to obtain results expected under normal conditions. When these adjustments are necessary, Federal Grain Inspection Service Field Offices, official inspection agencies, and interested parties in the rice industry will be notified promptly in writing of the modification. These modifications shall not include changes in interpretations of identity, class, quality, or condition.

§ 68.305 Broken kernels determination.

Broken kernels shall be determined by the use of equipment and procedures set forth in the Inspection Handbook HB 918–11,[2] or by any method which gives equivalent results.

§ 68.306 Interpretive line samples.

Interpretive line samples showing the official scoring line for factors that are determined by visual observation shall be maintained by the Standardization Division, Federal Grain Inspection Service, U.S. Department of Agriculture, and shall be available for reference in all inspection offices that inspect and grade rice.

§ 68.307 Milling requirements.

The degree of milling for milled rice; i.e., "well milled," "reasonably well milled," and "lightly milled" shall be equal to, or better than, that of the interpretive line samples for such rice.

§ 68.308 Moisture.

Water content in milled rice as determined by an approved device in accordance with procedures prescribed in the Inspection Handbook HB 918–11.[2] For the purpose of this paragraph, "approved device" shall include the Motomco Moisture Meter and any other equipment that is approved by the Administrator as giving equivalent results.[3]

§ 68.309 Percentages.

Percentages shall be determined on the basis of weight and shall be rounded off as follows:

(a) When the figure to be rounded is followed by a figure greater than 5, round to the next higher figure; e.g., 0.46, report as 0.5.

(b) When the figure to be rounded is followed by a figure less than 5, round to the next lowest figure; e.g., 0.54, report as 0.5.

(c) When the figure to be rounded is followed by the figure 5, round to the nearest even figure; e.g., 0.45, report as 0.4; 0.55, report as 0.6.

All percentages, except for milling yield, shall be stated in whole and tenth percent to the nearest tenth percent. Milling yield shall be stated to the nearest whole percent.

[3] Requests for information concerning approved devices and procedures, criteria for approved devices, and requests for approval of devices should be directed to the Standardization Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue SW., Washington, D.C. 20250.

GRADES, GRADE REQUIREMENTS, AND GRADE DESIGNATIONS

§ 68.311 Grades and grade requirements for the classes Long-Grain Milled Rice, Medium-Grain Milled Rice, and Mixed Milled Rice. (See also § 68.315.)

Grade	Seeds, heat-damaged, and paddy kernels (singly or combined)		Red rice and damaged kernels (singly or combined)	Chalky kernels 1/		Maximum limits of -- Broken kernels			Other types 3/		Color Requirements 4/	Milling Requirements (Minimum) 5/
	Total	Heat-damaged and objectionable seeds		In long-grain rice	In medium- or short-grain rice	Total	Removed by a 5 plate 2/	Removed by a 6 plate 2/	Through a 6 sieve 2/	Whole kernels	Whole and broken kernels	
	Number in 500 grams	Number in 500 grams	Percent	Percent	Percent	Percent	Percent	Percent	Percent	Percent	Percent	
U.S. No. 1	2	1	0.5	1.0	2.0	4.0	0.04	0.1	0.1	--	1.0	Shall be white or creamy	Well milled
U.S. No. 2	4	2	1.5	2.0	4.0	7.0	0.06	0.2	0.2	--	2.0	May be slightly gray	Well milled
U.S. No. 3	7	5	2.5	4.0	6.0	15.0	0.1	0.8	0.5	--	3.0	May be light gray	Reasonably well milled
U.S. No. 4	20	15	4.0	6.0	8.0	25.0	0.4	2.0	0.7	--	5.0	May be gray or slightly rosy	Reasonably well milled
U.S. No. 5	30	25	4/ 6.0	10.0	10.0	35.0	0.7	3.0	1.0	10.0	--	May be dark gray or rosy	Lightly milled
U.S. No. 6	75	75	5/15.0	15.0	15.0	50.0	1.0	4.0	2.0	10.0	--	May be dark gray or rosy	Lightly milled
U.S. Sample grade	U.S. Sample grade shall be milled rice which: (a) does not meet the requirements for any of the grades from U.S. No. 1 to U.S. No. 6, inclusive; (b) contains more than 15.0 percent of moisture; (c) is musty or sour, or heating; (d) has any commercially objectionable foreign odor; (e) contains more than 0.1 percent of foreign material; (f) contains live or dead weevils or other insects, insect webbing, or insect refuse; or (g) is otherwise of distinctly low quality.											

1/ For the special grade Parboiled milled rice, see § 68.315(c).
2/ Plates should be used for southern production rice; but any device or method which gives equivalent results may be used.
3/ These limits do not apply to the class Mixed Milled Rice.
4/ For the special grade Undermilled milled rice, see § 68.315(d).
5/ Grade U.S. No. 6 shall contain not more than 6.0 percent of damaged kernels.

§68.311 Grades and Grade Requirements for the Class Second Head Milled Rice (See also §68.315)

Grade	Maximum limits of —					
	Seeds, heat-damaged, and paddy kernels (singly or combined)		Red rice and damaged kernels (singly or combined)	Chalky kernels 1/	Color Requirements 1/	Minimum Milling Requirements 2/
	Total	Heat-damaged kernels and objectionable seeds				
	Number in 500 grams	Number in 500 grams	Percent	Percent		
U.S. No. 1	15	5	1.0	4.0	Shall be white or creamy	Well milled
U.S. No. 2	20	10	2.0	6.0	May be slightly gray	Well milled
U.S. No. 3	35	15	3.0	10.0	May be light gray	Reasonably well milled
U.S. No. 4	50	25	5.0	15.0	May be gray or slightly rosy	Reasonably well milled
U.S. No. 5	75	40	10.0	20.0	May be dark gray or rosy	Lightly milled
U.S. Sample Grade	U.S. Sample Grade shall be milled rice of this class which: (a) does not meet the requirements for any of the grades from U.S. No. 1 to U.S. No. 5 inclusive; (b) contains more than 15.0 percent of moisture; (c) is musty, or sour, or heating; (d) has any commercially objectionable foreign odor; (e) contains more than 0.1 percent of foreign material; (f) contains live or dead weevils or other insects, insect webbing, or insect refuse; or (g) is otherwise of distinctly low quality.					

1/ For the special grade Parboiled milled rice, see §68.315(c).

2/ For the special grade Undermilled milled rice, see §68.315(d).

§68.312 Grades and Grade Requirements for the class Screenings Milled Rice (See also #68.315)

Grade	Maximum limits of —				
	Paddy kernels and seeds		Chalky kernels 1/	Color Requirements 1/	Minimum Milling Requirements 2/
	Total (singly or combined)	Objectionable seeds			
	Number in 500 grams	Number in 500 grams	Percent		
U.S. No. 1 3/ 4/	30	20	5.0	Shall be white or creamy	Well milled
U.S. No. 2 3/ 4/	75	50	8.0	May be slightly gray	Well milled
U.S. No. 3 3/ 4/	125	90	12.0	May be light gray or slightly rose	Reasonably well milled
U.S. No. 4 3/ 4/	175	140	20.0	May be gray or rosy	Reasonably well milled
U.S. No. 5	250	200	30.0	May be dark gray or very rosy	Lightly milled
U.S. Sample Grade	U.S. Sample Grade shall be milled rice of this class which: (a) does not meet the requirements for any of the grades from U.S. No. 1 to U.S. No. 5 inclusive; (b) contains more than 15.0 percent of moisture; (c) is musty, or sour, or heating; (d) has any commercially objectionable foreign odor; (e) has a badly damaged or extremely red appearance; (f) contains more than 0.1 percent of foreign material; (g) contains live or dead weevils or other insects, insect webbing, or insect refuse; or (h) is otherwise of distinctly low quality.				

1/ For the special grade Parboiled milled rice see §68.315(c).

2/ For the special grade Undermilled milled rice see §68.315(d).

3/ Grades U.S. No. 1 to U.S. No. 4, inclusive, shall contain not more than 3.0 percent of heat-damaged kernels, kernels damaged by heat and/or parboiled kernels in nonparboiled rice.

4/ Grades U.S. No. 1 to U.S. No. 4, inclusive, shall contain not more than 1.0 percent of material passing through a 30 sieve.

RULES AND REGULATIONS

FEDERAL REGISTER, VOL. 42, NO. 156—FRIDAY, AUGUST 12, 1977

§ 68.313 Grades and Grade Requirements for the Class Brewers Milled Rice. (See also §68.315)

Grade	Maximum limits of				Minimum Milling Requirements 2/
	Paddy kernels and seeds		Objectionable seeds	Color Requirements 1/	
	Total (singly or combined)				
	Percent		Percent		
U.S. No. 1 3/ 4/ ...	0.5		0.05	Shall be white or creamy	Well milled
U.S. No. 2 3/ 4/ ...	1.0		0.1	May be slightly gray	Well milled
U.S. No. 3 3/ 4/ ...	1.5		0.2	May be light gray or slightly rosy	Reasonably well milled
U.S. No. 4 3/ 4/ ...	3.0		0.4	May be gray or rosy	Reasonably well milled
U.S. No. 5	5.0		1.5	May be dark gray or very rosy	Lightly milled
U.S. Sample Grade ..	U.S. Sample Grade shall be milled rice of this class which: (a) does not meet the requirements for any of the grades from U.S. No. 1 to U.S. No. 5 inclusive; (b) contains more than 15.0 percent of moisture; (c) is musty, or sour, or heating; (d) has any commercially objectionable foreign odor; (e) has a badly damaged or extremely red appearance; (f) contains more than 0.1 percent of foreign material; (g) contains more than 15.0 percent of broken kernels that will pass through a 2 1/2 sieve; (h) contains live or dead weevils or other insects, insect webbing, or insect refuse; or (i) is otherwise of distinctly low quality.				

1/ For the special grade Parboiled milled rice see §68.315(c).
2/ For the special grade Undermilled milled rice see §68.315(d).
3/ Grades U.S. No. 1 to U.S. No. 4, inclusive, shall contain not more than 3.0 percent of heat-damaged kernels, kernels damaged by heat and/or parboiled kernels in nonparboiled rice.
4/ Grades U.S. No. 1 to U.S. No. 4, inclusive, shall contain not more than 1.0 percent of material passing through a 30 sieve. This limit does not apply to the special grade Granulated brewers milled rice.

§ 68.314 Grade designations.

(a) The grade designation for all classes of milled rice, except Mixed Milled Rice, shall include in the following order: (1) The etters "U.S."; (2) the number of the grade or the words "Sample grade," as warranted; (3) the words "or better," when applicable and requested by the applicant prior to inspection; (4) the class; and (5) each applicable special grade (see § 68.316).

(b) The grade designation for the class Mixed Milled Rice shall include, in the following order: (1) The letters "U.S."; (2) the number of the grade or the words "Sample grade," as warranted; (3) the words "or better," when applicable and requested by the applicant prior to inspection; (4) the class; (5) each applicable special grade (see § 68.316); (6) the percentage of whole kernels of each type in the order of predominance and when applicable; (7) the percentage of broken kernels of each type in the order of predominance; and (8) the percentage of seeds and foreign material.

NOTE.—Broken kernels other than long grain, in Mixed Milled Rice, shall be certificated as "medium or short grain."

SPECIAL GRADES, SPECIAL GRADE REQUIREMENTS, AND SPECIAL GRADE DESIGNATIONS

§ 68.315 Special grades and special grade requirements.

A special grade, when applicable, is supplemental to the grade assigned under § 68.314. Such special grades for milled rice are established and determined as follows:

(a) *Coated milled rice.* Coated milled rice shall be milled rice which is coated, in whole or in part, with glucose and talc.

(b) *Granulated brewers milled rice.* Granulated brewers milled rice shall be milled rice which has been crushed or granulated so that 95.0 percent or more will pass through a 5 sieve, 70.0 percent or more will pass through a 4 sieve, and not more than 15.0 percent will pass through a 2½ sieve.

(c) *Parboiled milled rice.* Parboiled milled rice shall be milled rice in which the starch has been gelatinized by soaking, steaming, and drying. Grades U.S. No. 1 to U.S. No. 6, inclusive, shall contain not more than 10.0 percent of ungelatinized kernels. Grades U.S. No. 1 and U.S. No. 2 shall contain not more than 0.1 percent, grades U.S. No. 3 and U.S. No. 4 not more than 0.2 percent, and grades U.S. No. 5 and U.S. No. 6 not more than 0.5 percent of nonparboiled rice. If the rice is: (1) Not distinctly colored by the parboiling process, it shall be considered "Parboiled Light"; (2) distinctly but not materially colored by the parboiling process, it shall be considered "Parboiled"; (3) materially colored by the parboiling process, it shall be considered "Parboiled Dark." The color levels for "Parboiled Light," "Parboiled," and "Parboiled Dark" shall be in accordance with the interpretive line samples for parboiled rice.

NOTE.—The maximum limits for "Chalky kernels," "Heat-damaged kernels," "Kernels damaged by heat," and the "Color requirements" in §§ 68.310, 68.311, 68.312, and 68.313 are not applicable to the special grade "Parboiled milled rice."

(d) *Undermilled milled rice.* Undermilled milled rice shall be milled rice which is not equal to the milling requirements for "well milled," "reasonably well milled," and "lightly milled" rice (see § 68.307). Grades U.S. No. 1 and U.S. No. 2 shall contain not more than 2.0 percent, grades U.S. No. 3 and U.S. No. 4 not more than 5.0 percent, grade U.S. No. 5 not more than 10.0 percent, and grade U.S. No. 6 not more than 15.0 percent of well-milled kernels. Grade U.S. No. 5 shall contain not more than 10.0 percent of red rice and damaged kernels (singly or combined) and in no case more than 6.0 percent of damaged kernels.

NOTE.—The "Color and milling requirements" in §§ 68.310, 68.311, 68.312, and 68.313 are not applicable to the special grade "Undermilled milled rice."

§ 68.316 Special grade designation.

The grade designation for coated, granulated brewers, parboiled, or undermilled milled rice shall include following the class, the word(s) "Coated," "Granulated," "Parboiled Light," "Parboiled," "Parboiled Dark," or "Undermilled," as warranted, and all other information prescribed in § 68.314.

EFFECTIVE DATE: Administrative procedure provisions of section 553 of Title 5, United States Code require that no standards shall become effective less than 30 days after promulgation thereof, unless, it is found that the public health, interest, or safety require that they become effective sooner.

The new standards should become effective on August 28, 1977, to coincide with the new crop season already in progress. Members of the rice industry have reviewed the proposed revisions and have offered no objections. The commentors who responded to the proposal fully endorsed the revisions and requested that they be made effective as soon as practicable. The amendments benefit rice marketing by providing more flexibility regarding grading and certification procedures and should be made available to the rice industry as soon as practicable. Furthermore, it does not appear that a waiting period beyond this date would make additional relevant information available to the Department on this matter.

The amended regulations will not create any undue hardships or impose requirements or obligations on persons affected which cannot be complied with within the time that these amendments are to become effective.

For a period of 6 months after adoption of these amendments, official inspection personnel shall, upon request, show on inspection certificates the grade under both the "old" and "new" standards.

Accordingly, it is deemed to be in the public interest to waive the 30-day waiting period and make the amendments of the rice standards effective in less than 30 days. Therefore, amendments shall become effective August 28, 1977.

Done at Washington, D.C. on August 8, 1977.

L. E. BARTELT,
Administrator.

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENT

[Amendment 6]

PART 725—FLUE-CURED TOBACCO

Subpart—Flue-Cured Tobacco Acreage Allotment and Marketing Quota Regulations, 1973–74 and Subsequent Marketing Years

AGENCY: Agricultural Stabilization and Conservation Service, Department of Agriculture.

ACTION: Final rule.

SUMMARY: This rule changes the eligibility requirements for lease and transfer of flue-cured tobacco quota if the transfer is filed after June 14th and incorporates the 1977 penalty rate on excess flue-cured tobacco. This rule also clarifies the authority of the county committee as to the assessment of penalty for tobacco falsely identified.

The change in leasing requirement results from Pub. L. 95–54 approved by the President on June 25, 1977. The penalty rate is 75 percent of the previous year market average, as required by section 314 of the Agricultural Adjustment Act of 1938, as amended.

Effective date: August 12, 1977.

FOR FURTHER INFORMATION CONTACT:

David W. Anderson, Program Operations Division, Agricultural Stabilization and Conservation Service, USDA, P.O. Box 2415, Washington, D.C. 20013 (202–447–7935).

SUPPLEMENTARY INFORMATION: As marketing and leasing of flue-cured tobacco quota is currently underway, it is essential that producers be aware of the change brought about by Pub. L. 95–54, and the penalty rates for the current crop of tobacco. Accordingly, it is hereby found and determined that compliance with the procedure for notice of proposed rulemaking and public participation is impracticable and contrary to the public interest.

FINAL RULE

Accordingly, 7 CFR Part 725 is amended as follows, effective beginning with the 1977 crop of flue-cured tobacco:

§ 725.72 [Amended]

1. In § 725.72 paragraph (c) (3) (ii) is amended by changing the 50 percent to 80 percent.

2. Section 725.92 (b) is amended to read as follows:

§ 725.92 Rate of Penalty.

* * * * *

(b) (1) *Average market price.* The average market prices as determined by the Crop Reporting Board for the marketing year specified was:

Average Market Price

Marketing year:	Cents per pound
1972 to 1973	85.3
1973 to 1974	88.1
1974 to 1975	105.0
1975 to 1976	99.8
1976 to 1977	110.4

(2) *Rate of Penalty Per Pound.* The penalty per pound upon marketings of excess tobacco subject to marketing quota during the marketing year specified shall be:

Rate of Penalty

Marketing year:	Cents per pound
1973 to 1974	64
1974 to 1975	66
1975 to 1976	79
1976 to 1977	75
1977 to 1978	83

§ 725.98 [Amended]

3. Section 725.98(d) is amended by deleting the last sentence.

AUTHORITY: Sections 301, 313, 314, 316, 317, 363, 373–375, 377, 378, 52 Stat. 38, as amended, 47, as amended, 48, as amended, 75 Stat. 469, as amended, 79 Stat. 66, 52 Stat. 63, as amended, 65–66, as amended, 72 Stat. 995; (7 U.S.C. 1301, 1313, 1314, 1314b, 1314c, 1363, 1372–75, 1377, 1378); Section 401, 63 Stat. 1054, as amended (7 U.S.C. 1421).

NOTE.—The Commodity Credit Corporation has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

Signed at Washington, D.C., on August 4, 1977.

RAY FITZGERALD,
Administrator, Agricultural Stabilization and Conservation Service.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Grapefruit Reg. 77, Amdt. 10]

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

Amendment of Size Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment increases the minimum diameter requirements applicable to domestic shipments of Florida pink seeded and pink seedless grapefruit to $3^{12}/_{16}$ inches and $3^{10}/_{16}$ inches, respectively. The amended regulation recognizes the size composition of the estimated crop of Florida pink seeded and pink seedless grapefruit and is necessary to maintain orderly markeing conditions in the interest of producers and consumers.

DATES: Effective August 16, 1977, through September 25, 1977.

FOR FUTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3545).

SUPPLEMENTARY INFORMATION: Notice was published in the FEDERAL REGISTER on June 30, 1977 (42 FR 33316) that consideration was being given to a proposal to amend Grapefruit Regulation 77 (§ 905.565; 41 FR 42177, 49474, 51029, 54917; 42 FR 9663, 10833, 14865, 18271, 21469, 24715), effective pursuant to the applicable provisions of the marketing agreements, as amended, and Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida. This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The proposed amendment was recommended by the Shippers Advisory Committee and Growers Administrative Committee, established under said amended marketing agreement and order. The notice provided that all written data, views, or arguments in connection with the proposed amendment be submitted by July 25, 1977. None were received.

The amendment reflects the Department's appraisal of the need for regulation of shipments of Florida grapefruit during the period August 16 through September 25, 1977, based on the available supply and current and prospective demand by fresh market outlets. The action is necessary to maintain orderly marketing conditions by preventing the adverse effect on the market caused by shipment of smaller-size grapefruit when more than ample supplies of the more desirable sizes are available to serve consumers' needs. The amendment is consistent with the objectives of the act of promoting orderly marketing and protecting the interest of consumers.

After consideration of all relevant matter presented, including the proposal set forth in the aforesaid notice and other available information, it is hereby found that the regulation of shipments of Florida grapefruit, as hereinafter set forth, is in accordance with said amended marketing agreement and order and will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for making this amendment effective at the time hereinafter set forth and for not postponing the effective date hereof until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) notice of proposed rulemaking concerning this amendment was published in the FEDERAL REGISTER on June 30, 1977 (42 FR 33316), and no objection to such amendment was received; (2) the regulatory provisions are the same as those contained in said notice except for the later effective date of August 16, 1977; and (3) compliance with the regulation will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof.

Order. In § 905.565 (Grapefruit Regulation 77; 41 FR 42177, 49474, 51029, 54917; 42 FR 9663, 10833, 14865, 18271, 21469, 24715) the provisions of paragraph (a) and subparagraphs (2) and (4) thereof are amended to read as follows:

§ 905.565 Grapefruit Regulation 77.

(a) During the period August 16, 1977, through September 25, 1977, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico: * * *

(2) Any seeded grapefruit, grown in the production area, which are of a size smaller than $3^{12}/_{16}$ inches in diameter, except that a tolerance for seeded grapefruit, smaller than such minimum diameter shall be permitted as specified in § 51.761 of the U.S. Standards for Grades of Florida Grapefruit;

* * * * *

(4) Any seedless grapefruit, grown in the production area, which are of a size smaller than $3^{10}/_{16}$ inches in diameter, except that a tolerance for seedless grapefruit smaller than such minimum diameter shall be permitted as specified in § 51.761 of the U.S. Standards for Grades of Florida Grapefruit.

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: August 10, 1977, to become effective August 16, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-23480 Filed 8-11-77;8:45 am]

[Lemon Reg. 105]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period August 14–20, 1977. This regulation is needed to provide for orderly marketing of fresh lemons for the regulation period because of the production and marketing situation confronting the lemon industry.

EFFECTIVE DATE: August 14, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3545).

SUPPLEMENTARY INFORMATION: (a) *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee established under the amended marketing agreement and order, and upon other available information, it is found that the limitation of handling of such lemons, as provided in this regulation will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantity of lemons that may be marketed during the specified week stems from the production and marketing situation confronting the lemon industry.

(i) The committee has submitted its recommendation for the quantity of lemons it considers advisable to be handled during the specified week. The recommendation resulted from consideration of the factors covered in the order. The committee further reports the demand for lemons is good on size 140's and smaller, but poorer on larger sizes. Average f.o.b. price was $6.89 per carton the week ended August 6, 1977, compared to $7.21 per carton the previous week. Track and rolling supplies at 225 cars were the same as last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be established as provided in this regulation.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information upon which this regulation is based became available and the time when it must become effective to effectuate the declared policy of the act is insufficient. A reasonable time is permitted, for preparation for the effective time; and good cause exists for making the regulation effective as specified. The committee held an open meeting during the current week, after giving due notice, to consider supply and market conditions for lemons and the need for regulation. Interested persons were afforded an opportunity to submit information and views at this meeting. The recommendation and supporting information for regulation during the period specified were promptly submitted to the Secretary after the meeting was held, and information concerning the provisions and effective time has been provided to handlers of lemons. It is necessary, to effectuate the declared policy of the act, to make this regulation effective as specified. The committee meeting was held on August 9, 1977.

§ 910.405 Lemon Regulation 105.

(a) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period August 14, 1977, through August 20, 1977, is established at 275,000 cartons.

(2) As used in this section, "handled" and "cartons(s)" have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: August 10, 1977.

CHARLES R. BRADER,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Docket No. AO–162–A5]

PART 918—FRESH PEACHES GROWN IN GEORGIA

Order Amending Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amended order.

SUMMARY: This amends the Federal marketing agreement and order for fresh peaches grown in Georgia. Georgia peach growers voting in the June 20–30 referendum favored the amendment. The amendment provides for a public member on the administrative committee, dissolves the advisory committee, changes the conditions under which a continuance referendum would be held, ends compensation for committee members attending meetings, and provides for establishment of a reserve fund. The amendment also makes a number of minor changes with resepct to the terminology and language used in the marketing order.

EFFECTIVE DATE: September 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, Department of Agriculture, Washington, D.C. 20250. (202–447–3545).

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Hearing—Issued November 19, 1976; published November 24, 1976 (41 FR 51818).

Notice of Recommended Decision.—Issued March 7, 1977; published March 11, 1977 (42 FR 13557); Corrections published April 8, 1977 (42 FR 18621) and May 6, 1977 (42 FR 23160).

Secretary's Decision.—Issued May 20, 1977, and published May 26, 1977 (42 FR 27012).

PRELIMINARY STATEMENT

A public hearing was held upon proposed further amendment of the marketing agreement, as amended, and Order No. 918, as amended (7 CFR Part 918), (hereinafter referred to collectively as the "order") regulating the handling of fresh peaches grown in Georgia. The hearings was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice (7 CFR Part 900), at Fort Valley, Georgia, on December 9, 1976, pursuant to notice thereof issued on November 19, 1976.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, on March 7, 1977, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto. No exceptions were filed.

The Secretary's Decision and referendum order was issued May 20, 1977.

FINDINGS AND DETERMINATIONS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and each previously issued amendment thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed amendment of the marketing agreement, as amended, and Order No. 918, as amended (7 CFR Part 918), regulating the handling of fresh peaches grown in Georgia.

Upon the basis of the record it is found that: (1) The order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The order, as amended, and as hereby further amended, regulates the handling of fresh peaches grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in, the mar-

keting agreement and order upon which hearings have been held;

(3) The order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) The order, as amended, and as hereby further amended, prescribes, so far as practicable, such different terms applicable to different parts of the production area as are necessary to give due recognition to the differences in the production and marketing of fresh peaches grown in the production area; and

(5) All handling of fresh peaches grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order, as amended, effective not later than 30 days after publication in the FEDERAL REGISTER. Any delay beyond that date would tend to disrupt the orderly marketing of fresh peaches grown in Georgia.

(c) *Determinations.* It is hereby determined that: (1) The "Marketing Agreement, as Amended, Regulating the Handling of Fresh Peaches Grown in Georgia" upon which the aforesaid public hearing was held has been signed by handlers (excluding cooperative associations of producers who are not engaged in processing, distributing, or shipping fresh peaches covered by the order, as amended, and as hereby further amended), who, during the period January 1, 1976, through December 31, 1976, handled not less than 50 percent of the volume of such fresh peaches covered by the said order, as amended, and as hereby further amended, and

(2) The issuance of this amendatory order, amending the aforesaid order, as amended, is favored or approved by at least two-thirds of the producers who participated in a referendum on the question of its approval and who during the period January 1, 1976, through December 31, 1976 (which has been deemed to be a representative period), have been engaged within the State of Georgia, in the production of fresh peaches for market, such producers having also produced for market at least two-thirds of the volume of such commodity represented in the referendum.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof, the handling of fresh peaches grown in Georgia, shall be in conformity to and in compliance with the terms and conditions of the said order, as amended, and as hereby further amended, as follows:

1. Section 918.1 is revised to read as follows:

§ 918.1 Secretary.

"Secretary" means the Secretary of Agriculture of the United States, or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

2. Section 918.10 is revised to read as follows:

§ 918.10 District.

"District" means the applicable one of the following described geographical subdivisions or the area:

(a) "South Georgia District" shall include the counties of Quitman, Coffee, Miller, Jeff Davis, Baker, Toombs, Terrell, Ware, Mitchell, Pierce, Worth, Evans, Brooks, Liberty, Turner, Glynn, Irwin, Echols, Atkinson, Early, Wheeler, Decatur, Montgomery, Randolph, Bacon, Dougherty, Wayne, Crisp, Charlton, Thomas, Bryan, Tift, McIntosh, Ben Hill, Berrien, Lanier, Clay, Telfair, Seminole, Clinch, Calhoun, Appling, Lee, Tattnall, Grady, Brantley, Colquitt, Long, Cook, Chatham, Wilcox, Camden, Lowndes, Stewart, Pulaski, Webster, Dodge, Sumter and Dooly;

(b) "Central Georgia District" shall include the counties of Muscogee, Bleckley, Marion, Laurens, Schley, Johnson, Macon, Candler, Houston, Glascock, Bullock, Twiggs, Wilkinson, Taylor, Washington, Crawford, Emanual, Peach, Jefferson, Burke, Effingham, Chattahoochee, Treutlen, Bibb, Jenkins, and Screven; and

(c) "North Georgia District" shall include the counties of Harris, Talbot, Upson, Monroe, Jones, Baldwin, Hancock, Warren, McDuffie, Polk, Troup, Gwinnett, Lamar, Jackson, Fayette, Forsyth, Jasper, Franklin, Douglas, Gordon, Henry, Dade, Greene, Whitfield, Lincoln, Haralson, Paulding, Cobb, De Kalb, Rockdale, Walton, Oconee, Oglethorpe, Floyd, Richmond, Cherokee, Pike, Clarke, Coweta, Elbert, Butts, Banks, Carroll, Chattooga, Clayton, Dawson, Morgan, Catoosa, Wilkes, Gilmer, Fannin, Lumpkin, Union, White, Towns, Haversham, Stephens, Rabun, Columbia, Bartow, Meriwether, Barrow, Heard, Madison, Spalding, Hall, Putnam, Hart, Fulton, Pickens, Newton, Walker, Taliaferro, and Murray.

3. Section 918.15 is revised to read as follows:

§ 918.15 Establishment of Industry Committee.

An Industry Committee, consisting of nine members, and alternates is hereby established to administer the terms and provisions of this part. Eight members and alternates shall be growers of peaches and one member and alternate shall be individuals who are neither growers nor handlers of peaches. The 8 members who shall be growers shall be known as "grower members" and the remaining member shall be known as a "public member". The members of said Industry Committee and their respective alternates, shall be selected in accordance with the provisions of this part.

4. Section 918.18 is revised to read as follows:

§ 918.18 Nomination of members of Industry Committee.

(a) The Industry Committee shall hold or cause to be held prior to January 31 of each year a meeting or meetings of growers in each of the districts designated in § 918.10, or as redesignated pursuant to § 918.29(k), for the purpose of designating nominees for grower member and alternate member positions on the Industry Committee. The Committee shall give adequate notice of any such meeting or meetings to all growers in the respective district. (b) Members of the committee, selected pursuant to § 918.21, may nominate individuals for the public member and alternate member positions on the Industry Committee, and promptly send the names of these nominees, along with their qualifications, to the Secretary.

5. Section 918.25 is revised to read as follows:

§ 918.25 Eligibility for membership on Industry Committee.

Any person nominated or selected to serve as a member or as an alternate member of the Industry Committee, except for the public member and alternate, shall be an individual grower of peaches in the respective district for which selected, or an officer, employee, or agent of a corporate grower or corporate growers in such district. The public member and alternate shall reside in Georgia, but neither person shall be grower or handler of peaches.

6. Section 918.16 is revised to read as follows:

§ 918.16 Representation by grower members by districts on Industry Committee.

(a) Two members of the Industry Committee shall be selected from among growers in the South Georgia District.

(b) Four members of the Industry Committee shall be selected from among growers in the Central Georgia District.

(c) Two members of the Industry Committee shall be selected from among growers in the North Georgia District.

§ 918.17 [Deleted]

7. Section 918.17 is deleted.

8. Section 918.26 is revised to read as follows:

§ 918.26 Term of office.

The members of the Industry Committee and their respective alternates shall serve for the fiscal period for which they have been selected and if their successors have not been selected and qualified prior to the end of the respective fiscal period, each such member or alternate shall continue to serve until his respective successor shall have been selected and qualified.

9. Section 918.27 is revised to read as follows:

§ 918.27 Reimbursement for expense.

Each member of the Industry Committee and each alternate member when acting for a member or when designated by the committee to attend, may be reimbursed for expenses incurred while attending committee meetings; while attending to committee business authorized by the committee; and while attending each consultation or conference with any committee, or representatives thereof, established under any marketing agreement and order program pursuant to the act, with respect to the handling of peaches grown in Georgia or in any other State.

§ 918.29 [Amended]

10. In § 918.29 paragraph (q) is deleted; paragraph (h) is amended by deleting the words "and to authorize members and alternate members of the Distributors' Advisory Committee to attend such conferences and consultations;"; paragraph (r) is redesignated as paragraph (q).

§ 918.32 [Revoked]

§ 918.33 [Revoked]

§ 919.34 [Revoked]

§ 918.35 [Revoked]

§ 918.36 [Revoked]

§ 918.37 [Revoked]

§ 918.38 [Revoked]

11. Sections 918.32 through 918.38 are deleted.

12. Sections 918.40 and 918.41 are revised to read as follows:

§ 918.40 Expenses.

The Industry Committee is authorized to incur such expenses as the Secretary finds are reasonable and likely to be incurred by the committee for its maintenance and functioning and to enable it to exercise its powers and perform its duties in accordance with the provisions of this part during each fiscal period. The funds to cover such expenses shall be acquired by the levying of assessments as prescribed in § 918.41.

§ 918.41 Assessments.

Each handler who first ships peaches shall pay upon demand, to the Industry Committee, such handler's pro rata share of the expenses which the Secretary finds are reasonable and likely to be incurred by the committee for its maintenance and functioning during each fiscal period: *Provided*, That no assessment shall be levied against peaches that are exempt from regulation pursuant to § 918.71 or against peaches that are exempt from inspection pursuant to § 918.64. Such handler's pro rata share of such expenses shall be equal to the ratio between the total assessable quantity of peaches shipped by such handler as the first shipper thereof, during the applicable fiscal period, and the total assessable quantity of peaches shipped by all handlers as the first shippers thereof during the same fiscal period.

13. Section 918.44 is revised to read as follows:

§ 918.44 Accounting.

If at the end of a fiscal period the assessments collected are in excess of expenses incurred, the Industry Committee, with the approval of the Secretary, may carry over such excess into subsequent fiscal periods as a reserve up to an amount of $20,000. Such reserve funds may be used to cover any expenses authorized by this part and to cover necessary expenses of liquidation in the event of termination of this part. If any such excess is not retained in a reserve, each handler entitled to a proportionate refund shall be credited with such refund against the operations of the following fiscal period or be paid such refund. Upon termination of this part, any funds not required to defray the necessary expenses of liquidation shall be disposed of in such manner as the Secretary may determine to be appropriate: *Provided*, That, to the extent practical, such funds shall be returned pro rata to the persons from whom such funds were collected.

14. Section 918.81 is revised to read as follows:

§ 918.81 Termination.

(a) The Secretary shall terminate or suspend the operation of this part or any provision thereof whenever he finds that the part or any provision thereof does not tend to effectuate the declared policy of the act.

(b) The Secretary shall terminate the provisions of this part whenever he finds by referendum or otherwise that such termination is favored by the majority of the growers: *Provided*, That such majority has, during the current marketing season, produced more than 50 percent of the peaches which were produced for market within the area. Such termination shall become effective on the last day of February following the announcement thereof by the Secretary.

(c) The Secretary shall conduct a referendum among growers to ascertain whether continuance of this part is favored by growers, when requested to do so by the committee, or upon the request of 6 or more growers who produced 10 percent or more of the inspected peaches shipped during the then current fiscal period: *Provided*, That such request is received prior to December 1.

(d) The provisions of this part shall, in any event, terminate whenever the provisions of the act authorizing them cease to be in effect.

15. Section 918.19 is revised to read as follows:

§ 918.19 Conduct of nomination meetings.

At each meeting held to elect nominees for grower member and alternate grower member positions on the Industry Committee, the growers eligible to participate therein shall select a chairman and secretary therefor. The chairman of each meeting shall announce at such meeting the name of each person for whom a vote has been cast, whether as member or alternate member, and the number of votes cast for each such person, and the chairman or the secretary of the meeting shall forthwith transmit such information to the Secretary or the designated representative of the Secretary. At each such meeting at least two nominees shall be designated for each position as member and at least two nominees shall be designated for each position as alternate member on the committee as representative or representatives of the respective district.

16. Section 918.21 is revised to read as follows:

§ 918.21 Selection of members of Industry Committee.

The Secretary may select the members of the Industry Committee and their respective alternates from nominations made by growers as provided in §§ 918.15 through 918.26 or the Secretary may select such members and alternates from among other persons.

17. Section 918.22 is revised to read as follows:

§ 918.22 Vacancies.

In the event nominations are not made for membership on the Industry Committee, pursuant to the provisions of §§ 918.15 through 918.26 by February 15 of the respective fiscal period, the Secretary may select such members and their respective alternates without waiting for nominees to be designated. To fill any vacancy occasioned by the failure of any person, selected as a member of the Industry Committee or as an alternate member thereof, to qualify, or in the event of the death, removal, resignation, or disqualification of any qualified member or alternate, a successor for his unexpired term shall be selected by the Secretary.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Effective date: September 12, 1977.

Signed at Washington, D.C., on August 8, 1977.

ROBERT H. MEYER,
Assistant Secretary for Marketing Services.

[FR Doc 77-23342 Filed 8-11-77;8:45 am]

[Grapefruit Reg. 17, Am. 8]

PART 944—FRUITS; IMPORT REGULATIONS

Amendment of Size Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment increases the minimum diameter requirements applicable to imported pink seeded and pink seedless grapefruit to $3^{12}/_{16}$ inches and $3^{8}/_{16}$ inches, respectively, to coincide with such requirements being

made effective on Florida grapefruit. This amendment is required by Federal law.

EFFECTIVE DATES: August 16, 1977, through September 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250; telephone 202–447–3545.

SUPPLEMENTARY INFORMATION: Notice was published in the FEDERAL REGISTER on June 30, 1977 (42 FR 33316), that consideration was being given to a proposal to amend Grapefruit Import Regulation 17 (§ 944.113; 41 FR 42181, 49109; 42 FR 9664, 10835, 14867, 18271, 21469, 24717), pursuant to Part 944—Fruits; Import Regulations (7 CFR Part 944). The notice provided that all written data, views, or arguments in connection with the proposed amendment be submitted by July 25, 1977.

One letter was filed objecting to the application of specified size requirements to imported pink seeded and pink seedless grapefruit on the basis that this could reduce supplies of such grapefruit available to consumers. Normally, ample supplies of the more desirable sizes of pink grapefruit are available to serve domestic consumers' needs, and it is anticipated that this will be the case during the period of this regulation.

This amendment is mandatory under section 8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This section requires that whenever specified commodities, including grapefruit, are regulated under a federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality or maturity requirements as those in effect for the domestically produced commodity. This amendment fixes the same minimum size requirements on imported grapefruit as are effective under Marketing Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida.

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, and the views and comments submitted during the notice period, it is hereby found that the size requirements in effect pursuant to the said amended marketing agreement and order shall apply to grapefruit to be imported.

It is hereby further found that good cause exists for not postponing the effective time of the regulatory provisions of this amendment, as hereinafter set forth, beyond that hereinafter specified (5 U.S.C. 553) in that (a) the requirements of this import regulation are imposed pursuant to §8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), which makes such requirements mandatory; (b) the size requirements of this import regulation are the same as those being made applicable to domestic shipments of grapefruit grown in Florida under Grapefruit Regulation 77 (§ 9§.5565); (c) notice that such action was being considered was published in the June 30, 1977, issue of the FEDERAL REGISTER (42 FR 33316); (d) the provisions of this import regulation are the same as those contained in said notice except for the later effective date of August 16, 1977; and (e) notice hereof in excess of three days, the minimum prescribed by said Section 8e, is given with respect to this import regulation by prescribing an effective date of August 16, 1977.

The provisions of paragraph (a) of § 944.113 (Grapefruit Regulation 17; 41 FR 42181, 49109; 42 FR 9664, 10835, 14867, 18271, 21469, 24717) are revised to read as follows:

§ 944.113 Grapefruit Regulation 17.

(a) During the period August 16, 1977, through September 25, 1977, the importation into the United States of any grapefruit is prohibited unless such grapefruit is inspected and meets the following requirements:

(1) Seeded grapefruit shall grade at least U.S. No. 1 and be of a size not smaller than $3^{12}/_{16}$ inches in diameter, except that a tolerance for seeded grapefruit smaller than such minimum diameter shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances specified in § 51.761 of the U.S. Standards for Grapes of Florida Grapefruit and

(2) Seedless grapefruit shall grade at least Improved No. 2 and be of a size not smaller than $3^{9}/_{16}$ inches in diameter, except that a tolerance for seedless grapefruit smaller than such minimum diameter shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances specified in § 51.761 of the U.S. Standards for Grades of Florida Grapefruit. ("Improved No. 2" shall mean grapefruit grading at least U.S. No. 2 and also meeting the requirements of the U.S. No. 1 grade as to shape (form) and color.)

PART 945—IRISH POTATOES GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

Amendment No. 1 to Handling Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment to the handling regulation requires fresh market shipments of potatoes grown in certain counties in Idaho and Malheur County, Oregon, to be inspected and meet minimum grade, size, cleanliness, maturity and pack requirements during the period August 16, 1977, through July 31, 1978. The amendment should promote orderly marketing of such potatoes by keeping less desirable sizes and qualities from being shipped to consumers.

EFFECTIVE DATE: August 16, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone: 202–447–3545.

SUPPLEMENTARY INFORMATION: Marketing Agreement No. 98 and Order No. 945, both as amended (7 CFR 945), regulate the handling of potatoes grown in designated counties in Idaho and Malheur County, Oregon. It is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Idaho-Eastern Oregon Potato Committee, established under the order, is responsible for its local administration.

Notice was published in the July 25, 1977, FEDERAL REGISTER (42 FR 37819) inviting written comments by August 9, 1977. None was received.

This regulation is based upon recommendations made by the committee at its public meeting in Twin Falls, Idaho, on June 15, 1977.

The amendment extends the current regulation, which is similar to those issued during past seasons.

The grade, size, cleanliness, maturity, pack and inspection requirements recommended herein are necessary to prevent potatoes of low quality or undesirable sizes from being distributed to fresh market outlets. The specific requirements will benefit consumers and producers by standardizing and improving the quality of the potatoes shipped from the production area, thereby promoting orderly marketing, and will thus tend to effectuate the declared policy of the act.

Exceptions are provided to certain of these requirements to recognize special situations in which such requirements are inappropriate or unreasonable.

A specified quantity of potatoes is exempt from maturity requirements in order to (1) permit growers to make test diggings without loss of the potatoes so harvested or (2) allow a lot to be shipped which after regrading, meets the grade and size requirements but then fails to meet the maturity requirements, possibly due to further "skinning" as a result of running the potatoes over the grader again.

Shipments may be made to certain special purpose outlets without regard to minimum grade, size, cleanliness, maturity and pack requirements, provided that safeguards are met to prevent such potatoes from reaching unauthorized outlets. Since no purpose would be served by regulating potatoes used for charity purposes, such shipments are also exempt. Certified seed and seed pieces cut from stock eligible for certification are also exempted, because requirements for this outlet differ greatly from those for fresh market.

Potatoes used for experimentation have special requirements and do not normally enter commercial channels of trade. Potatoes for most processing uses are exempt under the legislative authority for this part.

Requirements for export shipments differ from those for domestic markets. While the standard quality requirements are desired in foreign markets, smaller sizes are more acceptable. In commercial prepeeling, operators can use potatoes with surface defects which are undesirable for the tablestock market, and smaller sizes are acceptable. Therefore, different requirements are set forth for export and prepeeling shipments.

Findings. After consideration of all relevant matter presented, including the proposal set forth in the notice, it is hereby found that the amendment, as hereinafter set forth, will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of this section until 30 days after its publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) shipments of potatoes grown in the production area have already begun, (2) to maximize benefits to producers, this regulation should apply to as many shipments as possible during the marketing season, and (3) compliance with this regulation, which is similar to the temporary regulation currently in effect and to regulations issued during previous seasons, will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective date of this amendment.

The amended handling regulation is as follows:

§ 945.336 Handling regulation.

During the period August 16, 1977, through July 31, 1978, no person shall handle any lot of potatoes unless such potatoes meet the requirements of paragraphs (a), (b), (c), and (d) of this section, or unless such potatoes are handled in accordance with paragraphs (e), (f), or (g) of this section.

(a) *Minimum quality requirements*—(1) *Grade—All varieties*—U.S. No. 2 or better grade.

(2) *Size*—(i) *Round red varieties*—$1^{7}/_{8}$ inches minimum diameter.

(ii) *All other varieties*—2 inches minimum diameter, or 4 ounces minimum weight.

(iii) *All varieties*—Size B if U.S. No. 1 or better grade.

(3) *Cleanliness—All varieties*—"Fairly clean."

(b) *Minimum maturity requirements*—(1) *White Rose and red skin varieties:* Beginning the effective date hereof through December 31, 1977, "moderately skinned"; thereafter no maturity requirements.

(2) *Norgold variety:* "Slightly skinned."

(3) *All other varieties:* "Slightly skinned."

(4) *Exceptions.* (i) Subject to compliance with subdivision (iii) of this paragraph, any lot of potatoes not exceeding a total of 50 hundredweight of each variety may be handled for any producer without regard to the foregoing maturity requirements.

(ii) If an officially inspected lot of potatoes meets the foregoing maturity requirements, but fails to meet the grade and size requirements, the lot may be regraded. If, after regrading, such lot then meets the grade and size requirements but fails to meet the maturity requirements, as indicated by the applicable Federal-State inspection certificate, such lot if not exceeding 100 hundredweight shall be exempt from the foregoing maturity requirements if the handler complies with subdivision (iii) of this subparagraph.

(iii) Prior to each shipment of potatoes exempt from the foregoing maturity requirements, the handler thereof shall report to the committee the name and address of the producer of such potatoes, and each such shipment shall be handled as an identifiable entity.

(c) *Pack.* (1) When 50-pound containers (except master containers) of long varieties of potatoes are marked with a count, size or similar designation they must meet the count, average count and weight ranges for the count designation listed below.

Larger than 50 count	Range of—		
	Count—10 pct. over or under—	Average count [1]—5 pct. over or under—	Weight—15 oz. or larger—
Larger than:			
50 count	45 to 55	48 to 53	12 to 19
60 count	54 to 66	57 to 63	10 to 16
70 count	63 to 77	67 to 74	9 to 15
80 count	72 to 88	76 to 84	8 to 13
90 count	81 to 99	86 to 95	7 to 12
100 count	90 to 110	95 to 105	6 to 10
110 count	99 to 121	105 to 116	5 to 9
120 count	108 to 132	114 to 126	4 to 8
130 count	117 to 143	124 to 137	4 to 8
140 count	126 to 154	133 to 147	4 to 8
Smaller than 140 count	10 pct. over or under	5 pct. over or under	4 to 8

[1] Applicable to lots.

The following tolerances by weight, are provided for potatoes in any lot which fail to meet the weight range for the designated count:

(i) Not to exceed 5 percent for undersize; and

(ii) Not to exceed 10 percent for oversize.

(2) Potatoes packed in 50-pound cartons shall be U.S. No. 1 or better grade.

(d) *Inspection.* (1) No handler shall handle potatoes unless such potatoes are inspected by either the Idaho Federal-State Inspection Service or Oregon Federal-State Inspection Service and are covered by a valid inspection certificate except when relieved of such requirement pursuant to paragraphs (e), (f), or (g) of this section.

(2) Each lot moving by truck shall be accompanied by a copy of a valid inspection certificate.

(e) *Special purpose shipments.* (1) The minimum grade, size, cleanliness, maturity and pack requirements set forth in paragraphs (a), (b) and (c) of this section shall not be applicable to shipments of potatoes for any of the following purposes:

(i) Charity;

(ii) Certified seed;

(iii) Seed pieces cut from stock eligible for certification as certified seed;

(iv) Experimentation; and

(v) Canning, freezing and "other processing" as hereinafter defined: Except shipments of potatoes for the purpose specified in this subdivision (v) shall be exempt from inspection requirements specified in § 945.65 and paragraph (d) of this section and from assessment requirements specified in § 945.42.

(2) The minimum grade, size, cleanliness, maturity and pack requirements set forth in paragraphs (a), (b), and (c) of this section shall be applicable to shipments of potatoes for each of the following purposes:

(i) *Export:* Except potatoes of a size not smaller than $1^{1}/_{2}$ inches in diameter may be shipped if the potatoes grade not less than U.S. No. 2; and

(ii) *Prepeeling:* Except potatoes of a size not smaller than $1^{1}/_{2}$ inches in diameter may be shipped if the potatoes grade not less than Idaho Utility or Oregon Utility grade.

(f) *Safeguards.* (1) Each handler making shipments of potatoes for charity, seed pieces cut from stock eligible for certification, experimentation, export, or for prepeeling pursuant to paragraph (e) of this section shall:

(i) First, apply to the committee for and obtain a Certificate of Privilege to make shipments for each purpose;

(ii) Upon request by the committee, furnish reports of each shipment pursuant to the applicable Certificate of Privilege;

(iii) At the time of applying to the committee for a Certificate of Privilege, or promptly thereafter furnish the committee with a receiver's or buyer's certification that the potatoes so handled are to be used only for the purpose stated in the application and that such receiver will complete and return to the committee such periodic receiver's reports that the committee may require.

(iv) Mail to the office of the committee a copy of the bill of lading for each Certificate of Privilege shipment promptly after the date of shipment;

(v) Bill each shipment directly to the applicable receiver.

(2) Each handler making shipments of potatoes for canning, freezing, or "other processing" pursuant to paragraph (e) of this section shall:

(i) First apply to the committee for and obtain a Certificate of Privilege to make shipments for processing;

(ii) Make shipments only to those firms whose names appear on the committee's current list of manufacturers of potato products;

(iii) Upon request by the committee, furnish reports of each shipment pursuant to the applicable Certificate of Privilege;

(iv) Mail to the committee's office a copy of the bill of lading for each Certificate of Privilege shipment promptly after the date of shipment;

(v) Bill each shipment directly to the applicable processor.

(3) Each receiver of potatoes for processing pursuant to paragraph (e) of this section shall:

(i) Complete and return an application form for listing as a manufacturer of potato products;

(ii) Certify to the committee and to the Secretary that potatoes received from the production area for processing will be used for such purposes and will not be placed in fresh market channels;

(iii) Report on shipments received as the committee may require and the Secretary approve.

(g) *Minimum quantity exception.* Each handler may ship up to, but not to exceed, five hundredweight of potatoes any day without regard to the inspection and assessment requirements of this part, but this exception shall not apply to any shipment that exceeds five hundredweight of potatoes.

(h) *Definitions.* The terms "U. S. No. 1," "U. S. No. 2," "Size B," "fairly clean," "moderately skinned," and "slightly skinned," shall have the same meaning as when used in the United States Standards for Potatoes (7 CFR 51.1540–51.1566) including the tolerances set forth therein. The term "prepeeling" means the commercial preparation in a prepeeling plant of clean, sound, fresh potatoes by washing, peeling or otherwise removing the outer skin, trimming, sorting, and properly treating to prevent discoloration preparatory to sale in one or more of the styles of peeled potatoes described in § 52.2422 of the United States Standards for Peeled Potatoes (7 CFR 52.2421–52.2433). The term "other processing" has the same meaning as the term appearing in the act and includes, but is not restricted to, potatoes for dehydration, chips, shoestrings, starch, and flour. It includes only that preparation of potatoes for market which involves the application of heat or cold to such an extent that the natural form or stability of the commodity undergoes a substantial change. The act of peeling, cooling, slicing, dicing, or applying material to prevent oxidation does not constitute "other processing." The terms "Idaho Utility" grade and "Oregon Utility" grade shall have the same meaning as when used in the respective standards for potatoes for the respective States. Other terms used in this section shall have the same meaning as when used in Marketing Agreement No. 98 and Order No. 945, both as amended.

(i) *Applicability to imports.* Pursuant to § 8e of the act and § 980.1 "Import regulations" (7 CFR 980.1), Irish potatoes of the long varieties imported during the effective period of this section shall meet the grade, size, quality and maturity requirements specified in paragraphs (a) and (b) of this section.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated August 10, 1977, to become effective August 16, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MILK), DEPARTMENT OF AGRICULTURE

[Milk Order No. 11; Docket No. AO-251-A20]

PART 1011—MILK IN THE TENNESSEE VALLEY MARKETING AREA

Order Amending Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action amends the order based on a cooperative association's proposals considered at a public hearing on March 24, 1977. The amendments provide for a "base-excess" plan for paying producers. Under the plan, each producer's average daily delivery of milk in September through December would be his "base". In the following March through June, each producer would be paid the order's higher uniform base price for milk deliveries up to his base and a lower price for any excess milk. The plan is aimed at providing an incentive to producers to even out their milk production through the year.

EFFECTIVE DATE: September 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Irving E. Sutin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250. (202-447-4829).

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing, issued February 28, 1977; published March 3, 1977 (42 FR 12184).

Recommended Decision, issued June 20, 1977; published June 23, 1977 (42 FR 31797).

Final Decision, issued July 27, 1977.

FINDINGS AND DETERMINATIONS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of the said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Tennessee Valley marketing area.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order effective not later than September 1, 1977. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of this order are known to handlers. The recommended decision of the Acting Administrator was issued June 20, 1977, and the decision of the Assistant Secretary containing all amendment provisions of this order was issued July 27, 1977. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing,

it is hereby found and determined that good cause exists for making this order amending the order effective September 1, 1977, and that it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER. (Sec. 553(d), Administrative Procedure Act, 5 U.S.C. 551–559)

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in Sec. 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as hereby amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof, the handling of milk in the Tennessee Valley marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid, order, as amended, and as hereby further amended, as follows:

1. A heading and five new sections (§§ 1011.90, 1011.91, 1011.92, 1011.93 and 1011.94) are added as follows:

BASE-EXCESS PLAN

§ 1011.90 Base milk.

"Base milk" means the producer milk of a producer in each month of March through June that is not in excess of the producer's base multiplied by the number of days in the month.

§ 1011.91 Excess milk.

"Excess milk" means the producer milk of a producer in each month of March through June in excess of the producer's base milk for the month, and shall include all the producer milk in such months of a producer who has no base.

§ 1011.92 Computation of base for each producer.

(a) Subject to § 1011.93, the base for each producer shall be an amount obtained by dividing the total pounds of his producer milk during the immediately preceding months of September through December by the number of days' production represented by such producer milk or by 100, whichever is more.

(b) The base for a producer whose milk was delivered to a nonpool plant that became a pool plant after the beginning of the base-forming period (September–December) shall be calculated as if the plant were a pool plant for the entire base-forming period. A base thus assigned shall not be transferable.

§ 1011.93 Base rules.

(a) Except as provided in § 1011.92(b) and in paragraph (b) of this section, a base may be transferred in its entirety or in amounts of not less than 300 pounds effective on the first day of the month following the date on which an application for such transfer is received by the market administrator. Such application shall be on a form approved by the market administrator and signed by the baseholder or his heirs and the person to whom the base is to be transferred. If a base is held jointly, the application shall be signed by all joint holders or their heirs.

(b) A producer who transferred base on or after February 1 may not receive by transfer additional base that would be applicable during March through June of the same year. A producer who received base by transfer on or after February 1 may not transfer a portion of his base to be applicable during March through June of the same year, but may transfer his entire base.

(c) The base established by a partnership may be divided between the partners on any basis agreed to in writing by them if written notification of the agreed-upon division of base signed by each partner is received by the market administrator prior to the first day of the month in which such division is to be effective.

(d) The base assigned a person who was a producer during any of the immediately preceding months of September through December may be increased to 90 percent of his average daily producer milk deliveries in the month immediately preceding the month during which a condition described in paragraph (d) (1), (2) or (3) of this section occurred, providing such producer submitted to the market administrator in writing on or before March 1 a statement that established to the satisfaction of the market administrator that in the immediately preceding September through December base-forming period the amount of milk produced on his farm was substantially reduced because of conditions beyond his control, which resulted from:

(1) The loss by fire or windstorm of a farm building used in the production of milk on his farm;

(2) Brucellosis, bovine tuberculosis or other infectious diseases in his milking herd as certified by a licensed veterinarian; or

(3) A quarantine by a Federal or State authority that prevents him from supplying milk from his farm to a plant.

§ 1011.94 Announcement of established bases.

On or before February 1 of each year, the market administrator shall calculate a base for each person who was a producer during any of the immediately preceding months of September through December and shall notify each producer and the handler receiving milk from him of the base established by the producer. If requested by a cooperative association, the market administrator shall notify the cooperative association of each producer-member's base.

2. Section 1011.32 is revised as follows:

§ 1011.32 Other reports.

(a) Each handler described in § 1011.9 (a), (b) and (c) shall report to the market administrator on or before the 6th day after the end of each month of March through June the aggregate quantity of base milk received from producers during the month, and on or before the 20th day after the end of each month of March through June the pounds of base milk received from each producer during the month.

(b) In addition to the reports required pursuant to paragraph (a) of this section and §§ 1011.30 and 1011.31, each handler shall report such other information as the market administrator deems necessary to verify or establish each handler's obligation under the order.

3. Section 1011.61 is revised as follows

§ 1011.61 Computation of uniform price (including weighted average price and uniform prices for base and excess milk).

(a) The market administrator shall compute the weighted average price for each month and the uniform price for each month of July through February per hundredweight for milk of 3.5 percent butterfat content as follows:

(1) Combine into one total the values computed pursuant to § 1011.60 for all handlers who filed the reports prescribed in § 1011.30 for the month and who made the payments pursuant to § 1011.71 for the preceding month;

(2) Add one-half the unobligated balance in the producer-settlement fund;

(3) Add an amount equal to the total value of the location adjustments computed pursuant to § 1011.75;

(4) Divide the resulting amount by the sum of the following for all handlers included in these computations;

(i) The total hundredweight of producer milk; and

(ii) The total hundredweight for which a value is computed pursuant to § 1011.60 (f); and

(5) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The resulting figure, rounded to the nearest cent, shall be the weighted average price for each month and the uniform price for the months of July through February.

(b) For each month of March through June, the market administrator shall compute the uniform prices per hundredweight for base milk and for excess milk, each of 3.5 percent butterfat content, as follows:

(1) Compute the total value of excess milk for all handlers included in the computations pursuant to paragraph (a)(1) of this section as follows:

(i) Multiply the hundredweight quantity of excess milk that does not exceed

the total quantity of such handlers' producer milk assigned to Class III milk by the Class III price;

(ii) Multiply the remaining hundredweight quantity of excess milk that does not exceed the total quantity of such handlers' producer milk assigned to Class II milk by the Class II price;

(iii) Multiply the remaining hundredweight quantity of excess milk by the Class I price; and

(iv) Add together the resulting amounts;

(2) Divide the total value of excess milk obtained in paragraph (b)(1) of this section by the total hundredweight of such milk and adjust to the nearest cent. The resulting figure shall be the uniform price for excess milk;

(3) From the amount resulting from the computations pursuant to paragraph (a)(1) through (3) of this section, subtract an amount computed by multiplying the hundredweight of milk specified in paragraph (a)(4)(ii) of this section by the weighted average price;

(4) Subtract the total value of excess milk determined by multiplying the uniform price obtained in paragraph (b)(2) of this section times the hundredweight of excess milk from the amount computed pursuant to paragraph (b)(3) of this section;

(5) Divide the amount calculated pursuant to paragraph (b)(4) of this section by the total hundredweight of base milk included in these computations; and

(6) Subtract not less than 4 cents nor more than 5 cents from the price computed pursuant to paragraph (b)(5) of this section. The resulting figure, rounded to the nearest cent, shall be the uniform price for base milk.

4. Section 1011.62 is revised as follows:

§ 1011.62 Announcement of uniform prices and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 10th day after the end of each month the applicable uniform prices pursuant to § 1011.61 for such month.

§ 1011.71 [Amended]

5. In § 1011.71, paragraph (a)(2)(i) is amended by replacing the word "price" with the word "prices" and paragraph (a)(2)(ii) is amended by replacing the words "uniform price" with the words "weighted average price."

6. In § 1011.73, paragraph (a)(1), the introductory text of paragraph (a)(2), paragraph (c) (1) and (2), and paragraph (d) are revised as follows:

§ 1011.73 Payments to producers and to cooperative associations.

(a) * * *

(1) On or before the last day of each month, for milk received during the first 15 days of the month from such producer who has not discontinued delivery of milk to such handler before the 25th day of the month, at not less than the Class III price for the preceding month or 90 percent of the weighted average price for the preceding month, whichever is higher, less proper deductions authorized in writing by the producer; and

(2) On or before the 15th day of the following month, an amount equal to not less than the uniform price(s), as adjusted pursuant to §§ 1011.74 and 1011.75, multiplied by the hundredweight of milk or base milk and excess milk received from such producer during the month, subject to the following adjustments:

* * * * * * *

(c) * * *

(1) On or before two days prior to the last day of the month for milk received during the first 15 days of the month, not less than the Class III price for the preceding month or 90 percent of the weighted average price for the preceding month, whichever is higher; and

(2) On or before the 13th day of the following month for milk received during the month, not less than the appropriate uniform price(s) as adjusted pursuant to §§ 1011.74 and 1011.75, less any payments made pursuant to paragraph (c)(1) of this section.

(d) In making payments for producer milk pursuant to this section, each handler shall furnish each producer or cooperative association from whom he has received milk a supporting statement in such form that it may be retained by the recipient which shall show:

(1) The month and identity of the producer;

(2) The daily and total pounds and the average butterfat content of producer milk;

(3) For the months of March through June the total pounds of base milk received from the producer;

(4) The minimum rate(s) at which payment to the producer is required pursuant to this order;

(5) The rate(s) used in making the payment if such rate(s) is other than the applicable minimum rate(s);

(6) The amount, or the rate per hundredweight, and nature of each deduction claimed by the handler; and

(7) The net amount of payment to such producer or cooperative association.

§ 1011.74 [Amended]

7. Section 1011.74 is amended by replacing the words "uniform price" with the words "uniform price(s)."

8. Section 1011.75 is revised as follows:

§ 1011.75 Plant location adjustments for producers and on nonpool milk.

(a) In making payments required pursuant to § 1011.73, the uniform price and the uniform price for base milk pursuant to § 1011.61 for the month shall be adjusted by the amounts set forth in § 1011.52 according to the location of the plant where the milk being priced was received.

(b) For purposes of computing the value of other source milk pursuant to § 1011.71, the weighted average price shall be adjusted by the amount set forth in § 1011.52 that is applicable at the location of the nonpool plant from which the milk was received, except that the adjusted weighted average price shall not be less than the Class III price.

§ 1011.76 [Amended]

9. In § 1011.76, paragraph (a)(4) is amended by replacing the words "uniform price" with the words "weighted average price" in the two places they appear in paragraph (a)(4).

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Effective date: September 1, 1977.

Signed at Washington, D.C., on August 8, 1977.

ROBERT H. MEYER,
Assistant Secretary for Marketing Services.

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 82—EXOTIC NEWCASTLE DISEASE; AND PSITTACOSIS OR ORNITHOSIS IN POULTRY

Area Quarantined

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to quarantine a portion of Kern County in California because of the existence of exotic Newcastle disease. Exotic Newcastle disease was confirmed in Kern County, Calif., August 7, 1977. Therefore, in order to prevent the dissemination of exotic Newcastle disease it is necessary to quarantine the infested area.

EFFECTIVE DATE: August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. M. A. Mixson, USDA, APHIS, VS, Emergency Programs, Room 748, Federal Building, Hyattsville, Md. 20782 (301–436–8073).

SUPPLEMENTARY INFORMATION: This amendment quarantines a portion of Kern County in California because of the existence of exotic Newcastle disease. Therefore, the restrictions pertaining to the interstate movement of poultry, mynah, and psittacine birds, and birds of all other species under any form of confinement, and their carcasses and parts thereof, and certain other articles, from quarantined areas, as contained in 9 CFR Part 82, as amended, will apply to the quarantined area.

Accordingly, Part 82, Title 9, Code of Federal Regulations, is hereby amended in the following respect:

In § 82.3, the introductory portion of paragraph (a) is amended by adding thereto the name of the State of California and a new paragraph (a)(3) relating to the State of California is added to read:

§ 82.3 Areas quarantined.

(a) * * *

(3) *California.* The premises of Exotic Birds and Supplies located at 2413 and 2415 Alta Vista Drive, Bakersfield, Kern County.

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132 (21 U.S.C. 111–113, 115, 117, 120, 123–126, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141.)

The amendment imposes certain restrictions necessary to prevent the interstate spread of exotic Newcastle disease, a communicable disease of poultry, and must be made effective immediately to accomplish its purpose in the public interest. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and contrary to the public interest, and good cause is found for making the amendment effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 9th day of August 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

NORVAN L. MEYER,
Acting Deputy Administrator, Veterinary Services.

[FR Doc.77-23386 Filed 8-11-77;8:45 am]

Title 12—Banks and Banking

CHAPTER III—FEDERAL DEPOSIT INSURANCE CORPORATION

PART 343—INSURED STATE NONMEMBER BANKS WHICH ARE MUNICIPAL SECURITIES DEALERS

Regulations

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Adoption of regulations.

SUMMARY: The Federal Deposit Insurance Corporation has adopted regulations and accompanying forms and instructions which establish the method to be used by State banks insured by the Federal Deposit Insurance Corporation and not a member of the Federal Reserve System ("insured State nonmember banks") which are municipal securities dealers and their associated perons in complying with the professional qualifications rules of the Municipal Securities Rulemaking Board. The detailed system of records to be created through operation of the regulations will enable the Federal Deposit Insurance Corporation to effectively monitor this compliance.

DATES: The effective date of these regulations is September 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Judith E. Minsker, Attorney, Legal Division, Federal Deposit Insurance Corporation, Washington, D.C. 20429, 202–389–4261.

SUPPLEMENTARY INFORMATION: On March 30, 1977, the Federal Deposit Insurance Corporation ("FDIC") published for comment in the FEDERAL REGISTER (42 FR 16823) proposed 12 CFR Part 343, requiring insured State nonmember banks which are municipal securities dealers to file with the FDIC certain information about those persons who are or seek to be associated with these dealers as municipal securities principals or municipal securities representatives. Proposed Part 343 included two forms, with instructions, designed for the collection of the required information. Form MSD–4 was proposed to report a person's existing or prospective association with the dealer in a given capacity, and Form MSD–5 to report the termination of that association.

Proposed Part 343 was identical in all significant respects to proposals published the same day by the Board of Governors of the Federal Reserve System ("FED") and the Comptroller of the Currency ("Comptroller") for bank municipal securities dealers and associated persons under their respective jurisdictions. The FED, the Comptroller and the FDIC cooperated in drafting the forms and establishing a uniform record processing system in order to assure equal regulation among all classes of bank municipal securities dealers. As discussed more fully in the preamble to proposed Part 343, the three agencies expect to use the computer data base and processing facilities of the National Association of Securities Dealers ("NASD") to analyze, store, and retrieve the information filed by bank municipal securities dealers.

DISCUSSION OF COMMENTS

A. All comments received by the Comptroller, the FED and the FDIC on their respective proposals were exchanged and collectively considered in order to maintain the uniformity of the forms, instructions, and procedures which had been proposed. As here adopted, Part 343 incorporates several changes from the March 30, 1977 proposal in response to the comments received, as discussed below.

1. For purposes of Forms MSD–4 and MSD–5 and the respective instructions, the term "bank dealers" has been replaced by "bank municipal securities dealers." It includes all municipal securities dealers for which the Comptroller, the FED and the FDIC are the appropriate regulatory agencies under Section 3(a)(34) of the Securities Exchange Act of 1934 ("the Act") [15 U.S.C. 78c(a)(34)].

This change should minimize questions about filing requirements for those municipal securities dealers which are sometimes erroneously referred to as "bank dealers," but for which the Securities and Exchange Commission ("SEC"), not one of the Federal banks regulatory agencies, is the appropriate regulatory agency.

2. The record retention provisions of Part 343 have been clarified to require municipal securities dealers filing documents with the FDIC under Part 343 to retain a copy of each filing for at least three years following termination of the individual to whom the filing relates. This change tracks the record retention requirements of Municipal Securities Rulemaking Board ("MSRB") Rule G–7(e).

3. The instructions to Forms MSD–4 and MSD–5 have been changed to require that only the original, not the copies, need be manually signed.

4. A slight change in the wording of Item 6 (formerly Item 8) of Form MSD–4 allows a person to apply for qualification as both a municipal securities principal and representative by means of a single form.

5. Item 7 (formerly Item 9) of Form MSD–4, which describes the functions to be performed by the applicant, has been expanded to include three more activity categories. This reflects recent changes in the MSRB professional qualification rules.

6 In Item 7 (formerly Item 8) of Form MSD–5, the termination categories "permitted to resign" and "voluntary" have been combined under the single term "resigned." Another change in this item specifies that bank municipal securities dealers must furnish details about the reason for termination only if it is related to an actual or probable violation of banking or securities law.

7. The effective date of Part 343 has been changed from September 10, 1977 to September 15, 1977, to correspond with the dates set by the FED and the Comptroller. It should be noted that the effective date of MSRB Rule G–7 is September 1, 1977. Rule G–7 in part requires municipal securities dealers to obtain background and qualification information from their associated persons, but does not require that this information be filed with the appropriate regulatory agencies. Since it is anticipated that printed Forms MSD–4 and MSD–5 will be available by mid-August, bank municipal securities dealers will be able to use Form MSD–4 to comply with MSRB Rule G–7 by September 1 and still have an additional two weeks, until September 15, within which to properly assemble the forms and data for formal filing with the Comptroller, FED or FDIC, as appropriate.

8. Several minor editorial changes have also been made in Part 343 to correct errors and clarify some of its provisions.

B. The following comments were carefully considered but not adopted for the reasons given.

1. Concern about the effect of Item 10 (now Item 8) of Form MSD–4 on the privacy of individuals appeared in many of the comments. This item requires the employing bank municipal securities dealers to verify the employment information provided by the applicant by contacting the applicant's former employers.

One commentator suggested that applicants be required to execute several authorizations and certifications as part of Form MSD–4, similar to the format found in the securities industry's Form U–4. The employer inquiry language in Form MSD–4 is based on the explicit requirements of MSRB Rule G–7. Municipal securities dealers may well be able to resolve their privacy concerns through their own personnel practices, including perhaps the execution of appropriate authorization documents by an applicant, as long as these practices do not conflict with MSRB Rule G–7.

Another commentator was concerned that responses to inquiries of former employers may be less than candid, if received at all, because of the potentially sensitive nature of employee information. The extent of a municipal securities dealer's obligation under MSRB Rule G–7 and Form MSD–4 is to make a good-faith attempt to obtain appropriate information. On the other hand, MSRB Rule G–7 does impose an obligation on municipal securities dealers who receive these inquiries to respond to the extent required by that rule. Existing personnel practices which limit the information given out in such cases may conflict with Rule G–7.

2. One commentator proposed that a definition of the term "municipal securities dealer" be included in the regulations and that the definition contain considerably more detail than Section 3(a)(30) of the Act. The Act requires municipal securities dealers to register with the SEC, and that agency, not the bank regulatory agencies, has the authority to further define the term. The SEC did this in Securities Exchange Act Release 34–11742 (October 15, 1975), and subsequently its staff has issued interpretive letters.

3. Comments on Form MSD–4 that some of the activities listed in Item 9 (now Item 7) could include "operational personnel," and that educational and residential histories are not meaningful, did not result in any changes because both items reflect the requirements of the MSRB professional qualification rules.

4. A suggestion that Form MSD–4 include a check-off box labeled "grandfathered" was not followed because the form already contains informational items which will indicate whether an applicant is in fact "grandfathered" under MSRB rules.

5. A comment that more space be provided on Forms MSD–4 and MSD–5 for answers to some items was not followed because of a desire to keep the forms as short as possible. Attachment sheets may be used when necessary, as explained in the instructions to the forms.

6. A suggestion that documents filed under Part 343 be considered "filed" when mailed rather than when received was not followed in order to be consistent with long-established filing procedures of the SEC, because Forms MSD–4, and MSD–5 are also required to be filed with the SEC. By special arrangement, the SEC intends to accept filing with the appropriate bank regulatory agency as meeting this filing requirement. Upon receipt of Form MSD–4 or MSD–5, a copy will be forwarded to the SEC by the appropriate bank regulatory agency.

7. All Part 343 filings made by a given bank municipal securities dealer will contain the identity, address and registration number of the dealer. One commentator was concerned that a change in any of these items might require the filing of an amendment to every previously filed document, and suggested that a single "letter amendment" be permitted to accomplish this.

The instructions in Part 343 governing the preparation and filing of amendments are intended to track the requirements of MSRB Rule G–7, which requires updating of the information furnished to municipal securities dealers by their associated persons. This would not apply to the situation posed. Changes in dealer identity, address or registration must be reported to the SEC as amendments to the dealer registration form, and as such would be reflected in the computerized dealer registration list maintained by the SEC and available to the bank regulatory agencies. Such changes will be entered into the Part 343 files by the FDIC as a matter of course.

8. Several comments concerning specific language in Part 343 require interpretations of MSRB rules. The FDIC intends to submit questions of this nature to the MSRB for resolution.

Finally, one commentator asked about Part 343 filing procedures. The FDIC considers the filing requirements to be adequately explained in Section 343.3, in the instructions to Forms MSD–4 and MSD–5, and in the lengthy preamble to Part 343, in the FEDERAL REGISTER (42 FR 16823) on March 30, 1977.

C. In addition to changes made in response to comments received, the following changes were made by the staffs of the FED, Comptroller and FDIC:

1. In Instruction 1 of the General Instructions to Form MSD–4 and MSD–5, the definition of bank municipal securities dealer was amended to delete unnecessary verbage.

2. In Instruction 3 of the General Instructions to MSD–4 and MSD–5, reference to bank holding companies was deleted at the request of the FED.

The FDIC urges municipal securities dealers to thoroughly familiarize themselves with MSRB Rule G–7 in order to understand the interaction between that rule and Part 343.

AVAILABILITY OF FORMS

The FDIC expects to distribute printed copies of Forms MSD–4 and MSD–5 to municipal securities dealers under its jurisdiction prior to the effective date of MSRB Rule G–7, September 1, 1977. Additional copies will be available from the FDIC as needed after this initial distribution.

PRIVACY ACT

The filing requirements of Part 343 will create a system of records which may be subject to the Privacy Act of 1934, 5 U.S.C. 552a. A detailed notice of this proposed system of records was published on April 12, 1977 at 42 FR 19209.

The FDIC has adopted the system of records with only minor changes. A formal notice of adoption which lists the routine uses to be made of the information in the system is to be published in the FEDERAL REGISTER. Affected persons are urged to read the full text of that notice.[1]

RULEMAKING PROCEDURE

The FDIC finds that the changes made in the Part 343 proposal of March 30, 1977, respond to public comments and otherwise consist of corrections and clarifications which do not impose additional burdens on affected persons. Accordingly, further publication in this rulemaking process is not required by the relevant provisions of 5 U.S.C. § 553.

EFFECTIVE DATE

The effective date of this Part 343 is September 15, 1977.

REGULATIONS

Under the authority of Sections 15B(c)(5), 17, and 23 of the Securities Exchange Act of 1934 (15 U.S.C. §§ 78o–4(c)(5), 78q, and 78w) and the general authority of the Federal Deposit Insurance Act, 12 U.S.C. 1811 et seq., the FDIC hereby amends Chapter III of Title 12 of the Code of Federal Regulations by adopting new 12 CFR Part 343 as follows:

343.1 Scope of part.
343.2 Definitions.
343.3 Filing of Form MSD–4, Amending Statements, and Form MSD–5.
343.4–343.9 [Reserved]

FORMS

343.10 Uniform Application for Municipal Securities Principal or Municipal Securities Representative Associated with a Bank Municipal Securities Dealer (Form MSD–4).
343.11 Uniform Termination Notice for Municipal Securities Principal or Municipal Securities Representative Associated with a Bank Municipal Securities Dealer (Form MSD–5).

§ 343.1 Scope of Part.

(a) This part is issued by the Federal Deposit Insurance Corporation (the "Corporation") pursuant to those provisions of the Securities Exchange Act of 1934 (15 U.S.C. § 78a et seq.) which provide for the regulation of bank municipal securities dealers and their activities.

(b) This Part shall apply to all State banks insured by the Federal Deposit Insurance Corporation and not a member of the Federal Reserve System, or separately identifiable departments or divisions of such banks, which act as municipal securities dealers.

§ 343.2 Definitions.

For purposes of this paragraph, the terms herein have the meanings given them in section 3(a) of the Securities Exchange Act of 1934 (15 U.S.C. § 78c(a)) and the rules of the Municipal Securities Rulemaking Board. The term Act shall mean the Securities Exchange Act of 1934 (15 U.S.C. § 78a et seq.).

§ 343.3 Filing of Form MSD–4, Amending Statements, and Form MSD–5.

(a) On and after September 15, 1977, an insured State nonmember bank, or a subsidiary or a department or a division thereof, which is a municipal securities dealer shall not permit a person to be associated with it as a municipal securities principal or municipal securities representative unless it has filed with the Corporation an original and two copies of Form MSD–4, "Uniform Application for Municipal Securities Principal or Municipal Securities Representative Associated with a Bank Municipal Securities Dealer", completed in accordance with the instructions contained therein, for that person. Form MSD–4 is prescribed by the Corporation for purposes of paragraph (b) of Municipal Securities Rulemaking Board Rule G–7, "Information Concerning Associated Persons".

(b) Whenever a bank municipal securities dealer receives a statement pursuant to paragraph (c) of Municipal Securities Rulemaking Board Rule G–7, "Information Concerning Associated Persons", ("amending statement") from a person for whom it has filed a Form MSD–4 with the Corporation pursuant to subparagraph (a) of this Part 343.3, such dealer shall, within ten days thereafter, file three copies of the amending statement with the Corporation accompanied by an original and two copies of a transmittal letter which includes the name of the dealer and a reference to the material transmitted, identifying the person involved, and is signed by a municipal securities principal associated with the dealer.

(c) Within thirty days after the termination of the association of a municipal securities principal or municipal securities representative with a bank municipal securities dealer which has filed a Form MSD–4 with the Corporation for that person pursuant to subparagraph (a) of this Part 343.3, such dealer shall file an original and two copies of a notification of termination with the Corporation on Form MSD–5, "Uniform Termination Notice for Municipal Securities Principal or Municipal Securities Representative Associate with a Bank Municipal Securities Dealer", completed in accordance with the instructions contained therein.

(d) A bank municipal securities dealer which files a Form MSD–4, Form MSD–5, or an amending statement with the Corporation under this Part shall retain for its own records a copy of each such Form MSD–4, Form MSD–5, or amending statement for at least three years after termination of the associated person with respect to whom the filing was made.

(e) Forms MSD–4, Forms MSD–5 and amending statements are to be filed with Director, Division of Bank Supervision, Federal Deposit Insurance Corporation, Washington, D.C. 20429. The date that the Corporation receives a Form MSD–4, Form MSD–5, or amending statement shall be the date of filing. A Form MSD–4, Form MSD–5, or amending statement which is not prepared and executed in accordance with the applicable requirements may be returned as unacceptable for filing. Acceptance for filing shall not constitute any finding that a Form MSD–4, Form MSD–5 or amending statement has been completed in accordance with the applicable requirements or that any information contained therein is true, current, complete or not misleading. Every Form MSD–4, Form MSD–5, or amending statement filed with the Corporation under this Part shall constitute a filing with the Securities and Exchange Commission for purposes of section 17(c)(1) of the Act (15 U.S.C. § 78q(c)(1)) and a "report", "application", or "document" within the meaning of section 32(a) of the Act (15 U.S.C. 78ff(a)).

§ 343.4–343.9 [Reserved]

FORMS

§ 343.10 Uniform application for municipal securities principal or municipal securities representative associated with a bank municipal securities dealer (Form MSD–4).

INSTRUCTIONS FOR COMPLETING AND FILING FORM MSD–4

General instructions. 1. As used in these instructions and Form MSD–4:

[1] Pursuant to the annual publication requirement of 5 U.S.C. 552a(e)(4), FDIC has submitted that notice to the Office of the Federal Register who will publish it in the daily FEDERAL REGISTER at a later date.

A. The term "bank municipal securities dealer" means a municipal securities dealer which is a bank or a subsidiary or a department or division of a bank.

B. The term "applicant" means a person who is or seeks to be associated with a bank municipal securities dealer as a municipal securities principal or municipal securities representative.

2. Form MSD–4 is to be used by bank municipal securities dealers and persons who are or seek to be associated with such dealers as municipal securities principals or municipal securities representatives to comply with Municipal Securities Rulemaking Board Rule G–7, "Information Concerning Associated Persons," and rules and regulations of the Board of Governors of the Federal Reserve System, the Comptroller of the Currency, or the Federal Deposit Insurance Corporation which require the filing of Form MSD–4.

3. Bank municipal securities dealers are required to file Form MSD–4 with the appropriate regulatory agency as set forth below:

A. A bank municipal securities dealer which is a State member bank of the Federal Reserve System or a subsidiary or a department or division of any such bank is required to file with the Board of Governors of the Federal Reserve System.

B. A bank municipal securities dealer which is a bank insured by the Federal Deposit Insurance Corporation (other than a bank which is a member of the Federal Reserve System) or a subsidiary or department or division of any such bank is required to file with the Federal Deposit Insurance Corporation.

C. A bank municipal securities dealer which is a national bank or bank operating under the Code of Law for the District of Columbia or a subsidiary or a department or division of any such bank is required to file with the Comptroller of the Currency.

4. Copies of Form MSD–4 may be obtained from any one of the appropriate regulatory agencies listed in Instruction 3.

5. An original and two copies of Form MSD–4 and any attachments are to be filed with the appropriate regulatory agency listed in Instruction 3. A bank municipal securities dealer filing Form MSD–4 shall retain an exact copy in its records for at least three years after the applicant's employment or other association with such dealer has terminated.

6. If more space is needed to complete an answer, an appropriate designation shall be entered in the answer space provided, and one or more attachment sheets shall be used to complete the response. All attachments shall be submitted in the same format as the items to which response is made and should be typed on white 8½ by 11 inch paper. Answers to more than one question may appear on an attachment sheet if the questions are clearly identified. Attachments should be paginated and the name of both the applicant and the bank municipal securities dealer should appear on every attachment sheet.

7. Form MSD–4 and any attachments may be duplicated by any method which produces legible copies of type size identical to that of the Form MSD–4 on white 8½ by 11 inch paper.

8. Form MSD–4 shall be manually signed on page one by a municipal securities principal of the employing bank municipal securities dealer and on page three by the applicant.

9. All items on Form MSD–4 are to be completed, except that disclosure of one's social security number is not mandatory. The date on which the Form MSD–4 is received by the appropriate regulatory agency shall be the date of filing. A Form MSD–4 which is not prepared and executed in accordance with the applicable requirements may be returned as unacceptable for filing. Acceptance for filing shall not constitute any finding that a Form MSD–4 has been completed in accordance with those requirements or that any information reported on the form is true, current, complete, or not misleading.

10. Section 17(c)(1) of the Securities Exchange Act of 1934 requires every bank municipal securities dealer which files any application, notice, report, or document with its appropriate regulatory agency to file a copy of that application, notice, report, or document with the Securities and Exchange Commission. The Securities and Exchange Commission and the appropriate regulatory agencies listed in Instruction 3 have developed procedures under which the latter will transmit a copy of any application, notice, report, or document filed with them by a bank municipal securities dealer to the Securities and Exchange Commission. Accordingly, when this form is filed with the appropriate regulatory agency, it will be deemed to have been filed with the Securities and Exchange Commission.

Instructions to Specific Items on Form MSD–4

11. Items 2 through 8 are to be completed by the bank municipal securities dealer employing or proposing to employ the applicant named in Item 1. All other items are to be completed by the applicant.

12. Item 3: Give the address of the office of the bank municipal securities dealer in which the applicant is or will be employed.

13. Item 5: Indicate the appropriate regulatory agency as set forth in Instruction 3.

14. Item 6: Municipal Securities Rulemaking Board Rule G–3, "Classification of Principals and Representatives; Numerical Requirements; Testing," provides a description of the functions performed by a municipal securities principal or municipal securities representative.

15. Item 8: This item need not be completed if the applicant was employed by the bank municipal securities dealer named in Item 2 on December 3, 1976, and continuously thereafter in the capacity or capacities for which qualification is requested in Item 6.

16. Item 17: All time periods must be accounted for.

17. Item 26: (a) Although this item relates only to convictions during the past ten years, it should be noted that section 19 of the Federal Deposit Insurance Act (12 U.S.C. § 1829) prohibits any insured bank, except with the written consent of the Federal Deposit Insurance Corporation, from employing any person who has ever been convicted of a criminal offense involving dishonesty or breach of trust.

(b) Paragraph (iv) of this item relates only to convictions within the past ten years under sections 152, 1341, 1342, 1343 or Chapters 25 or 47 of Title 18, United States Code.

Form MSD–4 Page 1 of 3

UNIFORM APPLICATION FOR MUNICIPAL SECURITIES PRINCIPAL OR MUNICIPAL SECURITIES REPRESENTATIVE ASSOCIATED WITH A BANK MUNICIPAL SECURITIES DEALER

1. APPLICANT NAME _____ (LAST FIRST MIDDLE (If none, so specify))

2. BANK MUNICIPAL SECURITIES DEALER:

A. NAME _____

B. REGISTRATION NUMBER _____

C. MAIN ADDRESS _____

3. OFFICE OF EMPLOYMENT OF APPLICANT _____

4. DATE OF EMPLOYMENT OF APPLICANT _____

5. TO BE FILED WITH THE FOLLOWING (Indicate One):

Board of Governors of the Federal Reserve System ☐
Comptroller of the Currency ☐
Federal Deposit Insurance Corporation ☐

6. TYPE(S) OF QUALIFICATION REQUESTED: Municipal Securities Representative ☐ Municipal Securities Principal ☐

7. It is anticipated that the applicant will perform the following functions in the capacity indicated:

	Capacity: Supervisory	Capacity: Non-Supervisory
A. Underwriting, trading or sales of municipal securities:	☐	☐
B. Financial advisory or consultant services for issuers in connection with the issuance of municipal securities:	☐	☐
C. Research or investment advice with respect to municipal securities in connection with the activities described in (A) and (B) above:	☐	☐
D. Activities other than those specifically mentioned which involve communication, directly or indirectly, with public investors in municipal securities in connection with the activities described in (A) and (B) above:	☐	☐
E. Processing and clearance activities with respect to municipal securities:	☐	N/A
F. Maintenance of records involving activities described in (A) through (E) above:	☐	N/A
G. Training of municipal securities principals or municipal securities representatives:	☐	N/A

8. For the purpose of verifying the information furnished on this form by the applicant named in Item 1 above, this institution has made inquiry of all employers of the applicant during the immediately preceding three years, as set forth below, concerning the accuracy and completeness of the information provided, as well as the record and reputation of the applicant as related to the ability to perform the duties for which employed or to be employed:

EMPLOYER	NAME AND POSITION OF PERSON CONTACTED

Date _____ Print Name of Municipal Securities Principal _____ Signature of Municipal Securities Principal _____

DO NOT WRITE BELOW

Experience _____ Clearance _____
Further Training Required _____ Exam Taken: Date _____
Exam Required _____ Grade _____
Issue _____ Date Approved: Cond. _____
Exam Grade OK _____ Final _____

ACCEPTANCE OF THIS FORM FOR FILING SHALL NOT CONSTITUTE ANY FINDING THAT THE INFORMATION SUBMITTED HEREIN IS TRUE, CURRENT, COMPLETE, OR NOT MISLEADING. INTENTIONAL MISSTATEMENTS OR OMISSIONS OF FACT MAY CONSTITUTE FEDERAL CRIMINAL VIOLATIONS. (See 18 U.S.C. 1001, 1005, and 1007 and 15 U.S.C. 78ff.)

PERSONAL HISTORY OF APPLICANT

9. _____
Last Name First Middle

10. _____
Social Security Number
(Completion is not mandatory)

11. _____
Resident Street Address

12. _____
City State Zip

13. ____/____/____
Date of Birth

14. _____
Place of Birth

15. Any other name ever used or by which known: _____

16. EDUCATION

The following is a statement of all educational institutions attended starting with high school:

17. EMPLOYMENT HISTORY

The following is a complete, consecutive statement of all my business connections for the past ten years starting with my current position:

NAME OF EMPLOYER, COMPLETE ADDRESS AND TYPE OF BUSINESS	From Mo.	From Yr.	To Mo.	To Yr.	Position Held	Reason for Leaving	Full or Part Time

18. RESIDENTIAL HISTORY

The following is a complete, consecutive statement of all my residential addresses for the past ten years starting with my current residential address:

ADDRESS (Street, City, State, Zip Code)	From Mo.	From Yr.	To Mo.	To Yr.

19. A. Have you ever taken a qualification examination for municipal securities principals, municipal securities representatives or financial and operations principals prescribed by the Municipal Securities Rulemaking Board? If so, state below the type of examination and the approximate date taken:

Yes_____ No_____

_____ _____
Type of Examination Approximate Date

_____ _____
Type of Examination Approximate Date

B. Have you ever been exempt from or received a waiver of the requirement to take and pass an examination of the nature specified in question 19A? If so, state below the type of examination, the basis for such exemption or waiver, and, in the case of a waiver, the approximate date:

Yes_____ No_____

_____ _____ _____
Type of Examination Basis for Exemption or Waiver Approximate Date

_____ _____ _____
Type of Examination Basis for Exemption or Waiver Approximate Date

20. Are you currently bonded? Yes_____ No_____

IF THE ANSWER TO ANY OF THE FOLLOWING QUESTIONS IS YES, ATTACH COMPLETE DETAILS:

21. Have you ever been refused coverage under a fidelity bond or has any surety company paid out any funds on your coverage or cancelled such coverage?

Yes_____ No_____

22. Have you ever been denied membership, registration, license, permit, or certification by any federal or state securities or federal or state bank regulatory agency, any national securities exchange, registered securities association, or registered clearing agency?

Yes_____ No_____

23. Has any disciplinary action ever been taken against you, or any sanction imposed upon you, including any finding that you were a cause of any disciplinary action or violated any law, rule or regulation or were an aider, abettor or co-conspirator in any such violation, by any federal or state securities or federal or state bank regulatory agency, any national securities exchange, registered securities association, or registered clearing agency?

Yes_____ No_____

24. While you were associated in any capacity with any broker, dealer or municipal securities dealer:

A. Was its registration denied, suspended or revoked?

Yes_____ No_____

A. Was its membership in any national securities exchange, registered securities association, or registered clearing agency denied, suspended, or revoked, or was it expelled from any such organization?

Yes_____ No_____

25. Has any permanent or temporary injunction (including a cease and desist order) ever been entered against you or against any broker, dealer, or municipal securities dealer with which you were associated in any capacity when such injunction was entered enjoining conduct as an investment adviser, underwriter, broker, dealer or municipal securities dealer or as an affiliated person of any investment company, bank or insurance company, or any conduct related to such activities or any transactions in any security?

Yes_____ No_____

26. Have you been convicted within the past ten years of any felony or misdemeanor: (i) involving the purchase or sale of any security, the taking of a false oath, the making of a false report, bribery, perjury, burglary, or conspiracy to commit any such offense; (ii) arising out of the conduct of the business of a broker, dealer, municipal securities dealer, investment adviser, bank, insurance company, or fiduciary; (iii) involving larceny, theft, robbery, extortion, forgery, counterfeiting, fraudulent concealment, embezzlement, fraudulent conversion, or misappropriation of funds or securities; (iv) involving crimes of concealment of assets, false oaths or claims or bribery in a bankruptcy proceeding, mail fraud, fraud by wire including telephone, telegraph, radio or television, fraud or false statements?

Yes_____ No_____

Date_____ Signature of Applicant_____

FORM MSD-4 ACKNOWLEDGMENT

27. Applicant Name_____

28. Bank Municipal Securities Dealer Name_____

29. Bank Municipal Securities Dealer Address_____

30. Attention:_____

Receipt Stamp

WHEN THE FORM MSD-4 IS RECEIVED BY THE APPROPRIATE REGULATORY AGENCY, THIS ACKNOWLEDGMENT WILL BE STAMPED TO SHOW RECEIPT AND RETURNED TO THE PERSON NAMED IN ITEM 30. THE STAMPED ACKNOWLEDGMENT SHOULD BE RETAINED TO SUBSTANTIATE FILING.

§ 343.11 Uniform termination notice for municipal securities principal or municipal securities representative associated with a bank municipal securities dealer (Form MSD–5).

INSTRUCTIONS FOR COMPLETING AND FILING FORM MSD–5

1. As used in these instructions and Form MSD–5, the term "bank municipal securities dealer" means a municipal securities dealer which is a bank or a subsidiary or a department or division of a bank.

2. Form MSD–5 is intended for use by bank municipal securities dealers in reporting the termination of a municipal securities principal's or municipal securities representative's association with such a dealer.

3. Bank municipal securities dealers are required to file Form MSD–5 with the appropriate regulatory agency as set forth below:

A. A bank municipal securities dealer which is a State member bank of the Federal Reserve System, or a subsidiary or a department or division of any such bank, is required to file with the Board of Governors of the Federal Reserve System.

B. A bank municipal securities dealer which is a bank insured by the Federal Deposit Insurance Corporation (other than a bank which is a member of the Federal Reserve System) or a subsidiary or department or division of any such bank is required to file with the Federal Deposit Insurance Corporation.

C. A bank municipal securities dealer which is a national bank or bank operating under the Code of Law for the District of Columbia or a subsidiary or a department or division of any such bank is required to file with the Comptroller of the Currency.

4. Copies of Form MSD–5 may be obtained from any one of the appropriate regulatory agencies listed in Instruction 3.

5. An original and two copies of Form MSD–5 and any attachments are to be filed with the appropriate regulatory agency listed in Instruction 3 within 30 days after termination. A bank municipal securities dealer filing Form MSD–5 shall retain an exact copy in its records for at least three years after termination of the individual named in Item 1.

6. If more space is needed to complete an answer, an appropriate designation shall be entered in the answer space provided, and one or more attachment sheets shall be used to complete the response. All attachments shall be submitted in the same format as the items to which response is made and should be typed on white 8½ by 11 inch paper. Answers to more than one question may appear on an attachment sheet if the questions are clearly identified. Attachments should be paginated and the name of both the person terminated and the bank municipal securities dealer should appear on every attachment sheet.

7. Form MSD–5 and any attachments may be duplicated by any method which produces legible copies of type size identical to that of the Form MSD–5 on white 8½ by 11 inch paper.

8. Form MSD–5 shall be manually signed by a municipal securities principal of the employing bank municipal securities dealer.

9. All items on Form MSD–5 are to be completed, except that disclosure of the individual's social security number is not required if that information is unavailable. The date on which the Form MSD–5 is received by the appropriate regulatory agency shall be the date of filing A Form MSD–5 which is not prepared and executed in accordance with the applicable requirements may be returned as unacceptable for filing. Acceptance for filing shall not constitute any finding that a Form MSD–5 has been completed in accordance with those requirements or that any information reported on the form is true, current, complete, or not misleading.

10. Section 17(c)(1) of the Securities Exchange Act of 1934 requires every bank municipal securities dealer which files any application, notice, report, or document with its appropriate regulatory agency to file a copy of that application, notice, report, or document with the Securities and Exchange Commission. The Securities and Exchange Commission and the appropriate regulatory agencies listed in Instruction 3 have developed procedures under which the latter will transmit a copy of any application, notice, report, or document filed with them by a bank municipal securities dealer to the Securities and Exchange Commission. Accordingly, when this form is filed with the appropriate regulatory agency, it will be deemed to have been filed with the Securities and Exchange Commission.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Rev 6, Amdt. 14]

PART 120—BUSINESS LOAN POLICY

Loan Assistance to Cooperatives

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: This rule clarifies that all cooperatives, including farm cooperatives, must qualify as a group corporation to be eligible for financial assistance.

This question arose when Pub. L. 94–305 made agriculture eligible for SBA assistance. The intent of this rule is to establish the same eligibility rules for farm cooperatives as for other cooperatives.

DATE: Effective date: August 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard L. Wray, Financial Analyst, 202–653–6470.

SUPPLEMENTARY INFORMATION: The question of financial assistance for farm cooperatives arose when Pub. L. 94–305 made farmers small business concerns. A proposed rule was published on May 10, 1977, (42 FR 23614) to establish the same eligibility rules for farm cooperatives as for nonfarm cooperatives. Thus farm marketing and farm consumer cooperatives are just as ineligible as nonfarm marketing cooperatives or group corporations or nonfarm consumer cooperatives. No written objections to the proposed amendment were submitted.

Under the authority of Section 5(b)(6) of the Small Business Act (15 U.S.C. 634) Part 120, Chapter 1, Title 13 of the Code of Federal Regulations, § 120.2(d)(3) is amended to read as follows:

§ 120.2 Business Loans and Guarantees.

* * * * *

(d) Financial assistance will not be granted by SBA:

(1) * * *

(2) *

(3) If the applicant is an eleemosynary institution or other nonprofit enterprise: *Provided, however,* That this provision shall not be construed to bar financial assistance to a cooperative, including a farm cooperative, which meets the qualifications and requirements under § 122.9, of this Chapter. Consumer cooperatives are not eligible. An otherwise eligible small business concern will not become ineligible because it is owned in whole or in part by a nonprofit organization.

(Catalog of Federal Domestic Assistance Program No. 59.012 Small Business Loans.)

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

Adoption of Beneficial Ownership Disclosure Requirements

CFR Correction

In Title 17 of the Code of Federal Regulations, revised as of April 1, 1977, Parts 239, 240, and 249 are corrected to reflect the delaying in the effective date to August 31, 1977, for certain provisions announced in Securities Act Release No. 33–5808—Beneficial Ownership Disclosure Requirements, appearing at 42 FR 12342, March 3, 1977

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

1. Following § 239.11, appearing on CFR page 430, insert the following:

EFFECTIVE DATE NOTE.—At 42 FR 12349, in § 239.11, Form S–1 was amended, effective August 31, 1977

2. Following § 239.18, appearing on CFR page 431, insert the following:

EFFECTIVE DATE NOTE.—At 42 FR 12349, in § 239.18, Form S–11 was amended, effective August 31, 1977.

PART 240—GENERAL RULES AND REGULATIONS SECURITIES EXCHANGE ACT OF 1934

3. Following § 240.13d–1, appearing on CFR page 496, insert the following effective date note:

EFFECTIVE DATE NOTE.—Section 240.13d–1 was revised at 42 FR 12350, effective August 31, 1977. For the convenience of the user, the superseded text is set out as follows:

REGULATION 13D

§ 240.13–1 Filing of Schedule 13D (§240.13d–101).

Any person who, after acquiring directly or indirectly the beneficial ownership of any security of a class which is registered pursuant to section 12 of the Act, or any equity security of an insurance company which would have been required to be so registered except for the exemption contained in section 12(g)(2)(G) of the Act, or any equity security issued by a closed-end investment company registered under the Investment Company Act of 1940, is directly or indirectly the beneficial owner of more than 5 percentum of such class shall within 10 days after such acquisition, send to the issuer of the security at its principal executive office, by registered or certified mail, send to each exchange where the security is traded, and file with the Commission, a statement containing the information required by Schedule 13D (§ 240.13d–101) Eight copies of the statement shall be filed with the Commission Where an acquisition, not heretofore subject to this rule, was made subsequent to December 22, 1970, but prior to January 18, 1971, the specified statement shall be sent to the issuer and any exchange and, filed with the Commission not later than January 28, 1971 At the time of filing the statement, the person making the filing shall pay to the Commission a fee of $100, no part of which shall be refunded.

(15 U.S.C. 77f, 77g, 77j, 77s, 78m, 78n, (36 FR 976, Jan. 21, 1971, as amended at 37 FR 1472, Jan. 29, 1972).)

4. Following § 240.13d–2, appearing on CFR pages 496 and 497, insert the following effective date note, including superseded text:

EFFECTIVE DATE NOTE.—Section 240.13d–2 was revised at 42 FR 12350, effective August 31, 1977. For the convenience of the user, the superseded text is set forth as follows:

§ 240.13–2 Filing of amendments.

If any material change occurs in the facts set forth in the statement required by § 240.13d–1, the person who filed such statement shall promptly file with the Commission and send to the issuer and the exchange an amendment disclosing such change. Eight copies of each such amendment shall be filed with the Commission.

(33 FR 11016, Aug. 2, 1968, as amended at 34 FR 6101, Apr. 4, 1969.)

5. Following § 240.13d–3, appearing on CFR page 497, insert the following effective date note:

EFFECTIVE DATE NOTE.—Section 240.13d–3 was revised at 42 FR 12350, effective August 31, 1977. For the convenience of the user, the superseded text is set forth as follows:

§ 240.13d–3 Determination of ownership of specified percentages of a class of equity securities.

In determining, for the purposes of section 13(d) or section 14(d) [of the Act], whether a person is directly or indirectly the beneficial owner of securities of any class, such owner of securities of such class which such person shall be deemed to be the beneficial person has the right to acquire through the exercise of presently exercisable options, warrants or rights or through the conversion of presently convertible securities, or otherwise. The securities subject to such options, warrants, rights or conversion privileges held by a person shall be deemed to be outstanding for the purpose of computing the percentage of outstanding securities of the class owned by such person but shall not be deemed to be outstanding for the purpose of computing the percentage of the class owned by any other person.

(33 FR 14110, Sept. 18, 1968.)

6. Following § 240.13d–4, appearing on CFR page 497, insert the following effective date note:

EFFECTIVE DATE NOTE.—Section 240.13d–4 was revised at 42 FR 12351, effective August 31, 1977. For the convenience of the user, the superseded text is set forth as follows:

§ 240.13d–4 Exemption of acquisitions, pursuant to preemptive rights.

Acquisitions of securities of an issuer by a security holder who prior to such acquisition was the beneficial owner of more than 5 percent of the outstanding securities of the same class as those acquired shall be exempt from section 13(d) of the Act if the following conditions are met:

(a) The acquisition is made pursuant to pre-emptive subscription rights in an offering made to all holders of securities of the class to which the preemptive subscription rights pertain;

(b) The purchaser does not, through the exercise of such preemptive subscription rights, acquire more than his or its pro rata share of the securities offered; and

(c) The acquisition is duly reported pursuant to section 16(a) of the Act and the rule and regulations thereunder.

(Sec. 13, 32 Stat. 454; 15 U.S.C. 78m (34 FR 2354, Feb. 19, 1969, as amended at 36 FR 977, Jan. 21, 1971).)

7. Following § 240.13d–5, appearing on CFR pages 497 and 498, insert the following:

EFFECTIVE DATE NOTE.—Section 240.13d–5 was added at 42 FR 12351, March 3, 1977, effective August 31, 1977.

8. Following § 240.13d–6, appearing on CFR pages 498 and 499, insert the following:

EFFECTIVE DATE NOTE.—Section 240.13d–6 was added at 42 FR 12351, March 3, 1977, effective August 31, 1977.

9. Following § 240.13d–7, appearing on CFR page 499, insert the following:

EFFECTIVE DATE NOTE.—Section 240.13d–7 was added at 42 FR 12351, March 3, 1977, effective August 31, 1977.

10. Following § 240.13d–101, appearing on CFR pages 499 through 501 insert the following effective date note:

EFFECTIVE DATE NOTE.—Section 240.13d–101 was revised at 42 FR 12352, effective August 31, 1977. For the convenience of the user, the superseded text is set forth as follows:

§ 240.13d–101 Schedule 13D—Information to be included in statements filed pursuant to § 240.13d–1 or § 240.14d–1.

NOTES.—A. The item numbers and captions of the items shall be included but the text of the items are to be omitted. The answers to the items shall be so prepared as to indicate clearly the coverage of the items without referring to the text of the items. Answer every item. If an item is inapplicable or the answer is in the negative, so state.

B. If the statement is filed by a partnership, limited partnership, syndicate, or other group, the information called for by Items 2 to 6, inclusive, shall be given with respect to (1) each partner or any partnership or limited partnership, (2) each member of such syndicate or group and (3) each person controlling such partner or member. If a person referred to in (1), (2), or (3) is a corporation or the statement is filed by a corporation, the information called for by the abovementioned items shall be given with respect to each officer and director of such cooperation and each person controlling such corporation.

Item 1. Security and Issuer.

State the title of the class of equity securities to which this statement relates and the name and address of the insurer of such securities.

Item 2. Identity and Background.

State the following with respect to the person filing this statement:

(a) Name and business address;

(b) Residence address;

(c) Present principal occupation or employment and the name, principal business and address of any corporation or other organization in which such employment is carried on;

(d) Material occupations, positions, offices or employments during the last 10 years, giving the starting and ending dates of each and the name, principal business and address of any business corporation or other organization in which each such occupation/position, office, or employment was carried on; and

(e) Whether or not, during the last 10 years, such person has been convicted in a criminal proceeding (excluding traffic violations or similar misdemeanors) and, if so, give the dates, nature of conviction, name and location of court, and penalty imposed, or other disposition of the case. A negative answer to this subitem need not be furnished to security holders.

Item 3. Source and Amount of Funds or Other Consideration.

State the source and amount of funds or other consideration used or to be used in making the purchases, and if any part of the purchase price or proposed purchase price is represented or is to be represented by funds or other consideration borrowed or otherwise obtained for the purpose of acquiring, holding, or trading the securities, a description of the transaction and the names of the parties thereto.

Item 4. Purpose of transaction.

State the purpose or purposes of the purchase or proposed purchase of securities of the issuer. If the purpose or one of the purposes of the purchase or proposed purchase is to acquire control of the business of the issuer, describe any plans or proposals which the purchasers may have to liquidate the issuer, to sell its assets or to merge it with any other persons, or to make any other major change in its business or corporate structure, including, if the issuer is a registered close-end investment company, any plans or proposals to make any changes in its investment policy for which a vote would be required by section 13 of the Investment Company Act of 1940 (15 U.S.C. 80a–13).

Item 5. Interest in securities of the issuer.

State the number of shares of the security which are beneficially owned, and the number of shares concerning which there is a right to acquire, directly or indirectly, by (i) such persons, and (ii) each associate of such person, giving the name and address of each such associate. Furnish information as to all transactions in the class of securities to which this statement relates which were effected during the past 60 days by the person filing this statement and by its subsidiaries and their officers, directors and affiliated persons.

Item 6. Contracts, Arrangements, or Understanding With Respect to Securities of the Issuer.

Furnish information as to any contracts, arrangements, or understandings with any person with respect to any securities of the issuer, including but not limited to transfer of any of the securities, joint ventures, loan or option arrangements, puts or calls, guaranties of loans, guaranties against loss or guaranties of profits, division of losses or profits, or the giving or withholding of proxies, naming the persons with whom such contracts, arrangements, or understandings have been entered into, and giving the details thereof.

Item 7. Persons Retained, Employed, or To Be Compensated.

Where the Schedule 13D relates to a tender offer, or request or invitation for tenders, identify all persons and classes of persons employed, retained, or to be compensated by the person filing this Schedule 13D, or by any person on his behalf, to make solicitations or recommendations to security holders and describe briefly the terms of such employment, retainer, or arrangement for compensation.

Item 8. Material To Be Filed as Exhibits.

Copies of all requests or invitations for tenders or advertisements making a tender offer or requesting or inviting tenders, additional material soliciting or requesting such tender offers, solicitations or recommendations to the holders of the security to accept or reject a tender offer or request or invitation for tenders shall be filed as an exhibit.

Signature.

I certify that to the best of my knowledge and belief the information set forth in this statement is true, complete, and correct.

---------- ----------
(Date) (Signature)

If the statement is signed on behalf of a person by an authorized representative, evidence of the representative's authority to sign on behalf of such person shall be filed with the statement.

(33 FR 11016, Aug. 2, 1968, as amended at 33 FR 14110, Sept. 18, 1968.)

11. Following § 240.14d–102, appearing on CFR pages 501 and 502, insert the following:

EFFECTIVE DATE NOTE.—At 42 FR 12352, § 240.13d–102 was added, effective August 31, 1977.

12. Following §240.14a–101, appearing on CFR pages 515 through 527, insert the following effective date note:

EFFECTIVE DATE NOTE.—In § 240.14a–101, Items 5 and 6 of Schedule 14A were amended at 42 FR 12354, and Item 5 was corrected at 42 FR 15309, effective August 31, 1977. For the convenience of the user, the superseded text is set forth as follows:

§ 240.14a–101 Schedule 14A. Information required in proxy statement.

* * * * *

Item 5. Voting securities and principal holders thereof.

(a) * * *

(b) * * *

(c) * * *

(d) If to the knowledge of the persons on whose behalf the solicitation is made, any person owns of record or beneficially more than 10 percent of the outstanding voting securities of the issuer, name such person, state the approximate amount of such securities owned of record but not owned beneficially and the approximate amount owned beneficially by such person and the percentage of outstanding voting securities represented by the amount of securities so owned in each such manner.

(e) If, to the knowledge to the persons on whose behalf the solicitation is made, a change in control of the issuer has occurred since the beginning of its last fiscal year, state the name of the person(s) who acquired such control, the amount and the source of the consideration used by such person or persons; the basis of the control, the date and a description of the transaction(s) which resulted in the change of control and the percentage of voting securities of the issuers now beneficially owned directly or indirectly by the person(s) who acquired control; and the identity of the person(s) from whom control was assumed. If the source of all or any part of the consideration used is a loan made in the ordinary course of business by a bank as defined by Section 3(a)(6) of the Act, the identity of such bank shall be omitted provided a request for confidentiality has been made pursuant to Section 13(d)(1)(B) of the Act by the person(s) who acquired control. In lieu thereof, the material shall indicate that the identity of the bank has been so omitted and filed separately with the Commission.

Instructions. 1. State the terms of any loans or pledges obtained by the new control group for the purpose of acquiring control, and the names of the lenders or pledgees.

2. Any arrangements or understandings among members of both the former and new control groups and their associates with respect to election of directors or other matters should be described.

(f) Describe any contractual arrangements, including any pledge of securities of the issuer, or any of its parents, known to the persons on whose behalf the solicitation is made, the operation of the terms of which may at a subsequent date result in a change in control of the issuer.

Instruction. Paragraph (f) does not require a description of ordinary default provisions contained in the charter, trust indentures or other governing instruments relating to securities of the issuer.

Item 6. Nominees and Directors.

(a) • • •

(5) If more than 10 percent of any class of securities of the issuer or any of its parents or subsidiaries are beneficially owned by him and his associates, state the approximate amount of each class of such securities beneficially owned by such associates, naming each associate whose holdings are substantial.

13. In § 240.14a-102, appearing on CFR pages 527 and 528, insert the following effective date note:

EFFECTIVE DATE NOTE.—In § 240.14a-102, Item 3 was amended at 42 FR 12354, effective August 31, 1977. For the convenience of the user, the superseded text is set forth as follows:

§ 240.14a-102 *Schedule 14B. Information to be included in statements filed by or on behalf of a participant (other than an issuer pursuant to § 240.14a-11(c) (Rule 14a-11(c))).*

Item 3. Interests in securities of the issuer.

(g) State the amount of each class of securities of any parent or subsidiary of the issuer which you own beneficially, directly or indirectly.

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

14. Following § 249.210, appearing on CFR page 678, insert the following:

EFFECTIVE DATE NOTE.—In § 249.210, Form 10, Item 5, was amended at 42 FR 12353, effective August 31, 1977.

15. Following § 249.310, appearing on CFR page 680, insert the following:

EFFECTIVE DATE NOTE.—In § 249.310, Form 10-K, Item 14, was amended at 42 FR 12353 effective August 31, 1977.

[Release No. 34-13831]

LOST AND STOLEN SECURITIES

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: This action provides notification to entities subject to the Lost and Stolen Securities Program of modified requirements for making reports and inquiries with respect to missing, lost, stolen or counterfeit securities. These amendments are intended to ensure that information in the stop transfer files of transfer agents is current and complete and to eliminate unnecessary inquiry requirements for transfer agents. Notification of recordkeeping requirements for all reporting institutions is also provided. These actions are necessary to avoid duplication and to ensure compliance by reporting institutions.

EFFECTIVE DATE: October 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Gregory C. Yadley, Division of Market Regulation, Securities and Exchange Commission, Washington, D.C. 20549, 202-755-7826.

SUPPLEMENTARY INFORMATION: In order to avoid duplication and to implement the Lost and Stolen Securities Program in a more efficient manner, the Securities and Exchange Commission has amended § 240.17f-1 to require that copies of reports of missing, lost, stolen or counterfeit securities be filed with a registered transfer agent for the particular issue. This will ensure that information in the stop files of transfer agents is identical to that contained in the data base maintained by the Commission's designee and will allow transfer agents an exemption from inquiry during the pilot program. This release provides notification of this action and also of the recordkeeping and record retention requirements applicable to all reporting institutions under the Lost and Stolen Securities Program. The Commision has also delegated to the Director of the Division of Market Regulation the authority to grant non-reporting institutions access to the designee's data base.

BACKGROUND

On December 6, 1976, the Commission adopted § 240.17f-1, establishing reporting and inquiry requirements with respect to missing, lost, stolen or counterfeit securities.[1] Certain technical amendments to the section were made on February 18, 1977,[2] and further amendments regarding the role of transfer agents in the Lost and Stolen Securities Program were proposed.[3] A comprehensive release, providing notification of reporting and inquiry procedures and republishing § 240.17f-1 and reporting Form X-17F-1A in their final, amended versions appears in this issue of the FEDERAL REGISTER.

In order to implement § 240.17f-1 in the most efficient manner, the Commission determined that it would be appropriate to institute a pilot program to monitor the effectiveness of the section and the system designed to carry out its provisions. Accordingly, the Lost and Stolen Securities Program will be implemented on a pilot basis until December 31, 1978. In accordance with the inquiry and reporting requirements of paragraphs (b) and (c) of § 240.17f-1, any Federal Reserve Bank or Branch is an appropriate instrumentality with respect to United States Government and Agency Securities. The Securities Information Center, Inc. ("SIC") has been designated to receive reports and respond to inquiries with respect to all other securities during the pilot program.[4]

AMENDMENTS TO REPORTING PROVISIONS

Traditionally, transfer agents have had a pivotal role, through their "stop transfer" lists, in maintaining information regarding securities deemed to be missing, lost or stolen. Generally, a transfer agent will not effect registration of a transfer unless it is satisfied from its own records and a review of it stops that the particular transfer is in all respects proper.

Despite the adoption of § 240.17f-1, the traditional practice by which persons suffering loss or theft of securities notify the transfer agent of such loss or theft will continue in order to protect such persons' interests in the particular security. However, in order to avoid duplicative reporting and inquiry, the Commission, on February 18, 1977, proposed certain amendments to § 240.17f-1 so that the information contained in the stop transfer lists of registered transfer agents would be identical to the information in the possession of the appropriate instrumentalities.[5]

With respect to reporting, it was proposed that § 240.17f-1, paragraphs (b)(1)(i), (b)(2) and (b)(4) be amended to require that, when a reporting institution other than a registered transfer agent files a report of loss or theft with the appropriate instrumentality, a copy of such report be filed with a registered transfer agent for the issue. The public comment letters favored the adoption of these reporting amendments and, accordingly, the Commission has adopted them.[6] The Commission is of the view that the requirements do not impose any additional burden on reporting institutions since such institutions have traditionally informed transfer agents in cases of loss or theft.

INQUIRY PROVISIONS

The Commission proposed to amend paragraph (c) of § 240.17f-1 to exempt from inquiry by registered transfer agents those securities presented to a transfer agent by a person other than a reporting institution where an acceptable signature guarantee is provided by a reporting institution.

With respect to the proposed inquiry requirements although commentators expressed support, they stated that the proposal did not go far enough in relieving transfer agents from inquiry with the appropriate instrumentality. Even with the proposed exemption, inquiry would be required in a number of circumstances which involve no change in ownership of a fully registered security. In addition, in the context of tenders, exchanges or redemptions, where transfer agents are called upon to process large numbers of certificates within short periods of time, commentators stated that inquiry would still be required and would be duplicative and unduly burdensome.

Accordingly, the Commission has determined to exempt transfer agents from inquiry during the one year pilot period. The amendment requiring reports of lost or stolen securities to be made with the transfer agent concerned, in conjunction with a registered transfer agent's obligation to check its stop files, will provide substantially similar safeguards against the improper use of lost or stolen securities as a requirement that the transfer agent inquire with the appropriate instrumentality. During the pilot program, the Commission intends to monitor the effectiveness of transfer agent stop files in halting the negotiation of lost or stolen securities and in order to determine whether the exemption should be retained permanently. In connection therewith, the Commission may consider whether additional Federal regulation concerning maintenance of stop transfer lists would be appropriate. In light of this exemption during the pilot program, the Commission has withdrawn the proposed amendment published in Securities Exchange Act Release No. 13281 regarding inquiry by transfer agents.

Recordkeeping Requirements and Amendments to §§ 240.17a-3 and 240.17a-4

The Commission has amended §§ 240.17f-1, 240.17a-3 and 240.17a-4 in order to codify the recordkeeping and record retention procedures established by the Lost and Stolen Securities Program. Copies of all Forms X-17F-1A filed pursuant to this section and all confirmations or other information received from the appropriate instrumentality or its designee must be retained for a period of three years in an easily accessible place.

These recordkeeping provisions are necessary to the smooth functioning of the Lost and Stolen Securities Program and they essentially do no more than spell out the period of time for retention of records generated pursuant to paragraphs (b) and (c) of § 240.17f-1. They will become effective on October 3, 1977 when the balance of the program becomes effective unless public comments received prior to September 3, 1977 suggest modifications which the Commission deems to be appropriate. Written comments should be submitted in triplicate, addressed to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and should refer to File No. S7-611. Comments received will be available for public inspection at the Commission's Public Reference Room.

FORM X-17F-1A

Reporting Form X-17F-1A (17 CFR 249.1200) was adopted by the Commission on February 18, 1977, and this action was announced in Securities Exchange Act Release No. 13280. In discussions with representatives of the securities and banking industries and the Commission's designee, several technical modifications, primarily in terms of format, were suggested. These changes have been approved in order to facilitate the use of the form by reporting institutions and to allow Form X-17F-1A to be used as a stop transfer form by transfer agents. The form, as amended, is printed in this issue of the FEDERAL REGISTER. Since the modifications to Form X-17F-1A are technical in nature, notice and public procedure are not required by the Administrative Procedure Act (15 U.S.C. 553(b)(3)(B)) as a prerequisite to their approval by the Commission. Amended Form X-17F-1A will become effective on October 3, 1977.

DELEGATION OF AUTHORITY

The Commission has amended § 200.30-3 of its Rules of Organization by the addition of paragraph (a)(26) to delegate to the Director of the Division of Market Regulation the authority to grant non-reporting institutions access to the system for the purposes of making reports and inquiries upon specified terms, conditions, and time periods.[7]

This amendment to § 200.30-3 is adopted pursuant to sections 2, 17(f) and 23(a) of the Securities Exchange Act of 1934, and sections 78d-1 and 78d-2 of Title 15 of the United States Code. Inasmuch as the amendment involves rules of agency organization, procedure or practice within the meaning of the Administrative Procedure Act (5 U.S.C. Section 553(b)(3)(A) (1970)), notice and public procedure are not required prior to adoption. The amendment will become effective on October 3, 1977.

STATUTORY BASIS AND COMPETITIVE CONSIDERATIONS

The amendments to §§ 200.30-3, 240.17f-1, 240.17a-3 and 240.17a-4 and the Lost and Stolen Securities Program are adopted pursuant to sections 2, 17(a), 17(f) and 23(a) of the Securities Exchange Act of 1934, as amended, and section 78d-1 and 78d-2 of Title 15 of the United States Code. The Commission finds that any burden upon competition imposed by the amendments is necessary and appropriate in the public interest and for the protection of investors.

Text of Amendments:

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

I. Section 200.30-3 is amended by the addition of new paragraph (a)(26) as follows:

§ 200.30-3 **Delegation of authority to Director of Division of Market Regulation.**

• • • • • •

(a) • • •

(26) Pursuant to Rule 17f-1 (§ 240.17f-1 of this chapter), to designate persons not subject to § 240.17f-1 as reporting institutions upon specified terms, conditions, and time periods.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

II. Section 240.17a-3 is amended by the addition of new paragraph (a)(14), which incorporates the recordkeeping requirements of § 240.17f-1 of this chapter, as follows:

§ 240.17a-3 **Records to be made by certain exchange members, brokers and dealers.**

(a) • • •

(14) Copies of all Forms X-17F-1A filed pursuant to § 240.17f-1 and all confirmations or other information received from the appropriate instrumentality or its designee as a result of inquiry.

III. Section 240.17a-4 is amended by the addition of new paragraph (e)(4), which incorporates the record retention requirements of § 240.17f-1 of this chapter, as follows:

§ 240.17a-4 **Records to be preserved by certain members, brokers and dealers.**

• • • • • •

(e) • • •

(4) All records required pursuant to paragraph (a)(14) of § 240.17a-3 for three years.

IV. Section 240.17f-1 is amended by the addition of certain words in paragraphs (b)(1)(i), (b)(2), and (b)(4) and by the addition of new paragraph (f), as follows:

§ 240.17f-1 **Requirements for reporting and inquiry with respect to missing, lost, counterfeit or stolen securities.**

• • • • • •

(b) *Reporting requirements*—(1) *Stolen Securities.* (i) Every reporting institution shall report to the appropriate instrumentality and to a registered transfer agent for the issue the discovery of the theft or loss of any security where there is substantial basis for believing that criminal activity was involved. Such reports shall be made within one business

---

[1] Securities Exchange Act Release No. 13053, 41 FR 54923 (December 16, 1976).

[2] Securities Exchange Act Release No. 13280, 42 FR 11829 (March 1, 1977).

[3] Securities Exchange Act Release No. 13281, 42 FR 11844 (March 1, 1977).

[4] In Securities Exchange Act Release No. 13538, 42 FR 26495 (May 24, 1977), AutEx, Inc. was named as the designee. Subsequently, as a consequence of the acquisition of AutEx by ITEL Corporation, SIC was created as a wholly-owned subsidiary of ITEL AutEx, Inc.

[5] Securities Exchange Act Release No. 13281, 42 FR 11844 (March 1, 1977).

[6] As proposed, the amendment would have required a report to "the registered transfer agent for the security." In order to avoid confusion, the provision as adopted reads "to a registered transfer agent for the issue." Therefore, where more than one registered transfer agent performs transfer agent functions for a particular issue, a report to any one of them will satisfy the requirements of this section. It is expected that where there are cotransfer agents, internal procedures will be established to ensure prompt notification of losses to all cotransfer agents.

[7] For a discussion of the circumstances under which non-reporting financial institutions, such as foreign banks and insurance companies, may be granted access to the data base on Lost and Stolen Securities, see Securities Exchange Act Release No. 13832, Published in this issue of the FEDERAL REGISTER.

day of the discovery, and if the certificate numbers of the securities cannot be ascertained at that time, they shall be reported as soon thereafter as possible.

* * * * *

(2) *Missing or lost securities.* Every reporting institution shall report to the appropriate instrumentality and to a registered transfer agent for the issue the discovery of the loss of any security where criminal actions are not suspected when the security has been missing or lost for a period of two business days. Such report shall be made within one business day of the end of such period except that:

* * * * *

(4) *Recovery.* Every reporting institution shall report the recovery or finding of any security previously reported missing, lost or stolen pursuant to this section to the appropriate instrumentality and to a registered transfer agent for the issue within one business day of such recovery or finding. If a report of stolen securities is made to the appropriate law enforcement agency, a report of such recovery shall also be made to such agency. Recovery may only be reported by the institution which reported the security as missing, lost or stolen.

* * * * *

(f) *Recordkeeping.* Every reporting institution shall maintain and preserve in an easily accessible place for three years copies of all Forms X-17F-1A filed pursuant to this section and all confirmations or other information received from the appropriate instrumentality or its designee as a result of inquiry.

* * * * *

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

§ 249.1200 [Amended]

V. Certain technical modifications in terms of format to Form X-17F-1A (§ 249.1200) have been made. The amended form is published in this issue of the FEDERAL REGISTER.

By the Commission.

SHIRLEY E. HOLLIS,
Assistant Secretary.

Title 25—Indians

CHAPTER I—BUREAU OF INDIAN AFFAIRS, DEPARTMENT OF THE INTERIOR

PART 252—BUSINESS PRACTICES ON THE NAVAJO, HOPI, AND ZUNI RESERVATIONS

Interim Rule Revising Coverage of Requirement To Obtain Peddler's Permit

AUGUST 8, 1977.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Interim rule on which comment is solicited.

SUMMARY: This document revises 25 CFR 252.12 (which requires peddlers on the Navajo, Hopi, or Zuni reservations to obtain permits) by exempting enrolled members of federally recognized tribes who are selling items they have produced or gathered themselves. This provision is being revised because experience has shown that it is impossible to require permits and enforce the regulations fully as they apply to small-scale Indian peddlers. Because of the number of such peddlers, the cost of enforcement would far exceed the benefit to be received from such regulation. This revision is being issued as an interim rule so that it may be effective before the opening of the Navajo Tribal Fair. Unless the rule is changed large numbers of Indian concessionaires would have to obtain a peddler's permit and bond just for the duration of the fair. Public comment is invited, however, before adoption of a final rule.

DATE: This revision will be effective, on an interim basis, on August 12, 1977. Comments about the revision must be received on or before October 11, 1977.

ADDRESS: Comments should be sent to: Division of Law Enforcement Services, Navajo Area Office, Bureau of Indian Affairs, Window Rock, Ariz. 86515.

FOR FURTHER INFORMATION CONTACT:

William Winn, Business Licensing, Investigation and Audit Section, Division of Law Enforcement Services, Navajo Area Office, Bureau of Indian Affairs, Window Rock, Ariz. 86515

SUPPLEMENTARY INFORMATION: The authority for the Commissioner to issue this interim rule is contained in 5 U.S.C. § 301, 25 U.S.C. §§ 2 and 9, 25 U.S.C. §§ 261 et seq., and 230 DM 1 and 2.

The principal author of this document is William D. Back, Window Rock Field Office, Office of the Solicitor, Department of the Interior.

Section 252.12 of Title 25 of the Code of Federal Regulations is revised, on an interim basis, to read as follows:

§ 252.12 **Peddler's permits.**

(a) Except as provided in paragraph (b) of this section, no peddler may offer goods for sale within the exterior boundaries of the Hopi, Navajo, or Zuni reservations without a peddler's permit. The permit shall state on its face the class of goods that may be offered for sale. No peddler may offer for sale any class of goods other than those listed on the face of the permit.

(b) No peddler who is an enrolled member of a federally recognized Indian tribe is required to obtain a peddler's permit for offering to sell the following items:

(1) Coal and wood for non-commercial use,

(2) Homegrown fresh products,

(3) Meat products raised locally by the peddler, or

(4) Arts and crafts made by the peddler or the peddler's family.

(c) The applicant shall apply for a permit in writing on a form provided by the Commissioner.

(d) Peddlers shall pay such fee and post such surety bond on a form provided by the Commissioner as the Commissioner requires. The surety bond required may not be less than five hundred dollars ($500) nor more than ten thousand dollars ($10,000).

(e) Any surety on the bond of a peddler may be relieved of liability by complying with the provisions of § 252.57.

RAYMOND V. BUTLER,
Acting Deputy Commissioner of Indian Affairs.

[FR Doc.77-23376 Filed 8-11-77;8:45 am]

PART 258—KLAMATH RIVER FISHING

Fishing Regulations

AUGUST 5, 1977.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Final rule.

SUMMARY: This rulemaking is to add a new part 258 to Subchapter W, Chapter I of Title 25 of the Code of Federal Regulations. The purpose of Part 258 is to assist in the protection of Indian fishing rights on the Klamath River, to promote the proper management of the fishery resource until the Indians of the Reservation assume control, and to assure that the State of California's enforcement of its laws and regulations for management and conservation of the fishery's resource is compatible with the rights of the Indians of the Hoopa Valley Reservation.

DATES: With the exception of §§ 258.3 and 258.6(e) these regulations shall become effective August 12, 1977. Sections 258.3 and 258.6(e) shall become effective on September 12, 1977. Additional comments will be accepted and considered if received on or before September 12, 1977. If necessary, the regulations will be amended in response to the additional comments.

FOR FURTHER INFORMATION CONTACT:

Mr. Scott McElroy, Attorney, Division of Indian Affairs, Office of the Solicitor, U.S. Department of the Interior, Washington, D.C., 202-343-6967.

SUPPLEMENTARY INFORMATION: Beginning on page 28552 of the June 3, 1977, FEDERAL REGISTER (42 FR 28552-3) there was published a notice of proposed rulemaking. All interested persons were given until July 5, 1977, to submit written comments, suggestions, or objections regarding the proposed regulations.

After consideration of all comments presented by interested persons, the regulations as proposed are hereby adopted with the following changes:

1. The word Indians is substituted for the word Tribe in § 258.1(2) and the word assumes is changed to assume.

2. The title and contents of § 258.5 are changed to read as set forth below.

This section should not be interpreted as a reflection of our views on the question of whether, absent these regulations, the Indians of the Reservation possess rights to fish commercially in the Klamath River.

3. An additional phrase is added to the last sentence of § 258.6(a) so that the sentence reads as set forth below.

This change was made to indicate with greater clarity that the stated standard is intended simply to meet the requirements of the Bureau in promulgating and enforcing these temporary regulations.

4. Paragraph 258.6(b) was changed to read as set forth below.

This change was made in response to comments on the proposed regulations.

5. A new paragraph (f) is added to § 258.6, reading as set forth below.

This change was made to insure that these temporary regulations do not have the effect of eliminating the widespread and beneficial practice of individuals fishing for the benefit of others who are infirm, incapacitated, or otherwise unable to fish for themselves. It should be emphasized that this agency designation is not intended to expand anyone's rights but only to allow the designee to fish in the place of the original permittee.

RAYMOND V. BUTLER,
Acting Deputy Commissioner.

Subchapter W of Chapter I of Title 25 of the Code of Federal Regulations is amended by adding the following new Part 258.

258.1 Purposes.
258.2 Length of Nets.
258.3 Identification of Nets.
258.4 Checking Nets.
258.5 Commercial Fishing.
258.6 Issuance of Identification Cards.
258.7 Enforcement.

AUTHORITY: The Act of March 3, 1953, 10 Stat. 238, 25 U.S.C. Sec. 2; 25 U.S.C. Sec. 9.

§ 258.1 **Purposes.**

(a) The purposes of these regulations are: (1) To assist in protecting Indian fishing rights on the Klamath River.

(2) To promote the proper management, conservation, and protection of the fishery resources of the Klamath River on the Hoopa Valley Reservation until such time as the Indians of that reservation assumes control over those resources.

(3) To insure that the State of California's enforcement of its laws and regulations for the management and conservation of fisheries resources is compatible with the rights of the Indians of the Hoopa Valley Reservation.

(b) The conservation regulations of this Part are found to be necessary to assure that the fishing rights secured to the Indians of the Hoopa Valley Reservation are protected and preserved for the benefit of the present and future Indians of the Reservation in a manner consistent with such rights. The enactment of such regulations is consistent with and required by the trust responsibilities of the Federal Government.

(c) Present information indicates that the current level of unregulated fishing, if continued, may have a detrimental effect on the fishery resources of the Reservation. Ideally, the Tribes of the Reservation should determine how these reservation resources should be utilized by the Indians of the reservation including the extent to which commercial fishing is feasible. In the absence of tribal regulation, the regulations of this part are enacted as an emergency measure. They shall be in effect until sufficient information is available to satisfy the Secretary of the Interior that such fishing does not have the potential for harming the Klamath River fishery or until the Tribes of the Reservation assume effective control over the utilization of the fishery resources but absent reenactment no later than July 1, 1978.

(d) Jurisdiction. These regulations apply to all Indians entitled to fish on the Klamath River, within the Hoopa Valley Reservation.

§ 258.2 **Length of nets.**

No gill nets shall extend over $^2/_3$ the width of the Klamath River. No net shall be placed in front of the mouth of a tributary stream, nor shall any net placed in a tributary stream extend over $^1/_3$ the width of that stream.

§ 285.3 **Identification of nets.**

All gill nets utilized on the Klamath River or its tributaries shall be tagged with a tag provided by the Bureau of Indian Affairs identifying the owner as entitled to Indian fishing rights. Such identification shall be located so that the ownership of the fishing gear can be ascertained without having to remove the fishing gear from the water.

§ 258.4 **Checking nets.**

All nets must be checked for fish once every 24 hours.

§ 258.5 **Prohibited fishing.**

The catching for the purpose of sale of more than five (5) anadromous fish is prohibited. No limit is established on the catching of fish for purposes other than sale.

§ 258.6 **Issuance of identification cards.**

(a) The Commissioner of Indian Affairs or his designate shall arrange for the issuance of an appropriate identification card and net tag or tags to any Indian entitled to fish on the Klamath River. That identification card, the accompanying tag, and the evidence submitted in obtaining the card and tags shall be used solely for the purposes of identifying its holder as being entitled to fish on the Klamath River on an interim emergency basis and is not intended as a grant or recognition of permanent rights or privileges.

(b) An identification card shall be issued to any Indian who submits evidence satisfactory to the issuing officers that he or she is of $^1/_4$ degree or more Indian blood and in addition either (1) is an allottee of the reservation, (2) is a descendant of an allottee of the reservation, or (3) can demonstrate that in the past, he or she fished on the Klamath River as an Indian.

(c) Each card shall state the name and address of the holder.

(d) No person shall allow any use of his or her identification card by any other person except as contained in subsection (f) below.

(e) The failure of any person who claims to be entitled to the benefits of an Indian fishing rights on the Klamath River to have such a card in his immediate personal possession while fishing or engaging in other activities in the claimed exercise of such rights and to display it upon request to any federal, state, or tribal enforcement officer shall be prima facie evidence that the person is not entitled to exercise an Indian fishing right.

(f) The right of an individual Indian to fish and the card evidencing that right may be utilized by a designated agent who shall fish in the place and stead of the permittee. That agency shall not enlarge or expand the rights exercised.

§ 258.7 **Enforcement.**

Violators of these provisions shall be subject to a civil penalty not to exceed $500, or have his or her fishing gear and fish confiscated or have his or her tribal fishing privileges suspended; or any combination of these penalties.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 742-77]

PART 16—PRODUCTION OR DISCLOSURE OF MATERIAL OR INFORMATION

Subpart E—Exemption of Records Systems Under the Privacy Act

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This regulation exempts certain systems of records maintained by various organizational units of the Department from provisions of the Pri-

vacy Act of 1974 so as to maintain the confidentiality of information compiled for the purpose of criminal investigations.

EFFECTIVE DATE: August 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Harry L. Gastley, Administrative Counsel, Office of Management and Finance, Department of Justice, Washington, D.C. 20530. (202–739–5361).

SUPPLEMENTARY INFORMATION: On March 18, 1977, the Department of Justice published in the FEDERAL REGISTER proposed regulations exempting systems of records from certain provisions of the Privacy Act, 42 FR 15072, 15075. No comments were received on the proposed regulations.

By virtue of the authority vested in me by 5 U.S.C. 552a, the proposed revision of § 16.93 and the proposed addition of § 16.102, of Subpart E of Part 16 of Title 28, Code of Federal Regulations, as published in the FEDERAL REGISTER on March 18, 1977, 42 FR 15072, 15075 are adopted without change as set forth below:

Dated: August 1, 1977.

GRIFFIN B. BELL,
Attorney General.

§ 16.93 Exemption of Tax Division Systems—limited access.

(a) The following systems of records are exempted pursuant to the provisions of 5 U.S.C. 552a(j)(2) from subsections (c)(3), (c)(4), (d)(1), (d)(2), (d)(3), (d)(4), (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5), (e)(8), (f) and (g) of 5 U.S.C. 552a:

(1) Tax Division Central Classification Cards, Index Docket Cards, and Associated Records—Criminal Tax Cases (JUSTICE/TAX–001)—Limited Access.

(2) Tax Division Special Projects Files (JUSTICE TAX–005)—Limited Access.

These exemptions apply to the extent that information in these systems is subject to exemption pursuant to 5 U.S.C. 552a(j)(2).

(b) The systems of records listed under paragraphs (a)(1) and (a)(2) of this section are exempted for the reasons set forth below, from the following provisions of 5 U.S.C. 552a:

(1) (c)(3). The release of the disclosure accounting, for disclosures made pursuant to subsection (b) of the Act, including those permitted under the routine uses published for those systems of records, would enable the subject of an investigation of an actual or potential criminal tax case to determine whether he or she is the subject of investigation, to obtain valuable information concerning the nature of that investigation and the information obtained, and to determine the identity of witnesses or informants. Such access to investigative information would, accordingly, present a serious impediment to law enforcement. In addition, disclosure of the accounting would constitute notice to the individual of the existence of a record even though such notice requirement under subsection (f)(1) is specifically exempted for these systems of records.

(2) (c)(4). Since an exemption is being claimed for subsection (d) of the Act (Access to Records) this subsection is inapplicable to the extent that these systems of records are exempted from subsection (d).

(3) (d)(1); (d)(2); (d)(3); (d)(4). Access to the records contained in these systems would inform the subject of an actual or potential criminal tax investigation of the existence of that investigation, of the nature and scope of the information and evidence obtained as to his or her activities, and of the identity of witnesses or informants. Such access would, accordingly, provide information that could enable the subject to avoid detection, apprehension and prosecution. This result, therefore, would constitute a serious impediment to effective law enforcement not only because it would prevent the successful completion of the investigation but also because it could endanger the physical safety of witnesses or informants, lead to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony.

(4) (e)(1). The notices for these systems of records published in the FEDERAL REGISTER set forth the basic statutory or related authority for maintenance of these systems. However, in the course of criminal tax and related law enforcement investigations, cases, and matters, the Tax Division will occasionally obtain information concerning actual or potential violations of law that may not be technically within its statutory or other authority or may compile information in the course of an investigation which may not be relevant to a specific prosecution. In the interests of effective law enforcement, it is necessary to retain some or all of such information in these systems of records since it can aid in establishing patterns of criminal activity and can provide valuable leads for federal and other law enforcement agencies.

(5) (e)(2). In a criminal tax investigation or prosecution, the requirement that information be collected to the greatest extent practicable from the subject individual would present a serious impediment to law enforcement because the subject of the investigation or prosecution would be placed on notice as to the existence of the investigation and would therefore be able to avoid detection or apprehension, influence witnesses improperly, destroy evidence, or fabricate testimony.

(6) (e)(3). The requirement that individuals supplying information be provided with a form stating the requirements of subsection (e)(3) would constitute a serious impediment to law enforcement in that it could compromise the existence of a confidential investigation or reveal the identity of witnesses or confidential informants.

(7) (e)(4)(G) and (H). Since an exemption is being claimed for subsections (f) (Agency Rules) and (d) (Access to Records) of the Act these subsections are inapplicable to the extent that these systems of records are exempted from subsection (f) and (d).

(8) (e)(4)(I). The categories of sources of the records in the systems have been published in the FEDERAL REGISTER in broad generic terms in the belief that this is all that subsection (e)(4)(I) of the Act requires. In the event, however, that this subsection should be interpreted to require more detail as to the identity of sources of the records in these systems, exemption from this provision is necessary in order to protect the confidentiality of the sources of criminal tax and related law enforcement information. Such exemption is further necessary to protect the privacy and physical safety of witnesses and informants.

(9) (e)(5). In the collection of information for criminal tax enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely, and complete. With the passage of time, seemingly irrelevant or untimely information may acquire new significance as further investigation brings new details to light. Furthermore, the accuracy of such information can often only be determined in a court of law. The restrictions of subsection (e)(5) would restrict the ability of government attorneys in exercising their judgment in reporting on information and investigations and impede the development of criminal tax information and related data necessary for effective law enforcement.

(10) (e)(8). The individual notice requirements of subsection (e)(8) could present a serious impediment to law enforcement as this could interfere with the ability to issue warrants or subpoenas and could reveal investigative techniques, procedures, or evidence.

(11) (f). Procedures for notice to an individual pursuant to subsection (f)(1) as to the existence of records pertaining to him dealing with an actual or potential criminal tax, civil tax, or regulatory investigation or prosecution must be exempted because such notice to an individual would be detrimental to the successful conduct and/or completion of an investigation or prosecution pending or future. In addition, mere notice of the fact of an investigation could inform the subject or others that their activities are under or may become the subject of an investigation and could enable the subjects to avoid detection or apprehension, to influence witnesses improperly, to destroy evidence, or to fabricate testimony.

Since an exemption is being claimed for subsection (d) of the Act (Access to Records) the rules required pursuant to subsection (f) (2) through (5) are inapplicable to these systems of records to the extent that these systems of records are exempted from subsection (d).

(12) (g). Since an exemption is being claimed for subsections (d) (Access to Records) and (f) (Agency Rules) this section is inapplicable, and is exempted for the reasons set forth for those subsections, to the extent that these systems of records are exempted from subsections (d) and (f).

(c) The following system of records is exempted pursuant to the provisions of 5 U.S.C. 552a(k)(2) from subsections (c)(3), (d)(1), (d)(2), (d)(3), (d)(4), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I) and (f) of 5 U.S.C. 552a:

(1) Tax Division Central Classification Cards, Index Docket Cards, and Associated Records—Civil Tax Cases (JUSTICE/TAX–002)—Limited Access.

These exemptions apply to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a(k)(2).

(d) The system of records listed under paragraph (c)(1) is exempted for the reasons set forth below, from the following provisions of 5 U.S.C. 552a:

(1) (c)(3). The release of the disclosure accounting, for disclosures made pursuant to subsection (b) of the Act, including those permitted under the routine uses published for this system of records, would enable the subject of an investigation of an actual or potential civil tax case to determine whether he or she is the subject of investigation, to obtain valuable information concerning the nature of that investigation and the information obtained, and to determine the identity of witnesses or informants. Such access to investigative information would, accordingly, present a serious impediment to law enforcement. In addition, disclosure of the accounting would constitute notice to the individual of the existence of a record even though such notice requirement under subsection (f)(1) is specifically exempted for this system of records.

(2) (d)(1); (d)(2); (d)(3); (d)(4). Access to the records contained in this system would inform the subject of an actual or potential civil tax investigation of the existence of that investigation, of the nature and scope of the information and evidence obtained as to his or her activities and of the identity of witnesses or informants. Such access would, accordingly, provide information that could enable the subject to avoid detection. This result, therefore, would constitute a serious impediment to effective law enforcement not only because it would prevent the successful completion of the investigation but also because it could endanger the physical safety of witnesses or informants, lead to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony.

(3) (e)(1). The notices for this system of records published in the FEDERAL REGISTER set forth the basic statutory or related authority for maintenance of this system. However, in the course of civil tax and related law enforcement investigations, cases and matters, the Tax Division will occasionally obtain information concerning actual or potential violations of law that are not strictly or technically within its statutory or other authority or may compile information in the course of an investigation which may not be relevant to a specific case. In the interests of effective law enforcement, it is necessary to retain some or all of such information in this system of records since it can aid in establishing patterns of tax compliance and can provide valuable leads for federal and other law enforcement agencies.

(4) (e)(4) (G) and (H). Since an exemption is being claimed for subsections (f) (Agency Rules) and (d) (Access to Records) of the Act these subsections are inapplicable to the extent that this system of records is exempted from subsection (f) and (d).

(5) (e)(4)(I). The categories of sources of the records in this system have been published in the FEDERAL REGISTER in broad generic terms in the belief that this is all that subsection (e)(4)(I) of the Act requires. In the event, however, that this subsection should be interpreted to require more detail as to the identity of sources of the records in this system, exemption from this provision is necessary in order to protect the confidentiality of the sources of civil tax and related law enforcement information. Such exemption is further necessary to protect the privacy and physical safety of witnesses and informants.

(6) (f). Procdures for notice to an individual pursuant to subsection (f)(1) as to existence of records pertaining to the individual dealing with an actual or potential criminal tax, civil tax, or regulatory investigation or prosecution must be exempted because such notice to an individual would be detrimental to the successful conduct and/or completion of an investigation or case, pending or future. In addition, mere notice of the fact of an investigation could inform the subject or others that their activities are under or may become the subject of an investigation and could enable the subjects to avoid detection, to influence witnesses improperly, to destroy evidence, or to fabricate testimony.

Since an exemption is being claimed for subsection (d) of the Act (Access to Records) the rules required pursuant to subsection (f) (2) through (5) are inapplicable to this system of records to the extent that this system of records is exempted from subsection (d).

(e) The following system of records is exempted pursuant to the provisions of 5 U.S.C. 552a(j)(2) from subsections (c)(3), (c)(4), (d)(1), (d)(2), (d)(3), (d)(4), (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5), (e)(8), (f) and (g) of 5 U.S.C. 552a; in addition, the following system of records is exempted pursuant to the provisions of 5 U.S.C. 552a(k)(2) from subsections (c)(3), (d)(1), (d)(2), (d)(3), (d)(4), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I) and (f) of 5 U.S.C. 552a:

(1) Tax Division Freedom of Information—Privacy Act Request Files (JUSTICE/TAX–004).

(2) These exemptions apply only to the extent that the records contained in this system have been obtained from other systems of records maintained by the Tax Division for which exemptions from one or more of the foregoing provisions of the Privacy Act of 1974 have been promulgated. The exemption claimed for this system of records applies only to records obtained from such other Tax Division systems and only to the same extent as the records contained in such other systems have been exempted.

(f) The system of records listed under paragraph (e)(1) of this section is exempted for the following reasons:

(1) In the course of processing requests for records pursuant to the Freedom of Information Act (5 U.S.C. 552) or for access or correction of records pursuant to the Privacy Act (5 U.S.C. 552a), it is frequently necesary to search for records in systems of records for which exemptions have been claimed pursuant to 5 U.S.C. 552a (j) or (k). When records are located in said systems, it is frequently necessary to prepare copies for the purpose of consulting with agency personnel or with other agencies, either with regard to determining whether or to what extent the records should be disclosed, or access provided, or correction made or denied, or with regard to review in the event of administrative appeal or judicial review.

(2) If records otherwise exempt pursuant to published rules should lose their exempt character when taken from such exempt systems for the purpose of compliance with the Freedom of Information Act and the Privacy Act in reviewing such records and making determination with regard to disclosure, access, and correction, the purpose of the Privacy Act in providing such exemptions, and of the Department of Justice in claiming such exemptions would be defeated and nullified. The proper, efficient, and timely processing of citizens' requests pursuant to said Acts would be hindered and impeded.

* * * * *

§ 16.102 Exemption of Drug Enforcement Administration and Immigration and Naturalization Service Joint System of Records.

(a) The following system of records is exempted pursuant to provisions of 5 U.S.C. 552a(j)(2) from subsections (c)(3) and (4), (d), (e)(1), (2) and (3), (e)(4)(G), (H), and (I), (e)(5) and (8), (f), (g), and (h) of 5 U.S.C. 552a; in addition the following system of records is exempted pursuant to the provisions of 5 U.S.C. 552(k)(1) and (k)(2) from subsections (c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f) of 5 U.S.C. 552a.

(1) Automated Intelligence Record System (Pathfinder), JUSTICE/DEA–INS–111. These exemptions apply to the extent that information in those sys-

tems is subject to exemption pursuant to 5 U.S.C. 552a (j)(2), (k)(1) and (k)(2).

(b) The system of records listed under paragraph (a) of this section is exempted, for the reasons set forth from the following provisions of 5 U.S.C. 552a:

(1) (c)(3). The release of the disclosure accounting for disclosures made pursuant to subsection (b) of the Act, including those permitted under the routine uses published for these systems of records, would permit the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to determine whether he is the subject of investigation, or to obtain valuable information concerning the nature of that investigation, and the information obtained, or the identity of witnesses and informants and would therefore present a serious impediment to law enforcement. In addition, disclosure of the accounting would amount to notice to the individual of the existence of a record; such notice requirement under subsection (f)(1) is specifically exempted for these systems of records.

(2) (c)(4). Since an exemption is being claimed for subsection (d) of the Act (Access to Records) this subsection is inapplicable to the extent that these systems of records are exempted from subsection (d).

(3) (d). Access to the records contained in these systems would inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation of the existence of that investigation, or the nature and scope of the information and evidence obtained as to his activities, of the identity of witnesses and informants, or would provide information that could enable the subject to avoid detection or apprehension. These factors would present a serious impediment to effective law enforcement because they could prevent the successful completion of the investigation, endanger the physical safety of witnesses or informants, and lead to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony.

(4) (e)(1). The notices of these systems of records published in the FEDERAL REGISTER set forth the basic statutory or related authority for maintenance of this system. However, in the course of criminal or other law enforcement investigations, cases, and matters, the Immigration and Naturalization Service or the Drug Enforcement Administration will occasionally obtain information concerning actual or potential violations of law that are not strictly within its statutory or other authority or may compile information in the course of an investigation which may not be relevant to a specific prosecution. In the interests of effective law enforcement, it is necessary to retain such information in these systems of records since it can aid in establishing patterns of criminal activity and can provide valuable leads for federal and other law enforcement agencies.

(5) (e)(2). In a criminal investigation or prosecution, the requirement that information be collected to the greatest extent practicable from the subject individual would present a serious impediment to law enforcement because the subject of the investigation or prosecution would be placed on notice as to the existence of the investigation and would therefore be able to avoid detection or apprehension, to influence witnesses improperly, to destroy evidence, or to fabricate testimony.

(6) (e)(3). The requirement that individuals supplying information be provided with a form stating the requirements of subsection (e)(3) would constitute a serious impediment to law enforcement in that it could compromise the existence of a confidential investigation or reveal the identity of witnesses or confidential informants.

(7) (e)(4) (G) and (H). Since an exemption is being claimed for subsections (f) (Agency Rules) and (d) (Access to Records) of the Act these subsections are inapplicable to the extent that these systems of records are exempted from subsections (f) and (d).

(8) (e)(4)(I). The categories of sources of the records in these systems have been published in the FEDERAL REGISTER in broad generic terms in the belief that this is all that subsection (e)(4)(I) of the Act requires. In the event, however, that this subsection should be interpreted to require more detail as to the identity of sources of the records in these systems, exemption from this provision is necessary in order to protect the confidentiality of the sources of criminal and other law enforcement information. Such exemption is further necessary to protect the privacy and physical safety of witnesses and informants.

(9) (e)(5). In the collection of information for criminal law enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely, and complete. With the passage of time, seemingly irrelevant or untimely information may acquire new significance as further investigation brings new details to light and the accuracy of such information can often only be determined in a court of law. The restrictions of subsection (e)(5) would restrict the ability of trained investigators, intelligence analysts, and government attorneys in exercising their judgment in reporting on information and investigations and impede the development of criminal or other intelligence necessary for effective law enforcement.

(10) (e)(8). The individual notice requirements of subsection (e)(8) could present a serious impediment to law enforcement as this could interfere with the ability to issue warrants or subpoenas and could reveal investigative techniques, procedures, or evidence.

(11) (f). Procedures for notice to an individual pursuant to subsection (f)(1) as to the existence of records pertaining to him dealing with an actual or potential criminal, civil, or regulatory investigation or prosecution must be exempted because such notice to an individual would be detrimental to the successful conduct and/or completion of an investigation or prosecution pending or future. In addition, mere notice of the fact of an investigation could inform the subject or others that their activities are under or may become the subject of an investigation and could enable the subjects to avoid detection or apprehension, to influence witnesses improperly, to destroy evidence, or to fabricate testimony.

Since an exemption is being claimed for subsection (d) of the Act (Access to Records) the rules required pursuant to subsection (f) (2) through (5) are inapplicable to these systems of records to the extent that these systems of records are exempted from subsection (d).

(12) (g). Since an exemption is being claimed for subsections (d) (Access to Records) and (f) (Agency Rules) this section is inapplicable, and is exempted for the reasons set forth for those subsections, to the extent that these systems of records are exempted from subsections (d) and (f).

(13) (h). Since an exemption is being claimed for subsection (d) (Access to Records) and (f) (Agency Rules) this section is inapplicable, and is exempted for the reasons set forth for those subsections, to the extent that these systems of records are exempted from subsections (d) and (f).

(14) In addition, exemption is claimed for these systems of records from compliance with the following provisions of the Privacy Act of 1974 (5 U.S.C. 552a) pursuant to the provisions of 5 U.S.C. 552a(k)(1): subsections (c)(3), (d), (e)(1), (e)(4) (G), (H), and (I), and (f) to the extent that the records contained in these systems are specifically authorized to be kept secret in the interests of national defense and foreign policy.

Title 33—Navigation and Navigable Waters

CHAPTER II—CORPS OF ENGINEERS, DEPARTMENT OF THE ARMY

PART 207—NAVIGATION REGULATIONS

Puget Sound, Point Jefferson Restricted Area

AGENCY: Corps of Engineers, DOD.

ACTION: Final rule.

SUMMARY: We are revoking the regulation which establishes a restricted area at Point Jefferson, Puget Sound, Wash., as we have been advised by the Chief of Naval Operations that the area is no longer required.

DATE: August 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Ralph T. Eppard (202-693-5070) or write: Office of the Chief of Engineers, Forrestal Building, Washington, D.C. 20314, Attn: DAEN-CWO-N.

SUPPLEMENTARY INFORMATION: We are revoking only paragraph (f) of 33 CFR Part 207.750 which establishes a naval restricted area at Point Jefferson, Puget Sound, Wash. Since this revocation will have no affect on the public except to remove a restriction from a waterway notice of proposed rulemaking and public procedures thereto are considered unnecessary. Accordingly, 33 CFR 207.750(f) is revoked as set forth below.

§ 207.750 Puget Sound Area, Washington.

* * * * *

(f) [Revoked]

* * * * *

NOTE.—The Department of the Army has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(40 Stat. 266; 33 U.S.C. 1.)

Dated: July 28, 1977.

CHARLES R. FORD,
Acting Assistant Secretary of the Army (Civil Works).

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER E—PESTICIDE PROGRAMS

[FRL 776-4; OPP-300010C]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Exemptions From Requirement of a Tolerance for Certain Inert Ingredients in Pesticide Formulations

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes an exemption from the requirement of a tolerance for certain inert ingredients in pesticide formulations. The amendment was requested by various firms. This rule will allow the use of additional inert ingredients in pesticides applied to raw agricultural commodities and add another pesticide to the list of those generally recognized as safe for use.

EFFECTIVE DATE: August 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. David L. Ritter, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St. S.W., Washington D.C. 202-426-2680.

SUPPPLEMENTARY INFORMATION: On May 12, 1977, the EPA published a notice of proposed rulemaking in the FEDERAL REGISTER (42 FR 24071) to amend 40 CFR 180.1001 by exempting certain pesticide chemicals which are additional inert (or occasionally active) ingredients in pesticide formulations from tolerance requirements under provisions of Section 408(e) of the Federal Food, Drug, and Cosmetic Act. No comments or requests for referral to an advisory committee were received by the Agency with regard to this notice. It has been concluded that the amendment will protect the public health and, therefore, that the amendment to the regulations should be adopted as proposed.

Any person adversely affected by this regulation may, on or before September 12, 1977, file written objections with the Hearing Clerk, EPA, Rm. 1019, East Tower, 401 M St. SW., Washington, DC 20460. Such objections should be submitted in quintuplicate and should specify both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on August 12, 1977, Part 180, Subpart D, § 180.1001 is amended as set forth below.

Dated: August 4, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

(Section 408(e) of the Federal Food, Drug and Comestic Act (21 U.S.C. 346a(e)).)

With the exception of editorial changes to correct typographical errors, it is concluded that the original proposal be issued as an order as follows:

1. Part 180, Subpart A, § 180.2(a) is amended by adding the pesticide chemical sodium hypochlorite to read as follows.

2. Part 180, Subpart D, § 180.1001 is amended by: (1) deleting the entry "alpha-alkyl (C6-C10)-omega-hydroxypoly (oxypropylene) block polymer with polyoxyethylene; polyoxypropylene content averages 3 moles; polyoxyethylene content averages 7 moles; average molecular weight approximately 625" from paragraph (c); (2) deleting the entry "Sodium mono-, di-, and tributyl naphthalene sulfonates" from paragraph (d); (3) deleting the entries "Aluminum stearate", "Wintergreen oil", "Ethanol", and "Benzoic acid" from paragraph (d); (4) alphabetically inserting new items in paragraphs (c), (d), and (e); and (5) by deleting sodium hypochlorite from paragraph (c) to read as follows:

§ 180.2 Pesticide chemicals considered safe.

(a) As a general rule, pesticide chemicals other than benzaldehyde (when used as a bee repellant in the harvesting of honey), ferrous sulfate, lime, lime-sulfur, potassium polysulfide, sodium carbonate, sodium chloride, sodium hypochlorite, sodium polysulfide, and sulfur, and, when used postharvest as fungicides, citric acid, fumaric acid, oil of lemon, oil of orange, sodium benzoate, and sodium propionate are not for the purposes of section 408(a) of the act generally recognized as safe for use.

* * * * *

§ 180.1001 Exemptions from the requirement of a tolerance.

* * * * *

(c) * * *

Inert ingredient	Limits	Uses
* * * * *		
Alpha-alkyl (C6-C14)-omega-hydroxypoly(oxypropylene) block copolymer with polyoxyethylene; polyoxypropylene content is 1-3 moles; polyoxyethylene content is 7-9 moles; average molecular weight approximately 650.		Surfactants, related adjuvants of surfactants.
* * * * *		
Potassium sulfate		Solid diluent.

[FRL 776-2; PP6F1778/R124]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Norflurazon

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for residues of the herbicide norflurazon. The amendment was requested by Sandoz, Inc. This rule establishes maximum permissible levels for residues of norflurazon on apricots, cherries, filberts, peaches, plums (fresh prunes), nectarines, and walnuts.

EFFECTIVE DATE: August 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Henry Jacoby, Product Manager (PM) 24, Registration Division (WH–567), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460, 202–755–2196.

SUPPLEMENTARY INFORMATION: On June 3, 1976, notice was given (41 FR 22409) that Sandox, Inc., PO Box 1489, Homestead, Fla. 33030, had filed a petition (PP6F1778) for a tolerance with the Environmental Protection Agency (EPA). This petition proposed that 40 CFR 180.356 be amended by establishing tolerances for residues of the herbicide norflurazon (4-chloro-5-(methylamino)-2-α,α,α-trifluoro-m-tolyl)-3 (2H) pyridazinone) in or on the raw agricultural commodities apricots, cherries, filberts, peaches, plums, prunes, nectarines, and walnuts at 0.1 part per million (ppm). No comments were received in response to this notice of filing.

The data submitted in the petition and other relevant material have been evaluated, and the herbicide is considered to be useful for the purpose for which the tolerance is sought. The data indicate that there is no reasonable expectation of residues in eggs, milk, and the meat, fat, and meat byproducts of livestock and poultry as delineated in 40 CFR 180.6(a)(3). The scientific data considered in establishing the proposed tolerances were a rat reproduction study with a no-effect level (NEL) of 350 ppm, rat and mouse reproduction studies with NEL's greater than 1,250 ppm and at 370 ppm, respectively, a rat teratology study with an NEL of 400 milligrams/kilogram/day, two-year mouse and rat feeding studies with NEL's of 340 ppm and 375 ppm, respectively, and a six-month dog feeding study with an NEL of 150 ppm. Although mutagenicity data obtained by specific mutagenic test protocols were not submitted by the petitioner, some evidence for lack of mutagenic potential was found in data obtained in other test formats. The petitioner, however, will be required to submit mutagenic potential data developed under designated protocols as soon as these become available through publication of the registration guidelines.

An adequate analytical method (gas chromatography using electron capture detection) is available to enforce the proposed tolerances. Permanent tolerances have previously been established (40 CFR 180.356) for residues of norflurazon on cottonseed and cranberries at 0.1 ppm.

The established tolerances are expressed in terms of the parent compound and its desmethyl metabolite. Consequently, it has been concluded that the additional tolerances should be expressed in terms of norflurazon and its desmethyl metabolite, rather than in terms of the parent compound only. Since the additional uses are such that there would be essentially no residues of norflurazon or its desmethyl metabolite in any of the treated raw agricultural commodities, the tolerance of 0.1 ppm is considered adequate and appropriate. Sandoz did submit residue data for dried prunes in connection with its proposal for a tolerance on plums and prunes. Detectable residues were not present in the dried prunes derived from fresh prunes harvested from treated orchards. Thus, there is no need to establish a food additive tolerance under 21 CFR 193 for dried prunes. However, it is more correct to express the tolerance for prunes in this amendment as "plums (fresh prunes)" and this change is reflected.

Since it has been concluded that the tolerances established by amending 40 CFR 180.356 as proposed will protect the public health, it has been determined that the tolerances should be established as set forth below. Any person adversely affected by this regulation may by September 12, 1977, file written objections with the Hearing Clerk, Environmental Protection Agency, 401 M St. SW., East Tower, Room 1019, Washington, D.C. 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Dated: August 4, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

(Sec. 408(d), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a), transferred to the Administrator EPA in Reorganization Plan No. 3 (35 FR 15623).)

40 CFR 180.356 is revised in its entirety to correct the spelling of the chemical name for norflurazon and to include tolerances for residues of the pesticide in or on the raw agricultural commodities apricots, cherries, filberts, peaches, plum (fresh prunes), nectarines, and walnuts.

* * * * *

§ 180.66 Norflurazon; tolerances for residues.

Tolerances are established for combined residues of the herbicide norflurazon (4-chloro-5-(methylamino)-2-$\alpha,\alpha,\alpha,$-trifluoro - m - tolyl) - 3(2H) - pyridazinone) and its desmethyl metabolite 4-chloro -5 - (amino)-α,α,α-trifluoro - m-tolyl)-3(2H)-pyridazinone in or on the following raw agricultural commodities:

Commodity:	*Parts per million*
Apricots	0.1
Cherries	0.1
Cottonseed	0.1
Cranberries	0.1
Filberts	0.1
Peaches	0.1
Plums (fresh prunes)	0.1
Nectarines	0.1
Walnuts	0.1

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

[7 CFR Part 220]

Formulated Grain-Fruit Products

AGENCY: Food and Nutrition Service, USDA

ACTION: Proposed rule.

SUMMARY: This notice proposes to withdraw authorization for the use of a class of products referred to as "formulated grain-fruit products" in the School Breakfast Program. This action results from the questioned need for such products in the School Breakfast Program today. The Department is of the opinion that the withdrawal of "formulated grain-fruit products" will promote the development of good food habits in the furtherance of nutrition education through a well-balanced diet of conventional foods.

DATE: Comments must be received on or before: September 26, 1977.

ADDRESS: Comments may be addressed to the Director, Child Nutrition Division, Food and Nutrition Service, United States Department of Agriculture, Washington, D.C. 20250.

Grace L. Ostenso, Nutrition and Technical Services Staff, Food and Nutrition Service, United States Department of Agriculture, Washington, D.C. 20250, 202–447–9081.

SUPPLEMENTARY INFORMATION: On March 27, 1974 (39 FR 11249) the Food and Nutrition Service published regulations authorizing the use of formulated grain-fruit products which was believed to provide a nutritious, convenient alternative breakfast pattern when served with milk. The conventional breakfast pattern, as specified in the regulations, is a three component meal pattern—bread or cereal; juice, fruit or vegetable; and milk.

The Department believes the preferred source of adequate nutrition is a well-balanced diet of conventional foods. Any "alternate food" authorized for use in the child nutrition programs must make a nutritional contribution equal to or greater than the food it replaces and must be advantageous to the programs, meeting one or more of the following criteria: greater acceptability, lower cost, or improved convenience. The alternative pattern of the formulated grain-fruit product and milk was designed to provide at least 25 percent of the Recommended Dietary Allowances (RDA) for 10 to 12 year old children for specified nutrients except magnesium and kilocalories which are provided at approximately 13 percent of the RDA.

The nutrient levels provided by the alternate pattern are higher than those provided by the conventional breakfast pattern specified in the regulations. The product was considered convenient since it did not require food preparation and service facilities and thus fulfilled a need in no-facility schools and institutions.

The alternate meal pattern has been controversial. There has been some support of the concept and there has also been strong criticism. Some nutritionists and parents have expressed concern about the high sugar and high fat content of the products. Nutrition educators claim that this concept is counterproductive to nutrition education because it is difficult to distinguish it from the unfortified counterpart that is more readily available on the commercial market. It has also been alleged that the concept does not contribute to the formation of good eating habits. Another common criticism has been that the concept does not actually provide much convenience; i.e., a two component pattern is not greatly superior to a three component breakfast pattern. Support of the concept has been based on its labor-saving (convenience) aspect, and that the product ads variety to the menu.

When first introduced, the formulated grain-fruit product appeared to fill a need in no-facility schools and institutions by providing a breakfast where a conventional breakfast could not be served. There is evidence, however, that the majority of schools and institutions using the products today do have adequate food preparation and service facilities to provide a three-component breakfast. The products appear to be used as labor-saving items or to add variety to menus. The Department, therefore, questions the justification to continue authorization of formulated grain-fruit products in the School Breakfast Program. The effective date of this withdrawal is proposed to be June 30, 1978.

Accordingly, Part 220 of Chapter II, Title 7 CFR is proposed to be amended, as follows: The Formulated Grain-Fruit Products section of Appendix A would be deleted.

NOTE.—The Food and Nutrition Service has determined that this document does not contain major proposals requiring preparation of an economic impact statement under Executive Order 11821 and OMB Circular A–107.

Dated: August 9, 1977.

CAROL TUCKER FOREMAN,
Assistant Secretary.

Animal and Plant Health Inspection Service

[9 CFR Part 51]

ANIMALS DESTROYED BECAUSE OF BRUCELLOSIS

Proposed Cattle and Swine Brucellosis Indemnity

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend regulations for the payment of indemnity for animals destroyed because of brucellosis. This is needed to include swine destroyed under brucellosis indemnity program. This action will permit the payment of brucellosis indemnity for swine destroyed, will amend certain procedures, and clarify the regulations.

DATE: Comments on or before September 12, 1977.

ADDRESS: Comments to Deputy Administrator, USDA, APHIS, VS, Room 805, Federal Building, Hyattsville, Md. 20782.

FOR FURTHER INFORMATION CONTACT:

Dr. A. D. Robb, USDA, APHIS, VS, Room 805, Federal Building, Hyattsville, Md. 20782, 301–436–8711.

SUPPLEMENTARY INFORMATION: The eradication of brucellosis from the swine herds of the United States is an essential part of the National Brucellosis Eradication Program. In order to accomplish this objective, it is necessary to provide a means of indemnifying owners of affected and exposed breeding swine for losses incurred by the destruction of such swine. The officials of the Animal and Plant Health Inspection Service believe that indemnification of swine may be accomplished in a manner which is similar to that employed in the indemnification of cattle destroyed because of brucellosis.

Existing regulations require that certain cattle which are destroyed because of brucellosis be individually appraised and that reports of States is an essential part of the National Brucellosis Eradication Program. In order to accomplish this objective, it is necessary to provide

a means of indemnifying owners of affected and exposed breeding swine for losses incurred by the destruction of such swine. The officials of the Animal and Plant Health Inspection Service believe that indemnification of swine may be accomplished in a manner which is similar to that employed in the indemnification of cattle destroyed because of brucellosis.

Existing regulations require that certain cattle which are destroyed because of brucellosis be individually appraised and that reports of salvage be obtained as a prerequisite to the payment of indemnities. These amendments would delete such requirements and authorize the payment of indemnity for both cattle and swine at a prescribed rate. This procedure would materially decrease the manpower needed to process indemnity claims, and should shorten the time between destruction and payment of indemnities to the owner. Consequently, it is expected that the Federal Government should realize an overall savings in funds if the regulations are amended as proposed. The claimant should also benefit by receiving indemnity in a shorter waiting period than has been experienced under the present appraisal and salvage procedures for indemnification of cattle.

The dispersal of diseased cattle recently caused by the Teton Dam disaster in Idaho demonstrated a need for a revision of the regulations to provide for an extension of the time in which reactor or exposed animals must be destroyed when a delay in such destruction has been caused by events beyond the control of the owner. The proposed regulations would provide for such extension. Similarly, an extension of the time in which premises, contaminated because of occupation or use by brucellosis reactor or exposed cattle, should be cleaned and disinfected has also been provided when delay in such cleaning and disinfecting has been caused by events beyond the control of the owner.

Current § 51.4, which explains the meaning of cattle affected with or exposed to brucellosis has been deleted. It appears more logical to move the subject matter of that section to the definition section. Consequently, the proposed docket has added the definitions of "Brucellosis-reactor animals" which are animals affected with brucellosis and "Brucellosis-exposed animals" which are animals exposed to brucellosis, to § 51.1. Additionally, it is proposed that the definitions of "State representative," "Registered Swine," "Inbred or hybrid swine," "Herds known to be affected," "Animals," "Claimant," and "Condemn" be added to § 51.1. Further, the definitions of "Mortgage," "Owner," "Destroyed," "Herd," "Herd depopulation," "Registered cattle," and "Permit" in § 51.1 would be amended for the purposes of clarification.

Another change which is proposed is the replacement of the word "cattle" with the word "animals" in the sections applicable to both cattle and swine.

Section 51.3 of the present regulations, with respect to cattle, states that postmortem reports are acceptable as proof of slaughter and therefore, satisfy the proof of destruction requirement for the payment of indemnities. This provision would be deleted from the regulations because it appears that although postmortem reports are acceptable as proof of slaughter, they are only one of many methods of proving destruction, and need not be emphasized in the regulations. Also, in § 51.3 the phrase "except in Alaska, Hawaii, Puerto Rico, and the Virgin Islands where no payment for any cattle destroyed shall exceed $100" would be added to the section dealing with "exposed cattle." Due to the fact that it is difficult to replace cattle in such areas and the high cost of importing cattle into such areas, it appears that the higher rates of indemnity would be applicable to all cattle in such areas. It is not proposed to make such an exception in the sections authorizing swine indemnity since similar importation and replacement problems with respect to swine are not known to exist.

The identification requirements for cattle which are stated in present § 51.6 would be amended for the purposes of clarifying the requirements and so that the identification requiremenst would not be in conflict with the identification requirements established in Part 78 regulating the interstate movement of cattle to prevent the spread of brucellosis. The proposal would require that all brucellosis reactor cattle for which an indemnity is sought under Part 51 be identified in the manner prescribed in § 78.7(b), whether or not such cattle are to be moved interstate. All other cattle for which indemnity is being sought under Part 51 would be required to be identified with an "S" brand and other specified identification. The proposal also would establish a method of identification for swine for which an indemnity is being sought under Part 51.

The proposal also would amend present § 51.11, dealing with claims for indemnity. The proposal would delete the requirement that payment of indemnity will be made only if each Veterinary Services indemnity claim has been approved by a proper State official and if payment of the claim has been recommended by the appropriate Veterinarian in Charge or an official designated by him. The proposal would substitute therefor a requirement that a properly completed indemnity claim form be submitted to and approved by a Veterinarian in Charge or an official designated by him as a prerequisite to the payment of indemnity. Since the regulations concern the issuance of a Federal indemnity, there does not appear to be any reason that a State official should approve or not approve the indemnity claim. Further, the discretion which the Veterinary Services representative had in recommending or not recommending the payment of a particular claim has been clarified.

The proposal would amend present § 51.13(d) to include "spayed heifers" which was inadvertently omitted when Part 51 was promulgated.

The proposal also makes other minor changes in the present regulations for the purposes of clarifying the regulations.

Accordingly, Part 51, Title 9, Code of Federal Regulations, would be amended in the following respects:

PART 51—ANIMALS DESTROYED BECAUSE OF BRUCELLOSIS

1. The table of contents would be amended to read as follows:

Sec.

51.1 Definitions.
51.2 Cooperation with States.
51.3 Payment to owners for animals destroyed.
51.4 Record of tests.
51.5 Identification of animals to be destroyed because of brucellosis.
51.6 Destruction of animals; time limit for destruction of animals.
51.7 Claims for indemnity.
51.8 Disinfection of premises, conveyances, and materials.
51.9 Claims not allowed.
51.10 Part 53 of this chapter not applicable.

2. § 51.1 would be amended to read:

§ 51.1 Definitions.

For the purposes of this part, the following terms shall be construed, respectively, to mean:

(a) "Department": The United States Department of Agriculture.

(b) "Veterinary Services": Veterinary Services, Animal and Plant Health Inspection Service, USDA.

(c) "Deputy Administrator": The Administrator, Veterinary Services, Animal and Plant Health Inspection Service, USDA, or any other Veterinary Services official to whom authority has heretofore lawfully been delegated or may hereafter be delegated to act in his stead.

(d) "Veterinarian in Charge": The Veterinary official of Veterinary Services, Animal and Plant Health Inspection Service, USDA, who is assigned by the Deputy Administrator to supervise and perform official animal health work of the Animal and Plant Health Inspection Service, in the State concerned.

(e) "Veterinary Services Representative": A Veterinarian or other person employed by Veterinary Services, Animal and Plant Health Inspection Service, USDA, in animal health activities who is authorized to perform the function involved.

(f) "State": Any State, Territory, the District of Columbia, or Puerto Rico.

(g) "Accredited Veterinarian": An accredited veterinarian as defined in Part 160 of this chapter.

(h) "Mortgage": Any mortgage, lien, or other security or interest that is recorded under State law or identified in the indemnity claim form filed under § 51.7 and held by any person other than the one claiming indemnity.

(i) "Person": Any individual, corporation, company, association, firm, partnership, society, or joint stock company, or other legal entity.

(j) "Owner": Any person who has a legal or rightful title to animals whether or not they are subject to a mortgage.

(k) "Destroyed": Condemned under State authority and slaughtered or otherwise dies.

(l) "Official vaccinate": A female bovine animal of a dairy breed vaccinated subcutaneously against brucellosis while from 2 to 6 months (60 to 179 days) of age or a female bovine animal of a beef breed vaccinated subcutaneously against brucellosis while from 2 to 10 months (60 to 299 days) of age, under the supervision of a Federal or State Veterinary official, with a vaccine approved by Veterinary Services, permanently identified as an official vaccinate; and reported at the time of vaccination to the appropriate State or Federal agency cooperating in the eradication of brucellosis: *Provided, however,* That a bovine animal vaccinated prior to June 26, 1975, in accordance with the existing definition of an official vaccinate as set forth in this part at the time of vaccination, shall be deemed to be an official vaccinate.

(m) "Herd": Any group of animals of the same species maintained on common ground for any purpose, or two or more groups of animals (of the same species) under common ownership or supervision, geographically separated but which have an interchange or movement of animals without regard to health status.

(n) "Herd depopulation": (Removal by slaughter or other means of destruction of all cattle in a herd or of all swine in a herd or from a specific premises or under common ownership prior to restocking such premises with new animals, except that steers and spayed heifers or barrows and gilts maintained for feeding purposes may be retained on the premises if the Veterinarian in Charge finds such retention to be compatible with eradication efforts.

(o) "Registered cattle": Cattle for which individual records of ancestry are recorded and maintained by a breed association whose purpose is the improvement of the bovine species, and for which individual registration certificates are issued and recorded by such breed association.

(p) "Registered swine": Any breeding swine for which a certificate of pure breeding has been issued by a purebred swine association.

(q) "Inbred or hybrid swine": Any breeding swine which are the progeny of two or more breeds of registered swine and which are maintained to produce inbred or hybrid swine, and for which records of ancestry exist through which such swine can be individually identified as progeny of said registered swine.

(r) "Permit": An official document for movement of animals under this Part issued by a Veterinary Services representative, State representative, or accredited veterinarian listing the disease status and identification of the animal, where consigned, cleaning and disinfecting requirements, and proof of slaughter certification.

(s) "Brucellosis reactor animal": Any animal which has reacted to an official test for brucellosis as defined in the Uniform Methods and Rules, chapter I, part I–A and part II–G, or chapter II, part I–A and part II–G.[1] [2]

(t) "Brucellosis exposed animal": Any animal, except a brucellosis reactor animal, that is part of a herd known to be affected or that has been in contact with a brucellosis reactor animal in marketing or other channels for a period of 24 hours or for a period of less than 24 hours if such brucellosis reactor animal has aborted, calved, or farrowed within the past 30 days or has a vaginal or uterine discharge.

(u) "Herd known to be affected": Any herd in which any animal has been classified as a brucellosis reactor as defined in the Uniform Methods and Rules, chapter I, part I–A, or chapter II, part I–A, and which has not been released from quarantine in accordance with such Uniform Methods and Rules, chapter I, part II–D, or chapter II, part II–D.[1] [2]

(v) "Animals": Cattle and breeding swine.

(w) "Claimant": A person who files a claim for indemnity under section 51.7 of this part for animals destroyed under this part.

(x) "Condemn": The determination made by Veterinary Services representative, State representative, or accredited veterinarian that animals for which indemnity is sought under this Part shall be destroyed.

(y) "State representative": A veterinarian or other person regularly employed in livestock sanitary work of a State or a political subdivision thereof, and who is authorized by such State or political subdivision to perform the function involved under a cooperative agreement with the United States Department of Agriculture.

3. Section 51.2 would be amended to read:

§ 51.2 Cooperation with States.

The Deputy Administrator has been delegated the authority to cooperate with the proper State authorities in the eradication of brucellosis and to pay indemnities for the destruction of brucellosis-reactor animals or brucellos-exposed animals.

4. Section 51.3 would be amended to read:

§ 51.3 Payment to owners for animals destroyed.

(a) *Cattle.*—(1) *Brucellosis reactor cattle.* The Deputy Administrator may authorize the payment of Federal indemnity by the Department to owners whose cattle are destroyed as brucellosis reactors. The indemnity shall not exceed $50 for any nonregistered cattle or $100 for any registered cattle, except in Alaska, Hawaii, Puerto Rico, and the Virgin Islands where no payment for any nonregistered or registered cattle destroyed shall exceed $100. Prior to payment of indemnity, proof of destruction shall be furnished to the Veterinarian in Charge.

(2) *Herd depopulation.* The Deputy Administrator may authorize the payment of Federal indemnity by the Department to an owner whose herd of cattle are destroyed because of brucellosis. The indemnity shall not exceed $50 for any nonregistered cattle or $100 for any registered cattle, except in Alaska, Hawaii, Puerto Rico, and the Virgin Islands where no payment for any nonregistered or registered cattle destroyed shall exceed $100. Indemnity payment shall only be made for brucellosis exposed cattle or for cattle from a herd known to be affected, and only when the Deputy Administrator determines that the destruction of all cattle in the herd will contribute to the Brucellosis Eradication Program. Prior to payment of indemnity, proof of destruction shall be furnished to the Veterinarian in Charge.

(3) *Exposed cattle.* The Deputy Administrator may authorize the payment of Federal indemnity by the Department to an owner whose cattle are destroyed because of brucellosis. The indemnity shall not exceed $50 for any nonregistered cattle or $100 for any registered cattle, except in Alaska, Hawaii, Puerto Rico, and the Virgin Islands where no payment for any nonregistered or registered cattle destroyed shall exceed $100. Indemnity payment shall be made only for brucellosis exposed cattle and only when the Deputy Administrator determines that the destruction of such cattle will contribute to the Brucellosis Eradication Program. Prior to payment of indemnity, proof of destruction shall be furnished to the Veterinarian in Charge.

(b) *Swine.*—(1) *Brucellosis reactor swine.* The Deputy Administrator may authorize the payment of Federal indemnity by the Department to an owner whose breeding swine are destroyed as brucellosis reactors. The indemnity shall not exceed $25 per head for registered inbred, or hybrid swine, or $10 per head for all other breeding swine. Prior to payment of indemnity, proof of destruction shall be furnished to the Veterinarian in Charge.

(2) *Herd depopulation.* The Deputy Administrator may authorize the payment of Federal indemnity by the Department to an owner whose herd of breeding swine are destroyed because of brucellosis. The indemnity shall not exceed $25 per head for registered, inbred, or hybrid swine, or $10 per head for all other breeding swine. Indemnity payment shall be made only for brucellosis exposed swine or for swine from a herd known to be affected and only when the Deputy Administrator determines that the destruction of all swine in the herd will contribute to the Brucellosis Eradi-

[1] Copies of the January 1975 Recommended Brucellosis Eradication Uniform Methods and Rules (APHIS 91–1) are available upon request from Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture, Federal Building, Hyattsville, Md. 20782, and were filed as part of this original document.

[2] NOTE.—Incorporation by reference provisions approved by the Director, Office of the Federal Register on March 3, 1977.

cation Program. Prior to payment of indemnity, proof of destruction shall be furnished to the Veterinarian in Charge.

(3) *Exposed swine.* The Deputy Administrator may authorize the payment of Federal indemnity by the Department to an owner whose breeding swine are destroyed because of brucellosis. The indemnity shall not exceed $25 per head for registered, inbred, or hybrid swine, or $10 per head for all other breeding swine. Indemnity payment shall be made only for such brucellosis exposed swine and only when the Deputy Administrator determines that the destruction of such swine will contribute to the Brucellosis Eradication Program. Prior to payment of indemnity, proof of destruction shall be furnished to the Veterinarian in Charge.

5. Section 51.4 would be deleted.

6. Section 51.5 would be redesignated as § 51.4 and would be amended to read:

§ 51.4 Records of tests.

The claimant shall be responsible for providing information to Veterinary Services representative, State representative, or accredited veterinarian so that a complete test record may be made by such person on a Veterinary Services approved form for each herd known to be affected, including the reactor tag number of each brucellosis reactor animal and the registration name and number of each brucellosis reactor registered animal. A copy of the applicable test record shall be given to the owner of any such herd, and one copy of each such record shall be furnished to the appropriate State veterinarian's office by such person who completes the test record.

7. Section 51.6 would be redesignated as § 51.5 and the section and section heading would be amended to read as follows:

§ 51.5 Identification of animals to be destroyed because of brucellosis.

(a) The claimant shall be responsible for insuring that any animal for which indemnity is claimed shall be identified in accordance with the provisions of this section within 15 days after having been classified as a reactor or for any other animal subject to this part within 15 days after having been condemned. The Veterinarian in Charge may extend the time limit to 30 days when a request for such extension is received by him prior to the expiration date of the original 15 day period allowed, and when he determines that the extension will not adversely affect the Brucellosis Eradication Program.

(b) Regardless of whether the cattle are to move interstate, all brucellosis reactor cattle shall be identified in the manner prescribed in § 78.7(a) of the regulations for brucellosis reactor cattle. All other cattle for which indemnity is claimed under this Part, shall be identified by a Veterinary Services approved metal eartag and by branding with heat the letter "S" on the left jaw, in letters not less than 2 nor more than 3 inches high.

(c) Swine shall be individually identified by tagging with a metal tag bearing a serial number and inscription "U.S. Reactor" or a similar State reactor tag or other identification approved by the Deputy Administrator, Veterinary Services, upon request in specific cases, attached to the left ear of each animal.

8. Section 51.7 would be redesignated as § 51.6 and would be amended to read:

§ 51.6 Destruction of animals; time limit for destruction of animals.

(a) *Cattle.* The claimant shall be responsible for insuring that cattle subject to this part shall be sold under permit to a State or Federal slaughtering establishment approved by the Deputy Administrator for this purpose,[2] or to a stockyard approved by the Deputy Administrator for sale to such slaughtering establishment.[3]

(b) *Swine.* The claimant shall be responsible for insuring that swine subject to this part shall be sold under permit to a slaughtering establishment where State or Federal meat inspection is available, or to a market approved by the State Animal Health Official, or to a market approved by the Deputy Administrator, for sale to such slaughtering establishment.[4]

(c) *Time limit for destruction of animals.* Payment of indemnity shall be made under this Part only if the animals are destroyed within 15 days after the date of identification, pursuant to § 51.5 of the regulations in this part, except that the appropriate Veterinarian in Charge may extend the time limit to 30 days when request for such extension is received from the owner prior to the expiration date of the original 15-day period allowed, or when the animals were sold for slaughter prior to the expiration date of the original 15-day period, and when the Veterinarian in Charge determines that such extension will not adversely affect the Brucellosis Eradication Program; and except further, that the Deputy Administrator may, upon request in specific cases, extend the time limit beyond the 30-day period when unusual and unforeseen circumstances occur, such as but not limited to floods, storms, or other Acts of God, which are beyond the control of the owner, preventing or hindering the destruction of the animals.

9. Sections 51.8, 51.9, and 51.10 would be deleted in their entirety.

10. Section 51.11 would be redesignated as § 51.7 and would be amended to read:

§ 51.7 Claims for indemnity.

Claims for indemnity for animals destroyed because of brucellosis shall be presented on indemnity claim forms furnished by Veterinary Services on which the owner of the animals covered thereby shall certify that the animals are or are not subject to any mortgage as defined in this part. If the owner states there is a mortgage, the Veterinary Services indemnity claim form shall be signed by the owner and by each person holding a mortgage on the animals, consenting to the payment of any indemnity allowed to the person specified thereon. Payment will be made only if the claimant has submitted a complete indemnity claim form to, and such claim has been approved by the Veterinarian in Charge or by a Veterinary Services representative designated by him. On claims for indemnity made under the provisions of § 51.3, the Veterinarian in Charge or a Veterinary Services representative designated by him shall record on the Veterinary Services indemnity claim form the amount of Federal and State indemnity payments that appear to be due to the owner of the animals. The owner of the animals shall be furnished a copy of the completed Veterinary Services indemnity claim form. The Veterinarian in Charge or a Veterinary Services representative designated by him shall then forward the completed Veterinary Services indemnity claim form to the Deputy Administrator for further action on the claim. No charges for holding the animals on the farm pending slaughter or for trucking by the owner shall be so deducted or otherwise paid by the Department.

11. Section 51.12 would be redesignated as § 51.8 and would be amended to read:

§ 51.8 Disinfection of premises, conveyances, and materials.

All premises, including all structures, holding facilities, conveyances, and materials, contaminated because of occupation or use by brucellosis reactor or exposed animals shall be properly cleaned and disinfected with a disinfectant permitted by Veterinary Services in accordance with recommendations of the Veterinary Services or State representative within 15 days from the date reactors were removed from the premises, except that the appropriate Veterinarian in Charge may extend the time limit for disinfection to 30 days when request for such extension is received by him prior to the expiration date of the original 15-day period allowed, and when he determines that such extension will not adversely affect the Brucellosis Eradication Program; and except further, that the Deputy Administrator may, upon request in specific cases, extend the time limit beyond the 30-day period when unusual and unforeseen circumstances occur, such as but not limited to floods, storms, or other Acts of God, which are beyond the control of the owner, preventing or hindering the disinfection of premises, conveyances, and materials. Certain premises may be exempted from such cleaning and disinfacting requirements by approval of the appropriate Veterinarian in Charge or written recommendations by the Veterinary Services or State representative or when a written report by the Veterinary Services or State representative determines that there are no buildings, holding facilities, conveyances, or other materials on the premises that would require such cleaning and disinfection.

12. Section 51.13 would be redesignated § 51.9 and would be amended to read:

§ 51.9 Claims not allowed.

Claims for compensation for animals destroyed because of brucellosis shall not be allowed if any of the following circumstances exist:

(a) If the claimant has failed to comply with any of the requirements of this Part.

(b) If the existence of any such disease in the animal was determined as the result of an agglutination test applied in accordance with the Uniform Methods and Rules[1 2] by an accredited veterinarian and specific instructions for the administration of such test had not previously been issued to such veterinarian by the proper Veterinary Services and State authorities.

(c) If all cattle susceptible to brucellosis in the claimant's herd have not been tested for brucellosis under Veterinary Services or State supervision, or if all swine susceptible to brucellosis in the claimant's herd have not been tested for brucellosis under Veterinary Services or State supervision.

(d) If the animals or barrows or gilts maintained for feeding purposes, or are spayed heifers or steers unless the steers are work oxen.

(e) If the animals are classified as reactors and are unofficial vaccinates unless there is either a record of a negative blood agglutination test made not less than 30 days following the date of vaccination in accordance with the Uniform Methods and Rules,[1 2] or unless other Veterinary Services approved tests show the vaccinates are affected with virulent Brucellae.

(f) If there is substantial evidence that the owner or his agent has in any way been responsible for any unlawful or improper attempt to obtain indemnity funds for such animal.

(g) If, at the time of test or condemnation, the animals belonged to or were upon the premises of any person to whom they had been sold for slaughter; shipped for slaughter, or delivered for slaughter.

13. Section 51.14 would be redesignated as § 51.10 and would be amended to read:

§ 51.10 Part 53 of this chapter not applicable.

No claim for indemnity for animals destroyed because of brucellosis shall hereafter be paid under the regulations contained in Part 53 of this chapter, but all such claims shall be presented and paid pursuant to and in compliance with regulations contained in this Part.

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, 6505 Belcrest Road, Room 805, Hyattsville, Md. 20782, during regular hours of business (8 a.m. to 4:30 p.m., except holidays) in a manner convenient to the public business (7 CFR 1.27 (b)).

Comments submitted should bear a reference to the date and page number of this issue in the FEDERAL REGISTER.

Done at Washington, D.C., this 1st day of August 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparations of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

PIERRE A. CHALOUX,
Acting Deputy Administrator,
Veterinary Services.

FEDERAL ENERGY ADMINISTRATION

[10 CFR Parts 210, 211, and 212]

EXEMPTION OF MOTOR GASOLINE FROM MANDATORY PETROLEUM ALLOCATION AND PRICE REGULATION

Environmental Assessment of Proposed Rulemaking

AGENCY: Federal Energy Administration.

ACTION: Notice of availability.

SUMMARY: The Federal Energy Administration (FEA) has proposed to exempt motor gasoline from the mandatory petroleum allocation and price regulations and has made a negative determination as to the necessity of preparing an environmental impact statement with respect to this action.

DATE: Comments by September 6, 1977.

ADDRESS: Written comments to Executive Communications, Box ON, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Denna Williams (FEA Reading Room), 12th and Pennsylvania Avenue NW., Room 2107, Washington, D.C. 20461. (202-566-9161).

Gerald P. Emmer or William E. Caldwell, (Regulatory Programs), 2000 M Street NW., Room 2304, Washington, D.C. 20461. (202-254-8034).

J. Thomas Wolfe, (Office of General Counsel), 12th and Pennsylvania Avenue NW., Room 7146, Washington, D.C. 20461. (202-566-9750).

SUPPLEMENTARY INFORMATION: The proposed rulemaking would exempt motor gasoline from the provisions of 10 CFR Parts 210, 211, and 212, and is possible under section 12 of the Emergency Petroleum Allocation Act (EPAA), which was added to the EPAA on December 22, 1975, by the Energy Policy and Conservation Act, Pub. L. 94-163.

Pursuant to 10 CFR 208.4, the FEA hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the proposed rulemaking. Based upon assessment of environmental impacts that are expected to result from the implementation of the proposed rulemaking, the FEA has determined that exemption of motor gasoline from mandatory allocation and price regulation will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), FEA has determined that an environmental impact statement is not required for these plans.

Single copies of the environmental assessment may be obtained from the National Energy Information Center, Room 1404, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. Copies of the environmental assessment will also be available for public review in the FEA Freedom of Information Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Interested parties are invited to submit written comments with respect to the environmental assessment to the above address. Comments should be identified on the outside of the envelope and on the documents submitted to FEA with the designation "Environmental Assessment—Motor Gasoline Regulation Exemption." Five (5) copies should be received by FEA by September 6, 1977, in order to ensure consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., August 5, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

[10 CFR Parts 210, 211 and 212]

Exemption of Motor Gasoline From the Mandatory Petroleum Allocation and Price Regulations

AGENCY: Federal Energy Administration.

ACTION: Notice of Proposed Rulemaking and Public Hearing.

SUMMARY: The Federal Energy Administration (FEA) proposes to amend 10 CFR Parts 210, 211 and 212 to exempt motor gasoline (as defined in 10 CFR §§ 211.51 and 212.31) on November 1, 1977 from its Mandatory Petroleum Al-

location and Price Regulations and to establish a transitional assignment program for motor gasoline to alleviate possible supply dislocations following deregulation. In connection with its proposed exemption of motor gasoline, FEA is issuing concurrently with this notice its "Preliminary Findings and Views Concerning the Exemption of Motor Gasoline from the Mandatory Petroleum Allocation and Price Regulations" (the "Preliminary Findings").

DATES: Comments by September 6, 1977, 4:30 p.m.; requests to speak by August 26, 1977, 4:30 p.m.; statements by September 6, 1977, 4:30 p.m. for the National hearing and on the day the statement is to be presented for the Regional hearings; hearings to be held on the dates and at the locations set forth below.

HEARINGS DATES

National Hearing: September 7, 1977, 9:30 a.m. and continued if necessary at 9:30 a.m. at the same location on September 8, 1977.
Atlanta Hearing: September 7, 1977, 9:30 a.m. and continued if necessary at 9:30 a.m. at the same location on September 8, 1977.
New York Hearing: September 7, 1977, 9:30 a.m. and continued if necessary at 9:30 a.m. at the same location on September 8, 1977.
Chicago Hearing: September 7, 1977, 9:30 a.m. and continued if necessary at 9:30 a.m. at the same location on September 8, 1977.
Dallas Hearing: September 7, 1977, 9:30 a.m. and continued if necessary at 9:30 a.m. at the same location on September 8, 1977.
Denver Hearing: September 8, 1977, 9:30 a.m.
San Francisco Hearing: September 6, 1977, 9:30 a.m.

ADDRESSES: Written comments to: Executive Communications, Room 3317, Federal Energy Administration, 12th and Pennsylvania Avenue, N.W., Box ON, Washington, D.C. 20461. Statements for the National hearing to Executive Communications, Room 3317, Federal Energy Administration, 12th and Pennsylvania Avenue, N.W., Box ON, Washington, D.C. 20461 and for the Regional Hearings to the location of the hearing.

REQUESTS TO SPEAK TO

National Hearing: Federal Energy Administration, Attn: Executive Communications, 12th and Pennsylvania Avenue NW., Room 3317, Box ON, Washington, D.C. 20461.
Atlanta, Georgia Hearing: FEA, 1655 Peachtree St., Atlanta, Georgia 30309, Attn: S. Orr.
Chicago, Illinois Hearing: FEA, 175 W. Jackson Blvd., Room A-333, Chicago, Illinois 60604, Attn: C. Swank.
Dallas, Texas Hearing: FEA, 2626 West Mockingbird Lane, Dallas, Texas 75235, Attn: S. Dickey.
Denver, Colorado Hearing: FEA, P.O. Box 26247, Belmar Branch, 1075 South Yukon Street, Lakewood, Colorado 80226, Attn: R. Drawe.
San Francisco, California Hearing: FEA, Third Floor, 111 Pine Street, San Francisco, California 94111, Attn: J. McGourty.
New York, New York Hearing: FEA, 26 Federal Plaza, New York, New York 10007, Attn: E. W. Hennessey.

HEARING LOCATIONS

National Hearing: Room 3000A, Federal Energy Administration, 12th and Pennsylvania Avenue, N.W., Washington, D.C.
Atlanta, Georgia Hearing: Atlanta Civic Center, Room 201, 395 Piedmont Avenue, N.E., Atlanta, Georgia 30308.
Chicago, Illinois Hearing: Everett McKinley Dirksen Building, Room 1220, 219 South Dearborn Street, Chicago, Illinois 60604.
Dallas, Texas Hearing: FEA, Training Room 250, 2626 West Mockingbird Lane, Dallas, Texas 75235.
Denver, Colorado Hearing: Main Post Office Building, Room 269, 18th and Stout Street, Denver, Colorado 80266.
San Francisco, California Hearing: U.S. Environmental Protection Agency, Conference Room, Second Floor, 100 California Street, San Francisco, California 94111.
New York, New York Hearing: FEA, Room 305C, 26 Federal Plaza, New York, New York 10007.

SUPPLEMENTARY INFORMATION:

I. INTRODUCTION

Following a preliminary analysis of the impact of regulation of motor gasoline pursuant to the Emergency Petroleum Allocation Act of 1973 (EPAA), as amended P.L. 93-159, FEA has tentatively concluded that this product should be exempted from the Mandatory Petroleum Allocation and Price Regulations. Therefore, by this notice of proposed rulemaking, FEA is proposing two amendments to be submitted as energy actions to the Congress in accordance with the provisions of section 12 of the EPAA, section 551 of the Energy Policy and Conservation Act, P.L. 93-163 (EPCA), and section 102 of the Energy Conservation and Production Act, P.L. 94-385 (ECPA), to exempt motor gasoline, effective November 1, 1977, from the application of the Mandatory Petroleum Allocation and Price Regulations (10 CFR Parts 210, 211, and 212), thereby converting the EPAA to standby authority with respect to the pricing and allocation of motor gasoline. These proposed amendments are issued concurrently with FEA's Preliminary Findings.[1]

In addition to requesting comments on the proposed exemption of motor gasoline, FEA also requests public comment with respect to the Preliminary Findings and the proposed motor gasoline transitional assignment program. If, after all comments received during the public comment period are fully considered, FEA concludes that its preliminary findings and views are correct, two energy actions to exempt motor gasoline from regulation will be submitted to the Congress. The transitional assignment program will become effective upon the effectiveness of the proposal to exempt motor gasoline from allocation controls.

II. BACKGROUND

On January 19, 1977, following a notice of proposed rulemaking (41 FR 51832, November 24, 1976) and public hearings, FEA issued two amendments exempting motor gasoline from 10 CFR Parts 210, 211 and 212, the General Allocation and Price Rules and the Mandatory Petroleum Allocation and Price Regulations (42 FR 4416 and 42 FR 4419, January 25, 1977). These amendments were transmitted to the Congress as Energy Actions Nos. 8 and 9 on January 19, 1977, in accordance with the procedures set forth in section 551 of the EPCA.

At the time the amendments were issued, FEA provided therein that the amendments would take effect March 1, 1977, unless disapproved by either House of Congress or, because of the pending change of Administration, withdrawn by the President prior to Congressional approval or disapproval during the 15-day period provided for Congressional review by the EPCA. Notice was thereby given that the FEA rulemaking proceeding to exempt motor gasoline from its regulations was continued for the purpose of permitting a subsequent withdrawal of the energy actions and recision of the amendments in the event that the new Administration determined that further consideration would be necessary.

Prior to the end of the 15-day Congressional review period, the President determined that the motor gasoline exemption amendments required further consideration and, on January 24, 1977, FEA issued a notice rescinding the January 19 amendments (42 FR 3036, January 27, 1977) and thereby withdrew Energy Actions Nos. 8 and 9 from Congressional review.

In the President's April 29, 1977 National Energy Plan, the Administration expressed its intention to examine the motor gasoline supply and demand situation with the view toward decontrolling motor gasoline at the end of the peak driving season this fall:

> Gasoline allocation and price controls are another major area of unsettled oil policy. Gasoline prices have never reached their allowable controlled ceilings, and marketers have contended for some time that deregulation of gasoline would increase competition by allowing them to shop among suppliers. There is little question that gasoline allocation and price controls have distorted what at times has been a competitive market.
>
> * * * [T]he Administration currently hopes to eliminate gasoline price controls and allocation regulations at the end of the peak driving season this coming fall. Gasoline prices and market competition will be closely monitored between now and then to assure this policy is appropriate. If gasoline were to be decontrolled, controls could be reimposed if prices rose above a predetermined level. This standby authority would permit the elimination of controls while protecting consumers. (*The National Energy Plan*, p. 59.)

In accordance with the National Energy Plan, FEA has continued its examination of the impact of regulation of motor gasoline and, as discussed in more detail below, has tentatively concluded that, following the peak driving season this summer, continuation of the motor gasoline regulations will not be necessary to achieve the objectives of the EPAA.

III. EXEMPTION PROCEDURE

Section 455 of the EPCA has provided more flexibility to exempt a product category or categories from FEA price and allocation regulations than was the case under the EPAA prior to enactment of the EPCA. For example, pursuant to EPCA section 455 a product category or product categories may be exempted from FEA regulations in the same proceeding, and an exemption is no longer limited to 90 days in length as was previously required. FEA may propose to exempt an oil or refined product category from the regulations prescribed under section 4(a) of the EPAA if it determines that the exemption is consistent with the attainment of the public policy objectives specified in section 4(b)(1) of the EPAA. Those objectives are as follows:

(A) Protection of public health (including the production of pharmaceuticals), safety and welfare (including maintenance of residential heating, such as individual homes, apartments and similar occupied dwelling units), and the national defense;

(B) Maintenance of all public services (including facilities and services provided by municipally, cooperatively, or investor owned utilities or by any State or local government or authority, and including transportation facilities and services which serve the public at large);

(C) Maintenance of agricultural operations, including farming, ranching, dairy, and fishing activities, and services directly related thereto;

(D) Preservation of an economically sound and competitive petroleum industry, including the priority needs to restore and foster competition in the producing, refining, distribution, marketing, and petrochemical sectors of such industry, and to preserve the competitive viability of independent refiners, small refiners, nonbranded independent marketers, and branded independent marketers;

(E) The allocation of suitable types, grades, and quality of crude oil to refineries in the United States to permit such refineries to operate at full capacity;

(F) Equitable distribution of crude oil, residual fuel oil, and refined petroleum products at equitable prices among all regions and areas of the United States and sectors of the petroleum industry, including independent refiners, small refiners, nonbranded independent marketers, branded independent marketers, and among all users;

(G) Allocation of residual fuel oil and refined petroleum products in such amounts and in such manner as may be necessary for the maintenance of, exploration for, and production or extraction of—

(i) Fuels, and

(ii) Minerals essential to the requirements of the United States, and for required transportation related thereto;

(H) Economic efficiency; and

(I) Minimization of economic distortion, inflexibility, and unnecessary interference with market mechanisms.

Pursuant to EPAA section 12, an amendment exempting crude oil, residual fuel oil, or a refined petroleum product with respect to a class of persons or transactions with respect to any market level, must be submitted to the Congress as an energy action before it takes effect. The exemption will become effective if the amendment is not disapproved by either House of Congress within 15 days following its submission for Congressional review under section 551 of the EPCA.

Section 12 of the EPAA further provides that any amendment submitted to Congress which proposes to exempt crude oil (if permissible under and consistent with the requirements and limitations of section of the EPAA), residual fuel oil, or any refined petroleum product from FEA allocation regulations must be accompanied by a finding that the oil product is no longer in short supply and that the exemption would not have an adverse impact on the supply of any other oil or product. A proposed exemption from FEA price regulations must be accompanied by findings that competition and market forces would provide adequate protection for the summer, and that such amendment would not result in inequitable prices for any class of user. An exemption amendment submitted to the Congress must also be accompanied by an FEA analysis of the potential economic impact of such amendment.

Any oil or refined petroleum product which is exempted from the FEA regulation under section 4(a) of the EPAA is subject to the reimposition of price and allocation controls if FEA determines that reimposition is necessary for and consistent with the objectives specified in EPAA section 4(b)(1). Pursuant to section 12(f) of the EPAA, subsequent reexemption of that oil or refined petroleum product would not be subject to Congressional review.

In addition, section 102 of the ECPA, enacted on August 14, 1976, prohibits FEA from submitting to the Congress as one energy action an amendment proposing exemption of any oil, refined petroleum product or refined product category from both the allocation and pricing regulations. However, FEA may concurrently submit to the Congress an energy action relating to price together with an energy action relating to allocation of the same oil, refined petroleum product, or refined product category.

IV. PROPOSED EXEMPTION

As section 12(c)(2) of the EPAA requires that an exemption amendment apply to only one refined petroleum product or one refined product category, and specifies that motor gasoline constitutes a single product category, FEA proposes the exemption from FEA price and allocation regulations of motor gasoline as a single product category in this notice of proposed rulemaking. FEA is proposing the exemption of motor gasoline from both the Mandatory Petroleum Allocation Regulations and the Mandatory Petroleum Price Regulations because recent surplus supplies and market conditions appear to justify an end to both types of controls. Upon conclusion of this rulemaking, FEA will determine whether an exemption of motor gasoline from either of or both the allocation and price regulations should be adopted. If FEA determines that motor gasoline should be exempt from such regulations, FEA will submit the appropriate exemption amendments to the Congress for review of FEA's findings and views supporting such exemption. If, as stated above, FEA ultimately concludes that motor gasoline should be exempted from the mandatory Petroleum Price Regulations, further conforming amendments to FEA price regulations, beyond the simple exemption proposed herein, may be necessary to adequately effectuate the exemption of motor gasoline pursuant to this proceeding.

For purposes of this proposed exemption, motor gasoline, as defined in FEA allocation regulations (10 CFR 211.51), "means a mixture of volatile hydrocarbons, suitable for operation of an internal combustion engine, whose major components are hydrocarbons with boiling points ranging from 140° to 390° F and whose source is distillation of petroleum and cracking, polymerization, and other chemical reactions by which the naturally occuring petroleum hydrocarbons are converted to those that have superior fuel properties." Motor gasoline does not, however, include aviation gasoline. Gasoline as defined in the pricing regulations (10 CFR §212.31) to mean "all of the various grades, other than aviation gasoline, of refined petroleum naptha which, by its composition, is suitable for use as a carburant in internal combustion engines" would also be included in the exemption

[1] The Preliminary Findings were prepared prior to the passage by Congress on August 4, 1977 of the Clean Air Act Amendments of 1977; if enacted, projected effects of these amendments will be accounted for where necessary in the final findings before an energy action proposing an exemption is submitted to Congress

FEA has tentatively concluded in its preliminary findings on the basis of currently available data that this exemption would be consistent with and in furtherance of the attainment of the objectives set forth in section 4(b)(1) of the EPAA, as amended by section 451 of the EPCA.

As noted in the preliminary findings, FEA's demands forecasts were derived from FEA's short-term model which uses macroeconomic forecasts by Data Resources, Inc. (DRI). The current petroleum product demand estimates are consistent with Counsel of Economic Advisors—FEA economic targets and are based on a DRI Trendlong 0377 macroeconomic simulation of these targets. Furthermore, FEA conducted a refiner survey to determine industry estimates of supply and demand and sets forth the results in the preliminary findings.

FEA's preliminary conclusions are that, as long as supplies are adequate, the continuation of allocation and price controls for motor gasoline is not necessary to protect the public health, safety, and welfare (section 4(b)(1)(A)); the maintenance of all public services (section 4(b)(1)(B)); the maintenance of agricultural operations section 4(b)(1)(C)); or the maintenance of exploration for and production or extraction of fuels and minerals (section 4(b)(1)(G)). Adequate supply and the positive effects of increased competition would also insure that the proposed exemption is consistent with the preservation of an economically sound and competitive petroleum industry (section 4(b)(1)(D)); the equitable distribution of crude oil, residual fuel oil and refined petroleum products (section 4(b)(1)(F)); economic efficiency (section 4(b)(1)(H)); and minimization of economic distortions, inflexibility, and interference with market mechanisms (section 4(b)(1)(I)). The proposed exemption should have no adverse effect on the allocation of suitable crude oil to domestic refineries (section 4(b)(1)(E)). FEA emphasizes that these conclusions are preliminary and invites specific data, views and arguments with respect to the relationship between the objectives of the EPAA and the exemption contemplated by this proposal. Any further information received with respect to the compatibility of the exemption proposed herein with these objectives will be considered by FEA in formulating its final conclusions.

Tentative conclusions as set forth in the preliminary findings include:

(1) Motor gasoline is not now in short supply, and anticipated supplies of motor gasoline will be sufficient to meet the demand through 1979.

(2) Exemption of motor gasoline from the Mandatory Petroleum Allocation and Price Regulations would not have an adverse impact on the supply of any other oil or refined product subject to the EPAA.

(3) Competition and market forces are adequate to protect consumers if motor gasoline is exempted from regulation.

(4) Such an exemption from regulation will not result in inequitable prices for any class of user of motor gasoline fuel or other products.

In connection with tentative conclusion (3) set forth above, it should be noted that FEA projects that during the period of adequate supplies, non-cost-justified price increases will not occur solely as a result of motor gasoline decontrol.

The preliminary findings also indicate FEA's tentative views concerning the potential economic impacts of exempting motor gasoline from the Mandatory Petroleum Allocation and Price Regulations. As long as supplies remain adequate, it is not anticipated that there will be any adverse State or regional impacts resulting from the proposed exemption. As noted in the preliminary findings, the price regulations afford refiners regional pricing flexibility of up to three cents a gallon and removal of controls should not result in disparate price increases for any region.

In addition, in a period of adequate supplies, FEA anticipates no adverse economic impacts on the availbility of consumer goods or services, the Gross National Product, small business or the supply and availability of energy resources as fuel or feedstock for industry. FEA believes that the proposed exemption may have a positive effect on competition. The proposed exemption is likewise expected not to cause an adverse effect on employment or consumer prices. FEA's analysis preliminarily concludes that, since supplies should remain adequate, there will be no effect of the proposed exemption on the rate of unemployment in the United States, on the Consumer Price Index or on the implicit price deflator for the Gross National Product.

As stated in the National Energy Plan, if in a decontrolled setting prices were to rise above a predetermined level, controls could be reimposed. FEA intends to closely monitor motor gasoline prices at both the retail and refiner level and is particularly concerned as to the effects on prices if a shortage were to develop. FEA is requesting comments as to whether a price monitoring system such as that adopted with respect to middle distillates might be appropriate to disclose unwarranted price increases following decontrol of motor gasoline, and also the most effective manner in which such a system may be implemented. FEA will separately request written comments and hold public hearings with respect to the specific features of a price monitoring system.

V. Proposed Transitional Assignment Program

FEA is hereby proposing Special Rule No. 4 to Subpart A of the Mandatory Petroleum Allocation Regulations (10 CFR Part 211), which would establish an assignment program for motor gasoline to protect marketers as to their ability to obtain supplies during the transitional year following removal of controls. Special Rule No. 4, as proposed herein, is derived substantially from the Special Rule No. 4 contained in the motor gasoline exemption amendments issued January 19, 1977.

While FEA does not expect supply dislocations to occur as a result of motor gasoline decontrol, Special Rule No. 4, which is proposed to be effective following the exemption of motor gasoline, is designed as a safeguard against the same type of potential supply dislocations which prompted the adoption of Special Rule No. 3 to Subpart A of 10 CFR Part 211, following the exemption of middle distillates. FEA seeks to insure that no marketer of gasoline will lose its supply source without adequate time to arrange for a new supplier during the transitional period following the removal of controls. The proposal permits marketers who have made diligent unsuccessful efforts to obtain supplies of motor gasoline to be assigned as much as their previously authorized base period use.

Under proposed Special Rule No. 4, to terminate motor gasoline supplier/wholesale purchaser relationships prior to the end of the transitional year, all suppliers would be required to provide at least ninety days notice to any wholesale purchaser (commencing no earlier than the effective date of the final amendment) before terminating the supply relationship with that purchaser. Any such termination could be effective only at the beginning of a month. If the purchaser would be unable, after a diligent effort, to obtain a supply of motor gasoline equal to its base period use, it could apply at least thirty days prior to the date on which the termination is to become effective to the FEA Regional Office for the region where it is located, to continue its supplier/purchaser relationship with its base period supplier for three additional months. The wholesale purchaser could reapply to the FEA Regional Office for two additional continuation orders for three month periods if it were to remain unable after diligent efforts to find alternative sources of supply. A purchaser which chose not to receive product from its base period supplier during any three month period, however, would be assumed to have an alternative source of supply and not be eligible to apply for a further transition assignment as to the volume of product not lifted, unless such failure to lift was due to factors beyond the control of the purchaser and FEA determines that the purchaser's inability to obtain that volume would impose an undue hardship on that purchaser. The notification and transitional assignment periods would provide a maximum of four three month periods of assured supply. In any event, no assignment under the proposed Special Rule No. 4 would extend beyond one year from the effective date of the exemption.

Special Rule No. 4 would also provide that if FEA fails to act on an application for continuation of a supplier/purchaser relationship that was filed in a timely fashion, that is, at least thirty days prior to the date on which a termination following ninety days' notice was to take effect or a prior continuation order was to expire, the supplier/purchaser relationship would not end but would automatically continue for an additional month pending FEA action on the application. Moreover, if a late-filed application is not acted on by FEA by the termination date, Special Rule No. 4 would authorize FEA to issue a temporary continuation order for one month pending final action on the application if the applicant would show good cause for the late filing.

Inasmuch as prices will no longer be subject to controls during this period, if the exemption with regard to price is not disapproved, proposed Special Rule No. 4 would also prevent circumvention of the transitional assignment procedures set forth above by requiring that prices charged to wholesale purchasers, including marketers, receiving product under Special Rule No. 4 shall be nondiscriminatory. Suppliers would have to make gasoline available to purchasers which are assigned to them pursuant to Special Rule No. 4 on the same terms and conditions under which they would make gasoline available to other purchasers in the same class. In other words, suppliers could not discriminate against purchasers solely because they are assigned purchasers. The same definition of "discrimination" would apply for purposes of the Special Rule as currently is used in 10 CFR § 210.62(b).

In the event Special Rule No. 4 is adopted, FEA intends to issue guidelines to provide both FEA and the public greater guidance on the operation of the provisions of the Rule. These guidelines would explain in greater detail such matters as what efforts FEA would deem to constitute a "diligent unsuccessful effort to locate an alternate source of supply" and how the non-discrimination requirements would apply in particular situations.

In the context of assuring supplies for marketers during the transitional period, FEA requests comments whether a special motor gasoline state set-aside, operated by state energy offices, would be necessary in addition to the proposed transitional assignment program.

VI. Effective Date

FEA is proposing to have motor gasoline decontrol become effective on November 1, 1977 or on the first day following the expiration of the Congressional review period, whichever is later. If a longer lead time is believed to be necessary to allow gasoline marketers and purchasers to plan to operate in an unregulated market, comments should be submitted regarding the appropriate time period to delay the effective date of decontrol.

VII. Comments and Procedures

FEA's specific preliminary findings and views on the exemption proposed hereby and the data and information in support of the proposed exemption are fully set forth in its Preliminary Findings. Interested persons may obtain copies of the Preliminary Findings by writing FEA, Office of Communications and Public Affairs, Publications Distribution Center, Washington, D.C. 20461. Copies will also be available at the FEA Press Room, Room 3138, 1200 Pennsylvania Avenue NW., Washington, D.C., and at each of the FEA Regional Offices.

FEA has determined that in addition to holding a public hearing on this proposal in Washington, D.C., it will hold regional hearings in Atlanta, Chicago, Dallas, Denver, New York, and San Francisco.

In Washington, D.C., the hearing (hereinafter referred to as the National hearing) will be held beginning at 9:30 a.m., e.d.t., on September 7, 1977 in Room 3000A, 12th and Pennsylvania Avenue NW., Washington, D.C., and will be continued if necessary at 9:30 a.m., September 8, 1977, e.d.t., at the same location. Any person who has an interest in this proceeding or who is a representative of a group or class of persons that has an interest in this proceeding may make a written request for an opportunity to make an oral presentation. Such a request should be directed to Executive Communications, FEA, Room 3317, Box ON, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, and must be received before 4:30 p.m., e.d.t., on August 26, 1977. A request may be hand delivered between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday.

The regional hearings in Atlanta, Chicago, Dallas, and New York, will be held beginning at 9:30 a.m., local time, September 7, 1977 at the locations specified below, and these regional hearings will be continued if necessary on September 8, 1977 at 9:30 a.m., local time, at the same locations. The San Francisco regional hearing will be held at 9:30 a.m., local time, on September 6, 7977 and the Denver regional hearing will be held at 9:30 a.m., local time, on September 8, 1977. Any person who has an interest in this proceeding or who is a representative of a group or class of persons that has an interest may make a written request for an opportunity to make an oral presentation. Such a request should be directed to FEA at the address given below for the appropriate Region, and in accordance with the request procedures set forth below. Requests must be received before 4:30 p.m., local time, August 26, 1977.

FEA region	Submit requests to (with a duplicate to)	Hearing location
[illegible]	FEA, 1655 Peachtree [illegible] Atlanta, Ga. 30367 Attention: S. Orr	Atlanta Civic Center, Room 210, 395 Piedmont Ave., N.E., Atlanta, Ga. 30308.
[illegible]	FEA, 175 West Jackson Blvd., [illegible] Chicago, Ill. 60604 Attention: C. [illegible]	Everett McKinley Bldg., room 1020, 219 South Dearborn St., Chicago, Ill. 60604.
Dallas, Tex.	Federal Energy Administration, 2626 West Mockingbird Lane, Dallas, Tex. 75235 Attention: S. Dicker.	FEA, Training Room 250, 2626 West Mockingbird Lane, Dallas, Tex. 75235.
[illegible]	FEA Regional Administrator, P.O. Box 26247, Belmar Branch, 1075 South Yukon St., Lakewood, Colo. 80226 Attention: R. Drawe.	Main Post Office Bldg., Room 263, 18th and Stout Sts., Denver, Colo. 80202.
[illegible], N.Y.	FEA, Regional Administrator, 26 Federal Plaza, New York, N.Y. 10007 Attention: E.A. Horowitz.	FEA, Room 3657, 26 Federal Plaza, New York, N.Y. 10007.
[illegible], Calif.	FEA, Regional Administrator, 50 Fulton, 111 Lombard St., San Francisco, Calif. 94111 Attention: J. McGourty.	U.S. Environmental Protection Agency, Conference Room, 2d floor, 100 California St., San Francisco, Calif. 94111.

The following request procedures are applicable to both the National and regional hearings. Persons requesting an opportunity to make an oral presentation should submit their written requests to the appropriate address for the hearing in which they wish to appear. Requests should be labeled both on the document and on the envelope "Exemption of Motor Gasoline."

The person making the request should briefly describe the interest concerned; if appropriate, state why he or she is a proper representative of a group or class of persons that has such interest; and give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through August 30, 1977. Each person selected to be heard will be so notified by the FEA before 4:30 p.m., local time, August 30, 1977. One hundred copies of his or her statement must be submitted to the Executive Communications, FEA Room 3317, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, before 9:00 a.m., e.d.t. on September 6, 1977 for the National hearing, and to the location of the hearing on the day the statement is scheduled to be presented for the regional hearings.

The FEA reserves the right to select the persons to be heard at these hearings, to schedule their respective presentations and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearings. These will not be judicial or evidentiary-type hearings. Questions may be asked only by those conducting the hearings and there will be no cross-examination of persons presenting statements. Any decision made by the FEA with respect to the subject matter of the hearings will be based on all information available to the FEA. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions, to be asked of any person making a statement at the National hearing, to Executive Communications, FEA, Room 3309, Federal Building, 12th and

Pennsylvania Avenue NW., Washington, D.C. before 4:30 p.m., e.d.t., September 2, 1977. Any interested person may submit questions to be asked of any person making a statement at the regional hearings to the same address as that for submitting requests to testify, before 4:30 p.m., local time, September 2, 1977. Any person who makes an oral statement and who wishes to ask a question at the hearings may submit the question, in writing, to the presiding officer. The FEA or the presiding officer, if the question is submitted at the hearings, will determine whether the question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding officer.

Transcripts of the hearings will be made and the entire record of hearings, including the transcripts, will be retained by the FEA and made available for inspection at the Freedom of Information Office of the FEA, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcripts from the reporters.

Interested persons are also invited to participate in this rulemaking by submitting data, views, or arguments with respect to the proposed regulations set forth in this notice to Executive Communications, Federal Energy Administration, Room 3317, 12th and Pennsylvania Avenue NW., Box ON, Washington, D.C. 20461.

Comments should be identified on the outside envelope and on documents submitted to the FEA, Executive Communications, with the designation "Exemption of Motor Gasoline." Fifteen copies should be submitted. All comments received by September 6, 1977, and all relevant information will be considered by the FEA before final action is taken on the proposed regulations.

The inflationary impact of this proposal has been considered by the FEA, consistent with Executive Order 11821, issued November 27, 1974, and OMB Circular A–107. FEA has determined that this document contains a major proposal requiring preparation of an Inflationary Impact Statement, the requirement for which is satisfied by the issuance of the Preliminary Findings.

A copy of this notice has been submitted to the Administrator of the Environmental Protection Agency for his Comments concerning the impact of this proposal on the quality of the environment. The Administrator had the following comments:

EPA has reviewed the FEA report entitled "Preliminary Findings and Views Concerning the Exemption of Motor Gasoline from the Mandatory Petroleum Allocation and Price Regulations." We concur with the central finding of the report that neither current nor currently-anticipated supply and demand conditions for gasoline warrant the continuation of price and allocation controls. We agree with FEA that no shortage of gasoline is likely to occur in 1979.

We are concerned, however, that the proposal deals only with the pricing of gasoline in general. We wish to emphasize that EPA is continually concerned over the spread between the prices of the regular and unleaded grades of gasoline. This spread encourages the use of regular gasoline in cars equipped with catalytic converters, thereby resulting in increased emissions and endangering the nation's multi-billion dollar investment in automobile pollution controls. We would like to see an analysis of potential impact of decontrol on the *relative* prices of unleaded and leaded grades. Moreover, EPA strongly urges that provision be made for the reimposition of price controls should the price spread between these two grades increase significantly.

Finally, we question page 137 [page 135 of the final version on the Preliminary Findings] of the FEA report which states that the gasoline supply problem in 1979 depends on refiners' abilities to meet octane needs "without the use of TEL. Even without EPA waivers, refiners may use 0.8 grams of TEL per gallon until October 1, 1979, and 0.5 grams per gallon thereafter. Therefore, if FEA's analysis assumed no use of TEL, the results are not relevant.

Any information or data submitted pursuant to the above procedures and considered by the person furnishing it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93–159, as amended by Pub L. 93–511, Pub. L. 94–99, Pub. L. 94–133, Pub. L. 94–163, and Pub. L. 94–385; Federal Energy Administration Act of 1974, Pub. L. 93–275, as amended, Pub. L. 94–385; Energy Policy and Conservation Act, Pub. L. 94–163, as amended, Pub. L. 94–385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, it is proposed to amend Parts 210, 211 and 212 of Chapter II, Title 10 of the Code of Federal Regulations, as set forth below.

Issued in Washington, D.C., August 8, 1977.

ERIC J. FYGI,
Acting General Counsel.

1. Section 210.35 is amended by adding subparagraphs (h)(1) and (h)(2) to read as follows:

§ 210.35 Exempted products.

* * * * *

(h)(1) Motor gasoline as defined in § 211.51 of this chapter is exempt from the provisions of Part 211 of this chapter (except as set forth in Special Rule No. 4 to Subpart A of Part 211).

(2) Gasoline as defined in § 212.31 of this chapter is exempt from the provisions of Part 212 of this chapter.

2. Section 211.1 is amended in paragraph (b) by adding new subparagraph (10) to read as follows:

§ 211.1 Scope.

* * * * *

(b) Exclusions. * * *

* * * * *

(10) Notwithstanding the other provisions of this part, including Subpart F, motor gasoline is excluded from this part (except as set forth in Special Rule No. 4 to Subpart A of Part 211).

3. The Appendix to Subpart A of Part 211 is amended by the addition of a Special Rule No. 4 to read as follows:

SPECIAL RULE NO. 4

1. *Scope.* Notwithstanding the exemption of motor gasoline from the Mandatory Petroleum Allocation Regulations, this Special Rule provides for the establishment of a transitional assignment program for motor gasoline for the months _____ 1977 through _____ 1978.

2. Transitional assignment program. Notwithstanding any contrary provisions of parts 205 and 211 of this chapter, assignments of base period supplies and base period use for wholesale purchasers of motor gasoline shall be made in accordance with the provisions of his Special Rule.

(a) No supplier/wholesale purchaser relationship in effect under § 211.9 of this part as of _____, 1977, may be terminated before _____, 1978 by a supplier except upon written notice to the wholesale purchaser given at least ninety (90) days prior to the date on which the supplier intends to terminate the supply relationship. A termination under this paragraph (a) may only be effective at the end of the period corresponding to a base period coinciding with or following the expiration of the ninety (90) day notice period. Any such ninety (90) day period may not begin prior to _____, 1977.

(b) Any wholesale purchaser which has received a notice from its supplier under paragraph (a) above shall make a diligent effort to locate an alternate source of supply. If its effort is unsuccessful it may apply to the appropriate FEA Regional Office for a continuation of its current supplier/purchaser relationship, but any such application shall be made at least thirty (30) days prior to the date on which the termination under paragraph (a) is to become effective. The applicant shall certify to the FEA that it has made a diligent unsuccessful effort to locate an alternate source of supply and shall set forth in its application (i) the name and address of its base period supplier; (ii) its base period use with that supplier for each period corresponding to a base period; and (iii) the names and addresses of other suppliers contacted with respect to the applicant's efforts to locate an alternate source of supply, the volumes requested from each such other supplier, and the dates of those contacts. The applicant shall send a copy of its application to its base period supplier.

(c) If FEA determines that an applicant has made a diligent unsuccessful effort to locate an alternate source of supply, FEA shall order a continuation of the applicant's existing supplier/purchaser relationship for a period of three consecutive periods corresponding to a base period. While a continuation order is in effect, the wholesale purchaser shall again make a diligent effort to locate an alternate source of supply. If the wholesale purchaser is again unsuccessful, it may again apply for a continuation in accordance with paragraph (b) above.

(d) If FEA fails to take action on a timely filed application under paragraph (b) or (c) prior to the date upon which the termination of the supplier/purchaser relationship which is the subject of the application is to become effective, the supplier/purchaser relationship shall be automatically extended for a period of one (1) month pending FEA action on the application. If FEA fails to take action on a late filed application under paragraph (b) or (c) prior to the date upon which the termination of the supplier/purchaser relationship which is the subject of the application is to become effective, FEA may issue a temporary continuation order for a period of one (1) month pending FEA action on the application upon a showing by the applicant of good cause for the late filing.

(e) FEA may issue with respect to any supplier/purchaser relationship no more than three (3) continuation orders. In no event may the provisions of a continuation order be effective beyond _____, 1978.

(f) The failure of any wholesale purchaser to purchase its full allocation entitlement from its base period supplier without the written consent of that supplier in any three (3) month period shall disqualify any such puchaser from being eligible for issuance of a further continuation order covering volumes in excess of the percentage of the allocation entitlement lifted in the previous three (3) month period, unless such failure to purchase is due to factors beyond the control of that wholesale purchaser and FEA determines that such disqualification would impose an undue hardship on that wholesale purchaser.

3. *Non-discrimination requirement.* To prohibit any form of discrimination (including price discrimination) which has the effect of circumventing, frustrating, or impairing the objectives, purposes and intent of this Special Rule, the requirements of paragraph (b) of § 210.62 of this chapter shall continue to apply to suppliers which are subject to a continuation order under the traditional assignment program of this Special Rule, and to all suppliers which are still supplying purchasers because they have failed to give notice of intent to terminate supplies or such termination has not yet become effective.

4. Section 212.31 is amended in the definition of "covered products" to read as follows:

§ 212.31 Definitions.

* * * * *

"Covered products" means aviation fuel (kerosene-type) aviation gasoline, butane, crude oil, natural gas liquids, natural gasoline, and propane. A blend of two or more particular covered products is considered to be that particular covered product constituting the major proportion of the blend.

* * * * *

Subpart C of Part 212 is amended by adding a new section 212.58 as follows:

§ 212.58 Gasoline.

The prices charged for gasoline are exempt from the provisions of this part.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 105]

[Docket No. 75N–0318]

SPECIAL DIETARY FOODS LABEL STATEMENTS

Proposed Statement of Reasons, Findings of Fact and Conclusions and Tentative Order; Extension of Time for Filing Exceptions

AGENCY: Food and Drug Administration.

ACTION: Extension of time for filing exceptions.

SUMMARY: The period for filing exceptions to the tentative order is extended in response to requests for such extension.

DATE: The period for submitting exceptions closes October 18, 1977.

ADDRESS: Written exceptions to the Hearing Clerk (HFC–20), Food and Drug Administration, Room 4–65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Richard T. Hunt, Compliance Regulations Policy Staff (HFC–10), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301–443–3480).

SUPPLEMENTARY INFORMATION: The Food and Drug Administration issued a proposed statement of reasons, proposed findings of fact, proposed conclusions and tentative order in the FEDERAL REGISTER of July 19, 1977 (42 FR 37165), relating to regulations under Part 105 relating to special dietary foods for use in reducing or maintaining body weight or caloric intake and in the diet of diabetics. Exceptions were to be filed on or before August 18, 1977.

The Commissioner has received requests from Markel, Hill & Byerley, and the Grocery Manufacturers of America, Inc., among others, to extend the exception period for an additional 60 days. The requests stated an intention to file meaningful exceptions, not merely pro forma protests, and maintained that it would be impossible to prepare such a response within the 30-day period. The requests emphasized the size of the record and the length of time since the closing of the hearing. The Commissioner is persuaded that granting an extension of time is appropriate. The requests for extension are on file in the office of the Hearing Clerk, Food and Drug Administration.

The Commissioner hereby extends the period for submitting exceptions on the tentative order to close of business October 18, 1977.

Interested persons may on or before October 18, 1977, file with the Hearing Clerk, Food and Drug Administration, Room 4–65, 5600 Fishers Lane, Rockville, Md. 20857, written exceptions regarding the tentative order in relationship to the administrative record for this proceeding. Exceptions shall point out with particularity the alleged errors in the proposed findings of fact and tentative order and contain specific references to the pages of the transcript of testimony and to the exhibits on which the exceptions are based. Exceptions and acompanying briefs should be filed in quadruplicate (except that individuals may submit single copies), and should be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received exceptions and acompanying briefs may be seen in the above-named office, Monday through Friday, from 9 a.m. to 4 p.m., except on Federal legal holidays.

This action is taken under the Federal Food, Drug, and Cosmetic Act (secs. 201(n), 403 (a) and (j), 701 (a) and (e), 52 Stat. 1041 as amended 1047–1048 as amended 1055, 70 Stat. 919 as amended (21 U.S.C. 321(n), 343 (a) and (j), 371 (a) and (e)) and under authority delegated to the Commissioner (21 CFR 5.1).

Dated: August 8, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

Correction

In FR Doc. 77–22016 appearing at page 39316 as the Part II of the issue of Wednesday, August 3, 1977, the following changes should be made:

1. On page 39322, in the second column, in the last line of the Note, the date now reading "August 3, 1977" should read "August 3, 1979".

2. On page 39326, in the table in § 181.218, under the entry "Inhabited buildings

* * * Unbarricaded", the second entry now reading "160" shsould read "180".

POSTAL SERVICE

[39 CFR Part 111]

SECOND- AND BULK THIRD-CLASS MAIL

Use of Pressure Sensitive Package Labels

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: Postal regulations were revised in 1976 to provide for the mandatory use of pressure sensitive package labels, instead of the former paper labels, on second- and bulk third-class mail. Some mailers misinterpreted the revised regulations, believing that additional package-labeling requirements had been established, and claiming these supposed additional requirements had substantially escalated their mail preparation costs. This proposed regulation change is intended to clarify the intent of the 1976 change in the regulations.

DATE: Comments must be received on or before September 10, 1977.

ADDRESS: Written comments should be directed to Manager, Office of Mail Classification, Rates and Classification Department, United States Postal Service, Washington, D.C. 20260.

FOR FURTHER INFORMATION CONTACT:

Mr. Harvey Altergott, 202–245–4353.

SUPPLEMENTAL INFORMATION: Under the provisions of 39 CFR 111.3 the Postal Service is proposing to revise sections 125 .321 and .321 a(1) and b(1) and 134 .431 and .431 a(1) and b(1) of the Postal Service Manual, chapter I of which has been incorporated by reference in the FEDERAL REGISTER, see 39 C.F.R. 111.1. The purpose of these revisions is to make clear the intent of the change in 1976. That change substituted pressure sensitive labels for paper labels, and it has been incorrectly construed to require the use of pressure sensitive package labels on all second-class and third-class packages. Mailers would not be subject to the expense of purchasing pressure sensitive labels, since the Postal Service would provide the labels without cost.

Accordingly, although exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553 (b), (c)) regarding proposed rulemaking, 39 U.S.C. 410(a), the Postal Service invites public comment on the following proposed revision of parts of 125.321 and 134.431 of the Postal Service Manual:

PART 125—SECOND-CLASS BULK MAILINGS

1. In 125.32 revise .321, and .321 a(1) and b(1) to read as follows:

125.32 Preparation by the mailer of copies in packages and sacks.

.321 Package labels.

Pressure sensitive labels are made available to mailers through local customer services representatives and postmasters and must be used to indicate the make-up and destination of all packages that require a package label. Except as noted below, all pieces in a package must be faced in one way and the top piece must be plainly addressed, including the ZIP Code.

(a) *Use of package labels.*

(1) *Five-Digit package.* Place 6 or more pieces for the same ZIP Code area in a bundle. Use of a package label is optional. When such packages are labeled, affix Red Label D.

* * * * *

(b) *Package labels—general.*

(1) Nonstandard package labels must be used to identify mixed states, split states and foreign packages. This label when affixed should cover the entire address portion of the top mail piece.

PART 134—THIRD CLASS

2. In 134.43 revise .431 and 431 a(1) and (b) (1) to read as follows:

134.43 Preparation by the mailer of pieces in packages and sacks.

.431 Package labels.

Pressure sensitive labels are made available to mailers through local customer services representatives and postmasters and must be used to indicate the make-up and destination of all packages that require a package label. Except as noted below, all pieces in a package must be faced in one way and the top piece must be plainly addressed, including the ZIP Code.

(a) *Use of package labels.*

(1) *Five digit package.* Place 10 or more pieces for the same ZIP Code area in a bundle. Use of a package label is optional. When such packages are labeled, affix Red Label D.

* * * * *

(b) *Package labels—general.*

(1) Nonstandard package labels must be used to identify mixed states, split states and foreign packages. This label when affixed should cover the entire address portion of the top mail piece.

An appropriate amendment to 39 CFR 111.3 to reflect these changes will be published if the proposal is adopted.

(39 U.S.C. 401(2).)

W. ALLEN SANDERS,
Assistant General Counsel
Legislative Division.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 180]

[FRL 776-8; PP 6E1761/P45]

PESTICIDE CHEMICAL CHLOROTHALONIL

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that a tolerance be established for residues of chlorothalonil. The proposal was submitted by the Interregional Research Project No. 4. This amendment will establish a maximum permissible level for residues of chlorothalonil on papayas.

DATE: Comments must be received on or before September 12, 1977.

ADDRESS COMMENTS TO: Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M St. SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Mrs. Patricia Critchlow, Registration Division (WH-567), Office of Pesticide Programs, EPA, 202-755-2516.

SUPPLEMENTARY INFORMATION: Dr. C. C. Compton, Coordinator, Interregional Research Project No. 4, New Jersey State Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, N.J. 08903, has submitted a pesticide petition (PP 6E1761) to the EPA. This petition requests that the Administrator propose that 40 CFR 180.275 be amended by the establishment of a tolerance for combined residues of the fungicide chlorothalonil (tetrachloroisophthalnitrile) and its metabolite, 4-hydroxy-2,5,6 - trichloroisophthalontrile in or on the raw agricultural commodity papayas at 15 parts per million (ppm).

The data submitted in the petition and all other relevant material having been evaluated, it has been concluded that the tolerance of 15 ppm established by amending 40 CFR 180.275 will protect the public health. The toxicological data considered in support of the proposed tolerance were two-year rat and dog-feeding studies, a four-month special rat-feeding study, and two multigeneration rat reproduction studies. The Chemistry Branch concludes that very little, if any, chlorothalonil will be available for consumption in the pulp and pulp products from ripe and green, unwashed, peeled papayas. Finite but low level residues of chlorothalonil could occur in washed, green, unpeeled papayas. The toxicology Branch finds that papayas are a very minor part of the total fruit available for consumption. The Toxicology Branch also finds that additional toxicity data are not needed. The proposed 15 ppm tolerance for residues serves the purpose of controlling use. Only a fraction, of the 15 ppm will occur in the final edible product.

The metabolism of chlorothalonil in papayas is adequately understood and an adequate analytical method (gas chromatography with electron capture detection) is available for enforcement purposes. Permanent tolerances have been established (40 CFR 180.275) for residues of chlorothalonil in or on a variety of raw agricultural commodities from 15 ppm to 0.1 ppm (negligible residue). The negligible residue designator ("N") is being removed from the existing tolerance because long-term feeding studies are now available. There is no reasonable expectation of residues in eggs, milk,

meat, or poultry, as delineated in 40 CFR 180.6(a)(3). It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered, or submitted an application for the registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act which contains any of the ingredients listed herein may request, within 30 days after publication in the FEDERAL REGISTER, that this rulemaking proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, East Tower, Room 401, 401 M St. SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. The comments must be received on or before September 12, 1977, and should bear a notation indicating both the subject and the petition/document control number, "PP6E1761/P41". All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the office of the Feedral Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

(Section 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)).)

Dated: August 4, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

It is proposed that Part 180, Subpart C, Section 180.275 be revised by adding a tolerance for combined residues of chlorothalonil and its metabolite, 4-hydroxy-2,5,6-trichloroisophthalonitrile, in or on papayas at 15 ppm and by editorially reformatting the section into a tabular alphabetized listing, to read as follows:

§ 180.275 Chlorothalonil; tolerances for residues.

Tolerances are established for combined residues of the fungicide chlorothalonil (tetrachloroisophthalonitrile) and its metabolite 4-hydroxy-2,5,6-trichloroisophthalonitrile in or on the following raw agricultural commodities:

Commodity:	*Parts per million*
Beans, snap	5
Broccoli	5
Brussels sprouts	5
Cabbage	5
Carrots	1
Cauliflower	5
Celery	15
Corn, sweet (K+CWHR)	1
Cucumbers	5
Melons	5
Onions, dry bulb	0.5
Onions, green	5
Papayas	15
Passion fruit	3
Peanuts	0.3
Potatoes	0.1
Pumpkins	5
Squash, summer	5
Squash, winter	5
Tomatoes	5

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

[41 CFR Part 9-4]

COST PARTICIPATION POLICY

Demonstration Projects Involving Energy Producing Technologies

AGENCY: Energy Research and Development Administration (ERDA).

ACTION: Notice of proposed rulemaking.

SUMMARY: These reproposed regulations would establish the conditions under which ERDA would require cost sharing by non-Federal participants in demonstration projects involving energy producing technologies. The intent of the proposed regulation is to induce greater participation in activities of this type by interests outside the Federal Government.

DATE: Comments on this proposed regulation are requested by September 19, 1977.

ADDRESSEE: Director of Procurement, Attn.: Herbert Pelton, Price Analysis Staff, USERDA, Washington, D.C. 20545.

FOR FURTHER INFORMATION CONTACT:

Herbert Pelton (202) 376-4193.

SUPPLEMENTAL INFORMATION: On November 18, 1976, ERDA published a notice of rulemaking in the FEDERAL REGISTER, Vol. 41, No. 224, setting forth a proposed procurement regulation covering cost participation. The purpose of the proposed regulation was to revise the existing ERDA Procurement Regulation on cost sharing, a carry-over from the AEC Procurement Regulation, to make the policy express and fit the ERDA mission and ERDA legislation. The emphasis in the existing policy is on cost sharing in basic and applied research efforts. The proposed policy emphasized cost participation by the performer in the cost of contract performance when it was apparent that he would receive present or future economic benefits as a result of the effort. Contracts for products or services strictly for Government use were excluded from this requirement. Other major differences were that the proposed policy called for mandatory cost participation on demonstration projects and provided for participation "in kind."

We received 71 responses from industrial concerns, universities and industry and university associations. All of these constructive and thoughtful comments have been carefully considered.

The discussions which follow in A and B summarize the major issues raised by respondents as well as the significant changes which have been made from the November 18, 1976 version of the proposed regulation.

A. GENERAL COMMENTS

(1) *Impact of proposed policy.* A large number of commentators read the proposed procurement regulation to mean that there had been a major change in ERDA policy and that most future ERDA contracting would be on a cost participation basis. This was not the intent of the proposed regulation nor is it ERDA policy. It is our intent that full funding will be provided for Federal projects and for early phases of development programs when the technology has not been fully evaluated or proven. Where, however, technical feasibility, economic viability and social and political acceptability of commercial application can reasonably be anticipated to culminate in the significant enhancement of the performer's prospects for realizing financial benefit, cost participation would be expected.

(2) *Lack of specificity.* The proposed procurement regulation was purposely written in a general fashion to cover the total range of ERDA programs. The comments in this area were both pro and con with heavy support for case-by-case determinations. Other commentators wanted specific steps set forth eliminating any judgments or interpretations by contracting officers. In the proposed revision we have tightened the coverage somewhat, but of necessity have left required flexibility.

(3) *Fee provisions.* A number of commentators mistakenly interpreted the coverage on profit and fee in the proposed cost participation policy to mean a change in overall ERDA profit and fee policy. ERDA will continue to pay profit or fee in its normal fashion on contracts where there is full Federal support. Additionally, the policy has been modified as noted in B(7).

(4) *Patent policy.* Several commentators took this opportunity to voice displeasure with the ERDA patent policy, which when combined with the proposed cost participation policy would in their view make doing business with ERDA unattractive. The ERDA patents regulation is based upon the Atomic Energy Act of 1954, as amended, and the Federal Nonnuclear Energy Research and Development Act of 1974, and carries out the requirements of these Acts.

(5) *Total funding by ERDA.* A number of commentators suggested that there be no cost participation by performers and that ERDA should fully fund all projects. Then, if a project were carried forward to commercial success, the performer would repay the Government through royalty payments or some other arrangement. Sec. 8(b)(6) titled "Demonstration," of the Federal Nonnuclear Energy Research and Development Act of 1974 (Pub. L. 93-577) sets forth cost participation as one criteria to be considered when reviewing potential projects for support. It seems logical to assume that a performer who contributes to the cost of an undertaking has there-

by expressed its judgment of the cost/risk/benefit potential of the project.

(6) *Refund performer's share if project unsuccessful.* Several commentators suggested the regulation be expanded to provide reimbursement to the performer for its participation if the project did not become commercially viable. Again, it is ERDA's intent that the performer share part of the risk of the undertaking. The performer's participation is an indication of its commitment and belief in the viability of the project. Further, while ERDA must accept responsibility for the R&D it chooses to support, it cannot guarantee success for the resultant technologies.

(7) *Commission on Government Procurement recommendation on cost sharing.* Several commentators indicated that the proposed ERDA regulation was not in line with the Commission on Government Procurement (COGP) recommendation covering cost sharing. These conclusions were evidently based on the mistaken interpretations of the proposed policy such as discussed in A(1). We believe that with the clarifications provided in this preamble and the changes made to the proposed procurement regulation, the proposed policy will be judged to be quite compatible with the COGP recommendation.

(8) *Assistance versus procurement.* Many commentators evidently did not differentiate between procurement for Government end use and ERDA participation in development and demonstration of energy technology for use in the private sector. This lack of differentiation could stem from ERDA's use of traditional procurement instruments to perform assistance. ERDA has developed an assistance manual and is beginning to use cooperative agreements and grants to a greater extent when support is the objective.

(9) *Prior performer expenditures.* Several commentators proposed that, where cost contribution (participation) is required, a performer's prior expenditures on the proposed or related projects be recognized as its contribution to the project. However, prior expenditures in studies and preliminary research should be considered as investments which make it possible to compete successfully, by anticipating customer's evolving and changing needs. The advantage gained from early effort often can be the reason ERDA will support one project over another.

(10) *Mitigation of cost risk.* Throughout the responses received, concern for the "level of risk" was prevalent. ERDA is not insensitive to the risks inherent in R. & D., as is evidenced by the board latitude reflected in the proposed policy. Further, innovative suggestions for mutual mitigation of cost risks are welcomed. Award phasing has been identified as being one prospective means, under certain circumstances. For example, multiple approaches to a desired objective may be offered; however, to facilitate selection of one (or more) to pursue to a conclusion, multiple awards for "Phase I" may be warranted. Based upon an evaluation of the results, one (or more) of the original recipients may be selected for an award covering the succeeding Phase(s). This technique serves to reduce risk and preserves available alternatives.

B. CONTENTS OF PROPOSED REGULATION

(1) ***Reasonable expectations of economic benefit (paragraph 9–4.5601).***

A number of commentators suggested that the phrase, "reasonable expectations that the performer will receive present or future benefits," be defined. They were concerned that this is a highly judgmental area and further, by definition, all ERDA supported projects should have reasonable expectations of becoming commercially viable and providing economic benefits. This being the case, there was concern that cost participation would be extended to highly speculative projects. The intent of the statement was that where the performer (1) will receive economic benefits beyond the contract itself; (2) will be in a stronger position vis-a-vis potential competitors because of performing the project; (3) where the technical feasibility, economic viability, and social or political acceptability of commercial application can be reasonably established; and (4) where potential economic benefits are not so far in the future as to make any estimate of value unrealistic, the performer should share in the cost. The determination to be made is that the risk of achieving commercial success is reasonable and acceptable. An explanatory paragraph has been added as 9–4.5601(c), setting forth these concepts.

(2) *Financial capability of performer (paragraph 9–4.5601).* A number of commentators questioned the propriety of considering a prospective performer's financial capabilities when deciding whether the project should be on a cost participation basis. It should be recognized that there are three elements for determination; (i) applicability of cost participation to the project; (ii) determination whether to obtain, and; (iii) determination concerning target amount. The financial capability of a prospective performer is not a point of consideration in the decision pertaining to (i). Appropriate coverage is provided in the proposed regulation.

(3) *Cost participation on demonstration projects—(paragraph 9–4.5601).* The requirement for cost participation on demonstration projects is based on the Federal Nonnuclear Energy Research and Development Act of 1974 (Pub. L. 93–577). Sec. 8(b)(6) of the Act provides that in reviewing potential projects, the Administrator shall consider, among other criteria, "* * * the proposed financial contributions of the Federal Government and of the non-Federal participants." Several commentators indicated that a definition for demonstration project is needed since inconsistent approaches could result by different interpretations. Sec. 8(a) of the Act includes as demonstration projects, "* * * pilot plants demonstrating technological advances and field demonstrations of new methods and procedures, and demonstrations of prototype commercial applications for the exploration, development, production, transportation, conversion, and utilization of energy resources * * *" This definition has been added to paragraph 9–4.5601(e).

(4) *Cost participation when nearing commercial viability (paragraph 9–4.5602(c)).* Many commentators disagreed with our conclusion that greater cost participation is appropriate as a project nears commercial viability. They contended that the closer a project gets to commercialization, the higher the risk and financial exposure becomes. They stated that this is when Federal assistance is needed the most. While we agree that normally the demonstration phase is the most expensive and consequently more Federal funds are expended in this phase than in earlier phases, we do not agree that this dictates a higher share of Federal funding. As the commercialization stage of a project approaches, the performer's participation should increase as this will, as one commentator stated, "assure dedication." However, cost participation will be negotiated based on overall project risk, and program progress is but one factor in risk assessment. Factors such as those set forth in 9–45603(b) will also be considered.

(5) *Cost participation by educational institutions (paragraph 9–4.5602(d)).* Several industrial firms objected to the apparent preferential treatment of educational and other not for profit performers in that they were exempt from cost participation unless clearly against the basic policy. This objection appears to stem from the impression that all ERDA projects will be on a cost participation basis, an erroneous conclusion commented on in A(1) above. Because projects performed by this category of performers normally occur in the early stages of research and development programs, the added language in paragraph 9–4.5601 provides the necessary coverage and the November 1976 proposed 9–4.5602(d), has been deleted.

(6) *Valuation of noncash contributions (paragraph 9–4.5603(a)).* Many commentators objected to the provision that the value of noncash contributions shall be established by ERDA. This provision is contained in section 8(c)(2) of the Federal Nonnuclear Energy Research and Development Act of 1974. In making this determination, ERDA will consult with the proposer and evaluate supporting data provided. However, the final determination rests with ERDA.

(7) *Contract cost principles (paragraph 9–4.5603(a)).* Several commentators objected to the use of ERDA cost principles in establishing each party's share of costs. It was their view that because there is a provision that fee would not be considered when establishing the cost of the project, the performer would absorb unallowable costs, and in effect, contribute more than the stated share of the contract costs. Fee will not be considered in establishing the total estimated cost of the project; however, paragraph 9–4.5603(h) provides that forgone fee or profit will be considered in establishing the degree of cost participation.

(8) *Allocation of participant's share to other Federal contracts, agreements or grants (paragraph 9–4.5603(a)).* Several commentators suggested that the performer should be able to allocate to other Federal contracts, agreements or grants, allowable costs absorbed as its share of cost participation. They suggested this could be allocated as independent research and development (I.R. & D.) charges. We do not agree with this suggestion. It would, in essence, abrogate the agreed-to cost participation share. Also, it is doubtful that the performer's share of a jointly sponsored project could be counted as an I.R. & D. project. Further, Federal Procurement Regulation 1–15.205.19 provides that an excess of costs over income under any other contract, including the contractor's contributed portion under cost sharing contracts, is not an allowable charge against contracts subject to the cost principles.

(9) *Handling of offsetting returns from sales (paragraph 9–4.5603(d)).* Several commentators interpreted this coverage to mean that revenue sharing was required. This coverage, to set forth in the contract the handling of any return from sales of products from a jointly funded project, was intended only so that the parties reach agreement at the inception of the project on how this is to be accomplished. This would be done to avoid later misunderstandings. ERDA policy covering revenue offsets will be developed at a later date.

(10) *Coverage of cost participation in solicitation documents (paragraph 9–4.5603(e)).* Some commentators expressed concern about a lack of specificity in solicitation documents regarding target levels of expected cost participation as reflected in 9–4.5603 (a) and (b). Many variants are considered in developing an amount to be set forth as representing a reasonable level of cost participation. These variants do not lend themselves to precise measurement and thus reflections of intellectual judgments will vary. If accord is to be reached, flexibility is needed. Other comments implied that ERDA would select the proposer offering the lowest cost to the Government, and not the proposer offering the best technical project. ERDA source selection criteria emphasizes technical merit with cost normally in a lesser role. It is expected, however, that in cost participation actions where proposals are deemed to be of equivalent interest and merit, that which requires the least commitment of ERDA funds would be selected.

(11) *Fee/profit to members of proposing team (paragraph 9–4.5603(i)).* Several commentators indicated that they felt it to be an unwarranted intrusion into the affairs of private companies to provide that fee or profit would not be paid to any member of the proposing team, having a substantial and direct interest in the project, if such member would receive present or future economic benefits as a result of performing the effort. Further, because ERDA cost principles would be applied, they believed the performer would be in a cost participation mode; there would be no fee to offset unallowable costs. While these arguments have merit, Sec. 8(c)(1) of the Federal Nonnuclear Energy Research and Development Act of 1974 provides, "A financial award under this section may be made only to the extent of the Federal share of the estimated total design and construction, plus operation and maintenance costs." This has been interpreted to mean that the Federal share covers design and construction, plus operations and maintenance costs only, and profit or fee will not be included for performers having substantial or direct interest in the project. Interested parties may submit comments on this proposed regulation to: Director of Procurement, U.S. Energy Research and Development Administration, Washington, D.C. 20545, Attn: Herbert J. Pelton. For further information contact Mr. Pelton, Area Code No. 202–376–4193. All written submissions made pursuant to this notice will be available for public inspection at HQ ERDA during regular business hours.

To be given consideration by ERDA in its determinations relative to final promulgation of the procurement regulation, written submission must be made to arrive no later than September 19, 1977.

(Sec. 105, Energy Reorganization Act of 1974 (Pub. L. 93–438))

Dated at Washington, D.C. this 4th day of August, 1977.

M. J. TASHJIAN,
Director of Procurement.

It is proposed to delete existing Subpart 9–4.56 of the ERDA–PR and add the following new subpart 9–4.56 to the ERDA–PR.

Subpart 9–4.56—Cost Participation

Sec.

9–4.5600 Scope of subpart.
9–4.5601 Policy.
9–4.5602 Application.
9–4.5603 Amount of cost participation.
9–4.5604 Disposition of property and equipment furnished or acquired.
9–4.5605 Records.

AUTHORITY: Sec. 105, Energy Reorganization Act of 1974 (Pub. L. 93–438).

Subpart 9–4.56—Cost Participation

§ 9–1.5600 Scope of subpart.

(a) This subpart sets forth the ERDA policy on cost participation by organizations performing research, development, and demonstration projects under ERDA prime contracts. This subpart does not cover efforts and projects performed for ERDA by other Federal agencies.

(b) Cost participation is a generic term denoting any situation where the Government does not fully reimburse the performer for all allowable costs necessary to accomplish the project or effort under the contract. The term encompasses cost sharing, cost matching, cost limitation (direct or indirect), participation in kind, and concepts.

§ 9–4.5601 Policy.

(a) Cost participation by the performer will not be obtained under contracts where the principal purpose is the acquisition of goods and services for Government use.

(b) When ERDA supports performer research, development and demonstration efforts, where the principal purpose is ultimate commercialization and utilization of the technologies by the private sector, and when there are reasonable expectations that the performer will receive present or future economic benefits beyond the instant contract, as a result of performance of the effort, it is ERDA policy to obtain cost participation. Full funding will be provided for early phases of development programs when the technology has not been adequately evaluated or proven and when actual or potential technological problems are still great.

(c) In making the determination to obtain cost participation, and evaluating present and future economic benefits to the performer, ERDA will consider the technical feasibility, projected economic viability, societal and political acceptability of commercial application, as well as possible effects of other ERDA supported projects in competing technologies.

(d) The propriety, manner, and amount of cost participation must be decided case-by-case.

(e) Cost participation is required for demonstration projects unless exempted by the Administrator. Demonstration projects, pursuant to this subpart, include pilot plants demonstrating technological advances and field demonstrations of new methods and procedures and demonstrations of prototype commercial applications for the exploration, development, production, transportation, conversion and utilization of energy resources.

§ 9–4.5602 Application.

(a) The ERDA cost participation policy set forth in 9–4.5601 applies to all prime contracts except those exempted therein.

(b) Cost participation is not contemplated in contracts for the operation of Government-owned or leased, contractor-operated facilities of an unspecified life, or continuing cost-reimbursement type contracts for mission-oriented large-scale research programs performed, using equipment or facilities which are either partially or wholly Government-owned.

(c) Potential benefits to the performer are less likely where basic research is involved and cost participation, if any, is expected to be less than in circumstances where a product is being developed. As projects or proposed efforts reach stages approaching commercial viability, cost participation should be based on the overall project risk.

(d) Where in accordance with 9–4.5601, cost participation would be appropriate,

but it is determined by the cognizant program assistant administrator that payment of the full allowable cost of the contractual effort is necessary in order to obtain the services of a particular organization, cost participation need not apply.

(e) The performer's cost participation may be provided by other companies or associations with which it has contractual arrangements to perform the project. The fact that a project is jointly funded, e.g., where ERDA and an industry association fund a third party performer, does not preclude cost participation by the performer. In fact, if the performer will gain competitive and economic advantages, cost participation would be appropriate.

§ 9–4.5603 Amount of cost participation.

(a) Cost participation may be in various form or combination, which may include but is not limited to cash outlays, real property, or interest therein needed for the project, personal property or sevices, cost matching, forgone fee, or other in kind participation. Cost participation may include the value of contributions of other non-Federal sources, provided the contributions were not previously obtained free of charge from Federal sources. The value of any non-cash contribution shall be established by ERDA after consultation with the performer. Cost participation may be accomplished by a contribution to either direct or indirect costs provided such costs are otherwise allowable in accordance with the cost principles of the contract. Allowable costs which are absorbed by the performer as its share of cost participation may not be charged directly or indirectly to the Federal Government under other contracts, agreements, or grants.

(b) Organizations should contribute a reasonable amount of the total project cost covered under the contract. The ratio of cost participation should correlate to the apparent advantages available to performers and the proximity of implementing commercialization. In setting the levels of cost participation by the performer, the contracting officer, in consultation with the program office, should consider such factors as:

(1) The availability of the technology to the performer's competitors.

(2) The risks involved in achieving commercial success.

(3) The length of time before the project is likely to be commercially successful.

(4) Improvements in the performer's future commercial competitive position.

(5) Disposition of property at project's end.

(6) Whether the potential benefits will be lessened if the performer lacks production or other capabilities with which to capitalize the results of the project. However, if the results of the project are transferable to commercial organizations with production capabilities, and the performing organization would obtain patent or other property rights which could be sold or licensed, this should be considered.

(7) Whether the performing organization lacks adequate non-Federal sources of funds from which to make cost participation.

(c) The manner of cost participation and how it is to be accomplished shall be set forth in the contract.

(d) The handling of any return from sale of products from the project shall be set forth in the contract.

(e) The solicitation document shall state whether any cost participation is required and may set forth a target level of cost participation. Though technical considerations are normally most important, the degree of cost participation will be considered when cost to the Government is to be a major factor in a selection decision.

(f) Unsolicited proposals will be considered on a case-by-case basis by the program office in consultation with Procurement, as to the appropriateness of cost participation. If cost participation is considered to be appropriate, guidance for determining an appropriate level may be included in the procuement authorization package, but it should be recognized that the extent and type of cost participation is subject to negotiation.

(g) The extent to which a performing organization contributes to the cost of a project will be taken into consideration in the allocation of patent rights under ERDA's waiver policy.

(See § 9–9.109–6(h) (1) for patent policies.)

(h) Fee or profit will not be paid the performer under a cost participation contract. Forgone fee or profit will be considered in establishing the degree of cost participation.

(i) Where cost participation is appropriate, fee or profit will not be paid to any member of the proposing team having a substantial and direct interest in the project. Competitive subcontracts placed with the prior written consent of the contracting officer and subcontracts for routine supplies and services are not covered by the prohibition.

§ 9–4.5604 Disposition of property and equipment furnished or acquired.

Disposition instructions for any property and equipment furnished or acquired using Federal funds during performance shall be set forth in the contract.

§ 9–4.5605 Records.

Recipients of contracts which provide for cost participation shall be required to maintain records adequate to reflect the nature and extent of their cost contribution as well as those costs charged to ERDA. Such records shall be subject to audit by ERDA.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 170]

FINANCIAL ASSISTANCE FOR CONSTRUCTION, RECONSTRUCTION, AND RENOVATION OF HIGHER EDUCATION FACILITIES

AGENCY: U.S. Office of Education, H.E.W.

ACTION: Notice of proposed rulemaking.

SUMMARY This proposed rule amends the regulations principally to establish grant and loan procedures for reconstruction and renovation projects primarily designed to economize on the use of energy, bring facilities into conformance with the Architectural Barriers Act of 1968, and bring facilities into conformance with health and safety or environmental protection requirements mandated by Federal, State or local law.

DATES: All comments, suggestions, or objections to be considered must be received on or before September 26, 1977.

ADDRESSES: Comments should be sent to the Bureau of Higher and Continuing Education, Division of Training and Facilities, U.S. Office of Education, Room 3716, 7th and D Streets, SW., Regional Office Building No. 3, Washington, D.C. 20202. Comments will be available for public inspection at the above office, between 8:30 a.m. and 4 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Thomas F. McAnallen. (Telephone: 202–245–3253).

SUPPLEMENTARY INFORMATION:

NEED FOR CHANGES

Title VII of the Higher Education Act of 1965, as amended, authorizes programs of grant and loan assistance to public and private institutions of higher education for the construction of higher education academic facilities. Sections 161 and 162 of the Education Amendments of 1976, Pub. L. 94–482, 90 Stat. 2156–59, extended and revised Title VII. The primary revision is the addition of a new Part E which expands the program to include reconstruction and renovation projects which are designed primarily to:

(1) Economize on the use of energy;

(2) Bring facilities into conformance with the Architectural Barriers Act of 1968 (making facilities accessible to the handicapped); or

(3) Bring facilities into conformance with health and safety, or environmental protection requirements mandated by Federal, State, or local law.

Part E of Title VII authorizes grants from funds appropriated under Parts A and B of Title VII and loans from funds appropriated or available under Part C of Title VII, except for those appropriated under Section 745 of Part C. The Commissioner is proposing a number of changes in existing regulations to provide guidance for institutions which wish to apply for grants or loans for reconstruction or renovation projects.

Section 162 of the Education Amendments of 1976 also:

(1) Amends Section 721(a) of the Act to authorize the Commissioner to make grants to or enter into contracts with institutions of higher education for the construction of facilities for model intercultural programs; and

(2) Amends Section 743(b)(5) of the Act to grant a temporary moratorium on the repayment of principal or interest or both because of financial hardships, and to allow an institution to repay 75 percent of the balance of an existing loan as full payment of the total obligation.

The Commissioner is proposing amendments to existing regulations to reflect these statutory changes.

SUMMARY OF COMMENTS AND RESPONSES

Notice of intent to issue regulations was published in the FEDERAL REGISTER on November 29, 1976 (40 FR 52410) inviting comments on several issues arising from the 1976 Education Amendments which require revisions to Title 45 Part was published in the FEDERAL REGISTER 170 of the Code of Federal Regulations. Part 170 governs the administration of the Higher Education Facilities Program (under Title VII of the Higher Education Act of 1965, as amended; 20 U.S.C. 1132a–1132e). The following is a summary of the comments received and the responses by the Office of Education.

Comment. A number of comments were received concerning whether the Commissioner should establish minimum or maximum loans or grants per project. Some were in favor of a minimum with no maximum, and others were in favor of the reverse. Still others recommended a sliding scale based on available funds. The majority of comments indicated that some kind of minimum and maximum should be established.

Response. The Commissioner agrees with the views expressed in the majority of the comments. The proposed rules provide for a minimum project cost of $10,000 and a maximum loan of $5 million per campus per fiscal year. These proposed levels were set after discussions with representatives of institutions of higher education and State Higher Education Facilities Commissions. It was believed that the proposed minimum would be sufficiently low to permit institutions to undertake worthy small projects and at the same time prevent the high administrative costs associated with processing a large volume of applications for lesser amounts. The $5 million maximum loan was considered to be a reasonable ceiling to assure equitable distribution of funds without seriously penalizing the larger projects. A dollar maximum for grants was not established. The State Higher Education Facilities Commissions have the authority to establish dollar maximums in their State plans. It is believed that these maximums, if any, should be set at the State level to assure equitable distribution of grant funds within each State.

Comment. The majority of comments received did not favor the establishment of priorities among the three categories of projects authorized under Part E of Title VII. The comments, in general, reflected the belief that all three categories should be treated on an equal basis; however, a minority of commenters favored establishment of priorities by State Higher Education Facilities Commissions.

Response. The Commissioner concurs with the predominant feeling that priorities among the three categories authorized in Part E should not be established. Therefore, none are contained in the proposed regulations. However, in the State plan, each State Higher Education Facilities Commission may establish priorities for grants as it deems appropriate.

Comment. In determining eligibility for Part E projects, the Commissioner is required to consult with other Federal, State, or local agencies which have expertise or authority in those areas. The majority of commenters did not favor setting minimum technical standards after consultation with appropriate agencies. This was particularly evident with regard to energy projects because of the difficulty in accurately projecting the results of a proposed project. A number of commenters expressed concern that even though a proposed project plan might meet minimum standards, its actual performance might fall short of expectations thereby raising a question of the initial eligibility of the project. Most commenters recommended that an applicant demonstrate that the institution has taken certain minimum energy conservation measures prior to filing an application for an energy project.

Response. In view of the comments received, the Commissioner is not proposing minimum technical standards. The proposed regulations do require that, for an energy conservation project, an applicant must demonstrate in its application that certain energy conservation measures have been taken.

SUMMARY OF PROPOSED CHANGES

The following explanations of the proposed changes in regulations generally follow the same order as the sections in the existing regulations. The complete proposed text of revised regulations governing the construction, reconstruction, and renovation of academic facilities (45 CFR Part 170) is printed following this preamble.

SUBPART A—GENERAL PROVISIONS

170.1 DEFINITIONS.

1. The Education Amendments of 1976 expanded the definition of academic facilities to include, for energy conservation projects, certain health teaching facilities previously excluded from the definition. Therefore the definition of "academic facilities" in § 170.1 of the regulations was revised by adding a new paragraph (5) which incorporates the expanded definition included in the Statute.

2. The new Part E of Title VII expands program coverage to include reconstruction and renovation projects primarily designed for energy conservation, removal of architectural barriers, and conformance with health and safety or environmental protection requirements. Therefore, it is necessary to include a definition of the term "reconstruction or renovation project under Part E, Title VII." in § 170.1(m) of the regulations.

3. The Education Amendments of 1976 provided a definition of "reconstruction and renovation" which excludes the acquisition cost of land and buildings. Therefore, paragraphs (b) (1), (2), and (4) of § 170.6 of the regulations are revised to exclude these costs where reconstruction or renovation is involved.

170.6 DETERMINATION OF COSTS ELIGIBLE FOR FEDERAL PARTICIPATION.

4. Section 170.6, paragraph (c) is deleted. This provision was originally intended to apply to certain projects under section 745 of the Act which were begun on or before July 1, 1966. Since it is unlikely that any project would now qualify for an annual interest grant under these provisions, it is proposed that paragraph (c) be deleted.

170.8 GRANTS AND LOANS FOR RECONSTRUCTION AND RENOVATION PROJECTS AUTHORIZED UNDER TITLE VII, PART E OF THE ACT.

5. To establish basic grant and loan provisions for reconstruction and renovation projects under Title VII Part E of the Act, a new § 170.8 is proposed. The provisions of this new section are considered necessary for effective administration of the program and to assure compliance with the intent of the authorizing legislation. There are four basic provisions as follows: (1) A minimum eligible project cost of $10,000 was established. This was considered advisable to avoid the high administrative cost of processing large numbers of applications for minor renovation projects.

(2) Because Part E of Title VII specifies that projects must be primarily for energy conservation or to bring facilities into conformity with the Architectural Barriers Act, environmental protection, or health and safety programs, it was considered necessary to define what constitutes "primarily". Accordingly, the proposed rule will require that at least 90 percent of the eligible project cost be directly related to one or a combination of the purposes specified in Part E of Title VII. Thus, in any given application, as much as 10 percent of the eligible project may be for unrelated costs.

(3) Certain requirements in the application for assistance are proposed to assure conformance with Part E of Title VII and to set certain minimum requirements for eligibility. For example, with respect to projects to remove architectur-

al barriers, or to meet environmental protection, or health and safety requirements, an applicant will have to demonstrate that the proposed project is required to bring the facilities into conformity with Federal, State or local law. For energy conservation projects, an applicant must show that, before filing for Federal assistance, action was taken to accomplish certain energy conservation measures not requiring capital outlay. It is believed that an applicant should not be eligible for Federal financial assistance unless effort has first been made to reduce energy consumption through institutional policies, practices, and projects not requiring significant expenditure of funds.

(4) The final provision in the new section is designed to set a time limit within which an applicant must begin work on the project. This has been set at 18 months following the approval of a grant or loan. Experience has shown that many times applicants, after receiving a grant or loan award, find that because of various reasons they are unable to begin the project within a reasonable period of time. This can tie up scarce Federal resources for excessive periods of time. The 18 month limitation should encourage applicants not to apply for assistance unless they are fully prepared to begin work on the project within a reasonable period of time.

SUBPART B—GRANTS FOR CONSTRUCTION, RECONSTRUCTION AND RENOVATION OF UNDERGRADUATE ACADEMIC FACILITIES

Subpart B of the Regulations set forth provisions applicable to grants for construction of undergraduate academic facilities authorized under Title VII–A of the Act.

170.13 CONDITIONS FOR GRANT APPROVAL.

6. This section prescribes the conditions for approval of projects involving new construction and remodeling in which expansion of enrollment and capacity are prerequisites for approval. Since reconstruction and renovation projects authorized under Title VII Part E of the Act do not require expansion of enrollment or capacity, a change in the regulations has been made to exempt Part E projects from the provisions of paragraph (a) of § 170.13 and make them subject to the provisions established under a new paragraph (d). The conditions for approval in paragraph (d) require that an application meet the provisions of § 170.8 and that an application is recommended by the State Higher Education Facilities Commission in accordance with the priority system established in the State plan.

170.14 SUBMISSION AND PROCESSING OF TITLE VII–A APPLICATIONS.

7. Paragraph (a) of this section requires each State Commission to set at least two closing dates each fiscal year for filing applications. The dates must fall between July 31 and February 15. Section 170.14(f) requires forwarding of applications to the Commissioner no later than March 31. These provisions were established to assure the Commissioner adequate time to process applications by the end of the Federal fiscal year (June 30). Because the Federal fiscal year end has been changed from June 30 to September 30, the dates in paragraph (a) and (f) must be advanced by 3 months. Whenever they appeared in paragraph (a) July 31 was changed to "October 31" and February 15 was changed to "May 15." In paragraph (f), the date March 31 has been changed to "June 30."

170.15 CRITERIA FOR STANDARDS AND METHODS TO DETERMINE RELATIVE PRIORITIES OF ELIGIBLE PROJECTS.

8. To afford the States greater flexibility in establishing criteria to meet the specific needs within the State, it is proposed that the minimum standards presently in the regulations be revised so that each State will be better able to target funds allotted under Title VII–A of the Act to meet the most pressing needs of the institutions of higher education in the State. The proposed changes are not intended to require any State to change its present priorities, but merely afford geater flexibility to do so. Therefore, this section was changed as follows:

(1) The requirement for separate standards for new, as opposed to existing, institutions of higher education was eliminated.

(2) The required 20 percent weight for increased undergraduate enrollment was reduced to 5 percent; and the required 10 percent weight for utilization of existing facilities was reduced to 5 percent.

(3) Paragraph (c) requiring separate priority standards for new institutions was deleted and accordingly, paragraphs (d), (e), (f), (g), and (h) were redesignated (c), (d), (e), (f), and (g) respectively.

CHANGES TO SUBPART C—GRANTS FOR CONSTRUCTION OF GRADUATE ACADEMIC FACILITIES

Subpart C sets forth provisions for grants under Title VII–B of the Act. Funds made available under Title VII–B for graduate facilities are generally targeted to projects for improving graduate schools of excellence. The Education Amendments of 1976 made two changes which call for revision of the regulations. First, the authorization section of Title VII–B of the Act was expanded to include grants or contracts for "model intercultural centers." Secondly, reconstruction and renovation projects authorized under the new Part E of Title VII are eligible for grants from funds appropriated under Title VII–B. To accommodate these two changes, the following revisions of the regulations have been made.

170.41 ELIGIBILITY FOR GRANTS.

9. The eligibility for grants section was expanded to include grants and contracts for model intercultural centers.

170.42 SUBMISSION OF APPLICATIONS.

10. This section is revised to provide that applications for reconstruction and renovation projects authorized under Part E of Title VII shall be submitted through the State Higher Education Facilities Commissions in order to be consistent with procedures followed for other Part E project applications. The State Commissions will not have official authority to recommend approval or disapproval of any application but merely will serve to evaluate and comment on the project and the reasonableness of the data contained in the application. If a State Commission makes adverse comments concerning a particular project, the applicant will be afforded the opportunity to submit a rebuttal statement to be included with the application when the State Commission forwards it to the Office of Education. It is proposed that this same procedure be followed in connection with loans under Title VII–C of the Act. By so doing, all applications for grants and loans for Part E projects will flow through the State Commissions thereby establishing a uniform application filing procedure for all Title VII programs. The procedure will also assure that each State Commission is aware of the various projects being proposed within the State.

170.44 CRITERIA FOR EVALUATING APPLICATIONS.

11. The priority standards in this section of the regulations pertaining to grant applications for construction of graduate facilities generally focus on the excellence of the graduate programs offered by the applicant. These standards would be inappropriate for evaluating projects under Part E of Title VII. Consequently the regulations have been modified to exempt Part E projects from the provisions of this section and establish a new § 170.45 which will apply to Part E projects. This new section 170.45 provides that the Commissioner may, as a basis for project selection, consider the degree to which the applicant is effectively utilizing existing facilities.

Because the Education Amendments of 1976 did not establish priorities among the three categories of projects authorized under Part E of Title VII, it is necessary that the criteria for project selection be based on factors which do not favor any single category of projects. It is believed that the efficient use of existing facilities is an appropriate criteria for selecting reconstruction or renovation projects for approval. This selection criteria is also proposed for loans under Title VII–C of the Act, and is prescribed in § 170.59 of these regulations.

SUBPART D—LOANS FOR CONSTRUCTION, RECONSTRUCTION, AND RENOVATION OF ACADEMIC FACILITIES

Subpart D of the regulations pertains to the direct Federal loan program under Title VII–C of the Act. The Amendments of 1976 authorize loans under Title VII–C for reconstruction and renovation projects authorized under Title VII–E of the Act. Part E, however, limits the length of loans to twenty years, whereas regular loans under Title VII–C may have a term as long as fifty years. In order to

reflect the new authority for loans for Part E type projects and to reflect several other changes resulting from the 1976 Amendments, a number of revisions are proposed to Subpart D of the regulations.

170.51 ELIGIBILITY FOR LOANS.

12. In order to assure a wider distribution of loan funds, it is considered desirable to set a maximum loan of $5 million per campus per Federal fiscal year. Accordingly, it is proposed that this section be revised to reflect this maximum loan amount.

170.52 SUBMISSION OF APPLICATIONS.

13. To provide consistency in application filing procedures, applications for loans should be submitted through the State Higher Education Facilities Commissions for review and evaluation prior to submission to the Office of Education. Accordingly, it is proposed that the existing single paragraph in this section be designated as paragraph "(a)" and a new paragraph "(b)" be added to provide for application filing through the State Commissions. The rationale for this change was set forth in the explanation of changes in § 170.42 of the regulations.

170.53 SPECIAL TERMS AND CONDITIONS.

14. Paragraph (d) of the existing regulations requires that a project be related to campus or program development or planned increases in enrollment. Since some desirable reconstruction and renovation projects authorized under Part E of Title VII may not necessarily meet those conditions, it is proposed that paragraph (d) of the regulations be modified by adding a provision exempting Part E projects.

15. Section 170.53(e) of the existing regulations requires the Commissioner's consent to mortgage a facility constructed with loan assistance under Title VII–C. Since many facilities for which reconstruction and renovation assistance is needed under Title VII–E of the Act are already subject to mortgages or may subsequently be needed as collateral for general remodeling loans, it is proposed that the provisions of paragraph (e) be modified to exempt Part E type projects from the requirement to obtain the Commissioner's consent to mortgage, except when a mortgage is offered as security for a loan under Part E of Title VII. This means that if the Commissioner's loan is secured by a mortgage, consent will be required for the institution to offer another mortgage superior or subordinate to that of the Commissioner's.

170.56 SECURITY FOR LOANS.

16. It may be difficult for an institution to pledge adequate security for reconstruction and renovation loans authorized under Title VII, Part E of the Act. In addition, since it is desirable to encourage short term loans where there is quick turnover of loan capital which may be used for new loans, it is proposed that this section of the regulations be modified to add a new paragraph (g) which provides for unsecured loans which have terms of seven years or less.

170.57 LENGTH AND MATURITY OF LOANS.

17. Because the Amendments of 1976 provide for a maximum loan term of twenty years for reconstruction and renovation projects authorized under Part E of Title VII, paragraph (a) of § 170.57 is revised to reflect this change since loans for new construction are authorized for longer periods.

18. Paragraph (b) of § 170.57 provides that loan principal may be amortized from the third year through the final year of the loan. This provision was intended to free the first three years of a loan from principal payments. During that time, the borrower would be required to build a debt service reserve in three equal installments in lieu of principal payments. With shorter term loans the debt service reserve account may not be required, and it would be unreasonable to delay the beginning of the principal amortization period. Therefore, paragraph (b) has been revised to eliminate this provision.

19. Because of the change in loan term to 20 years for Part E projects, it was necessary to modify the reference to 30 year loans contained in paragraph (c) of § 170.57.

170.58 BOND COUNSEL OPINION.

20. Because of anticipated loans for less value and shorter terms for reconstruction and renovation projects authorized under Title VII–E of the Act, it is desirable to reduce the present regulatory requirements with regard to legal services and opinions. Therefore, the requirement for bond counsel opinion is modified to permit the Commissioner to accept, under certain circumstances, the opinions of attorneys other than bond counsel as described in the present regulations. Therefore, section 170.58 has been revised to relax the restrictions concerning the qualifications of counsel.

170.59 DETERMINATION OF PRIORITIES FOR LOAN APPROVALS.

21. To be consistent with other programs under Title VII of the Act, to provide competition for available loan funds, and to reflect conditions for approval of loans for reconstruction and renovation projects authorized under Part E of Title VII, it is proposed that the single existing paragraph in this section be designated as paragraph "(a)" and that paragraphs "(b)" and "(c)" be added.

170.66 MORATORIA ON THE PAYMENT OF PRINCIPAL AND INTEREST ON LOANS.

22. It is proposed that this new section of the regulations reiterate the authority specifically granted the Commissioner by the Education Amendments of 1976. The Amendments require the Commissioner to approve a specific repayment schedule for payments in arrears as a condition for granting a moratorium. Recognizing that in certain cases a realistic repayment schedule may be impossible, the new section provides that the Commissioner may under certain circumstances, grant a moratorium on the condition that a specific plan be submitted for approval at a future date designated by the Commissioner.

170.67 REPAYMENT OF LOANS AT SEVENTY FIVE PERCENT OF FACE VALUE.

23. The Amendments of 1976 authorized any borrower under Title VII–C who had a loan approval before January 1, 1976 to pay off the loan at any time before October 1, 1979, at 75 percent of the face value of the outstanding obligation. Accordingly, it is proposed that a new section be incorporated in the regulations to provide for early redemption of loans under the 75 percent redemption provision.

GENERAL REVISION TO BE MADE THROUGHOUT EXISTING REGULATIONS

24. The Amendments of 1976 added to the term "construction," wherever it appears throughout Title VII of the Act, the terms "reconstruction or renovation." Therefore, the existing regulations are revised throughout to insert, "reconstruction, or renovation" immediately after the word "construction," except in those instances in § 170.63 and § 170.64 where specific reference is made to a construction fund.

In consideration of the foregoing it is proposed to amend Part 170 of 45 CFR Chapter I as set forth below.

NOTE—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

(Catalog of Federal Domestic Assistance Number 13.457, Higher Education Facilities Construction—Interest Subsidization; Number 13.458, Higher Education Facilities Construction—Public and Private Colleges and Universities; Number 13.459, Higher Education Academic Facilities Construction Public Community Colleges and Technical Institutes).

Dated: June 14, 1977.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: August 6, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education, and Welfare.

Part 170 of Title 45 of the Code of Federal Regulations is revised to read:

PART 170—FINANCIAL ASSISTANCE FOR CONSTRUCTION, RECONSTRUCTION, OR RENOVATION OF HIGHER EDUCATION FACILITIES

Subpart A—General Provisions

Sec.
170.1 Definitions.
170.2 Office of Education general provisions.
170.3 Modification of general requirement for competitive bidding on contracts and for acquisition and installation of built-in equipment.
170.4 Fiscal control and fund accounting procedures by State commissions.
170.5 Retention of records by State commissions.

Sec.

170.6 Determination of costs eligible for Federal participation.
170.7 Urgency of need for projects of public institutions.
170.8 Grants and loans for reconstruction and renovation projects authorized under Title VII E of the Act.

Subpart B—Grants for Construction, Reconstruction, or Renovation of Academic Facilities

170.11 Institutional eligibility for grants under section 702 of the Act.
170.12 Institutional eligibility for grants under section 703 of the Act.
170.13 Conditions for grant approval.
170.14 Submission and processing of Title VII A applications.
170.15 Criteria for standards and methods to determine relative priorities of eligible projects.
170.16 Criteria for standards and methods to determine Federal shares of eligible projects.
170.17 State plans.
170.18 Adjustments in amount of Federal share.

Subpart C—Grants for Construction, Reconstruction, or Renovation of Graduate Academic Facilities

170.41 Eligibility for grants.
170.42 Submission of applications.
170.43 Facilities panel.
170.44 Criteria for evaluating applications.
170.45 Priorities for approval of grants for reconstruction and renovation authorized under Title VII E of the Act.

Subpart D—Loans for Construction, Reconstruction, or Renovation of Academic Facilities

170.51 Eligibility for loans.
170.52 Submission of applications.
170.53 Special terms and conditions.
170.54 Determination of nonavailability of equally as favorable terms and conditions.
170.55 Form of evidence of indebtedness.
170.56 Security for loans.
170.57 Length and maturity of loans.
170.58 Bond counsel opinion.
170.59 Determination of priorities for loan approvals.
170.60 Loan agreement.
170.61 Loan closing.
170.62 Interim financing.
170.63 Construction fund.
170.64 Investment of idle construction funds.
170.65 Disposal of balance remaining in the construction fund.
170.66 Moratoria on the payment of principal and interest on loans.
170.67 Repayment of loans at seventy five percent of face value.

Subpart E—Annual Interest Grants for Construction, Reconstruction, or Renovation of Academic Facilities

170.71 Eligibility for annual interest grants.
170.72 Amount of annual interest grants.
170.73 Submission of applications.
170.74 Conditions for approval of annual interest grants.
170.75 Limits governing extent of Federal assistance.
170.76 Approval of financing plans.
170.77 Evidence of lowest possible cost of loan.
170.78 Annual interest grant agreement.
170.79 Payment of annual interest grants.
170.80 Reduction of grant where refinancing produces lower cost.
170.81 Priority considerations; closing dates.
170.82 Preceding provisions not exhaustive of authority of Government.

AUTHORITY: Secs. 701–782 of Pub. L. 89–329, Title VII, as amended, 86 Stat. 288–303 (20 U.S.C. 1132a–1132e), unless otherwise noted.

Subpart A—General Provisions

§ 170.1 Definitions.

(a) "Act" means Public Law 89–329, the Higher Education Act of 1965, as amended. Unless otherwise indicated, title references are to titles of the Act. All references to sections are to sections of this part, unless otherwise indicated.

(b) "Academic facilities," as defined in the Act, are further defined and subdivided into the following categories:

(1) "Instructional and library facilities" means all rooms or areas used regularly for instruction of students, for faculty offices, or for library purposes, and service areas which adjoin and are used in connection with such rooms or areas.

(2) "Instruction-related facilities" means all rooms or areas other than instructional and library facilities which are used for purposes related to the instruction of students, research, or for the general administration of the educational or research programs of an institution of higher education and service areas which adjoin and are used in conjunction with such rooms or areas.

(3) "Health-care facilities," as authorized under Titles VII A and VII C, means infirmaries and all other rooms or areas designed to be used for medical examination or treatment of students and institutional personnel, and service areas which directly serve such rooms or areas.

(4) "Related supporting facilities" means all other areas and facilities which are necessary for the utilization, operation, and maintenance of "instructional and library facilities," "instruction-related facilities," or "health care facilities," as defined above. This term includes building service and circulation areas and central maintenance and utility facilities which serve more than one building, to the degree that such central facilities are designed and used to serve eligible academic facilities under Title VII of the Act.

(5) "Public health type facilities" means facilities as defined in section 782 (1) (B) (v) of the Act, to the degree that the facility is owned, operated, and maintained by the institution of higher education requesting the approval of a project and if—

(i) Funds available for the project are used solely for the purpose of conversion or modernization of energy utilization techniques to economize on the use of energy resources, and

(ii) The project is not limited to facilities described in section 782(1) (B) (v) of the Act.

(20 U.S.C. 1132e–1.)

(c) "Assignable area" means square feet of area in facilities which are designed and available for assignment to specific functional purposes (such as instruction, research, and administration, and including noneligible purposes such as student sleeping rooms, apartments, or chapel rooms). Areas used for general circulation within the building, for public washrooms, for building maintenance and custodial services, or in central maintenance and utility facilities which exist only to support the operation and utilization of other structures on the campus and which are not available for assignment to other specific functional purposes, as illustrated above, are classified as nonassignable area.

(20 U.S.C. 1132e–1 (1) and (2).)

(d) "Branch campus" means a separately organized unit of an institution of higher education which is located apart from the parent institution and which meets in its own right the definition of an institution of higher education as defined in the Act.

(20 U.S.C. 1141.)

(e) "Capacity/enrollment ratio" means the ratio of (1) the square feet of assignable area of instructional and library facilities as defined in paragraph (b)(1) of this section to (2) the total student clock-hour enrollment, at a particular campus of an institution. For purposes of this definition, "student clock-hour enrollment" means the aggregate clock hours (sometimes called contact hours) per week in classes or supervised laboratory or shop work for which all resident students (i.e., students enrolled for credit courses on the campus) are enrolled as of a particular date. Where formally established independent study programs exist, systematically determined equivalents of class or laboratory hours may be included under "student clock-hour enrollment."

(20 U.S.C. 1132a–4.)

(f) "Developing institution" means an eligible institution of higher education which has the desire and potential to make a substantial contribution to the higher education resources of our Nation but which for financial and other reasons is struggling for survival and is isolated from the main currents of academic life.

(20 U.S.C. 1052(a).)

(g) "Equipment" means manufactured items which have an extended useful life and are not consumed in use and which have an identity and function which are not lost through incorporation into a different or more complex unit or substance. Equipment is further subdivided into two categories: Built-in equipment and initial equipment.

(1) "Built-in equipment" means equipment which is a permanent part of the structure.

(2) "Initial equipment" means all items of equipment other than built-in equipment, which are necessary and appropriate for the initial functioning of a particular academic facility for its specific purpose. No equipment may be considered as initial equipment unless it has been acquired or contracted for prior to the date on which the facility is first used for education of students.

(20 U.S.C. 1132e–1(2).)

(h) "Full-time equivalent number of students" means:

(1) For purposes of determining State allotments, the number of full-time students enrolled in programs which consist wholly or principally of work normally creditable toward a bachelor's or higher degree plus one-third of the number of part-time students enrolled in such programs, plus 40 percent of the number of students enrolled in programs which are not chiefly transferable towards a bachelor's or higher degree plus 28 percent of the remaining number of such students. Student enrollment figures for each fiscal year for the purposes of this computation will be those contained in the most recent Office of Education survey containing data on opening fall enrollments in higher education.

(20 U.S.C. 1132a–1, 1132a–2.)

(2) For purposes of reporting undergraduate enrollment trends and projections in connection with applications for financial assistance for individual institutions under Title VII A of the Act, the "full-time equivalent number of students" may be defined for each State by the State commission by specific State plan provision. In the absence of such a definition in the applicable State plan, "full-time equivalent number of students" for application purposes is the total number of full-time students plus one-third of the number of part-time students. For the purpose of this definition, full-time students are those carrying at least 75 percent of a normal student-hour load.

(20 U.S.C. 1132a–4).

(i) "Institution of higher education or institution," means only so much of an educational institution in any State as meets the requirements set forth in section 1201(a) of the Act. The term "educational institution" limits the scope of this definition to establishments at which teaching is conducted.

(20 U.S.C. 1141(a).)

(j) "Project" means the facilities (all or a portion of one or more structures) which are eligible for grant or loan assistance under a particular title of the Act and for which grant or loan assistance is requested in a specific grant or loan application. Only facilities to be part of a unified construction, reconstruction, or renovation, activity and to be constructed, reconstruction, or renovated on the same campus may be included in the same project application.

(20 U.S.C. 1132e–1(2).)

(k) "State commission" means the State agency designated or established in each State which is broadly representative of the public and of institutions of higher education in that State.

(20 U.S.C. 1132a–2; 1142a.)

(l) "State plan" means the document submitted by a State commission and approved by the Commissioner, which sets forth the standards, methods, and administrative procedures whereby the State Commission will review projects proposed by applicants in the State for Federal assistance under Title VII A of the Act, and will determine and recommend the relative priority of each project and the Federal share of the costs eligible for Federal financial participation for each project.

(20 U.S.C. 1132a–3(a).)

(m) "Reconstruction or renovation project under Part E, Title VII," means a reconstruction or renovation project which is primarily designed to enable an institution—

(1) To economize on the use of energy resources, or

(2) To bring its academic facilities into conformity with the requirement of the Act of August 12, 1968, commonly known as the Architectural Barriers Act of 1968, or

(3) To bring its academic facilities into conformity with environmental protection or health and safety programs mandated by Federal, State or local law, if such requirements were not in effect at the time such facilities were constructed.

(20 U.S.C. 1132d–11.)

§ 170.2 Office of Education general provisions.

Assistance provided under Title VII of the Act, except Part C thereof is subject to applicable provisions contained in Subchapter A of this chapter (relating to fiscal, administrative, property management, and other matters). Assistance under Part C of Title VII of the Act is, however, subject to Subpart K of 45 CFR Part 100a (relating to construction, reconstruction, or renovation requirements).

(20 U.S.C. 1132a.)

§ 170.3 Modification of general requirement for competitive bidding on contracts for construction, reconstruction, or renovation and for requisition and installation of built-in equipment.

(a) Owner-furnished material or equipment may be procured in accordance with the procedures set out in 45 CFR Part 100a, Subpart I (Procurement standards).

(b) In order to assure the eligibility of costs under § 170.6, recipients must obtain the approval of costs to be incurred both before advertising for or soliciting bids and before awarding any construction, reconstruction, or renovation contract covered under the Act. Approval will be given only after Federal assistance has been approved for the facility by an appropriate Federal agency.

(20 U.S.C. 1132a–6(a)(2)(F).)

§ 170.4 Fiscal control and fund accounting procedures by State commissions.

Each State plan must contain specific information regarding fiscal control and fund accounting procedures as required by the Commissioner to insure proper disbursement of and accounting for Federal funds which may be paid to the State commission for expenses for the proper and efficient administration of the State plan.

(20 U.S.C. 1132a–3.)

§ 170.5 Retention of records by State commissions.

State commissions must establish a complete case file on each Title VII–A application received; inform applicants of official actions and determination by letter or similar type of correspondence, and must retain records regarding each case for at least 2 years after final action with respect to any such application. In addition, each State commission must maintain a full record of all hearings on appeals pursuant to section 704(a)(5) of the Act, and all proceedings by which it establishes relative priorities and recommended Federal shares for eligible projects considered as of each specified closing date and must retain such records for at least 3 years.

(20 U.S.C. 1132a–3(a)(b).)

§ 170.6 Determination of costs eligible for Federal participation.

(a) Determination of costs eligible for Federal participation will be based for each individual project, whether application is made under Title VII–A, VII–B, or VII–C of the Act, upon: (1) The date on which a given cost item was incurred or contracted for: (2) whether the cost is an allowable "development cost," as defined in section 782(3) of the Act, and has been incurred in accordance with the requirements set forth in these regulations; (3) the portion of the proposed facility which is eligible under the type of assistance for which the application is submitted; and (4) the amount of any financial assistance under any other Federal program which the applicant has obtained or is assured of obtaining for the project.

(b) For a project for which an application is filed for the first time under any program of the Act on or after July 1, 1972, the following will be excluded from the eligible development cost:

(1) Any cost for the acquisition of land which was incurred more than 2 years before an application is filed, and any cost for the acquisition of land in connection with an application for reconstruction or renovation;

(2) Any cost for the acquisition of an existing structure incurred more than 1 year before an application is filed, and any cost for the acquisition of an existing structure in connection with an application for reconstruction or renovation;

(3) Any cost for initial equipment incurred before the date an application is filed; or

(4) Any cost for construction, reconstruction or renovation, or for built-in equipment where the contract has been entered into before the date an application is filed and before the concurrence of the Commissioner in the award of the contract.

(20 U.S.C. 1132e–1 (3) and (4).)

§ 170.7 Urgency of need for projects of public institutions.

(a) Notwithstanding other project eligibility requirements, the Commis-

sioner under Parts B, C, and D of Title VII of the Act and the State commission under Part A of Title VII of the Act, shall not approve an application for assistance of a public institution of higher education unless the Commissioner or State commission, as appropriate, determines that the need for the project is urgent in light of the capacity of other public institutions of higher education which enroll students from basically the same geographic area as the applicant institution.

(b) If the applicant institution has a history of not serving persons of a particular race, color, or national origin and if there are within the geographic area which the institution serves one or more public institutions of higher education which have a history of not serving persons of another race, color, or national origin, the Commissioner or the State commission, as appropriate, will not determine that such urgency of need exists unless the applicant provides evidence satisfactory to the Commissioner that of a public institution of higher educa- the construction, reconstruction, or renovation and proposed use of the facilities will not establish, increase, or impede the elimination of the racial identifiability of any of these institutions.

(20 U.S.C. 1132a–4, 1132b, 1132c–4, 1132d–1 and Shannon vs. HUD, 436 F.2d 809.)

§ 170.8 Grants and loans for reconstruction and renovation projects authorized under Title VII E of the Act.

Applications submitted for grant or loan assistance for reconstruction or renovation projects under Title VII E will be subject to the following provisions:

(a) No project having a total eligible cost, as specified in paragraph (b) below, of less than $10,000, will be considered for approval by the Commissioner.

(b) Determination of costs eligible for Federal participation will be based on review of each application by the Commissioner. Only those costs directly related to one or a combination of reconstruction or renovation purposes specified in § 170.1(m) will be considered eligible by the Commissioner. The Commissioner may approve nonrelated costs provided they do not exceed 10 percent of those costs directly related to the purposes of § 170.1(m), and are found by the Commissioner to be part of the project for which Federal assistance is requested.

(c) The Commissioner will not approve an application unless the applicant presents sufficient information in the application to demonstrate that the project meets pertinent requirements as follows—

(1) For assistance for energy conservation, the applicant:

(i) Must have accomplished minimum energy conservation measures required by the Commissioner and

(ii) Must have demonstrated that the proposed project will result in significant savings in energy consumption or related costs;

(2) For assistance for the removal of architectural barriers for the handicapped, the project must be required by local, State or Federal law;

(3) For assistance for conformance with environmental or health and safety requirements, the project must be required by local, State or Federal law; and

(4) Any application involving a combination of the purposes specified in subparagraphs (1), (2), or (3) above must satisfy each of the requirements specified. Any portion of an application not meeting the applicable requirements will be ineligible for assistance, except to the extent permitted under paragraph (b) above.

(d) Any approved grant or loan project will be terminated if the reconstruction or renovation contract has not been awarded or on-site work begun within 18 months from the date of loan approval or grant approval whichever approval date comes first.

(20 U.S.C. 1132d–11.)

Subpart B—Grants for Construction, Reconstruction, or Renovation of Academic Facilities

§ 170.11 Institutional eligibility for grants under section 702 of the Act.

To qualify for a grant from funds allotted pursuant to section 702 of the Act, an institution or a branch campus of an institution, Reconstruction, or Renovation meet the requirements specified in section 1201(a) and 782(6) of the Act.

(a) An institution which is not accredited by a nationally recognized accrediting agency or association listed pursuant to section 1201(a) of the Act may qualify, alternatively, by obtaining a certification from the Commissioner (dated no earlier than 2 years prior to the date of filing of the application for a grant) stating that the institution has met the requirements, set forth in subsection 1201 (a)(5) of the Act.

(b) An institution or a branch campus of an institution will be determined to be organized and administered principally to provide a 2-year program as specified in section 782(6) of the Act, if:

(1) More than 50 percent of the full-time equivalent student enrollment at the institution or branch campus is in 2-year programs of the types specified in section 782(6) of the Act; and

(2) The application for a grant pursuant to section 702 of the Act contains a statement that the institution or branch campus is organized and administered principally to provide two year programs, and the statement is supported by information available to or obtained by the State Commission.

(20 U.S.C. 1132–1, 1141.)

§ 170.12 Institutional eligibility for grants under section 703 of the Act.

To qualify for a grant from funds allotted pursuant to section 703 of the Act, an institution must meet requirements specified in section 1201(a) of the Act. An institution which is not accredited by a nationally recognized accrediting agency or association listed pursuant to section 1201(a) of the Act may qualify, alternatively, by obtaining a certification from the Commissioner (dated no earlier than 2 years prior to the date of filing of the application for a grant) stating that the institution has met the requirements set forth in subsection 1201(a)(5) of the Act.

(20 U.S.C. 1132a–2.)

§ 170.13 Conditions for grant approval.

(a) An application for a grant under Title VII A of the Act, other than applications for reconstruction and renovation assistance authorized under Title VII E of the Act, will be approved only if the Commissioner is satisfied on the basis of information submitted with the application that:

(1) The facilities included in the Title VII A project are intended for use predominantly in undergraduate instruction, extension, and continuing education programs, and/or health care to students or personnel of the institution:

(2) The requirements of section 705 of the Act will be met; and

(3) The application meets all requirements of section 707(a) of the Act.

(b) In determining whether an institution of higher education is eligible for a grant in accordance with section 705 of the Act, the State commission must base its determination on the following criteria:

(1) To establish whether a substantial expansion of student enrollment capacity, health care capacity, or continuing education capacity is being provided, the State commission must determine that the increase to be provided in any one of the three types of capacities will exceed 10 percent of current capacity, or, in the case of enrollment capacity an increase of 10,000 S.F. of instructional and library space. For purposes of this paragraph student enrollment capacity means "instructional and library facilities," health care capacity means "infirmaries and all other rooms or areas designed to be used for medical examination or treatment of students and institutional personnel," and extension and continuing education capacity means "academic facilities" used principally for extension and continuing education programs of the institution.

(2) To establish whether such substantial expansion or creation of capacity is urgently needed, the State commission must consider:

(i) The planned enrollment growth of the institution (10 percent over 4 years to be considered minimal growth at existing institutions);

(ii) The capacity enrollment ratio at the campus to be expanded (other utilization measures may be substituted); and

(iii) Serious deficiencies in the quality of programs due to inadequacies in existing space.

(3) As used in section 705 of the Act, "other construction, reconstruction, or renovation to be undertaken within a reasonable time" means construction, reconstruction, or renovation approved to start within 1 year of the date of application.

(c) In determining whether an institution of higher education would experience a decrease in enrollment capacity if an urgently needed facility is not constructed reconstructed, or renovated, the Commissioner will give consideration to:

(1) The age and condition of existing instructional and library facilities which will be withdrawn from use, and

(2) Any other factors which will cause facilities to be functionally inadequate for instructional or library purposes.

(d) An application for a grant for reconstruction and renovation purposes authorized under Title VII E of the Act will be approved only if, based on information submitted with the application, the Commissioner is satisfied that—

(20 U.S.C. 1132a–6(a)(2))

(1) The application meets the basic provisions of paragraph (a) and (c) of § 170.8; and

§ 170.14 Submission and processing of Title VII A applications.

(a) *Closing dates for filing of applications.* Closing dates for which applications may be filed and accepted by the State commission will be established in the State plan. For each category of application (i.e., applications for public community colleges and public technical institutes and applications for institutions of higher education other than public community colleges and public technical institutes) the State plan will provide at least two closing dates for any Federal fiscal year, and all such closing dates shall be between October 31 and May 15. Where the Commissioner determines unusual circumstances so warrant, the State plan may provide for a closing date after May 15.

(b) *Submission of project applications.* Applications must be submitted directly to the appropriate State commission, together with any supplemental information which may be required by the State commission. The State commission officially records the date of receipt of each application. Applications must be initially submitted in advance of inviting bids for construction, reconstruction, or renovation. The application may be considered at only those closing dates which occur no later than 12 months after construction, reconstruction, or renovation has started.

(c) *Verification of application data and institutional and project eligibility.* Before determining the relative priority or Federal share for any application for grant assistance under Title VII A of the Act, the State commission must satisfy itself that the data contained in the application appear to be valid, and that the institution and the project meet basic eligibility requirements of the Act and the regulations governing the administration of the Act. In any case where in the opinion of the State commission a question may be raised as to the eligibility of an institution, the State commission will promptly forward a copy of the application to the Office of Education for a clarification of such eligibility. In any such case, the State commission continues to process and rank such application as if it were eligible, but delays final action on all applications under the same category considered as of the same closing date until notified by the Office of Education of the disposition of the eligibility question.

(d) *Determination of relative priorities and Federal shares.* All eligible applications received by each specified closing date must be considered by the State commission together with others of the same category (i.e., applications for public community colleges and public technical institutes for funds allotted under section 702 of the Act, and applications for all other institutions of higher education for funds allotted under section 703 of the Act) and assigned relative priorities and recommended/ Federal shares in accordance with the provisions of the State plan.

(e) *Procedures where funds are insufficient to provide full Federal shares for all eligible projects.* (1) In any case where the funds available in a State allotment for projects considered as of a particular closing date are insufficient to cover all eligible applications, the State commission will nevertheless determine the full Federal share, calculated according to the State plan, for all projects in their order of relative priority, until the remaining available funds are insufficient to provide the full Federal share as calculated for the next project in order of priority.

(2) If the State plan provides for apportionment of the State allotment among closing dates, the State plan may provide also that sufficient funds will be made available immediately, from such funds as were apportioned to later closing dates in the same fiscal year, so that the full Federal share as initially calculated will be available for the first project for which only a part of the Federal share would otherwise have been available. In any case where the State allotment is apportioned among closing dates and no such provision is included in the State plan, all projects for which the full Federal share, as calculated, cannot be provided for by the available funds must be carried over to any subsequent closing dates in the same fiscal year.

(3) If the State allotment is not apportioned among closing dates, or in the case of the last closing date in the fiscal year, the amount of the remaining funds will be offered as a partial Federal share for the first project in order of relative priority for which less than the full Federal share as calculated is available. The offer and acceptance of such a lesser Federal share will in no way be deemed to diminish the scope of the project. An applicant which agrees to accept such a partial Federal share will in all cases have the option to submit a supplemental application as provided in paragraph (e)(1) of this section. If the applicant offered such a partial Federal share declines to accept it, the remaining funds and the application for which the partial Federal share was declined must be carried over to the next closing date, if any, in the same fiscal year.

(f) *Recommendation by State commissions.* Promptly upon completing its consideration of applications as of each closing date, and no later than June 30 of each Federal fiscal year, each State commission will forward to the Commissioner: (1) A current project report, on forms supplied by the Commissioner, for the pertinent category of applications, listing each application received or carried over from the previous closing date, each application returned to the applicant and the reason for return of such application, each application considered as of the closing date, and the priority and Federal share determined according to the State plan for each project considered and (2) the application form and exhibits in the number of copies requested by the Commissioner for each project assigned a priority high enough to qualify for a Federal grant within the amount of funds available in the allotment for the State.

(g) *Notification to applicants.* The State commission must promptly notify each applicant of the results of all determinations regarding its application as of each closing date, and any applicant will, upon request in accordance with procedures as are established by the State commission, be furnished access to the records of official State commission proceedings on the basis of which relative priorities and Federal shares of all applications were determined.

(h) *Disposition of applications which are not recommended for grants.* Applications which are not recommended for a grant within the fiscal year in which they are filed may be retained by the State commission, but the unsuccessful applicants should be notified when there are no longer any funds available in the State allotments for the fiscal year. Applications may be reconsidered the following fiscal year for any project which does not receive a recommendation for a grant and which the applicant states in writing a desire to have reconsidered in a subsequent year. In addition, whenever any application is carried over from one closing date to the next those portions of the application requiring data on enrollments and available instructional, library, and or health care facilities must be amended to reflect most recent opening fall term data.

(i) *Grant award.* For a Title VII A project application which meets all eligibility requirements the Commissioner will approve the application and reserve Federal funds from the appropriate State allotment and will prepare and send to the applicant a grant award, which sets forth the pertinent terms and conditions of the grant.

(j) *Amendment of project applications.* Any time prior to a closing date for which an application is to be considered, the applicant may make changes

in the application by written notification to the State commission. After the closing date, no changes in applications are permitted, except corrections or submission of additional data as requested by the State commission.

(k) *Project changes.* After a project has been forwarded to the Commissioner by the State commission, no substantial changes in the nature or scope of the project will be approved by the Commissioner without first verifying that such changes would not have affected the State commission's original recommendation of the project for a grant.

(l) *Supplemental applications.* Any time after approval of a Title VII A grant, an applicant may, for reasons of not having received the maximum Federal share allowable under the Act or the applicable State plan, file a supplemental application. A supplemental application is a written request to the State commission and must contain all amended application data necessary to assign a priority to the application and to calculate a revised eligible development cost of the project where applicable. In no event, however, will a supplemental application be considered by a State commission (1) for a closing date which is more than 12 months after construction, reconstruction, or renovation has been started or (2) for a closing date which is after the date the project has been substantially completed, whichever is earlier.

(20 U.S.C. 1132a-6(c))

§ 170.15 Criteria for standards and methods to determine relative priorities of eligible projects.

(a) A State plan must set forth separately the standards and methods for determining the relative priorities of eligible projects for the construction, reconstruction, or renovation of acadamic facilities (1) for public community colleges and public technical institutes and (2) for institutions of higher education other than public community colleges and public technical institutes.

(b) The standards for determining relative priorities for established institutions or branch campuses must include the following, each of which will be assigned at least the percentage of the total weight assigned to all standards for established institutions or branch campuses:

(1) One or more standards dealing with the planned for and reasonably expected numerical and/or percentage increase in full-time equivalent undergraduate student enrollment at the campus at which the facilities are to be constructed, reconstructed, or renovated occurring between the opening of the fall term which opened preceding the closing date for which the application is being considered and the opening of either the third, fourth, or fifth term thereafter (at least 5 percent of total weight with priority advantage given to higher numerical and/or percentage increases).

(2) One or more standards (at least 10 percent of total weight) dealing with the amount and/or percentage by which the construction, reconstruction, or renovation of the project will increase or replace the assignable area in instructional and library facilities and health care facilities on the campus at which the facilities are to be constructed, reconstructed, or renovated.

(3) One or more standards designed to favor projects for institutions or branch campuses which are most effectively utilizing their existing academic facilities (at least 5 percent of total weight).

(4) A standard (at least 5 percent of total weight) designed to favor projects submitted by institutions or branch campuses that are committed to the enrollment of a substantial number of students from low-income families.

(5) A standard (at least 5 percent of total weight) designed to favor projects submitted by institutions or branch campuses which are committted to the enrollment of a substantial number of veterans returning to civilian life.

(c) The State plan may include additional standards for determining relative priorities which are not inconsistent with the standards set forth in paragraph (b) of this section and which will carry out the purposes of the Act.

(d) The methods for application of the standards for determining relative priorities must provide for the assignment of point scores for each standard applied, such that the potential total score for each project will be the same whether the project is for a new institution or branch campus or for an established institution or branch campus. The assignment of points for each standard may be by any one of the following methods or by similar objective methods, a different one of which may be used in connection with each standard.

(1) Applications may be ranked according to relative performance for the standard and assigned a point score for relative rank (e.g., 10 points placement in the highest 10 percent, 9 points for placement in the second highest 10 percent, 8 points for placement in the third highest 10 percent, etc.).

(2) Applications may be compared to a scoring table for the standard, and assigned points accordingly (e.g., for numercial increase in full-time equivalent undergraduate enrollment, a scoring table might provide for 10 points for an increase of 1,000 or more, 8 points for an increase of 800–999, 6 points for an increase of 600–799, etc.)

(3) Applications may be compared to a fixed requirement for the standard, and assigned points if they meet the requirement or denied points if they do not. This type of scoring should be used where comparison against the standard involves a "yes—no" decision (e.g., Is the proposed project located in a geographic area of the State in which an unfilled need for creation or expansion of undergraduate enrollment capacity has been documented in a statewide study? If "yes," award 5 points if "no," award 0 points).

(e) The methods for application of the standards must provide for determination of relative priorities on the basis of the total of the points earned by each application for each applicable standard and must specify factors to be applied in determining which application will receive the higher priority in the case of identical scores.

(f) The standards and methods for determining relative priorities must be developed on the basis of information which is to be submitted on the application form prescribed by the Commissioner, or required by the State commission to be submitted on supplemental State forms to accompany the application, or contained in published reports or publications readily available to the State commission and to all institutions within the State. Whenever supplemental forms or definitions or data in public reports or publications are to be used in connection with optional State plan standards, the State plan must include a section setting forth the definitions and supplementary data sources and an appendix illustrating the supplemental State forms.

(g) In no event may an institution's readiness to admit out-of-State students be considered as a priority factor adverse to the institution and in no event may the nature of the control or sponsorship of the institution, or the fact that construction of the project had commenced, or that part of the cost of a project has been incurred before or under a contract entered into prior to the date of the application, be considered as a priority factor either in favor of, or adverse, to, an institution.

(20 U.S.C. 1132a-5(a))

§ 170.16 Criteria for standards and methods to determine Federal shares of eligible projects.

(a) Unless the Federal share is specified in the State plan as a uniform percentage of the costs eligible for Federal financial participation, the State plan must prescribe the standards and methods in accordance with which the State commission determines the Federal share of such costs, but in no event may the Federal share of a project exceed the percentage of the eligible project development cost specified by the Act.

(b) Standards and methods for determining the Federal share pursuant to paragraph (a) of this section must: (1) be objective and simple to apply; (2) involve the use of data which are to be submitted on the application form prescribed by the Commissioner, required by the State commission to be submitted on supplemental State forms to accompany the application, or contained in reports or publications readily available to the State commission and the institutions of higher education in the State; (3) be such as will enable an applicant to calculate in advance (on the assumption that sufficient funds will be available to cover all applications) the minimum Federal share of the estimated eligible project development cost which the State commission would certify to the Commissioner if it rcommends the project for a Federal grant; and (4) be consistent with criteria published by the Commissioner with respect to the determination of relative priorities among projects and be promotive of the purposes of the Act.

(20 U.S.C. 1132a-5(b))

§ 170.17 State plans.

(a) A State must submit a State plan to the Commissioner no later than 60 days prior to the first closing date of each fiscal year that the State desires to participate in the Title VII A grant program. The Commissioner approves a State plan and annual revision upon the basis that he has received satisfactory assurance and explanation regarding the basis on which the State commission submitting the plan meets the requirements of section 704(a) of the Act. A new or revised State plan submitted in accordance with section 704 of the Act will be submitted on forms or in a format supplied by the Commissioner and must contain all provisions required by the Commissioner pursuant to section 704 of the Act and other sections of the regulations in this part, together with such additional organizational and administrative information as the Commissioner may request.

(b) All proposed amendments to a State plan must be submitted to the Commissioner for his approval in the form and according to the instructions established for that purpose. Amendments will apply uniformly to all applications to be considered together as of any closing date, and, unless otherwise provided in the State plan, become effective immediately upon approval by the Commissioner, except that in no event may any amendment which affects the standards and methods for determining priorities or Federal share or any amendment providing for an additional closing date or for the change in an existing closing date become effective sooner than 60 days after the date the proposal to amend is received by the Commissioner and 30 days after the date of the Commissioner's approval of the amendments as a part of the State plan. Amendments which are required by amendments of the Act or of these regulations or are designed to implement promptly amendments of the Act or of these regulations may be effective immediately upon their approval by the Commissioner.

(c) State plan amendments conforming to the provisions in these regulations regarding determination of priorities must be submitted and approved prior to State commission actions on any Title VII A applications for closing dates later than April 1, 1973.

(20 U.S.C. 1132a-3)

§ 170.18 Adjustments in Amount of Federal share.

In any case where the costs eligible for Federal participation are determined to be less than those provided for in the grant award, the Commissioner will redetermine the amount of the Federal share which would have been recommended for the project, based on the lesser eligible cost, under State plan provisions in effect at the time the project was recommended for a grant, as if sufficient funds had been available in the State allotment at that time to provide the maximum Federal share provided for by the plan. If the redetermined Federal share entitlement is less than the maximum amount authorized by the grant award the grant will be reduced accordingly, and any overpayment of Federal funds will immediately be due to the Government of the United States. If the redetermined Federal share is equal to or greater than the maximum amount of the Federal share authorized by the grant award, the final settlement will be based on the Federal share amount authorized by the grant award.

(20 U.S.C. 1132a-6(c))

Subpart C—Grants for Construction, Reconstruction, or Renovation of Graduate Academic Facilities

§ 170.41 Eligibility for grants.

From funds available under Title VII B of the Act, the Commissioner is authorized:

(a) To make grants to institutions of higher education and cooperative graduate center boards for construction, reconstruction, or renovation of academic facilities dedicated to the provision of graduate education, including facilities essential to their operation; and

(20 U.S.C. 1132b(a)(1))

(b) To make grants to or to enter into contracts with institutions of higher education for construction of facilities for model intercultural programs designed to integrate the educational requirements of substantive knowledge and language proficiency.

(20 U.S.C. 1132b(a)(2))

§ 170.42 Submission of applications.

(a) Applications covered by this subpart may be submitted by institutions of higher education or by cooperative graduate center boards as defined in section 782(8) of the Act. Applications will be submitted at the time and in manner as may be prescribed by the Commissioner and, except as provided in paragraph (b) of this section, will be processed by the staff of the Office of Education in the order of their receipt. Upon the completion of such processing as is submitted to the panel of specialists for their review and evaluation. Applications must be submitted in advance of inviting bids for construction, reconstruction, or renovation.

(20 U.S.C. 1132b-1 (a) and (b), 1132d-11)

(b) With respect to an application filed for reconstruction or renovation under Title VII E of the Act, the applicant first submits the application to the State Higher Education Facilities Commission. The Commission will review and evaluate the application and provide comments regarding—

(1) Space utilization,

(2) Enrollment data, and

(3) Over-all need for the project

(c) Following its review, the State Commission will furnish its evaluation to the aapplicant. If the applicant does not agree with the evaluation, the Commission must afford the applicant the opportunity to submit a rebuttal statement to accompany the application. The Commission will submit the applications through the appropriate Regional Office of the Department of Health, Education, and Welfare together with all required State agency comments

(d) If the Higher Education Facilities Commission is not the agency serving as the State Postsecondary Education Commission authorized under Section 1202(a) of the Act, the latter must also be afforded the opportunity to review and evaluate any application filed under Title VII C of the Act.

(20 U.S.C. 1132b, 1132d-11)

§ 170.43 Facilities panel.

The Commissioner may not approve any application for a grant under this title, except for Title VII E purposes, until he obtains the advice and recommendations of a panel of specialists who are not employees of the Federal Government and who are competent to evaluate such applications. The panel of specialists reviews all applications in the light of the criteria set forth in § 170.44 and makes recommendations to the Commissioner for the approval or disapproval, in whole or in part, of each application.

(20 U.S.C. 1132b-1(b))

§ 170.44 Criteria for evaluating applications.

Except as provided for in § 170.45, the determination of relative priorities for recommending grants from available funds must take into consideration at least the following factors:

(a) The extent to which the programs to be assisted by the proposed construction, reconstruction, or renovation will contribute toward the establishment or development of a graduate school or cooperative graduate center of excellence, or the extent to which the program or programs will contribute toward the improvement of an existing graduate school or cooperative graduate center.

(b) The extent to which the proposed construction, reconstruction, or renovation will increase the capacity of the institution to supply highly qualified personnel critically needed by the community, industry, government, research, and teaching.

(c) The extent to which the proposed construction, reconstruction, or renovation will assist in attaining a wider distribution throughout the United States of graduate schools and cooperative graduate centers.

(d) The capability of the applicant to give full financial support to its program generally, and specifically to the programs of graduate education to be as-

sisted by the proposed construction, reconstruction, or renovation.

(e) The extent to which the program or programs to be assisted by the proposed construction, reconstruction, or renovation are likely to draw to the institution both graduate students and faculty of a high level of competence.

(f) The adequacy of applicant's existing academic facilities with respect to the present demands made on them and the demands that can reasonably be expected to be made on them in the foreseeable future, with particular reference to the adequacy of those facilities, if any, available for the conduct of the program or programs to be assisted by the proposed construction, reconstruction, or renovation.

(g) The extent to which the proposed construction, reconstruction, or renovation would contribute significantly to the increase in both or either the quantity or quality of graduate education in a relatively wide geographical area.

(20 U.S.C. 1132b(a))

§ 170.45 Priorities for approval of grants for reconstruction and renovation authorized under Part E of the Act.

With respect to applications filed for reconstruction or renovation projects under Title VII E of the Act, priority consideration may be given to the degree of efficiency with which the institution is utilizing its present facilities.

(20 U.S.C. 1132d-11)

Subpart D—Loans for Construction, Reconstruction, or Renovation of Academic Facilities

§ 170.51 Eligibility for loans.

Loans, not to exceed $5 million per campus per Federal fiscal year, may be made for construction, reconstruction, or renovation of academic facilities for institutions of higher education or for cooperative graduate centers.

(20 U.S.C. 1132c(a)(2))

§ 170.52 Submission of applications.

(a) Each institution, cooperative graduate center board or higher education building agency desiring a loan for the construction, reconstruction, or renovation of academic facilities submits an application for the assistance, in the manner and containing the information specified by the Commissioner. Applications must be submitted in advance of inviting bids for construction, reconstruction, or renovation.

(20 U.S.C. 1132c)

(b) The applicant must send a copy of each application to the State Higher Education Facilities Commission. The Commission will review and evaluate the application and provide comments regarding—

(1) Space utilization,

(2) Enrollment data, and

(3) Over-all need for the facility or reconstruction or renovation of a facility for which assistance is requested.

(c) Following its review, the State Commission will furnish its evaluation to the applicant. If the applicant does not agree with the evaluation, the Commission must afford the applicant the opportunity to submit a rebuttal statement to accompany the application. The Commission will submit the applications through the appropriate Regional Office of the Department of Health, Education, and Welfare together with all required State agency comments.

(d) If the Higher Education Facilities Commission is not the agency serving as the State Postsecondary Education Commission authorized under Section 1202(a) of the Act, the latter must also be afforded the opportunity to review and evaluate any application filed under Title VII C of the Act.

(20 U.S.C. 1132c-3(b)(1), 1142a)

§ 170.53 Special terms and conditions.

Before approving a loan the Commissioner requires:

(a) Satisfactory evidence that the applicant has or will have a fee simple or such other estate or interest in the facilities and site, access thereto, sufficient in the opinion of the Commissioner to assure undisturbed use and possession for the purpose of the construction, reconstruction, or renovation and operation of the facilities for not less than 50 years from the date of application.

(b) Satisfactory evidence of the ability of the applicant to comply with the appropriate terms and conditions for repayment of the loan.

(c) Satisfactory evidence that the applicant has the necessary legal authority to finance, construct, reconstruct, or renovate, and maintain the proposed facilities, to apply for and receive the proposed loan, and to pledge or mortgage any assets or revenues to be given as security for the proposed loan.

(d) Satisfactory assurances that the project is related to a plan for development of the institution, branch campus, or cooperative graduate center for which it will be constructed, reconstructed, or renovated, and is associated with either a planned increase in student enrollment or a planned improvement in the instructional programs offered by the institution, branch campus, or cooperative graduate center. The assurances specified in this paragraph will not be required with respect to reconstruction and renovation projects authorized under Title VII E of the Act.

(e) Satisfactory assurance that the applicant will not, without the consent of the Commissioner, mortgage to others the facility constructed, reconstructed, or renovated with the assistance of the loan during the life of the loan. Consent is not required to mortgage facilities reconstructed or renovated under Title VII E unless a mortgage on the facilities was taken by the Commissioner as security for a loan made under Title VII.

(20 U.S.C. 1132c-2(b)(1))

(f) Satisfactory assurance that not less than 20 percent of the development cost of the facility will be financed from non-Federal sources except that in the instance of an institution qualifying as a developing institution pursuant to Title III of the Act, the applicant is not required to provide this assurance.

(20 U.S.C. 1055(b)(1); 1132c-1(a))

§ 170.54 Determination of nonavailability of equally as favorable terms and conditions.

No loan will be made unless the Commissioner finds that the applicant is unable to secure the loan from other sources upon terms and conditions equally as favorable as the terms and conditions applicable to loans under this part. For the purpose of making this determination, the applicant must be required to comply with any procedures the Commissioner may establish, including, where deemed necessary, public advertising for bids from other sources.

(20 U.S.C. 1132c-1(a)(2))

§ 170.55 Forms of evidence of indebtedness.

The evidence of indebtedness will be in such form as may be prescribed by the Commissioner.

(20 U.S.C. 1132c-1(b))

§ 170.56 Security for loans.

All loans must be secured in a manner which the Commissioner finds sufficient to reasonably assure repayment. The security may be one or a combination of the following:

(a) A first mortgage on the facilities and site thereof.

(b) Negotiable stocks or bonds of a quality and value acceptable to the Commissioner.

(c) A pledge of unrestricted and unencumbered income from an endowment or other trust funds acceptable to the Commissioner.

(d) A pledge of a specified portion of annual general or special revenues of the institution, accepatable to the Commissioner.

(e) General obligations of a State or local public body.

(f) Other types of security as the Commissioner may find acceptable in specific instances.

(g) Notwithstanding the provisions of paragraphs (a) through (f) the Commissioner may make unsecured loans on any reconstruction or renovation project authorized under Title VII E if the term of such loan is seven years or less.

(20 U.S.C. 1132c-1(b).)

§ 170.57 Length and maturity of loans.

(a) The maximum repayment period for loans—

(1) Under Title VII C of the Act will be 30 years, except where the Commissioner finds that a longer repayment period is required; and

(20 U.S.C. 1132c-1(b).)

(2) Under Title VII E will be 20 years.

(20 U.S.C. 1132d-11.)

(b) Repayment of the loan will be made by substantially level total annual installments of principal and interest unless otherwise authorized by the Commissioner.

(c) Loans which do not mature serially may be considered by the Commissioner if that type of loan is necessary to be compatible with an applicant's total financial planning.

(d) In no case may a loan repayment period exceed the estimated useful life of the facilities to be constructed, reconstructed, or renovated with the assistance of the loan.

(20 U.S.C. 1132c-1(b).)

§ 170.58 Bond Counsel opinion.

(a) At appropriat stages in the loan application and development procedure, a legal memorandum or opinion of bond counsel will be required with respect to the legality of the proposed bond or note issue, the legal authority to offer the issue and secure it by the proposed collateral, and the legality of the issue upon delivery. "Bond Counsel" means either a law firm or individual lawyer, thoroughly experienced in the financing of construction, reconstruction, or renovation projects by the issuance of bonds, and whose approving opinions have previously been accepted by purchasers of bonds offered at public sales. In addition, where the borrower is a public institution or agency, the proposed bond counsel must be a recognized bond counsel in the municipal field. The legal memorandum or opinion to be provided by such an acceptable bond counsel in each case generally shall be as follows:

(1) A memorandum by bond counsel, submitted with the loan application, stating that there is or will be authority to finance, construct, maintain the project, and to issue the proposed obligations and to pledge or mortgage the assets and/or revenues offered to secure the loan, citing the basis for such authority.

(2) A preliminary approving opinion of bond counsel, submitted at the time the applicant proposes to advertise for construction, reconstruction, or renovation bids for the project, to the effect that when the bonds or notes described in the loan agreement are sold and delivered they will comply with the applicable provisions of the loan agreement and will be valid and binding obligations of the issuer and will be payable in accordance with their terms.

(3) A final approving opinion of bond counsel, delivered at the same time as the delivery of the bonds or notes, stating that the bonds or notes (i) are those described in the loan agreement and the authorizing proceedings, (ii) have been duly authorized, sold, and delivered to the Commissioner, and (iii) constitute the valid and binding obligations of the issuer payable in accordance with their terms.

(b) The Commissioner may accept the opinion of legal counsel, other than a bond counsel as defined above, after considering such factors as the amount, term, and security for the loan, and the legal or financial complexity of the transaction. For purposes of this section "legal conusel" means a law firm or individual lawyer having experience in the financing of construction, reconstruction, reconstruction, or renovation projects and whose opinions with regard to such financings have been previously accepted by responsible lenders or lending institutions.

(20 U.S.C. 1132c-2(b)(6).)

§ 170.59 Determination of priorities for loan approvals.

(a) Loan applications will be processed in such order and according to the standards and methods as the Commissioner may determine. The standards and methods will be developed as may be necessary and appropriate to encourage distribution of the available loan funds in accordance with actual needs and may include establishment of closing dates for consideration of applications and for determination of priorities.

(b) Some priority consideration may be given to—

(1) Applications from developing institutions (as defined in § 170.1, and

(2) The degree of efficiency with which the institution is utilizing its present facilities.

(c) No loan application for reconstruction or renovation projects authorized under Title VII E of the Act will be approved unless it meets the conditions specified in paragraphs (a) and (c) of § 170.8.

(20 U.S.C. 1132c-2(b).)

§ 170.60 Loan agreement.

For project applications which meet all requirements of the Act and of the regulations governing the administration of the Act, and upon approval by the Commissioner together with a reservation of Federal funds, a loan offer will be prepared by the Commissioner and sent to the applicant. The loan offer sets forth the pertinent terms and conditions for the loan, and is conditioned upon the fulfillment of these terms and conditions. The accepted loan offer will constitute the loan agreement between the Commissioner and the applicant for the partial financing of the construction, reconstruction, or renovation of the approved project.

(20 U.S.C. 1132c-2(b).)

§ 170.61 Loan closing.

Loan closing occurs at the time determined by the Commissioner.

(20 U.S.C. 1132c-2(b).)

§ 170.62 Interim financing.

If necessary, the applicant must arrange for interim financing, subject to the approval of the Commissioner, to cover the cost of construction, reconstruction, or renovation pending the loan closing. Where the Commissioner finds that an applicant is unable to secure necessary interim financing on reasonable terms, he may provide for advances against the approved loan.

(20 U.S.C. 1132c-2(b).)

§ 170.63 Construction fund.

The proceeds of the sale of the bonds or notes, any interim advances against the approved loans, and all other moneys to be used in paying for the construction, reconstruction, or renovation, of which the project is a part, must be deposited into a separate bank account to be maintained in a bank of the applicant's choice and to be known as the Construction Fund. All expenditures for the construction, reconstruction, or renovation must be made from this fund. Accounting for this fund shall be in accordance with generally accepted accounting principles. When necessary and appropriate, the Commissioner may approve other arrangements for the deposit of construction funds and the construction fund accounting, provided such arrangements provide adequate accountability for the total construction, reconstruction, or renovation receipts and expenditures.

(20 U.S.C. 1132c-2(b).)

§ 170.64 Investment of idle construction funds.

Where the moneys on deposit in the construction fund exceed the estimated disbursements for the project for the next 90 days, the borrower should if permitted by State or local law, direct the depository bank to invest such excess funds in direct obligations of the U.S. Government or obligations the principal of or interest on which is guaranteed by the U.S. Government, which will mature not later than eighteen (18) months from the date of such investment.

(20 U.S.C. 1132c-2(b).)

§ 170.65 Disposal of balance remaining in the construction fund.

The balance of moneys remaining in the construction fund at the completion of construction, reconstruction, or renovation must be disposed of in accordance with the provisions of the loan agreement.

(20 U.S.C. 1132c-2(b).)

§ 170.66 Moratoria on principal or interest loan payments.

A moratorium on the repayment of principal and interest installments due on the loan may be approved by the Commissioner if the borrower—

(a) Can demonstrate a temporary inability to make such payment without undue financial hardship, and

(b) Furnishes a specific plan for repayment of the amounts in arrears in a schedule acceptable to the Commissioner. Where it can be clearly demonstrated that a specific repayment schedule cannot be reasonably projected due to circumstances beyond the borrower's control, the Commissioner may grant a moratorium on the condition that a schedule will be developed for consider-

ation at a future date designated by the Commissioner.

(20 U.S.C. 1132c-2(b)(5)(A).)

§ 170.67 Repayment of loans at seventy five percent of face value.

In lieu of the full payment of any loan approved before January 1, 1976, the Commissioner may accept from the borrower an amount equal to 75 percent of the outstanding principal balance plus interest due to the date of payment. Payment is acceptable only if made in the form of a single remittance and received before October 1, 1979.

(20 U.S.C. 1132c-2(b)(5)(B).)

Subpart E—Annual Interest Grants for Construction, Reconstruction, or Renovation of Academic Facilities

§ 170.71 Eligibility for annual interest grants.

(a) Annual interest grants may be made to institutions of higher education, higher education building agencies, and cooperative graduate center boards, to reduce the cost to them of borrowing funds, other than those available under this part, for the construction, reconstruction, or renovation of academic facilities.

(20 U.S.C. 1132c-4.)

(b) No annual interest grant will be made unless the Commissioner finds that the applicant is unable to secure a loan in the amount with respect to which the annual interest grant is to be made, from other sources upon terms and conditions equally as favorable as the terms and conditions applicable to direct Federal loans under Subpart D of this part. For the purpose of making such determination, the applicant must comply with the procedures as the Commissioner may establish, including public advertising for bids from other sources.

(20 U.S.C. 1132c-4(e)(2).)

(c) Annual interest grants may not be made with respect to loans consummated prior to the filing of an application under this subpart or Subpart D of this part.

(20 U.S.C. 1132c-4(3)(2).)

(d) Annual interest grants may not be made with respect to loans (or portions thereof) which cover a construction, reconstruction, or renovation activity that was begun more than 12 months before the closing date for which consideration is being requested.

(20 U.S.C. 1132c-4(b).)

§ 170.72 Amount of annual interest grants.

Except where limitation of general applicability is promulgated, each grant will be in an amount approximately equal to but not more than the difference between (a) the average annual debt service which is required to be paid, during the life of the loan, on the amount borrowed from private sources for the construction of an academic facility covered by the application, and (b) the average annual debt services which the institution would have been required to pay, during the life of the loan, with respect to such amount if the applicable interest rate were 3 percent per annum. The amount of the annual interest grant stipulated in the agreement may be amended by the Commissioner to reflect changes in the amount or terms of the loan. An increase in the annual grant amount resulting from a request to increase the amount of loan to be subsidized must be made not later than 12 months after construction, reconstruction, or renovation has started, through the submission of an amended application and is subject to priority considerations applicable at the time the supplemental request is filed. A request for an increase in the annual grant amount resulting from a change in the rate of interest of the term at the time of actual consummation of the loan will be considered apart from the priority ranking system.

(20 U.S.C. 1132c-4(b).)

§ 170.73 Submission of applications.

An applicant desiring to receive annual interest grants must submit an application for such grant assistance, in the manner and containing the information specified by the Commissioner. A copy of each application will be furnished to the State Commission prior to filing with the Regional Office. The Commission will review and evaluate the application and provide comments regarding (a) space utilization, (b) enrollment projections, and (c) over-all need for the facility for which assistance is requested. Following its review, the State Commission will furnish its evaluation to the applicant. If the applicant does not agree with the evaluation, the applicant may include, with the application, a statement supporting its counter position. Applications then will be submitted to the appropriate Regional Office of the Department of Health, Education, and Welfare together with all required State agency comments. Applications must be submitted in advance of inviting bids for construction, reconstruction, or renovation.

(20 U.S.C. 1132c-4.)

§ 170.74 Condition for approval of annual interest grants.

An application for annual interest grants will be approved only if the Commissioner is satisfied that:

(a) The facilities to be constructed, reconstructed, or renovated are urgently needed to accommodate more students or to replace inadequate facilities in order to prevent a decrease in student enrollment capacity;

(b) Funds will be available as required to pay the total development cost of the facilities;

(c) The applicant has or will have a fee simple or such other estate or interest in the facilities and site, including access thereto, sufficient in the opinion of the Commissioner to assure undisturbed use and possession for the purpose of the construction, reconstruction, or renovation and operation of the facilities for not less than 50 years from the date of application;

(d) The applicant has the necessary legal authority to finance, construct, reconstruct, or renovate, and maintain the proposed facilities, to apply for and receive the proposed loan and annual interest grants, and to pledge or mortgage any assets or revenues to be given as security for the proposed loan; and

(e) The applicant's financing plan meets the conditions of § 170.76 and is otherwise practicable and feasible.

(20 U.S.C. 1132c-4.)

§ 170.75 Limits governing extent of Federal assistance.

The principal amount of loan (or portion thereof) on which an annual interest grant is approved, together with the amount of any other Federal financial assistance the applicant has obtained or is assured of obtaining under any other Federal program, may not exceed 90 percent of the eligible development cost. Further, the aggregate principal amount of loans (or portions thereof) with respect to which annual interest grants are approved during any Federal fiscal year may not exceed $5 million per campus.

(20 U.S.C. 1132c-4.)

§ 170.76 Approval of financing plans.

(a) Except as provided in paragraph (b) of this section, in order to be acceptable a financing plan submitted pursuant to § 170.73 must:

(1) Provide that the term of the loan with respect to which an annual interest grant is to be paid does not exceed 30 years or the useful life of the facilities with respect to which the annual interest grant is to be made, whichever is the lesser;

(2) Provide that such loan is to be repaid in substantially level annual installments of interest and principal over the term of the loan, except that interest only may be paid for an initial period not exceeding 5 years; and

(3) Contain such other terms and conditions as will assure the Commissioner that the support provided by the Government over the term of the loan is no more than is necessary to effectuate the purposes of this subpart.

(b) Financing plans may also be acceptable where the term of the loan is longer than 30 years or the annual installments of interest and principal are not substantially level, if the Commissioner finds that unusual circumstances warrant such exception. In no event may the term of the loan exceed 40 years.

(20 U.S.C. 1132c-4.)

§ 170.77 Evidence of lowest possible cost of loan.

An applicant must demonstrate to the satisfaction of the Commissioner that the loan it proposes to obtain is at the lowest possible net interest cost. In the case of an applicant proposing to issue tax-exempt bonds to finance the construction, reconstruction, or renovation of academic facilities, a sale pursuant to public advertising or bids for the securities in an advertising medium acceptable to the Commissioner will be deemed to meet this requirement. Prior to advertising bonds for sale, the applicant must submit to the Commissioner for approval a draft of the proposed notice of sale and a statement of essential facts concerning the sale. An applicant not issuing tax-exempt securities will be expected to submit offers from at least three (3) lending institutions normally engaged in making long term construction, reconstruction, or renovation loans. The applicant must have furnished each such institution with the information necessary to enable it to specify in its offer the amount, interest rate, maturity period, security and prepayment provisions of the loan. A loan offer must be approved by the Commissioner before the applicant enters into a firm and binding agreement with a lender.

(20 U.S.C. 1132c-4)

§ 170.78 Annual interest grant agreement.

Upon approval of an application for annual interest grants, the Commissioner prepares and sends to the applicant a proposed agreement, which contains the terms and conditions relating to the receipt of an annual interest grant including a description of the project and the facilities, the maximum principal amount of the loan (or portion thereof) on account of which annual interest grants payments will be made, the maximum annual grant amount and the anticipated terms of the annual interest grant payments. The proposed agreement must also provide that where a loan is not consummated prior to execution of such agreement by the Commissioner, no grant will be made thereunder unless the Commissioner concurs in the rate of interest and other terms and conditions of the loan. The agreement once executed by the applicant and the Commissioner creates a contractual obligation on the part of the Commissioner to make annual interest grants in future years in accordance with the terms and conditions of the agreement for so long as the applicant carries out its obligations under the agreement. The agreement for annual interest grants is not entered into for the benefit of, nor to induce the making of loans by or the sale of bonds to, third parties and the Commissioner will not entertain grievances or claims of such third parties.

(20 U.S.C. 1132c-4)

§ 170.79 Payment of annual interest grants.

Payments under an annual interest grant agreement will be made by the Government once a year. The date of such payment will coincide as closely as possible with the anniversary date of the loan or, a date during the year when debt service requirement related to the loan is greatest. Once established, the payment date will remain fixed for the duration of the loan. The first payment accrues from a date not earlier than the date of initial use of the project to the date established for the annual payment. The last payment accrues from the effective date of the next-to-last payment to the date the loan is completely repaid. Payment of annual interest grants will be made directly to the grantee or to a trustee, paying agent, or lender pursuant to an assignment of such payments by the grantee.

(20 U.S.C. 1132c-4)

§ 170.80 Reduction of grant where refinancing produces lower costs.

Where the Commissioner finds that the applicant could have accelerated repayment of the loan outstanding and obtained a new loan where to do so would have resulted in a net savings in the cost of the loan, the amount of annual interest grants must be computed as if such refinancing had been undertaken.

(20 U.S.C. 1132c-4)

§ 170.81 Priority considerations: closing dates.

The Commissioner gives priority first to applications from public community colleges and public technical institutes, developing institutions (as defined in § 170.1) and to institutions enrolling 20 percent or more students from low-income families. All applications from other institutions of higher education are considered next. Within the two priority categories, applications are processed in a manner appropriate to encourage distribution of the available funds to those institutions or branch campuses that are (a) in urgent need of additional academic facilities to meet increasing enrollments or to prevent a decrease in enrollment due to inadequate facilities or (b) committed to the enrollment of substantial numbers of veterans. Closing dates by which applications must be filed in order to be considered for funds allocated for such closing date shall be on September 1 and February 1 in each fiscal year in which funds are available unless otherwise announced by the Commissioner. Applications filed by September 1 will be considered as filed for the February 1 closing date. Available funds will be divided equally among closing dates.

(20 U.S.C. 1132c-4)

§ 170.82 Preceding provisions not exhaustive of authority of Government.

The provisions of this subpart are not exhaustive of the authority of the Government to impose, at any time it may deem appropriate, further limitations respecting the amount of the annual interest grant or the amount on which such grant is based.

(20 U.S.C. 1132c-4)

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 13]

[Docket No. 20817; FCC 77-528]

RADIO OPERATOR LICENSING PROGRAM

Delineation of Operator Responsibility

AGENCY: Federal Communications Commission.

ACTION: Proposed rulemaking

SUMMARY: This is a proposed rulemaking to restructure the radio operator examination and licensing program and to delineate operator responsibility. This action is being taken because a need exists to specifically define the responsibilities of radio operators.

DATES: Comments must be received on or before October 3, 1977, and Reply comments on or before October 31, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Vernon P. Wilson, Field Operations Bureau, 202-632-7240.

SUPPLEMENTARY INFORMATION

Adopted: July 12, 1977.

Released: August 4, 1977.

In the matter of an inquiry relating to the Commission's radio Operator Licensing Program (See 41 FR page 38210).

By the Commission: Commissioner Washburn dissenting and issuing a statement.

1. The Commission has before it for consideration the Notice of Inquiry entitled "An Inquiry relating to the Commission's radio operator licensing program", released on June 7, 1976. (41 FR 22981) More than 500 parties filed both formal and informal comments and one reply comment was submitted.

2. The Notice of Inquiry solicited comments on the following questions:

(a) Should the service or maintenance operator requirements in the various radio services be retained?

(b) If the service operator requirements are retained, to what degree should the operator be held responsible for the technical performance of the transmitting equipment which he installs, services, and maintains?

(c) Should operators holding a Restricted Radiotelephone Operator Permit (or non-licensed persons if Section 318 of the Communications Act is revised at a later date) be permitted to perform routine operating duties at the various classes of Broadcast stations?

(d) Are the Commission's current radio operator examinations producing technically qualified operators?

(e) Should an operator be required to obtain practical experience under a "be-

ginner" class of license prior to the issuance of a "regular" license?

(f) Should the Commissioner consider issuing a basic operator/technician license with optional specialized endorsements?

(g) Should operator licenses be issued for the lifetime of the holder or if periodic renewal is continued to be required, should the applicant be required to demonstrate a minimum period of service or be required to take a renewal examination?

3. The great majority of comments received concerning the retention or elimination of the requirement that an FCC licensed operator be employed for installing, servicing, and maintaining transmitting equipment favored the retention of the requirement. The comments were addressed to two categories of maintenance—broadcast stations and non-broadcast stations. In the broadcast category, technically oriented persons strongly favored retention of the license requirement and station management was evenly divided.

4. The National Association of Broadcasters (NAB) in its comments, which were endorsed by the licensees of 51 radio and television stations represented by their attorneys, McKenna, Wilkinson, and Kittner (McKenna), favored the retention of the Radiotelephone First Class operator for maintenance and inspection purposes.

5. Typical of other comments in favor of retaining the First Class operator requirement was that of Morris H. Blum, President of Annapolis Broadcasting Corporation (WANN), an owner/licensee of 31 years, who said, "While it can be argued that a licensee can, without undue trouble, find technically proficient unlicensed persons to maintain the station's technical equipment and consequently, the Commission's operational requirements under its rules, we would prefer to employ a full time licensed service operator who has, at the very least, demonstrated some degree of technical knowledge and ability by passing a required examination."

6. Numerous comments in favor of deleting the First Class Operator requirement were received from broadcast station owners and managers. They contend that a person who holds a First Class Operator license has not necessarily proved that he possesses any practical technical expertise; whereas many technically competent persons do not hold FCC operator licenses. They feel that since the Commission holds the station licensee responsible for the proper operation of the station, he should be free to employ any person he believes to be technically competent to meet the needs of his particular station.

7. Comments concerning the retention or elimination of the requirement that an FCC licensed operator be required for the installation, maintenance, and servicing of other than broadcast transmitters were overwhelmingly in favor of retaining the requirement. Comments submitted by the Office of Electronic Communications of the State of Minnesota Department of Highways reflect the views of many others. It stated "Whereas the state-of-the-art in the electronic industry is becoming more sophisticated in general, specific radio systems are tending to become more complex. Digital control devices, computer-assisted dispatch, microwave control links and complex repeater systems all mandate a high level of technical expertise necessary for the service technician. Examination and licensing has historically been, and should continue to be, the initial requirement for employment in the field."

8. Those who opposed the retention of the operator license requirement in the non-broadcast services (as in the case of those who opposed the retention of the license requirement for broadcast station maintenance) believe generally that license holding does not necessarily prove technical competence on the part of the operator or technician and therefore serves no useful purpose.

9. The Commission is of the opinion that installation, maintenance, and servicing of present-day complex radio transmitting systems requires a high degree of technical competence and believes this can best be assured by retaining the operator licensing requirements in both the broadcast and non-broadcast areas. However, the Commission is proposing to restructure operator examinations and to issue several new classes of licenses to reflect a degree of specialization, which will be discussed later in this notice.

10. The Notice of Inquiry requested comments concerning the degree to which a licensed technician should be held responsible for the technical performance of transmitting equipment which he installs, maintains, or services. A large majority of comments stated that the station licensee should be solely responsible for the technical performance of the station; a few would place the responsibility on the technician; and a substantial number advocated shared responsibility.

11. The Commission has always contended that the station licensee was ultimately responsible for the proper operation of the station and is not persuaded by the received comments to alter this position. However, as many station licensees do not possess the necessary expertise to assure the proper technical operation of the station, they must depend upon a licensed technician to perform this function. Although the operator licensing program cannot, nor is it intended to, assure the complete competence of station technical employees, licensing does connote a degree of responsibility for actions taken under the authority of the license held. Because of this special relationship between the station licensees and the technicians they must depend upon for compliance with the Commission's technical rules, it is believed that the technician should be held accountable for his actions, or lack of them, and it is proposed to amend Sections 13.63 and 13.75, as shown in the Appendix, to implement this concept.

12. Under the proposed amendments, the technician who installs, maintains, or services a transmitter would be required to certify that the equipment is operating in accordance with the Commission's Rules and terms of the station authorization at the conclusion of the work. If the station is in non-compliance, he must state the reason and must also immediately notify the licensee in writing of the non-compliance. Some of the comments received recommended that in cases of non-compliance the technician be required to notify the Commission as well as the licensee while others thought this procedure would result in "professional suicide," destroy the employer-employee relationship, and result in a rash of false alarms. It is, therefore, believed that to require licensed technicians to notify the Commission of uncorrected violations would not be practical, nor would it accomplish its intended objective. It is believed that proposed amendments, without FCC notification, would accomplish the desired result—prompt correction of technical problems. Further proposed amendments to Section 13.63 would prohibit on the air testing of an unlicensed station, or one not in compliance with the terms of its authorization, and prohibit the modification of equipment which would void its Commission type-acceptance or type-approval or enable its use in a service where such equipment is prohibited.

13. If licensed technicians are to be held accountable for their actions, the Commission must have a means of dealing with irresponsible ones. As was pointed out in the Notice of Inquiry, the Commission does have the authority to suspend licenses and can assess forfeitures in certain limited cases. However, it is believed that in many cases the ability to assess a forfeiture for a broad range of operator violations would be more meaningful than the more drastic sanction of license suspension. Legislation to expand the forfeiture authority as it relates to radio operators and others is pending and the Commission will continue to actively pursue this additional administrative sanction.

14. Numerous responses to the question of whether the Commission should permit the *routine* operation of the various classes of Broadcast stations by non-licensed persons (or the holders of Restricted Radiotelephone Operator Permits) pending possible revision of Section 318 of the Communications Act[1] were received. Station licensees and managers strongly favored elimination of the licensed operator requirement, contending that it served no useful purpose and in many cases created a hardship for stations located at some distance from Commission examining points. They pointed out that modern transmitting systems are highly stable and require little attention during normal operation. They further pointed out that, as the Commission has always held the broadcast station licensee primarily responsible for the operation of the station, they should be permitted to employ and train non-licensed persons and be responsible for their performance.

15. Holders of First, Second, and Third Class Radiotelephone Operator Licenses favored the licensed operator requirement. They believe the examination does serve a useful purpose in that it reflects the individual's understanding of the Commission's Rules and the basic operational requirements of a Broadcast station. They further believe that having to earn a license by examination creates a "sense of responsibility" in the holder.

16. After careful review of all the comments, the Commission is of the opinion that no useful purpose would be served by continuing to require that the routine operator of a broadcast station hold at least a Radiotelephone Third Class Operator Permit endorsed for Broadcast operation. For more than ten years, holders of the Provisional Radio Operator Certificate for the Radiotelephone Third Class Operator Permit endorsed for broadcast station operation, which may be obtained without examination[2], have been permitted to perform routine operating duties. There is no evidence before the Commission at this time to indicate that the performance of those individuals has been less satisfactory than that of operators who qualified for the Radiotelephone Third Class Operator Permit with broadcast Endorsement by examination. It is therefore proposed to authorize the routine operation of AM and FM broadcast stations, where permitted by the Rules, by persons holding a Restricted Radiotelephone Operator Permit[3] in lieu of the presently required Radiotelephone Third Class Operator Permit endorsed for Broadcast operation. In proposing this amendment, the comment made by many station licensees that the proper training of their operating staffs, and the ultimate responsibility for compliance with the Commission's regulations, rests with the station licensees, is recognized and reinforced.

17. It is evident from comments received that the radio operator license examinations need improvement. While it is believed that the technical portions of the examinations do test the applicant's basic knowledge of electronics, there is no doubt, that they are in need of updating and, in some cases, expansion. Some of the examinations have been in use for several years and evidence indicates that many have been compromised. Obviously the only way to restore the integrity and assure the timeliness of the examinations is to develop a completely new series of updated examinations and to change them at frequent intervals to prevent compromise. It is proposed to increase efforts in this direction.

18. If the licensing of operators and technicians were to be continued, the Notice of Inquiry requested comments on what changes or improvements should be made in the examination and licensing programs. A majority of comments supported an apprenticeship program under which a newly licensed operator or technician would be required to complete a period of on-the-job experience before being granted a regular or "journeyman" license. Others warned that such a program might place an unmanageable administrative burden on the Commission and place it in the position of aiding union and closed shop interests in an industry which it regulates. They feared that established interests could control entry into the competition within the field. They further suggested that any program of apprenticeship or certification of operators or technicians should be handled by employers or operator/technician organizations and not by the government.

19. A well-qualified operator could be defined as one who has demonstrated his theoretical knowledge by passing the required examination and his practical skill by obtaining experience while employed under that license. The Commission has traditionally performed the first function by administering the examinations but has left the determination of practical skills up to the individual employer. This method seems to have served its intended purpose fairly well. In recent months at least one major group of interested radio operators (Society of Broadcast Engineers) has initiated a "certification program" which, if successful, may become widespread in the industry and serve to provide additional information on the experience of operators to potential employers. The Commission is therefore, reluctant to initiate a broad new government program of licensing based on a demonstration of practical skill or experience at this time.

20. Responses to the question "should operator and technician licenses be issued for the lifetime of the holder?" strongly rejected such a proposal and many favored requiring an applicant for renewal to demonstrate some amount of satisfactory service obtained during the license term or in lieu of service to pass a renewal examination. The Commission recognizes the merit of requiring a showing of service or a renewal examination but believes that the adoption of such a proposal "across the board" would present serious, if not impossible, administrative problems and resource requirements. Staff members who were involved with license renewals prior to the waiving of the previous renewal service requirement in 1951 told of the difficulties encountered in equitably evaluating "satisfactory" service. For example, applicants were sometimes given unsatisfactory ratings by employers for reasons other than their technical abilities and in the case of the independent service technician, "self-certification" became suspect.

21. Another problem which might arise concerns the evaluation of service obtained under the license. For example, a Radiotelephone First Class Operator License authorizes among other things, the holder to maintain a television transmitter. If he were to submit a renewal application with a record of service showing that he had spent the last five years installing and maintaining marine radiotelephone equipment, which his license also authorized him to do, what assurance would there be that the applicant was still qualified to maintain a television transmitter? Conversely, what indication would there be that a licensee who spent five years maintaining a television transmitter had any expertise in the marine service?

This problem could possibly be overcome by requiring a separate license for each specialty such as mobile radio, AM Broadcasting, FM Broadcasting, Television Broadcasting, etc. instead of the present system of each license encompassing the authority of all lower grade licenses in the series. The advantage of this alternative licensing structure would be that an applicant would be required to pass an examination only in his field of interest and at renewal time it would be a relatively simple matter to evaluate his service under that license. The disadvantages would be that persons interested in several fields would be required to hold multiple licenses and the Commission's administrative work-load would be increased. Although it is not proposed to initiate such a licensing structure at this time, comments on its feasibility and desirability would be welcomed.

[1] Section 318, in pertinent part, states "The actual operation of all transmitting apparatus for which a station license is required by this Act shall be carried on only by a person holding an operator's license issued hereunder, and no person shall operate any such apparatus in such station except under and in accordance with an operator's license issued to him by the Commission: Provided, however, That the Commission if it shall find that the public interest, convenience, or necessity will be served thereby may waive or modify the foregoing provisions of this section for the operation of any station except * * * stations engaged in broadcasting * * *"

[2] To obtain the certificate, the applicant must submit a certification by the holder of a Radiotelephone First Class Operator License who is responsible for the technical maintenance of a radio broadcast station, that he has instructed the applicant in the operation of a broadcast station and believes him to be capable of performing the duties expected of a person holding a Radiotelephone Third Class Operator Permit with broadcast station operation endorsement. The certificate is valid for one year; is non-renewable; and may be issued to a person only once. During the term of the Provisional Certificate the holder is expected to qualify by examination for the Third Class Radiotelephone Operator Permit with Broadcast endorsement.

[3] No oral or written examination is required for this permit. In lieu thereof, applicants will be required to certify in writing to a declaration which states that the applicant has need for the requested permit; can receive and transmit spoken messages in English; can keep at least a rough written log in English or in some other language in general use that can be readily translated into English; is familiar with the provisions of treaties, laws, and rules and regulations governing the authority granted under the requested permit; and understands that it is his responsibility to keep currently familiar with all such provisions.

22. A required renewal examination for all applicants would be an equitable approach to the matter but would place an undue burden on our examination and licensing facilities and cause considerable inconvenience to applicants. It would, of course, assure that all licensees had, within five years, demonstrated their academic knowledge. However, this might not necessarily serve a useful purpose. Several comments received pointed out that an operator or technician who did not keep abreast of current operating practices and technology would soon find himself jobless and would probably not renew his license, anyway. It is, therefore, not proposed to require either a showing of satisfactory service or a routine renewal examination as a requirement for renewal of licenses.

23. It is proposed to continue to issue licenses for a five year term. At the very least, five year renewals purge the records of licensees who no longer need or want their licenses. More importantly, however, it enables the Commission to review the applicant's record to determine if he possesses the necessary qualifications to continue to be a licensee. There are, however, occasional instances where a licensee has demonstrated ignorance of the Commission's Rules or questionable technical ability. In such individual cases, it is believed that the licensing system would be strengthened by requiring those applicants to undergo a renewal examination and it is proposed to amend Section 13.28 of the Rules, as shown in the Appendix, to effect this.

24. The majority of comments received concerning the structure of the licensing system [4] favored a basic operator license which could be upgraded by the addition of specialized endorsements. A number of comments suggested that the licenses should be re-titled to distinguish between those authorizing only routine operation of transmitters and those authorizing technical duties. The suggestion to re-title the two classes of licenses has merit and it is proposed to adopt it. However, the Commission is not convinced that the issuance of a basic license with optional endorsements for additional authority would necessarily serve a useful purpose. Such a system would appear to be unduly complex and could result in a greater degree of specialization than is believed to be desirable or necessary. Instead, it is proposed to establish a dual series of licenses—one for technical duties and the other for routine operation.

[4] As was noted in the Notice of Inquiry, this proceeding is limited primarily to the Radiotelephone Class of license. Certain revisions to the licensing requirements for Radiotelegraph operators are necessitated by recent changes adopted by the International Telecommunications Union; however, these matters will be addressed in a separate action. At that time we will also address the question of the need to continue issuing the Aircraft Radiotelegraph Endorsements.

25. The technical series would consist of:

Radiotelephone Technician License
Radio Broadcast Technician License
Television Broadcast Technician License

The Radiotelephone Technician License could be considered the basic license; but rather than adding specialized endorsements, it is proposed to offer two additional classes of licenses—the Broadcast Technician License and the Television Broadcast Technician License. Applicants for the Broadcast Technician License would be required to first pass the examination for the Radiotelephone Technician License and applicants for the Television Broadcast Technician License would be required to first pass the Radiotelephone Technician and Broadcast Technician examinations. Credit would be given for any licenses held at the time of application. The Radiotelephone Technician License would replace the present Radiotelephone Second Class Operator License and would authorize the holder to operate, service, and maintain nonbroadcast radio transmitting equipment. It would be used mainly in the land-mobile and maritime services. The Radiotelephone Technician License would encompass all authority included in the Restricted Radiotelephone Operator Permit and the Limited Radiotelephone Operator Permit.[5] The Radio Broadcast Technician License would replace the present Radiotelephone First Class Operator License. It would authorize the operation of AM and FM broadcast stations and would encompass all the authority of the Radiotelephone Technician License. A new class of license to be known as

"Television Broadcast Technician License" is proposed. This license would authorize the holder to operate and maintain television broadcast transmitters and would encompass all authority contained in the Radio Broadcast Operator License.

26. The routine operator series of permits would consist of the following:

Limited Radiotelephone Operator Permit
Restricted Radiotelephone Operator Permit

No change is proposed in the present Restricted Radiotelephone Operator Permit (RP) and no change is proposed in the present Radiotelephone Third Class Operator Permit other than to re-title it "Limited Radiotelephone Operator Permit" and to combine the present examination elements 1 and 2 into a new element 1. No change is proposed in the Ship Radar Endorsement which may be placed on any of the three technician classes of licenses (as well as on the Radiotelegraph First and Second Class Operator Licenses).

27. The following chart shows the proposed license structure and compares it with the existing structure:

[5] See Paragraph 26.

Proposed	*Existing*
Television broadcast technician license.	Radiotelephone first class operator license.
Radio broadcast Technician license.	Do.
Radiotelephone technician license.	Radiotelephone second class operator license.
Limited radiotelephone operator permit.	Radiotelephone third class operator permit.
Deleted	Radiotelephone third class operator permit endorsed for broadcast station operation.
Do	Provision radio operator certificate for a radiotelephone third class operator permit endorsed for broadcast station operation.
Restricted radiotelephone operator permit.	Restricted radiotelephone operator permit.

28. In order to implement the new license structure certain changes in examination elements and examination requirements would be required and are shown in the Appendix under Sections 13.21 and 13.22. It is proposed, as previously stated, to combine the present examination elements 1 and 2 into a new element 1. Present element 3 would become new element 2; and present element 4 would become new element 3. A new element 4 for th Television Technician License would be developed.

29. If the proposed rules are adopted, the current license structure would be completely replaced by the new one five years from the effective date. Holders of current licenses could renew them as shown below:

Current	*Renewed*
Radiotelephone first class	Television broadcast technician.
Radiotelephone second class	Radiotelephone technician.
Radiotelephone third class endorsed for broadcast station operation	Limited radiotelephone operator permit.
Radiotelephone third class	Do.

30. Adoption of the proposed rules would result in conforming changes in other affected rules.

31. Accordingly, interested persons desiring to submit comments, proposals, and recommendatons pertaining to the above matters may do so on or before October 3, 1977. Replies to such comment, proposals, or recommendations may be submitted on or before October 31, 1977. All relevant and timely filed comments as well as other pertinent information made available to the Commission will be considered. Pursuant to Section 1.419 of the Commission's Rules, an original and 5 copies of all statements, briefs, or comments filed in response to this notice shall be furnished to the Commission. In an effort to obtain the widest possible response in this proceeding, informal comments (without extra copies) will be accepted. These informal comments should specifically reference this proceeding. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C. 20554.

32. Authority for this action is contained in Section 4(i) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i).

FEDERAL COMMUNICATIONS COMMISSION,[6]
VINCENT J. MULLINS,
Secretary.

Part 13 of this Chapter is amended to read as follows:

1. Section 13.2 is amended to read as follows:

§ 13.2 Classification of Commercial Operator Licenses and Endorsements.

(a) Radiotelegraph Licenses:
(1) Radiotelegraph First Class Operator License;
(2) Radiotelegraph Second Class Operator License;
(3) Radiotelegraph Third Class Operator Permit.
(b) Non-Radiotelegraph Licenses:
(1) Technician Series:
(i) Television Broadcast Technician License;
(ii) Radio Broadcast Technician License;
(iii) Radiotelephone Technician License.
(2) Routine Operator Series:
(i) Limited Radiotelephone Operator Permit;
(ii) Restricted Radiotelephone Operator Permit.
(c) Endorsements:
(1) Six months service endorsement—applicable only to Radiotelegraph First and Second Class Operator Licenses.
(2) Ship radar endorsement—applicable only to Radiotelegraph First and Second Class Licenses, Television Technician Licenses, Broadcast Technician Licenses, and Radiotelephone Technician Licenses.
(3) Aircraft radiotelegraph endorsement—applicable only to Radiotelegraph First and Second Class Licenses.
(4) Restrictive endorsement as specified in this part of the Rules.

2. Section 13.21, headnote and text, are amended to read as follows:

§ 13.21 Examinations.

(a) Written Examination Elements:
(1) Communications operation—Practical knowledge of radiotelephone operation and procedures, and general knowledge of the international regulations applying to radiotelephone communications and specifically of that part of the international regulations relating to the safety of life.
(2) Radiotelephone technician—Technical, legal, and other matters applicable to the installation, adjustment, operation, and maintenance of two-way communications stations.
(3) Radio Broadcast technician—Technical, legal, and other matters applicable to the installation, adjustment, operation, and maintenance of AM and FM broadcast stations.
(4) Television Broadcast technician—Technical, legal, and other matters applicable to the installation, adjustment, operation, and maintenance of TV broadcast stations.
(5) Radiotelegraph operating practice—Radio operating procedures and practices generally followed or required in communicating by means of radiotelegraph stations primarily other than in the maritime mobile services of public correspondence.
(6) Advanced radiotelegraph—Technical, legal and other matters applicable to the operation of all classes of radiotelegraph stations, including operating procedures and practices in the maritime mobile services of public correspondence, and associated matters such as radio navigational aids, message traffic routing and accounting, etc.
(7) Aircraft radiotelegraph—Basic theory and practice in the operation of radio communication and radio navigational systems in general uses on aircraft.
(8) Ship radar techniques—Specialized theory and practice applicable to the proper installation, servicing and maintenance of ship radar equipment in general use for marine navigational purposes.
(b) Code Examinations:
(1) Sixteen (16) code groups-per-minute;
(2) Twenty (20 plain language words-per-minute;
(3) Twenty (20) code groups-per-minute;
(4) Twenty-five (25) plain language words-per-minute.

3. Section 13.22 is amended to read as follows:

§ 13.22 Examination Requirements.

Applicants for original licenses must have the ability to transmit and receive spoken messages in English and will be required to pass examinations as follows:
(a) Radiotelegraph First Class Operator License:
(1) Transmitting and receiving code test of 20 words-per-minute plain language and 20 code groups-per-minute.
(2) Written examination elements 1, 5, and 6.
(b) Radiotelegraph Second Class Operator License:
(1) Transmitting and receiving code test of 20 words-per-minute plan language and 16 code groups-per-minute.
(2) Written examination elements 1, 5, and 6.
(c) Radiotelegraph Third Class Operator Permit:
(1) Transmitting and receiving code test of 20 words-per-minute plain language and 16 code groups-per-minute.
(2) Written elements 1 and 5.
(d) Television Broadcast Technician License: Written elements 1, 2, 3, and 4.
(e) Radio Broadcast Technican License: Written elements 1, 2, and 3.
(f) Radiotelephone Technician Licens: Written elements 1 and 2.
(g) Limited Radiotelephone Operator Permit: Written element 1.
(j) No oral or written examination is required for this permit. In lieu thereof, applicants will be required to certify in writing to a declaration which states that the applicant has need for the requested permit; can receive and transmit spoken messages in English; can keep at least a rough written log in English or in some other language in general use that can be readily translated into English; is familiar with the provisions of treaties, laws, and rules and regulations governing the authority granted under the requested permit; and understands that it is his rsponsibility to keep current familiar with all such provisions.
(k) Six months service endorsement: No written examination is necessary.
(l) Ship radar endorsement: Written element 8.
(m) Aircraft radiotelegraph endorsement:
(1) Transmitting and receiving code test of 25 words-per-minute plain language and 20 code groups-per-minute.
(2) Written element 7.
(n) Restrictive endorsements: No written examination required.

4. Section 13.28, headnote and text, are amended to read as follows:

§ 13.28 Renewal Requirements and Exceptions.

A Restricted Radiotelephone Operator Permit normally is issued for the lifetime of the holder and need not be renewed, EXCEPT that alien Restricted Radiotelephone Operator Permits are normally issued for a five year term and are normally renewable. A license of any other class will generally be renewed without examination. However, the Commission may, if it finds cause, require the applicant to be re-examined in any or all examination elements required for the class of license for which renewal is sought.

5. Section 13.63 is amended to read as follows:

§ 13.63 Operator's Responsibility.

(a) A licensed operator or technician shall not cause any transmitter which he installs, operates, services, or maintains to radiate energy unless that station is authorized by and is consistent with the terms of a valid station license issued by the Commission.
(b) A licensed operator or technician shall make no modification to transmitting equipment which would void its Commission type-acceptance or type-approval, nor shall he repair equipment the type-acceptance or type-approval of which has been voided.

[6] See attached Dissenting Statement of Commissioner Washburn.

(c) A licensed operator or technician shall make no modifications to transmitting equipment which would enable its use in a service where the equipment is prohibited, nor shall he repair equipment which is being used in a service where prohibited.

(d) A licensed technician responsible for the installation, maintenance, or servicing of a transmitter shall also be responsible for making the entries in the station log or maintenance records and the notification to the licensee required in Section 13.75 of this chapter.

(e) A licensed technician responsible for the maintenance of a transmitter may permit other persons to adjust a transmitter in his presence for the purpose of carrying out tests or making adjustments requiring specialized knowledge or skill, provided that he shall not be relieved thereby from responsibility for the proper operation of the equipment.

6. Section 13.75, headnote and text, are amended to read as follows:

§ 13.75 Record of Operating and Maintenance Duties Performed.

(a) In every case where a station operating log is required, the responsible operator on duty in charge of the station operation shall make the required entries in the log for that station during the perod of his duty.

(b) In every case where a station service and maintenance log or record is required, the responsible technician performing or supervising the installation, servicing, or maintenance duties which may affect the proper operation of the station shall sign and date an entry in the station log or records giving:

(1) Pertinent details of all service and maintenance work performed by him or under his supervision;

(2) A statement that the station is operating in accordance with the Commission's Rules and the terms of the station authorization. If the station is in non-compliance, he shall so state, giving the particulars and shall immediately notify the station licensee in writing, recording in the appropriate log or station maintenance records the date and time of the notification.

(3) The class, serial number, and expiration date of his license.

(c) In cases where a station service and maintenance log or record is not required, the responsible technician performing or supervising the installation, servicing, or maintenance duties which may affect the proper operation of the station shall furnish the licensee a signed and dated entry giving:

(1) Pertinent details of all service and maintenance work performed by him or under his supervision;

(2 A statement that the station is operating in accordance with the Commission's Rules and the terms of the station authorization. If the station is in non-compliance, he shall so state, giving the particulars and shall immediately notify the station licensee in writing, recording in the appropriate log or station maintenance records the date and time of the notification.

(3) The class, serial number, and expiration date of his license.

(d) The responsible technician performing service and maintenance work shall not be subject to the requirements of Paragraphs (b) (3) and (c) (3) of this section if he is employed as an operator or technician on a full-time basis at a station or stations of one licensee at a single location, and his license is properly posted.

DISSENTING STATEMENT OF COMMISSIONER ABBOTT WASHBURN

RE: An Inquiry Relating to the Commission's Radio Operator Licensing Program (Docket 20817)

I am not convinced that it would be in the public interest to permit routine operation of broadcast transmitters with non-licensed persons (or R. P. holders), except where stations are equipped with automatic transmission systems.

In a recent compilation of rules frequently violated by broadcast stations, four of the nine listed violations were: operator failure to maintain power within authorized tolerances, operation with full daytime power during nighttime reduced power or presunrise times, operation with excessive modulation levels, and failure to make the required daily observation of tower light operation.

Because of the crowded nature of the broadcast band and the very precise technical requirements necessary to assure interference-free reception and quality of service, it is vital that the integrity of the Commission assignment plan be assured. This assurance is presently satisfied, at least in part, through inspection by Commission engineers, by the employment of operators with some technical competence, and by the use of automated transmission systems (ATS).

In recent years the frequency of inspections of broadcast stations has been declining to the point where the individual station is now inspected about once every ten years, so the need for some technical knowledge by station operators and increased use of automated transmission systems is becoming even more important.

Perhaps the industry's change in equipment will permit increasing reliance on ATS to the point where the Commission could eliminate the requirement of third class operators without attendant concern about its adverse impact on the technical integrity of the system. However, there is not sufficient evidence before us at this time, in my judgment, to make that proposal now.

I hope that those with similar worries on this score will give us their comments, as requested by the Notice.

[FR Doc.77-23351 Filed 8-11-77;8:45 am]

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

MONTHLY SALES LIST (PERIOD JUNE 1, 1977 THROUGH MAY 31, 1978)

CCC-Owned Commodities Notice to Buyers

This Monthly Sales List for the period June 1, 1977 through May 31, 1978, hereinafter referred to as "the period", is issued pursuant to the policy of the Commodity Credit Corporation issued on October 12, 1954, and published in the FEDERAL REGISTER of October 16, 1954 (19 FR 6669, 7 CFR Part 1402), and amended on January 31, 1970 (35 FR 1276), and on June 3, 1970 (35 FR 8537). This Monthly Sales List is effective with respect to Commodity Credit Corporation (CCC) commodity holdings which are available for sale, beginning at 2:30 p.m., e.d.t. on May 31, 1977. Sales price transitions between successive months will be made at 2:30 p.m. (Washington, D.C.), on the last CCC business day of each month unless otherwise specified.

This Monthly Sales List reflects sales policy for the beginning month of the period covered by the list. This Monthly Sales List also projects the beginning sales policy as far as possible into the balance of the period by setting forth prices that will prevail in subsequent months if the beginning sales policy remains unchanged. The inclusion of projected prices for subsequent months is intended to minimize the repetitive publication of price information and shall not be construed as an annual sales policy commitment by CCC. This Monthly Sales List will be amended in the FEDERAL REGISTER from time to time during the period to reflect intra-month and end-of-month changes.

This Monthly Sales List sets forth the commodities available for sale, information concerning financing, and the pricing basis on which sales will be made, and sources from which further information concerning matters described in this paragraph may be obtained. This list is issued for the purpose of public information and does not constitute an offer to sell by CCC or an invitation for offers to purchase from CCC.

1. GENERAL

(a) CCC will entertain offers from responsible buyers for the purchase of any commodity in this Monthly Sales List. Offers accepted by CCC will be subject to the terms and conditions prescribed by CCC. With certain exceptions, such terms and conditions appear in published regulations and in pamphlets which are designated as announcements. The identity of such announcements are, with certain exceptions, stated in this Monthly Sales List. The announcements may be obtained from the sources described herein.

(b) CCC reserves the right to refuse to consider an offer if CCC does not have adequate information of financial responsibility of the offeror to meet contract obligations of the type contemplated under the prospective contract. If a prospective offeror is in doubt as to whether CCC has adequate information with respect to his financial responsibility, he should either submit a financial statement to the office named to receive offers in the appropriate announcement or invitation prior to making an offer or communicate with such office to determine whether such a statement is desired in his case. When satisfactory financial responsibility has not been established, CCC reserves the right to consider an offer only on submission by the offeror of a certificated or cashiers' check, a bid bond, or other security, acceptable to CCC, assuring that if the offer is accepted, the offeror will comply with any provisions of the contract with respect to payment for the commodity and the furnishing of a performance bond or other security acceptable to CCC. Interest at 8 percent will be charged for delinquent payments on dairy product sales and on consignment and track grain sales.

(c) The pricing provisions in the CCC Monthly Sales List in effect at time of sale shall be applicable to sales of all commodities. Grain sales are made on-track with immediate delivery; in-store for delivery as soon as possible; or FOB origin for delivery as soon as possible subject to availability of transportation. In the case of sales FOB buyer's conveyance, carrying charges for account of the buyer will accrue at the rate specified in the contract commencing 10 days after date of sale. Sales for delivery other than immediate or as soon as possible will be made only pursuant to terms specified in special provisions.

(d) Financial coverage for commodities purchased shall be furnished before delivery, in cash or by irrevocable letter of credit.

(e) CCC reserves the right to determine the class, grade, quality, and available quantity of commodities listed for sale.

(f) Nonstorable commodities will be sold at not less than market price.

2. EXPORT COMMODITIES

On sales for export, the buyer shall be regularly engaged in the business of buying or selling commodities and for this purpose shall maintain a bona fide business office in the United States, its territories or possessions and have a person, principal or resident agent upon which service of judicial process may be had.

Prospective buyers for export should note that, generally sales to U.S. Government agencies, with minor exceptions, will constitute sales for domestic unrestricted use of the commodity.

CCC reserves the right, before making any sales, to define or limit export areas.

Exports to certain countries are regulated by the U.S. Department of Commerce. These restrictions also apply to any commodities purchased from CCC whether sold for restricted or unrestricted use. Countries and commodities are specifically listed in the U.S. Department of Commerce export control regulations. Additional information is available from the Bureau of International Commerce or from the field offices of the Department of Commerce.

In the case of export sales, the buyer is responsible for obtaining any required U.S. Government export permit or license. Purchase from CCC shall not constitute any assurance that any such permit or license will be granted by the issuing authority.

Although a commodity may not be specifically listed for export sale, CCC reserves the right to make emergency sales of its stocks for export if unexpected trade opportunities develop or when the flow of commodities to ports is disrupted or impeded and the maintenance of U.S. exports is temporarily jeopardized. Specific offering terms, including the applicable export announcement to be used, will be provided interested parties through special sales announcements and by amendments to the CCC Monthly Sales List.

3. ODD LOT QUANTITIES

Disposals and other handling of inventory items often result in small quantities at given locations or in qualities not up to specifications. These lots are offered by the appropriate ASCS office promptly upon appearance and, therefore, generally they do not appear in the monthly sales list.

4. DEFINITIONS

The following terms as used in this monthly sales list shall have the following meanings unless otherwise specifically stated:

(a) "Market price" means market price as determined by CCC.

(b) "Transit value" means transit value as determined by CCC.

(c) "Sales for unrestricted use" and "unrestricted use sales" means sales which permit either domestic or export use.

(d) "Sales for export" and "export sales" mean sales which require export of a commodity.

(e) "Designated terminals" means the terminals which are listed in grain price support regulations.

(f) "Export market price" means a price as determined by CCC and generally reflects the price at which commodities are being sold for export.

5–12 (RESERVED)

13. CORN — UNRESTRICTED USE SALES (BULK-STORABLE—BASIS GRADE 2 YELLOW CORN 15.1–15.5 PERCENT MOISTURE—IN-STORE)

The minimum price will be the market price but not less than the formula price. The formula price is the 1976 county loan rate where stored plus the monthly markup shown in this section plus transit value, if any.

Monthly markups—cents per bushel—1977:

June	51
July	53½
August	56
September	58½

Loan differentials will be applied in determining the formula price of other grades or qualities:

14–16 (RESERVED)

17. GRAIN SORGHUM—UNRESTRICTED USE SALES (BULK-STORABLE—BASIS GRADE 2 OR BETTER IN-STORE)

The minimum price is the market price but not less than the formula price.

At designated terminals, the formula price is the 1976 county loan rate where stored plus the monthly markup shown in this section plus 14 cents per hundredweight or the transit value, whichever is higher.

Outside of designated terminals, the formula price is the county loan rate where stored plus the monthly markup shown in this section plus the transit value, if any.

Loan differentials will be applied in determining the formula price of other grades and qualities.

Monthly markups—dollars per hundredweight—1977:

June	.86
July	.90½
August	.95
September	.99½

18–24 (RESERVED)

25. RICE, ROUGH—UNRESTRICTED USE SALES (F.O.B. WAREHOUSE)

The minimum price is the market price but not less than the formula price. Basis of sale is f.o.b. warehouse as is, or at buyers option, basis outturn weights and grades. The formula price is 115% of the 1976 target price plus the applicable monthly markup shown in this section.

Monthly markups—dollars per hundredweight—1977:

June	.88
July	.88

26. (RESERVED)

27. NONFAT DRY MILK—UNRESTRICTED USE SALES (IN-STORE-CARLOT QUANTITIES)

Market price, but not less than 74.6 cents per pound for U.S. Extra Grade spray process in 50 pound bags. Sales are made under Announcement PV-DS-2. In addition, from time to time CCC will issue an invitation for competitive offers under Announcement PV-DS-1 to buy from CCC nonfat dry milk which is 20 months old or older and/or has a moisture content of 4.2 percent but not more than 5.0 percent.

28. BUTTER—UNRESTRICTED USE SALES (INSTORE-CARLOT QUANTITIES)

Market price, but not less than 10 cents per pound over CCC's purchase price at each location for U.S. Grade A or higher in 60 to 68-pound blocks. Sales are made under Announcement PV-DS-2.

29. CHEDDAR CHEESE—UNRESTRICTED USE SALES (INSTORE-CARLOT QUANTITIES)

Market price, but not less than $1.07¾ per pound for U.S. Grade A or higher in 40 pound blocks. Sales are made under Announcement PV-DS-2.

30–31 (RESERVED)

32. PEANUTS, FARMERS STOCK—RESTRICTED USE SALES—DOMESTIC CRUSHING AND DOMESTIC USE OIL (SEGREGATION 1 AND 2 LOTS)

Competitive offer basis under Announcement PVP-DCO-1. Adjustments in the sales price, for oil and ammonia content, will be made after delivery. Proof of domestic utilization of peanut oil will be required per Announcement PVP-DCO-1.

When stocks are available, lot lists or invitations to bid will be issued by peanut associations for submission of bids each week to the Prairie Village ASCS Commodity Office.

33. PEANUT OIL, PRIME CRUDE—RESTRICTED USE SALES—DOMESTIC USE (BULK—FOB ORIGIN—CARLOT QUANTITIES)

Competitive offer basis under Announcement PVP-CPO-1 with issuance of invitations by and submission of bids to the Prairie Village ASCS Commodity Office. Proof of domestic utilization is required per Announcement PVP-CPO-1.

34–35 (RESERVED)

36. SOYBEANS—UNRESTRICTED USE SALES (BULK-STORABLE—BASIS GRADE 1 IN-STORE)

The minimum price will be the market price but not less than the formula price. The formula price is the 1976 base loan rate where stored plus the monthly markup shown in this section plus transit value if any. Market discounts will be applied in determining the minimum price of lower grades.

Monthly markups—dollars per bushel—1977:

June	1.39
July	1.42
August	1.45

37. COTTON, UPLAND—UNRESTRICTED USE SALES

The minimum price is the market price but not less than the formula price. The formula price is 49.70 cents per pound basis Strict Low Middling one and one sixteenth inch cotton (micronaire 3.5 through 4.9) at average location plus the monthly markup shown in this section.

In determining the formula price for other qualities and locations, current market differentials will be applied for other qualities and loan program location differentials will be applied for other locations.

Monthly markups—points per pound—1977:

June	270
July	270

Notwithstanding the foregoing, when the production of upland cotton is less than the estimated requirements for domestic use and for export for the marketing years, as determined by the Secretary of Agriculture, sales of a quantity of cotton equal to such difference ("shortfall") shall be made at current market prices as determined by CCC.

38. COTTON, EXTRA LONG STAPLE—UNRESTRICTED USE SALES

The minimum price is the market price but not less than the formula price. The formula price is 115 percent of the 1976 loan rate for each quality of such cotton plus the monthly markup shown in this section.

Monthly markups—points per pound—1977:

June	270
July	270

Notwithstanding the foregoing, when the amount by which the production of extra long staple cotton is less than the estimated requirements for domestic use and for export for the marketing years as determined by the Secretary of Agriculture, the formula price for sales against the shortfall is 115 percent of the 1976 loan rate for each quality of such cotton.

USDA Agricultural Stabilization and Conservation Services Offices: Feedgrains, wheat, rye and oilseeds are sold by the Commodity Office and Branch offices as listed below. Cotton, rice, dry edible beans, dairy products, honey, tung oil and peanuts are sold only by the Commodity Office.

SALES OFFICES: ADDRESSES, TELEPHONE AND SALES AREAS

Prairie Village ASCS Commodity Office—2400 West 75th Street (P.O. Box 8377), Shawnee Mission, Kans. 66208; Telephone: Area Code 816-926-6421 (Grain), 6140 (Dairy), 6338 (Rice).

Domestic and Export Sales—Alaska, Arizona, Colorado, Connecticut, Delaware, Georgia, Hawaii, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Missouri, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Virginia, Vermont, West Virginia, and Wyoming.

Branch Office—Houston ASCS Branch Office, 2550 North Loop West, Suite 525, Houston, Tex. 77018, P.O. Box 94175, Telephone: Area Code 713, 226–5871.

Domestic and Export Sales—Alabama, Arkansas, Florida, Louisiana, Mississippi, Oklahoma, and Texas.

Branch Office—Minneapolis ASCS Branch Office, 310 Grain Exchange Bldg., Minneapolis, Minn. 55415, Telephone: Area Code 612, 725–2051.

Domestic and Export Sales—Minnesota, Montana, North Dakota, South Dakota, and Wisconsin.

Branch Office—Portland ASCS Branch Office, Room 832, Federal Building, 1220 SW. 3d Avenue, Portland, Oreg. 97204, Telephone: Area Code 503, 221–2715.

Domestic and Export Sales—California, Idaho, Nevada, Oregon, Utah, and Washington.

Peanut Association Addresses: GFA Peanut Association, Telephone: Area Code 912–336–5241, Camilla, Ga. 31730.

Peanut Growers Cooperative, Marketing Association, Telephone: Area Code 804–562–4103, Franklin, Va. 23851.

Southwestern Peanut Growers Association, Telephone: Area Code 817–734–2222, Gorman, Tex. 76454.

(Sec. 4, 62 Stat. 1070, as amended (15 U.S.C. 714b); Sec. 407, 63 Stat. 1055, as amended (7 U.S.C. 1427)).)

Signed at Washington, D.C. on August 3, 1977.

RAY FITZGERALD,
Executive Vice President,
Commodity Credit Corporation.

Soil Conservation Service

SOQUE WATERSHED PROJECT, GEORGIA

Availability of Negative Declaration

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for a portion of the Soque Watershed project, Habersham County, Ga.

The environmental assessment of this Federal action indicates that this portion of the project will not create significant adverse local, regional, or national impacts on the environment and that no significant controversy is associated with this portion of the project. As a result of these findings, Mr. Dwight M. Treadway, State Conservationist, Soil Conservation Service, has determined that the preparation and review of an environmental impact statement is not needed for this portion of the project.

The project concerns a plan for watershed protection and flood prevention. The planned works of improvement, as described in the negative declaration, include conservation land treatment supplemented by three single purpose floodwater retarding structures.

The negative declaration is being filed with the Council on Environmental Quality and copies are being sent to various Federal, State, and local agencies. The basic data developed during the environmental assessment is on file and may be reviewed by interested parties at the Soil Conservation Service, 206 Federal Building, 355 East Hancock Avenue, Athens, Ga. 30603. A limited number of copies of the negative declaration is available from the same address to fill single copy requests.

No administrative action or implementation of the proposal will be taken until August 29, 1977.

(Catalog of Federal Domestic Assistance Program, No. 10.904, Watershed Protection and Flood Prevention Program—Pub. L. 83-566, 16 U.S.C. 1001–1008.)

Dated: August 4, 1977.

SHELDON G. BOONE,
Director, River Basins Division,
Soil Conservation Service,
U.S. Department of Agriculture.

[FR Doc.77-23359 Filed 8-11-77;8:45 am]

DEPARTMENT OF DEFENSE

Office of the Secretary

PRESIDENT'S COMMISSION ON MILITARY COMPENSATION

Notification of Meeting

Pursuant to Pub. L. 92-463 notice is hereby given that the next meeting of the President's Commission on Military Compensation will be held September 1, 1977, at 666 11th St. NW., Room 735, Washington, D.C. The meeting will last from 10:00 a.m. to 4:30 p.m. The agenda will include internal staff organization, discussion of the Commission's plan of study, scheduling subsequent meetings, hearings and trips, and briefings on current military compensation topics.

The following rules and regulations will govern participation by the public at this meeting:

(1) The meeting will be open to the public.

(2) Questions and statements from the public will not be accepted during this meeting.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Office of the Assistant Secretary of Defense (Comptroller).

CIVIL AERONAUTICS BOARD

[Docket 27573; Agreement C.A.B. 26814; R-1 through R-6; Order 77-8-17]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Specific Commodity Rates

Issued under delegated authority August 4, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA), and adopted pursuant to the provisions of Resolution 590 dealing with specific commodity rates.

The agreement names six specific commodity rates under existing commodity descriptions as set forth below, reflecting reductions from general cargo rates; and was adopted pursuant to unprotested notice to the carriers and promulgated in IATA letters between June 23 and June 25, 1977.

Agreement CAB	Specific commodity item No.	Description and rate
26814		
R-1	2411	Shirts and Blouses 130 ¢/kg, minimum weight 300 kg, Nicosia to New York.
R-2	8382	Sunglasses and or Goggles and Spectacle Cases When Shipped With the Main Article: 109 ¢/kg,[1] minimum weight 500 kg, New York to Zurich.
R-3	4131	Resistors and or Rheostats: 220 ¢/kg, minimum weight 500 kg, Bombay to New York.
R-4	4356	Sporting Boat Parts and Accessories: 224 ¢/kg, minimum weight 300 kg, Honolulu to Auckland.
R-5	7119	Books: 238 ¢/kg,[2] minimum weight 3,000 kg, Los Angeles to Sydney Melbourne.
R-6	9223	Swimming Pool Equipment including Ladders, Scoops, Filters, Pumps: 206 ¢/kg, minimum weight 500 kg, Perth to Los Angeles.

[1] Subject to applicable currency conversion factors as shown in tariffs.
[2] Expires June 30, 1978.
[3] Expires Dec. 31, 1977.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that the agreement is adverse to the public interest or in violation of the Act, provided that approval is subject to the conditions ordered.

Accordingly, *it is ordered*, that: Agreement C.A.B. 26814, R-1 through R-6, be approved, provided that (a) approval shall not constitute approval of the specific commodity descriptions contained therein for purposes of tariff publications; (b) tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filing; and (c) where a specific commodity rate is published for a specified minimum weight at a level lower than the general commodity rate applicable for such weight, and where a general commodity rate is published for a greater minimum weight at a level lower than such specific commodity rate, the specific commodity rate shall be extended to all such greater minimum weights at the applicable general commodity rate level.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-23382 Filed 8-11-77;8:45 am]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Care Financing Administration

PROPOSED SCHEDULE OF LIMITS UNDER THE HEALTH INSURANCE PROGRAM FOR COST-REPORTING PERIODS BEGINNING ON OR AFTER OCTOBER 1, 1977

In accordance with the Secretary's commitment contained in a notice published in the FEDERAL REGISTER (42 FR 35496) on July 8, 1977, notice is hereby given pursuant to the Administrative Procedure Act (5 U.S.C. 553) that a revised Schedule of Limits on Hospital Inpatient General Routine Service Costs in the Medicare program is set forth in tentative form as proposed by the Administrator, Health Care Financing Administration, with the approval of the Secretary of Health, Education, and Welfare. Section 1861(v)(1) of the Social Security Act permits the Secretary to set prospective limits on costs to be recognized as reasonable based on estimates of the cost necessary in the efficient delivery of needed health services. The revised Schedule of Limits will replace the Schedule currently in effect which was published in the FEDERAL REGISTER (41 FR 26992) on June 30, 1976. The proposed Schedule of Limits on Hospital Inpatient General Routine Service Costs set out below, when published in final form, will be applicable for cost reporting periods beginning on or after October 1, 1977, and before the effective date of a revised schedule. The proposed schedule of limits will apply to the entire cost reporting period of a hospital whose cost reporting period begins during the effective period of the schedule. (For the schedule of limits applicable to hospitals with cost reporting periods beginning on or after July 1, 1977, and before October 1, 1977, see FEDERAL REGISTER (42 FR 35496) of July 8, 1977.) The proposed schedule applies to the total of the cost of hospital inpatient general routine service costs. These limits do not apply to the cost of special care units or ancillary services.

The Secretary of Health, Education, and Welfare is strongly committed to a national policy of containing the rapidly escalating health care costs. Therefore, the Secretary hereby serves notice of his intention to review these limits from time to time and make such changes in the limits as circumstances may warrant to assure that costs which are reimbursed are reasonable. Any such changes will be prospective in nature but will apply to all hospital inpatient general routine service costs incurred after the effective date of the changes. In addition, the limits contained in this proposed Schedule will be revised to conform with any Federal cost containment legislation enacted subsequent to the effective date of this schedule.

The initial classification system, which is described in the FEDERAL REGISTER (39 FR 20168) published June 6, 1974, was developed to provide for comparison of hospitals of similar size and in similar economic environments. Several refinements of the initial classification system were made effective July 1, 1975, and are described in the FEDERAL REGISTER (40 FR 23622) published May 30, 1975.

An additional refinement was made in the revised schedule of limits effective July 1, 1976. The refinement was the result of changes in the size of units of economic environment, and is described in the FEDERAL REGISTER (41 FR 26992) published June 30, 1976.

A refinement was made in the revised schedule of limits published in the FEDERAL REGISTER (42 FR 35496) on July 8, 1977. This limited refinement arose from the definition of metropolitan environments in the New England area. Under the Office of Management and Budget (OMB) definition, which has been used to distinguish between metropolitan and nonmetropolitan areas, Standard Metropolitan Statistical Areas (SMSA's) and Standard Consolidated Statistical Area (SCSA's) in New England are based on cities and towns rather than on counties, as is the case in the rest of the United States. Because towns and cities are used to delineate SMSA's and SCSA's in New England, a county may be part of more than one SMSA or only a part of a county may be in an SMSA. However, income data supplied by the Department of Commerce, Bureau of Economic Analysis (BEA), which are used to group various areas according to economic environment, are available only on a county basis. In order to use the available data, BEA has slightly changed SMSA definitions in New England so that the SMSA's follow county lines.

Therefore, a hospital located in the part of the county not included by OMB in the SMSA/SCSA would be subject to a nonmetropolitan limit even though the per capita income of the hospital's location had been used for SMSA/SCSA classification grouping purposes. This situation is limited to New England and is inconsistent with the classification grouping for the rest of the United States where the OMB and BEA definitions of SMSA's consistently follow county lines.

In order to rectify this inconsistency, there is a change in the description of metropolitan environment used in the classification system. The change would alter the requirements for metropolitan status and would deem an entire county to be within an SMSA, SCSA if any part of such county was included by OMB in the SMSA, SCSA. Where a county contains the major city of an SMSA and is considered by OMB to be part of two or more SMSA's, the entire county would be deemed to be part of the SMSA whose major city it encompasses. Where a county is considered by OMB to be part of two or more SMSA's and does not contain the major city of any SMSA, the county would be included in the SMSA having the highest per capita income. An SMSA's major city is defined as the city from which the SMSA takes its name. Where the application of this provision results in a provider being placed in a group with a limit lower than the limit to which it would have been subject without the change, the higher limit may be applied in the cost reporting period to which this schedule applies.

An additional refinement made in the revised schedule of limits effective July 1, 1977, for nonmetropolitan areas is incorporated in the proposed revised schedule.

In nonmetropolitan areas, which are frequently single industry areas, per capita income levels are extremely sensitive to changes in economic conditions from one year to the next. This is especially true where the primary source of income is from agriculture. In these cases, hospital costs usually reflect the trend of the area's economy rather than year to year fluctuations. In order to provide more equitable treatment to nonmetropolitan areas, a change has been made that would base the classification of State nonmetropolitan areas on a 5-year per capita average income instead of a one year base period. In these areas the longer base would be more reflective of the economic environment than a single year's income.

The same change was considered for the metropolitan (SMSA/SCSA) areas. However, these areas do not exhibit the same volatility of per capita income from one year to the next as do the non-SMSA areas. This may be attributed to diversity in economic activity in the SMSA areas plus the additional benefits, such as supplemental unemployment compensation, which are available to the mostly unionized workers in these areas. Therefore no change was made in the classification system for SMSA/SCSA areas.

The revised Schedule of Limits retains the provision to protect metropolitan area providers for the period in which this schedule is in effect from the effects of lower limits that might result from circumstances that result in a lower per capita income for the provider's area. Thus if a metropolitan area's per capita income in a year or a change in SMSA/SCSA designation during the year, places the area in a group lower than in the previous year, the limit to be applied for that year will be the higher of the current period group or the immediately preceding year group. This provision will lessen the effect of unusual short-term fluctuations in area per capita income on reimbursement to individual providers.

For the period in which this schedule is in effect the same provision will be applied to nonmetropolitan providers which have been placed in a lower group as a result of the new classification methodology. SMSA and non-SMSA areas that are affected by this provision are indicated in the list of groups by an asterisk preceding the area name.

Example. Hospital A, Bed Size: 150. Per capita income in the provider's SMSA during the period on which the classification is based was reduced because of the effects of a natural disaster. Provider A had been classified in Group II effective October 1, 1976, and is now classified in Group III beginning October 1, 1977. The limit to be applied to Provider A beginning October 1, 1977, is the higher of the Group II limit or the Group III limit.

All SMSA's and SCSA's have been divided into the following five groups based on per capita income. Counties, rather than SMSA/SCSA areas, are listed for New England States.

[2] Hospitals in States identified by a figtwo will receive the higher of the limit published herein for the group in which the hospital is actually classified or the limit published herein for the group in which the hospital was classified in the immediately preceding cost reporting period.

With respect to the Standard Consolidated Statistical Area/Standard Metropolitan Statistical Area groupings, the groupings were developed by combining those SCSA/SMSA's which reflect a similar economic environment as expressed by per capita income data. The SCSA/SMSA's were arrayed in order of the size of their per capita income and groupings were established. The same procedure was followed for grouping the non-SCSA/SMSA areas to arrive at State groups.

The following bed-size categories are used to classify hospitals:

STANDARD METROPOLITAN STATISTICAL AREAS

GROUPS I AND II

Less than 100.
100–404.
405–684.
685 and above.

[1] Hospitals in areas (SCSA or SMSA) identified by an asterisk will receive the higher of the limit published herein for the group in which the hospital is actually classified or the limit published herein for the group in which the hospital was classified in the immediately preceding cost reporting period.

Non-SMSA areas will be classified according to the per capita income of all non-SMSA counties within a State. The following are the five income groupings, (with States classified according to a 5-year per capita income average) to be used for hospitals located in non-Standard Metropolitan Statistical Areas in those States.

GROUPS III, IV, AND V

Less than 100.
100–404.
405 and above.

NON-STANDARD METROPOLITAN STATISTICAL AREAS

Less than 100.
100–169.
170 and above

The limits were developed in the following manner:

1. Inpatient general routine service cost data for each participating hospital were obtained from the fiscal intermediaries.

2. The data for hospitals in each class were arrayed in descending order of inpatient general routine service cost.

3. The 80th percentile and the median were computed for each class.

4. For each class, an amount equal to 10 percent of the median was added to the 80th percentile amount.

5. This sum was adjusted to reflect the 14 percent annual rate of estimated cost increases in per diem routine service costs following the date of data collection.

6. The amounts calculated in step 5 are rounded to the next highest dollar which establishes the limit for each class, subject to adjustment for hospitals reporting on other than a reporting period beginning July 1, 1977.

Under the authority of section 1861(v) of the Social Security Act, the following cost limitations apply to the total of the hospital inpatient general routine service costs (excluding costs incurred for special care units and ancillary services), adjusted upward as provided for below. The limits are applicable to cost reporting periods beginning on or after October 1, 1977, and will remain in effect until the effective date of a revised schedule.

The limits are applicable to any hospital with a cost reporting period beginning on or after October 1, 1977. Where a hospital has a cost reporting period beginning after July 1, 1977, the published limit will be adjusted upward by a factor of 1.17 percent for each elapsed month between July 1, 1977, and the month in which the hospital's reporting period begins. The result of this calculation is not rounded and is to be given in dollars and cents.

Example.—Hospital A's cost reporting period starting in 1977 begins October 1, 1977, and ends September 30, 1978. The cost factor for Hospital A's group from the table below is $100.

COMPUTATION OF ADJUSTED COST LIMIT

Cost factor	$100.00
Plus: Adjustment for 3-month period (July 1, 1977, to Sept. 30, 1977), 3 months × 1.17 pct. = 3.51 pct.; 3.51 pct. × cost factor	3.51
Adjusted cost limit applicable to hospital A for the Oct. 1, 1977, to Sept. 30, 1978, reporting period	$103.51

SCHEDULE OF LIMITS ON HOSPITAL INPATIENT GENERAL ROUTINE SERVICE COSTS FOR HOSPITALS WITH COST-REPORTING PERIODS BEGINNING ON OR AFTER JULY 1 1977 [1]

Hospitals located within SMSA's (metropolitan) bed size

SMSA group	Less than 100	100 to 404	405 to 684	685 and above
I	$120	$144	$160	$211
II	121	125	150	171
III	100	110	130	150
IV	100	110	130	150
V	90	85	100	130

Hospitals located outside SMSA's (nonmetropolitan) bed size

Group	Less than 100	100 to 169	170 and above
I	$105	$114	$142
II	110	115	107
III	100	90	100
IV	90	85	91
V	84	85	84

[1] Limits apply to all SMSA's except Anchorage, Alaska, and Honolulu, Hawaii, where cost-of-living adjustment (25 pct. Anchorage, Alaska; 17.5 pct. Honolulu, Hawaii) was made. The limits for these areas are as follows:

	Less than 100	100 to 404	405 to 684	685 and above
Anchorage	$174	$180	$208	$264
Honolulu	144	174	188	248

Limits apply to all Group I States except Alaska where cost of living adjustment (25 pct.) was made. Limits for Alaska are:

Less than 100	$150
100 to 169	160
170 and above	181

Applies to all Group II States except Hawaii where cost of living adjustment (17.5 pct.) was made. Limits for Hawaii are:

Less than 100	$169
100 to 169	129
170 and above	121

[1] The schedule of limits and adjustment factor are only for a 12-month cost reporting period. For providers with other than 12-month cost reporting periods, intermediaries must contact the Health Care Financing Administration for adjustment factor.

Consideration will be given to written comments or suggestions received on or before September 12, 1977.

Address comments to:

Administrator, Health Care Financing Administration, Department of Health, Education, and Welfare, P.O. Box 2372, Washington, D.C. 20013.

When commenting please refer to MAB 39. Agencies and organizations are requested to submit their comments in duplicate. Comments will be available for public inspection, beginning approximately 2 weeks after publication, in Room 5225 of the Department's offices at 330 C Street SW., Washington, D.C. 20201, on Monday through Friday of each week from 8:30 a.m. to 5 p.m.; telephone 202–245–0950.

FOR FURTHER INFORMATION, CONTACT:

Mrs. Virginia K. Gray, Health Care Financing Administration, Medicare Bureau, 6401 Security Boulevard, Baltimore, Md. 21235, Director, Division of Provider Reimbursement and Accounting Policy (301–594–9690).

National Institutes of Health

NATIONAL CANCER ADVISORY BOARD PRESIDENT'S CANCER PANEL BOARD SUBCOMMITTEES

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Cancer Advisory Board and the President's Cancer Panel, National Cancer Institute, September 19–20, 1977, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 31C, Conference Room 6.

The meeting will be open to the public on September 19 from 1:00 p.m. to 5:00 p.m. to hear reports on activities of the President's Cancer Panel, the Director, NIH, and the Director, NCI. On September 20, the meeting will be open to the public from 9:00 a.m. to 12:00 noon to hear reports on computer tomography in radiation therapy, the NCI construction plan, and the special training programs. Attendance by the public will be limited to space available.

In addition, Subcommittees of the Board will meet as follows:

Subcommittee on Construction, September 18, Building 31C, Conference Room 10, from 7:30 p.m. to adjournment.

Subcommittee on National Organ Site Programs, September 19, Holiday Inn, 8120 Wisconsin Avenue, Bethesda, Maryland, from 7:00 a.m. to 7:45 a.m.

Subcommittee on Centers, September 19, Building 31A, Conference Room 11A10, from 8:30 a.m. to 12:00 noon. Open to the public from 8:30 a.m. to 9:30 a.m. for reports on the cancer centers profile and the intrainstitute committee.

Subcommittee on Special Actions for Grants, September 19, Building 31C, Conference Room 6, from 10:30 a.m. to 12:00 noon.

Subcommittee on Planning and Budget, September 19, Building 31C, Conference Room 6, from 8:00 p.m. to adjournment, to review the status of the 1978 budget and the 1979 preliminary budget submitted to the Office of Management and Budget. This meeting will be entirely open to the public.

Attendance by the public at the open portions of these meetings will be limited to space available.

In accordance with provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting of the Board and Panel will be closed to the public on September 20, from 1:00 p.m. to adjournment, for the review, discussion and evaluation of individual grant applications.

In addition, the Subcommittee on Construction will be closed on September 18, from 7:30 p.m. to adjournment; the Subcommittee on National Organ Site Programs, from 7:00 a.m. to 7:45 a.m., September 19; the Subcommittee on Centers, from 9:30 a.m. to 12:00 noon, September 19; and the Subcommittee on Special Actions for Grants, from 10:30 a.m. to 12:00 noon, September 19, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Dr. Richard A. Tjalma, Assistant Director, NCI, Building 31, Room 11A46, National Institutes of Health, Bethesda, Maryland 20014 (301/496-5854) will provide summaries of the meetings, substantive program information and rosters of members.

(Catalog of Federal Domestic Assistance Program Nos. 13.392 through 13.399, National Institutes of Health.)

Dated: August 2, 1977.

THOMAS E. MALONE,
Deputy Director,
National Institutes of Health.

NIH CONSENSUS COMMITTEE FOR BREAST CANCER SCREENING (TEMPORARY)

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the NIH Consensus Committee for Breast Cancer Screening, National Cancer Institute, September 14-16, 1977, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland, in Building 1, Wilson Hall.

The entire meeting will be open to the public from 8:30 a.m. to 6:00 p.m. each day, to solicit information from the scientific community and other interested groups, concerning the current state of knowledge of the commonly used modalities for breast cancer screening (including clinical history, physical examination, mammography, thermography, and breast self-examination) in terms of risks and benefits, to establish a consensus and to provide recommendations on breast cancer screening. Attendance by the public will be limited to space available.

Dr. Seymour Perry, Special Assistant to the Director, NIH, Building 1, Room 111, National Institutes of Health, Bethesda, Maryland 20014, (301) 496-2500, will provide summaries of the meeting and rosters of committee members.

Mr. Storm Whaley, Associate Director for Communications, NIH, Building 1, Room 309, National Institutes of Health, Bethesda, Maryland 20014, (301) 496-4461, will provide additional meeting information.

Dated: August 5, 1977.

THOMAS E. MALONE,
Deputy Director.

CLINICAL TRIALS REVIEW COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Clinical Trials Review Committee, National Heart, Lung, and Blood Institute, September 26, 1977, Lobby Room, Holiday Inn of Chevy Chase, 5520 Wisconsin Avenue, Chevy Chase, Maryland 20015.

This meeting will be open to the public from 8:30 a.m. to 9:00 a.m. on September 26, 1977, to discuss administrative details and to hear a report concerning the current status of the National Heart, Lung, and Blood Institute. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on September 26, 1977, from 9:00 a.m. to adjournment, for the review, discussion and evaluation of an individual research grant application. Application and the discussion could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the application.

Mr. York Onnen, Chief, Public Inquiries and Reports Branch, NHLBI, National Institutes of Health, Building 31, Room 5A03, phone (301) 496-4236, will provide summaries of the meeting and rosters of the committee members. Dr. Fred P. Heydrick, Chief, Research Contracts Review Section, Division of Extramural Affairs, NHLBI, Westwood Building, Room 548B, phone (301) 496-7363, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.837, National Institutes of Health.)

Dated: August 8, 1977.

THOMAS E. MALONE,
Deputy Director,
National Institutes of Health.

NATIONAL ADVISORY CHILD HEALTH AND HUMAN DEVELOPMENT COUNCIL

Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the National Advisory Child Health and Human Development Council, September 25-27, 1977. The meeting on September 25 will be held in Building 31, Room 2A03; the September 26-27 sessions will be held in Building 31, Conference Room 6, National Institutes of Health, Bethesda, Maryland. The meeting will be open to the public on September 25 from 3:00 p.m. to 6:00 p.m. for planning and evaluation discussion; on September 26 from 9:00 a.m. to 5:00 p.m. and on September 27 from 2:00 p.m. to 3:00 p.m. for current status reports, review of the Developmental Biology and Nutrition Program, scientific presentations, and remarks by guest speakers. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on September 27 from 9:00 a.m. to 2:00 p.m. and from 3:00 p.m. to adjournment for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mrs. Marjorie Neff, Council Secretary, NICHD, Building 31, Room 2A-04, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496-1848, will provide a summary of the meeting and a roster of Council members as well as substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.864 and 13.865, National Institutes of Health.)

Dated: August 8, 1977.

THOMAS E. MALONE,
Deputy Director, National Institutes of Health.

BOARD OF SCIENTIFIC COUNSELORS, NIDR

Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Dental Research, September 29, 1977, National Institutes of Health, Building 30, Conference Room 117, at 9:00 a.m.

This meeting will be open to the public from 9:00 a.m. to approximately 10:00 a.m., to discuss program policies and issues. Attendance by the public is limited to space available.

In accordance with the provisions set forth in Section 552b(c) (6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 10:00 a.m. to adjournment for the review discussion, and evaluation of individual programs and projects conducted by the National Institutes of Health, NIDR, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. Marie U. Nylen, Director of Intramural Research, National Institute of Dental Research, National Institutes of Health, Building 30, Room 132, Bethesda MD 20014, (telephone 301 496-1483) will provide summaries of meeting, rosters of committee members, and substantive program information.

Dated: August 8, 1977.

THOMAS E. MALONE,
Deputy Director, National Institutes of Health.

MAMMALIAN CELL LINES COMMITTEE

Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Mammalian Cell Lines Committee, National Institute of General Medical Sciences, National Institutes of Health, on September 30, 1977, at 9 a.m., Conference Room 8, Building 31C, Bethesda, Maryland.

This meeting will be open to the public on September 30 at 9 a.m. to 1 p.m. to discuss matters and issues relevant to the Genetics Program. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Title 5, U.S. Code 552b(c)(4) and 552(b)(6), the meeting will be closed to the public at 1 p.m. to adjournment for the review, discussion, and evaluation of a Genetics Center research grant application. The review of this application could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the application.

Mr. Paul Deming, Research Reports Officer, National Institute of General Medical Sciences, Westwood Building, Room 9A05 Bethesda, Maryland 20014, telephone 301-496-7301, will provide summary minutes of the meeting and a roster of the committee members.

Dr. Michael I. Goldberg, Executive Secretary, Mammalian Cell Lines Committee, Westwood Building, Room 910, telephone 301-496-7175 will provide substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13-862, National Institutes of Health.)

Dated: August 2, 1977.

THOMAS E. MALONE,
Deputy Director, National Institutes of Health.

[FR Doc.77-23336 Filed 8-11-77;8:45 am]

BOARD OF SCIENTIFIC COUNSELORS, NINCDS

Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Neurological and Communicative Disorders and Stroke, National Institutes of Health, October 20 and 21, 1977, in Conference Room 1B-07, Bldg. 36, Bethesda, MD 20014. This meeting will be open to the public from 10:30 a.m. to 5:00 p.m. on October 20th to discuss program planning and program accomplishments. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Public Law 92-463, the meeting will be closed to the public from 9:00 a.m. until the conclusion of the meeting on October 21st for the review, discussion and evaluation of individual programs and projects conducted by the National Institutes of Health, including consideration of personnel qualifications and performance, the competence of individual investigators and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Acting Chief, Office of Scientific and Health Reports, Mr. Robert N. Hinkel, Bldg. 31, Room 8A03, NIH, NINCDS, Bethesda, MD 20014, telephone 301-496-5751, will furnish summaries of the meeting and rosters of committee members.

The Executive Secretary from whom substantive program information may be obtained is Dr. Thomas N. Chase, Director of Intramural Research Program, NINCDS, Bldg. 36, Room 5A05, NIH, Bethesda, MD 20014, telephone 301-496-4297.

(Catalog of Federal Domestic Assistance Program No. 13.356, National Institutes of Health.)

Dated: August 4, 1977.

NATIONAL ADVISORY NEUROLOGICAL AND COMMUNICATIVE DISORDERS AND STROKE COUNCIL

Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the National Advisory Neurological and Communicative Disorders and Stroke Council, National Institutes of Health, September 29, 30, and October 1, 1977, at 9:00 a.m. in Building 31-C, Conference Room 6, Bethesda, Maryland 20014. The meeting will be open to the public from 9:00 a.m. until 1:00 p.m. on September 29, 1977, and from 9:00 a.m. until the conclusion of the meeting on October 1, 1977, to discuss program planning and program accomplishments. Attendance by the public will be limited to space available. In accordance with the provisions set forth in Sections 552b(c)(4), and 552b(c)(6) of Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 1:00 p.m. on September 29, 1977, until the conclusion of the meeting that day, and from 9:00 a.m. until 5:00 p.m. on September 30, 1977, for review, discussion and evaluation of individual initial pending and renewal research grant applications and applications for Teacher-Investigator Awards and Research Career Development Awards. The portion of the meeting being closed involves the review, discussion, and evaluation of individual grant applications. These applications and the discussion could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

The Acting Chief, Office of Scientific and Health Reports, Mr. Robert N. Hinkel, Building 31, Room 8A03, NIH, NINCDS, Bethesda, Maryland, telephone 301-496-5751, will furnish summaries of the meeting and rosters of committee members.

Dr. O. Malcolm Ray, Executive Secretary, Federal Building, Room 1020C, Bethesda, Maryland 20014, telephone 301-496-9234, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.851, 13.852, 13.853, 13.854, National Institutes of Health.)

Dated: August 2, 1977.

Social Security Administration

ENGLISH LANGUAGE AND EMPLOYMENT SERVICES FOR ADULT INDOCHINESE REFUGEES

Change in Guidelines for Existing Projects

On July 26, 1976, the Social and Rehabilitation Service, Department of Health, Education, and Welfare published a notice and guidelines for proposals to conduct English Language and Employment Services for Adult Indochinese Refugees (41 FR 30701). (This activity is now under the jurisdiction of the Social Security Administration.)

Subsequently, grants were awarded for the period October 1, 1976, through September 30, 1977, in accordance with the requirement contained in the notice of July 26, 1976, that "The period of performance of any grant awarded under this notice shall not extend past September 30, 1977."

Due to longer start-up periods than anticipated, many grantees will not have

expended all of their funds by September 30, 1977.

Therefore, authority is hereby granted to the Regional Commissioners, Social Security Administration, to extend the period of any grant beyond September 30, 1977, when the Regional Commissioner, or his/her designee, determines that such extension is in the best interest of the Government and the refugees being served. An extension of up to three months—i.e., through December 31, 1977—may be made by the Regional Commissioner, or his/her designee, without further concurrence. Proposed extensions of more than three months will be submitted for the concurrence of the Director, Indochinese Refugee Assistance Program, or his designee.

Dated: August 4, 1977.

B. CARDWELL,
Commissioner of Social Security.

Alcohol, Drug Abuse, and Mental Health Administration

ALCOHOL RESEARCH REVIEW COMMITTEE

Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the months of August and September 1977:

ALCOHOL RESEARCH REVIEW COMMITTEE

Date and time: August 31–September 1, 9 a.m.

Place: New Jersey Room, Holiday Inn, Bethesda, Maryland 20014.

Type of meeting: open—August 31, 9–10 a.m. Closed—Otherwise.

Contact: Dr. Albert A. Pawlowski, Room 16C–26, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301–443–4223.

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute on Alcohol Abuse and Alcoholism relating to research activities and makes recommendations to the National Advisory Council on Alcohol Abuse and Alcoholism for final review.

Agenda: From 9 to 10 a.m., August 31, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of Section 552b(c)(6), Title 5 U.S. Code and Section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

Substantive program information may be obtained from the contact person listed above. The NIAAA Information Officer who will furnish upon request summaries of the meeting and rosters of the committee members is Mr. Harry Bell, Director, Office of Public Affairs, NIAAA, Room 11A–17, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301–443–3306.

Dated: August 4, 1977.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

[FR Doc. 77-23003. Filed 8-11-77; 8:45 am]

Food and Drug Administration

ADVISORY COMMITTEES

Meetings

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also sets forth a summary of the procedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)), and FDA regulations (21 CFR Part 14) relating to advisory committees. The following advisory committee meetings are announced:

Committee name	Date, time, and place	Type of meeting and contact person
1. Ophthalmic Panel	Sept. 16 and 17, 9 a.m., Conference Room C, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md.	Open public hearing, Sept. 16, 9 a.m. to 10 a.m.; open committee discussion, Sept. 16, 10 a.m. to 4:30 p.m.; Sept. 17, 9 a.m. to 4:30 p.m.; John T. McElroy (HFD-510), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4960.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of nonprescription drug products.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make such a presentation should notify the contact person before September 13, 1977, and submit a brief statement of the general nature of the data, information, or views they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required for their presentation.

Open committee discussion. The panel will review data submitted pursuant to the over-the-counter (OTC) review's call for data for this panel (see also 21 CFR 330.10(a)(2)).

The panel will be reviewing, voting upon, and modifying the content of summary minutes and categorization of ingredients and claims.

Committee name	Date, time, and place	Type of meeting and contact person
2. Immunology Device Classification Panel.	Sept. 26 and 27, 8 a.m., Room 425, 8757 Georgia Ave., Silver Spring, Md.	Open public hearing, Sept. 26, 8 a.m. to 9 a.m.; open committee discussion, Sept. 26, 9 a.m. to 5 p.m., Sept. 27, 8 a.m. to 5 p.m.; Srikrishna Vadlamudi, D.V.M., Ph. D., (HFK-440), 8757 Georgia Ave., Silver Spring, Md. 20910, 301-427-7538.

General function of the committee. Reviews and evaluations available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested parties are encouraged to present information pertinent to classification of in vitro diagnostic products (immunology) to the executive secretary. Submission of data on tentative classification findings is also invited. Those desiring to make formal presentations should notify the executive secretary by September 21, 1977, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, references to any data to be relied on, and also an indication of the approximate time required for their presentation.

Open committee discussion. The panel will review and comment on the reclassification petition under section 513(f)(2) of the Federal Food, Drug, and Cosmetic Act, by International Diagnostic Technology, Santa Clara, California on the following products: FIAX TM Test for C3; Anti DNA Antibody Test.

The panel will review the classification results for consistency with the Medical Device Amendments of 1976 and also review the recommendations for all the supplementary data sheets completed in previous meetings.

Committee name	Date, time, and place	Type of meeting and contact person
3. Topical Analgesic Panel	Sept. 26, 27, and 28, 9 a.m., Conference Room C, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md.	Open public hearing, Sept. 26, 9 a.m. to 10 a.m.; open committee discussion, Sept. 26, 10 a.m. to 4:30 p.m., Sept. 27 and 28, 9 a.m. to 4:30 p.m.; Lee Geisnar (HFD-510), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4960.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of nonprescription drug products.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Those desiring to make such a presentation should notify the contact person before September 21, 1977, and submit a brief statement of the general nature of the data, information, or views they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required for their presentation.

Open committee discussion. The panel will review data submitted pursuant to the over-the-counter (OTC) review's call for data for this panel (see also 21 CFR 330.10(a)(2)).

The panel will be reviewing, voting upon, and modifying the content of summary minutes and categorization of ingredients and claims.

Committee name	Date, time, and place	Type of meeting and contact person
4. Hematology Device Classification Panel.	Sept. 27, 9 a.m., Rm. 1813, FB-8, 200 C St. SW., Washington, D.C.	Open public hearing, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 5 p.m., Kaiser Azar, Ph.D., (HFK-440), 8757 Georgia Ave., Silver Spring, Md. 20910, 301-427-7564.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested parties are encouraged to present information pertinent to the classification of hematology devices to the executive secretary. Submission of data relative to tentative classification findings is also invited. Those desiring to make a formal presentation should notify the executive secretary by September 19, 1977, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, references to any data to be relied on, and also an indication of the approximate time required for their presentation.

Open committee discussion. The Hematology Device Classification Panel will classify the following in vitro diagnostic products: automated blood cell diluting apparatus; automated blood cell separation; automated slide spinners; automated slide stainers; guiac reagent; radioactive chromium; computer systems integrated with hematological analyzers; Schilling test; blood volume measurement; red cell survival; iron turnover; and ATP (adenosine triphosphate) release (luminescence).

Committee name	Date, time, and place	Type of meeting and contact person
5. Anesthesiology Device Classification Panel.	Sept. 27 and 28, 8:30 a.m., Room 3651 HEW-N, 330 Independence Ave. SW., Washington, D.C.	Open public hearing, Sept. 27, 8:30 a.m. to 9:30 a.m.; open committee discussion, Sept. 27, 9:30 a.m. to 4 p.m.; Sept. 28, 8:30 a.m. to 4 p.m.; Dennis J. Cotter (HFK-450), 8757 Georgia Ave., Silver Spring, Md. 20910, 301-427-7559.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested parties are encouraged to present information pertinent to anesthesiology devices to the executive secretary. Submission of data relative to tentative classification findings is also invited. Those desiring to make a formal presentation should notify the executive secretary by September 20, 1977, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, references to any data to be relied on, and also an indication of the approximate time required for their presentation.

Open committee discussion. Review the entire anesthesiology device list and prepare final panel recommendations for a report.

Committee name	Date, time, and place	Type of meeting and contact person
6. Ear, Nose, and Throat Device Classification Panel.	Sept. 28 and 29, 9 a.m. Room 1813, FB-8, 200 C St. SW., Washington, D.C.	Open public hearing, Sept. 28, 9 a.m. to 10:30 a.m.; open committee discussion, Sept. 28, 10:30 a.m. to 4:30 p.m., Sept. 29, 9 a.m. to 4:30 p.m.; Harry R. Sauberman (HFK-450), 8757 Georgia Ave., Silver Spring, Md. 20910, 301-427-7538.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested parties are encouraged to present information pertinent to tentative classification findings. Those desiring to make a formal presentation should notify the executive secretary by September 14, 1977, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, references to any data to be relied on, and also an indication of the approximate time required for their presentation.

Open committee discussion. The panel will review its tentative classification recommendations and will structure the format and content of its report to the Commissioner.

Committee name	Date, time, and place	Type of meeting and contact person
7. Clinical Chemistry Device Classification Panel.	Sept. 29 and 30, 9 a.m., Room 1409, FB-8, 200 C St. SW., Washington, D.C.	Open public hearing, Sept. 29, 9 a.m. to 10 a.m.; open committee discussion, Sept. 29, 10 a.m. to 5 p.m., Sept. 30, 9 a.m. to 5 p.m.; Kaiser Aziz, Ph. D., (HFK-440), 8757 Georgia Ave., Silver Spring, Md. 20910, 301-427-7234.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested parties are encouraged to present information pertinent to the classification of clinical chemistry devices to the executive secretary. Those desiring to make a formal presentation should notify the executive secretary by September 15, 1977, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, reference to any data to be relied on, and also an indication of the approximate time required for their presentation.

Open committee discussion. The panel will review and complete classification of the following in vitro diagnostic products: Acid phosphatase (prostatic); acid phosphatase (total); adrenocorticotropin/ACH; alanine amino transferase ALT/SGPT; albumin; aldolase; aldosterone; alkaline phosphatase; alkaline phosphatase isoenzyme; aminolevulinic acid; ammonia; amylase; androstenedione; androsterone; angiotensin I & II and renin; ascorbic acid; aspartate amino transferase/AST/SGOT; Bence Jones protein; bicarbonate/carbon dioxide; bilirubin (total and direct); bilirubin and its conjugates (urinary, non-quant.); blood gases/PCO2, PO2; blood pH; blood volume; bromide; calcitonin; calcium; calibrators; carbon monoxide; catecholamines (total); ceruloplasmin; chloride; cholesterol (total); chymotrypsin; compound S; copper; corticoid; corticosterone; cortisol (hydrocortisone, hydroxycorticosterone); creatine; creatine phosphokinase isoenzymes; creatine phosphokinase creatine kinase; creatinine; cyclic AMP; cyclic GMP; cystine; dehydroepiandrosterone (free and sulfate); desoxycorticosterone; enzyme calculator; estradiol; estriol; estrogens (total, in pregnancy); estrogens (total, non-pregnant); estrone; etiocholanolone; fatty acids (total esterified); ferritin; folic acid; follicle stimulating hormone; formiminoglutamic acid (FIGLU); galactose; galactose-1-phosphate uridyl transferase; gamma-glutamyl transpeptidase and isoenzymes; gastric acidity; gastrin; globulin; glucagon; glucose (urinary, non-quant.); glucose; glucose-6-phosphate dehydroglnase; glucose-6-phosphate dehydrogenase isoenzymes; glutathione (GHS); glutathione reducatase deficiency histidine; human C peptides; human chorionic gonadotropin (HCG); human growth hormone; human placental lactogen (HPL); hydroxybutyric dehydrogenase; hydroxyproline; immunoglobulins (D, E); immunoglobulins (G, A, M); instruments (general), for clinical use; iron (non-heme); iron binding capacity; isocitric dehydrogenase; ketones (urinary, non-quant.); lactate dehydrogenase; lactate dehydrogenase isoenzyme; lactic acid; lecithin-sphingomyelin ratio in amniotic fluid; leucine aminopeptidase; lipase; lipid (total); lipoprotein; lithium; long-acting thyroid stimulator (LATS); luteinizing hormone; lysozyme (muramidase); magnesium; malic dehydrogenase; mucopolysaccharides; nitrite (urine); nitrogen (amino-nitrogen); occult blood in urine; ornithine carbamyl transferase; osmolality of serum and urine; parathyroid hormone; pH (urinary, non-quant.); phenylalanine; phenylketones (urinary, non-quant.); phosphohexose isomerase; phospholipid; phosphorus (inorganic); plasma oncometry; plasma viscometry; porphobilinogen; porhyrins; potassium; pregnanediel; pregnanetriol; pregnenolone; progesterone; prolactin (lactogen); protein (fractionation), protein (total); protein bound iodine; protein or albumin (urinary, non-quant.); pseudocholinesterase (CHS); pyruvate kinase; pyruvic acid; quality control material (assayed and unassayed); sodium; sorbitol dehydrogenase; specimen collection products; testosterone and dihydrotestosterone; thyroglobulin autoantibody; thyroid binding globulin; thyroid stimulating hormone; thyroxine; transferrin; triglyceride; triiodothyronine; triose phosphate isomerase; trypsin; tyrosine (free); urea nitrogen; uric acid; urinary calculi/stone; urobilinogen (urinary, non-quant.); uroporphyrin; vanilmandelic acid; vitamin A; vitamin B_{12}; vitamin E; xylose; 17-hydroxycorticosteroids; 17-hydroxyprogesterone; 17-ketogenic steroid; 17-ketosteroids; 2,3-diphosphoglyceric acid; 5-hydroxyindole acetic acid/serotonin; 5-nucleotidase; 6-phosphogluconate dehydrogenase; insulin (immunoreactive); single analyte control; multianalyte control; vitamin B_{12} binding capacity; lactose; computer systems and/or accessories for clinical chemistry devices; fluorometers for clinical use; automated urinalysis system; cephalin-cholesterol flocculation; thymol turbidity.

Committee name	Date, time, and place	Type of meeting and contact person
8. Dermatology Advisory Committee.	Sept. 30, 9 a.m., Conference Room G, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md.	Open public hearing, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 4 p.m.; Mary K. Bruch (HFD-140), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4310.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational prescription drugs for use in the practice of dermatology.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. Discussion of the safety and effectiveness of NDA (new drug application) 50-513 (Mycophenolic Acid); review of Kwell labeling; and revision of topical corticosteroid guidelines.

Committee name	Date, time, and place	Type of meeting and contact person
Allergenic Extracts Panel.	Sept. 30 and Oct. 1, 9 a.m., Room 130, 6110 Executive Blvd., Rockville, Md.	Open public hearing, Sept. 30, 9 a.m. to 10 a.m.; open committee discussion, Sept. 30, 10 a.m. to 5:30 p.m., Oct. 1, 8:30 a.m. to 5:30 p.m.; Gray Sisk (HFB-5), 5600 Rockville Pike, Bethesda, Md. 20014, 301-443-3460.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of biological products.

Agenda—Open public hearing. Any interested person may present data, information, or views, orally or in writing, on issues pending before the committee.

Agenda—Open committee discussion. Discussion of manufacturing guidelines for allergenic extracts; combination allergenic extracts; and edit draft standards on endotoxins, opthalmic testing, epidermal extracts, food extracts, clinical testing recommendations, and adjuvants.

Committee name	Date, time, and place	Type of meeting and contact person
10. Miscellaneous External Drug Products Panel.	Sept. 30 and Oct. 1, 9 a.m., Conference Room C, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md.	Open public hearing, Sept. 30, 9 a.m. to 10 a.m.; open committee discussion, Sept. 30, 10 a.m. to 4:30 p.m., Oct. 1, 9 a.m. to 4:30 p.m.; Thomas D. DeCillis (HFD-510), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4960.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of nonprescription drug products.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make such a presentation should notify the contact person before September 27, 1977, and submit a brief statement of the general nature of the data, information, or views they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required for their presentation.

Open committee discussion. The panel will review data submitted pursuant to the over-the-counter (OTC) review's call for data for this panel (see also 21 CFR 330.10(a)(2)).

The panel will be reviewing, voting upon, and modifying the content of summary minutes and categorization of ingredients and claims.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this FEDERAL REGISTER notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be obtained from the Public Records and Documents Center (HFC-18), 5600 Fishers Lane, Rockville, MD 20857, between the hours of 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 14.

Dated: August 5, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance

[FR Doc 77-23122 Filed 8-11-77;8:45 am]

ADVISORY COMMITTEES

Meetings

AGENCY: Food and Drug Administration.

ACTION: Notice

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also sets forth a summary of the procedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)), and FDA regulations (21 CFR Part 14) relating to advisory committees. The following advisory committee meetings are announced:

Committee name	Date, time, and place	Type of meeting and contact person
1. Hormone Subcommittee of the Science Advisory Board.	Sept. 15, 9 a.m., National Center for Toxicological Research, Jefferson, Ark.	Open public hearing, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 3 p.m.; Ruth S. Magee, National Center for Toxicological Research, Jefferson Ark. 72079, 501-541-4528.

General function of the committee. Advises on establishment and implementation of a research program that will assist the Commissioner of Food and Drugs and the Administrator, Environmental Protection Agency, in fulfilling their regulatory responsibilities.

Agenda.—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. Discussion of the role of subcellular mechanisms in transplacental carcinogenesis; molecular parameters of the estrogen response; the status of carcinogenic-estrogenic bioassays; and metabolic studies of synthetic estrogen.

Committee name	Date, time, and place	Type of meeting and contact person
2. Mutagenesis Subcommittee of the Science Advisory Board.	Sept. 29, 9 a.m., National Center for Toxicological Research, Jefferson, Ark.	Open public hearing, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 3:30 p.m.; Ruth S. Magee, National Center for Toxicological Research, Jefferson, Ark. 72079, 501-541-4528.

General function of the committee. Advises on establishment and implementation of a research program that will assist the Commissioner of Food and Drugs and the Administrator, Environmental Protection Agency, in fulfilling their regulatory responsibilities.

Agenda.—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. Discussion of the status report on dosimetry/pharmacokinetics program; discussion of strain selection for heritable translocation assay; and progress report on development of in vivo microlesion assay project.

Committee name	Date, time, and place	Type of meeting and contact person
3. Matrix Approach Subcommittee of the Science Advisory Board.	Sept. 30, 9 a.m., National Center for Toxicological Research, Jefferson, Ark.	Open public hearing, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 3 p.m.; Ruth S. Magee, National Center for Toxicological Research, Jefferson, Ark. 72079, 501-541-4528.

General function of the committee. Advises on establishment and implementation of a research program that will assist the Commissioner of Food and Drugs and the Administrator, Environmental Protection Agency, in fulfilling their regulatory responsibilities.

Agenda.—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. Review and evaluation of program studying urine from animals with bladder cancer for mutagenicity; selection of mouse strains for mutagenicity testing; and HAM studies for detection of mammary tumors.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilities the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this FEDERAL REGISTER notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be obtained from the Public Records and Documents Center (HFC-18), 5600 Fishers Lane, Rockville, Md. 20857, between the hours of 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 14.

The Commissioner approves the scheduling of meetings at locations outside of the Washington, D.C., area on the basis of the criteria of 21 CFR 14.22 of FDA's regulations relating to public advisory committees.

Dated: August 5, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

[Docket No. 76F-0317]

NALCO CHEMICAL CO.

Withdrawal of Petition for Food Additives

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document announces the withdrawal without prejudice of the petition (FAP 5A3026) proposing the safe use of poly(*N*-methylethylene ammonium) chloride as a processing aid in the manufacture of silica and silicates intended for food additive use.

FOR FURTHER INFORMATION CONTACT:

John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, DC 20204 (202-472-5690).

SUPPLEMENTARY INFORMATION: Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409 (b), 72 Stat. 1786 (21 U.S.C. 348(b))), the following notice is issued:

In accordance with § 171.7 *Withdrawal of petition without prejudice* of the procedural food additive regulations (21 CFR 17.7, formerly § 121.52, prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), Nalco Chemical Co., 180 North Michigan Ave., Chicago, Ill. 60601, has withdrawn its petition (FAP 5A3026), notice of which was published in the FEDERAL REGISTER of September 10, 1976 (41 FR 38540), proposing that the food additive regulations be amended to provide for the safe use of poly (*N*-methylethylene ammonium) chloride as a processing aid in the manufacture of silica and silicates intended for food additive use.

Dated: August 2, 1977.

HOWARD R. ROBERTS,
Acting Director, Bureau of Foods.

[FR Doc.77-22981 Filed 8-11-77;8:45 am]

[Docket No. 77N-0150]

PHENFORMIN HYDROCHLORIDE

Hearing and Prehearing Conference

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces a formal evidentiary public hearing, and a prehearing conference, on factual issues relating to the proposed withdrawal of approval of the new drug applications (NDA's) described below for drug products for human use containing phenformin hydrochloride, marketed by Geigy Pharmaceuticals, Division of Ciba-Geigy Corp., Ardslay, N.Y. (Ciba-Geigy) and USV Laboratories, Division of USV Pharmaceutical Corp., Tuckahoe, N.Y. (USV).

DATES: Prehearing conference August 30, 1977, beginning at 9 a.m.; written notices of participation must be received by August 26, 1977.

ADDRESSES: The prehearing conference and hearing will be held in the FDA Hearing Room, Room 4A-35, 5600 Fishers Lane, Rockville, Md. 20857; written notices of participation identified by the above-designated docket number should be submitted to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857 (to facilitate identification, the envelope containing the notice should be clearly labeled "Phenformin Hearing").

FOR FURTHER INFORMATION CONTACT:

Tenny Neprud, Compliance Regulations Policy Staff (HFC-10), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-3480).

RELATED ACTION: In the FEDERAL REGISTER of April 29, 1977 (42 FR 21845), the Commissioner of Food and Drugs announced a public hearing, to be held on May 13, 1977, to receive information and views on the issue of whether the drug phenformin, as currently labeled, constitutes such a hazard that the Secretary of Health, Education, and Welfare should be advised to invoke the "imminent hazard" clause of section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) to remove the drug from the market immediately (Docket No. 77N-0147). After the hearing, and after receiving and reviewing the Commissioner's recommendations, the Secretary, on July 25, 1977, suspended approval of the NDA's for phenformin until completion of administrative proceedings on the withdrawal of these applications (Docket No. 77N-0150) or until termination of these proceedings upon other appropriate action that precludes general marketing of the drug.

SUPPLEMENTARY INFORMATION: A notice of opportunity for a hearing was published in the FEDERAL REGISTER of May 6, 1977 (42 FR 23170), on the proposal of the Director of the Bureau of Drugs to withdraw approval of the following NDA's and all amendments and supplements thereto:

NDA 11-624; DBI (phenformin) Tablets; Geigy Pharmaceuticals, Division of Ciba-Geigy Corp., Ardslay, N.Y. 10502.

NDA 12-752; DBI-TD (phenformin) Capsules; Geigy Pharmaceuticals.

NDA 17-126; Meltrol-25 (phenformin) Tablets; USV Laboratories, Division of USV Pharmaceutical Corp., Tuckahoe, N.Y. 10707.

NDA 17-127; Meltrol-50 (phenformin) Capsules; USV Laboratories.

This action was taken on the grounds that evidence of clinical experience which was not contained in the NDA's or not available until after the NDA's were approved, shows that such drugs are not shown to be safe for use under the conditions of use on the basis of which the NDA's were approved. In the Director's view, there was a clear association demonstrated between the use of phenformin and the occurrence of lactic acidosis, as reflected in numerous reports submitted to FDA and in the medical literature. Lactic acidosis is a potentially fatal metabolic disorder in which abnormal amounts of lactic acid accumulate in the blood. The notice of opportunity for hearing invited the submission of written requests for a hearing by June 6, 1977, and data, information, and analyses justifying a hearing, as well as comments on the proposed withdrawal of approval, by July 5, 1977.

Requests for hearing and extensive material in support of the hearing requests were received from Ciba-Geigy and USV, and a hearing on the proposed withdrawal of the NDA's is hereby granted. The parties to the hearing will be the Bureau of Drugs of the Food and Drug Administration, Ciba-Geigy, and USV. The hearing will be open to the public.

The Secretary's order of July 25 declaring phenformin an imminent hazard described a limited patient population for whom the Secretary and the Food and Drug Administration believe the benefits of phenformin therapy may outweigh the risks. The Secretary directed the Commissioner to begin discussions with the manufacturers of the drug and with the appropriate professional associations to devise a voluntary controlled distribution system that would assure the continued availability of the drug to that limited population alone, while removing the drug from general marketing.

Discussions with representatives of organizations interested in resolving the question of the feasibility of a limited distribution program began on July 25. The organizations invited to participate in these discussions are as follows: Ciba-Geigy; USV; Lilly Pharmaceuticals; Squibb Pharmaceutical Corp.; American Medical Association; American Diabetes Association; American Pharmaceutical Association; Committee for the Care of the Diabetic; and the Health Research Group. Lilly Pharmaceuticals and Squibb Pharmaceutical Corp. were included because they are the major manufacturers of insulin, one alternative mode of therapy available to certain patients who are removed from phenformin. The Health Research Group was included because it is the organization that petitioned the Secretary to declare phenformin an imminent hazard; that petition was granted on July 25 when the Secretary issued his order. These discussions are continuing by means of a series of weekly meetings, and there appears to be a possibility that agreement may be reached on a limited distribution program in the near future.

Because of these discussions, the outcome of which may affect the number and scope of factual issues to be resolved at the evidentiary hearing, the specific issues for that hearing cannot be identified at this time, as required by 21 CFR 12.35(a) (4) and (5). Accordingly, those provisions are waived pursuant to 21 CFR 10.19. One of the purposes of the prehearing conference, therefore, will be to identify and agree upon the issues of fact which as of that date remain unresolved. The issues for the hearing will be initially determined by the presiding Administrative Law Judge, Daniel J. Davidson, after consultation with the participants, and thereafter subject to the approval of the Commissioner. The Commissioner notes that participation in the discussions referred to above is independent of this withdrawal proceeding and therefore does not dispense with the requirement for filing a notice of participation in accordance with 21 CFR 12.45(a), as modified by this notice. The participants are encouraged to file, on or before August 26, 1977, memorandum setting forth the factual issues that they believe are appropriate for resolution at the hearing, together with the reasons that justify inclusion of such issues for consideration at the hearing.

Further, the Commissioner is aware that there has been discussion among the Bureau of Drugs, Ciba-Geigy, and USV that any issues remaining to be resolved at a formal evidentiary public hearing might, in lieu thereof, be considered and determined by a Public Board of Inquiry in accordance with 21 CFR Part 13. In order that the opportunity for such an alternative form of public hearing not be foreclosed, the Commissioner, pursuant to 21 CFR 10.19, is also waiving the requirement in 21 CFR 12.32(b)(3) that a request for an alternative form of public hearing be submitted prior to publication of this notice of hearing. The publication of this notice, therefore, shall not preclude submission by Ciba-Geigy and USV of a request for hearing before a Public Board of Inquiry. Such a request shall be received not later than August 26, 1977, and pursuant to 21 CFA 12.32(b)(4)(ii), shall be in the form of a waiver of the right to an opportunity for a formal evidentiary hearing conditioned upon the Commissioner's granting a hearing before a Public Board of Inquiry. The

filing of a request for such an alternative form of public hearing shall not eliminate the necessity for the filing of a notice of participation in the formal evidentiary public hearing on or before August 26, 1977. In the event the Commissioner, in response to a request by both Ciba-Geigy and USV, concludes, in his discretion, that a hearing before a Public Board of Inquiry is acceptable, he will withdraw this notice and publish in the FEDERAL REGISTER a notice, in accordance with 21 CFR 12.32(e), announcing a public hearing before a Public Board of Inquiry.

Pursuant to 21 CFR 10.19, the following additional modifications in the procedures, which may be further amended at the prehearing conference, are hereby adopted to expedite the hearing:

1. Section 10.20(e) (21 CFR 10.20(e)) is modified to require all filings and submissions to be received on or before the due date, without reference to the postmark.

2. Section 12.35(a)(8) (21 CFR 12.35 (a)(8)) is modified to provide that the prehearing conference may commence as specified herein.

3. Section 12.35(a)(9) (21 CFR 12.35 (a)(9)) is modified to provide that this notice need not list the contents of the administrative record of this proceeding.

4. Section 12.45(a) (21 CFR 12.45(a)) is modified to provide that written notices of participation must be received by the Hearing Clerk, Food and Drug Administration, not later than August 26, 1977.

5. Section 12.85 (a) and (b) (21 CFR 12.85 (a) and (b)) is modified to provide that the date for submission of data and narrative statements by all participants (including the Bureau of Drugs) be determined at the prehearing conference.

6. Section 12.92(a)(2) (21 CFR 12.92 (a)(2)) is modified to read as follows:

Each participant shall bring to the prehearing conference, and file with the Hearing Clerk, a list of potential witnesses whose testimony may be offered at the hearing, together with a full curriculum vitae for each such witness. A date for the exchange and filing of the final list of witnesses shall be determined at the prehearing conference.

The participants should be prepared, at the prehearing conference, to discuss any changes in the procedural rules that they believe would further expedite the hearing. The hearing will take place in the FDA Hearing Room on a date to be determined at the prehearing conference.

Any participant may appear in person, or with counsel or other qualified representative, and may be heard with respect to matters relevant to the issues under consideration. The participation of nonparties shall be governed by 21 CFR 12.89.

Dated: August 9, 1977.

SHERWIN GARDNER,
Acting Commissioner of Food and Drugs.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration Bureau of East-West Trade

COMPUTER PERIPHERALS, COMPONENTS, AND RELATED TEST EQUIPMENT TECHNICAL ADVISORY COMMITTEE

Notice of Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. 1 (Supp. V, 1975), notice is hereby given that a meeting of the Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee will be held on Tuesday, September 21, 1977, at 9:00 a.m. in Room 5230, Main Commerce Building, 14th and Constitution Avenue NW., Washington, D.C.

The Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974 and January 13, 1977, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to computer peripherals, components and related test equipment, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.

The Committee meeting agenda has six parts:

GENERAL SESSION

(1) Opening remarks by Rauer H. Meyer, Director, Office of Export Administration.
(2) Election of Chairman.
(3) Presentation of papers or comments by the public.
(4) Comments on the review of the Export Administration Regulations.
(5) Discussion of work program, including classification methods for foreign availability and technical classification.

EXECUTIVE SESSION

(6) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (6), the Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 27, 1977, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of the national defense or foreign policy. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under Executive Order 11652. All Committee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Room 3012, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

The complete Notice of Determination to close portions of the series of meetings of the Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER on February 8, 1977, (42 FR7978).

Dated: August 9, 1977.

RAUER H. MEYER,
Office of Export Administration, Bureau of East-West Trade, United States Department of Commerce.

Economic Development Administration

DORN SHIRT CO.

Petition for a Determination of Eligibility To Apply for Trade Adjustment Assistance

A petition by Dorn Shirt Co., 314 North 13th Street, Philadelphia, Pa. 19107, a producer of ladies' shirts, was accepted for filing on August 8, 1977, pursuant to section 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315). Consequently, the U.S. Department of Commerce has initiated an investigation to determine whether increased imports into the United States of articles like or directly competitive with those produced by the firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of the petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, on or before August 22, 1977.

JACK W. OSBURN, JR.,
Chief, Trade Act Certification Division, Office of Planning and Program Support.

National Oceanic and Atmospheric Administration

ALASKA DEPARTMENT OF FISH AND GAME

Issuance of Permit To Take Marine Mammals

On May 3, 1977, notice was published in the FEDERAL REGISTER (42 FR 22392) that an application had been submitted to the National Marine Fisheries Service by the Alaska Department of Fish and Game, Subport Building, Juneau, Alaska 99801, to take by killing three hundred sixty (360) animals, consisting of ninety (90) each of the following species: ringed seals (*Phoca hispida*), bearded seals (*Erignathus barbatus*), ribbon seals (*Phoca fasciata*), spotted seals (*Phoca vitulina largha*); and by marking the following number and species of animals: 200 ringed seals (*Phoca hispida*); 100 ribbon seals (*Phoca fasciata*); and 300 spotted seals (*Phoca vitulina largha*), over a period of three years, for the purpose of scientific research.

Notice is hereby given that, on July 26, 1977, and as authorized under the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407); the National Marine Fisheries Service issued a Scientific Research Permit for the above mentioned mammals to the Alaska Department of Fish and Game, subject to certain conditions specified therein. The Permit is available for review by interested persons in the following offices: Director, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.; and Regional Director, National Marine Fisheries Services, Alaska Region, P.O. Box 1668, Juneau, Alaska 99801.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

JULY 26, 1977.

MID-ATLANTIC FISHERY MANAGEMENT COUNCIL AND ITS SCIENTIFIC AND STATISTICAL COMMITTEE

Public Meeting

Notice is hereby given of meetings of the Mid-Atlantic Fishery Management Council established by Section 302, and the Council's Scientific and Statistical Committee established by Section 302(g) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265).

The Mid-Atlantic Fishery Management Council has authority, effective March 1, 1977, over fisheries within the fishery conservation zone adjacent to the States of New York, New Jersey, Delaware, Pennsylvania, Maryland, and Virginia. The Council will, among other things, prepare and submit to the Secretary of Commerce fishery management plans with respect to fisheries within its area of authority, prepare comments on foreign fishing applications, and conduct public hearings.

The Scientific and Statistical Committee assists the Council in the development, collection, and evaluation of such statistical, biological, economic, social, and other scientific information as is relevant to the Council's development and amendment of fishery management plans.

The meeting of the Scientific and Statistical Committee will be held on September 12 and 13, 1977, from 9:30 a.m. to 4:00 p.m. and 9:00 a.m. to 3:00 p.m., respectively, at the Sheraton-Fountainebleau Inn, 10100 Ocean Highway, Ocean City, Maryland 21842. The meeting may be extended or shortened depending on progress on the agenda.

Proposed Agenda:

1. Mackeral Management Plan;
2. Butterfish; and
3. Other Business.

This meeting is open to the public and there will be seating for approximately 20 public members available on a first-come, first-served basis.

The meeting of the Council will be held on September 14 and 15, 1977, 9:00 a.m. to 3:00 p.m. at the Sheraton-Fountainebleau Inn, 10100 Ocean Highway, Ocean City, Maryland 21842. The meeting may be extended or shortened depending on progress on the agenda.

Proposed Agenda:

1. Squid Management Plan;
2. Scallop Management Plan;
3. Report of foreign fishing activity;
4. Status of fishery management plans; and
5. Other management business.

This meeting is open to the public and there will be seating for approximately 30 public members available on first-come, first-served basis.

Members of the public having an interest in specific items for discussion are also advised that agenda changes are at times made prior to the meetings. To receive information on changes, if any, made to the agendas, interested members of the public should contact on or about September 2, 1977:

Mr. John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, Room 2115—Federal Building, North and New Streets, Dover, Del. 19901.

At the discretion of the Council and its Committee, interested members of the public may be permitted to speak at times which will allow the orderly conduct of business. Interested members of the public who wish to submit written comments should do so by addressing Mr. John C. Bryson at the above address. To receive due consideration and to facilitate inclusion of these comments in the record of the meeting, typewritten settlements should be received within 10 days after the close of the meeting.

Dated August 9, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

MINNESOTA ZOOLOGICAL GARDEN

Issuance of Permit To Take and Import Marine Mammals

On July 1, 1977, notice was published in the FEDERAL REGISTER (42 FR 33786), that an application had been filed with the National Marine Fisheries Service by Minnesota Zoological Garden, 12101 Johnny Cake Ridge Road, Apple Valley, Minnesota 55124, for a permit to take and import four (4) beluga whales (*Delphinapterus leucas*) for public display.

Notice is hereby given that on August 3, 1977, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a Permit for the above taking and importing to Minnesota Zoological Garden, subject to certain conditions set forth therein. The Permit is available for review by interested persons in the following offices: Director, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.; and Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Mass. 01930.

Dated: August 3, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

NAVAL OCEAN SYSTEMS CENTER

Issuance of Permit To Take and Import Marine Mammals

On January 31, 1977, notice was published in the FEDERAL REGISTER (42 FR 5742), that an application had been filed with the National Marine Fisheries Service by Naval Ocean Systems Center, Department of the Navy, San Diego, Calif. 92152, for a Permit to conduct scientific research with a specified number of marine mammals.

Notice is hereby given that on July 26, 1977, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a Permit for the above taking and importing to Naval Ocean Systems Center, Department of the Navy, subject to certain conditions set forth therein. The Permit is available for review by interested persons in the following offices:

Director, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.
Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, Calif. 90731.
Regional Director, National Marine Fisheries Service, Northwest Region, 1700 Westlake Avenue North, Seattle, Wash. 98109.
Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Gandy Boulevard, St. Petersburg, Fla. 33702.
Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Mass. 01930.
Regional Director, National Marine Fisheries Service, Alaska Region, P.O. Box 1668, Juneau, Alaska 99801.

Dated: July 26, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

WESTERN NOVELTY CO., INC.

Pre-Act Endangered Species Products, Issuance of Certificate of Exemption

On June 29, 1977, notice was published in the FEDERAL REGISTER (42 FR 33051) that an application had been filed with the National Marine Fisheries Service by Western Novelty Co., Inc. of Portland, Oreg. for a Certificate of Exemption to engage in certain commercial activities with respect to its declared inventory of pre-Act endangered species products.

Notice is hereby given that on August 8, 1977, as authorized by the provisions of the Endangered Species Act of 1973, as amended, (Pub. L. 94-359), and the regulations issued thereunder (50 CFR Part 222, Subpart B), the National Marine Fisheries Service issued a Certificate of Exemption to Western Novelty Co., Inc., 124 Burnside, Portland, Oreg. 97209.

The Certificate of Exemption is available for review during normal business hours in the Office of the Enforcement Division, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C. 20007.

Dated: August 8, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

[Department Organization Order 10-1; Amdt. No. 2]

Office of the Secretary

ASSISTANT SECRETARY FOR SCIENCE AND TECHNOLOGY

Delegation of Authority

EFFECTIVE DATE: July 29, 1977.

This order effective July 29, 1977, further amends the material appearing at 41 FR 18536 of May 5, 1976, and 41 FR 26593 of June 28, 1976.

Department Organization Order 10-1 of April 9, 1976 is hereby further amended as shown below. The purpose of this amendment is to delegate to the Assistant Secretary for Science and Technology the authority to administer a voluntary consumer product information labeling program at the Department.

1. SEC. 3. *Delegation of authority.* A new subparagraph .01h is added, and paragraph .03 is revised to read as follows:

"h. Exercise the functions of the Secretary of Commerce in administering a voluntary consumer product information labeling program as described in the procedures pertaining to such a program which are set out in Part 16 of Title 15 of the Code of Federal Regulations (42 FR 26647-26651, dated May 25, 1977), except for the function of issuing the annual report called for by section 16.14 of those procedures."

".03 The Assistant Secretary may delegate authorities except for the authority to issue or approve regulations and except that redelegation of other authorities in subparagraphs c., d., g., and h. of paragraph .01 above shall be limited to the Deputy Assistant Secretaries provided herein."

ELSA A. PORTER,
Assistant Secretary
for Administration.

[FR Doc.77-23364 Filed 8-11-77;8:45 am]

[Department Organization Order 25-5B; Amdt. No. 5]

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Delegation of Authority

Effective date: July 20, 1977.

This order effective July 20, 1977, further amends the material appearing at 41 FR 795 of January 5, 1976, 41 FR 36061 of August 26, 1976, 41 FR 43753 of October 4, 1976, 41 FR 50318 of November 15, 1976, and 42 FR 11862 of March 1, 1977.

Department Organization Order 25-5B, dated December 4, 1975, is hereby further amended as shown below. The purpose of this amendment is to transfer the directives management function from the Administrative Operations Division to the Office of Management and Computer Systems, (paragraphs 8.01 and 8.02).

SEC. 8. *Assistant Administrator for Administration.* Paragraphs .01 and .02 are revised to read as follows:

.01 The Administrative Operations Division shall perform the following functions: procurement and grants management; property and supply management; paper work management; records and files management; space and facilities management; travel and traffic management; mail, messenger, and related office services; graphic services; safety; security; and processing of tort claims.

.02 The Office of Management and Computer Systems shall conduct studies and provide analytical assistance to develop or improve the organization and staffing structure and other management systems within NOAA; provide management staff services in the application of advanced management principles and techniques; carry out the NOAA committee, directives and reports management functions; develop and maintain a central system for collecting, analyzing, presenting and disseminating information on program status and performance; develop systems for measuring productivity and performance; exercise overall management, planning and coordination of NOAA's automatic data processing and telecommunications needs and facilities, including serving as the focal point within NOAA for intra- and inter-agency matters, and the review and evaluation of proposals for automatic data processing and telecommunications requirements and systems; coordinate the Federal planning program for environmental telecommunications systems; and engage in research into advanced system concepts and apply or provide guidance in the application of these concepts. It shall provide systems analysis and programming support to NOAA's executive and administrative management functions and to other NOAA functions as requested, and shall operate and provide system and special software support for automatic data processing facilities for all NOAA components except where separate facilities are approved.

W. N. HESS,
Acting Administrator, National
Oceanic and Atmospheric
Administration.

Approved:

ELSA A. PORTER,
Assistant Secretary
for Administration.

[Department Organization Order 20-2]

OFFICE OF AUDITS

Functions and Organization

JULY 21, 1977.

Effective date: July 21, 1977.

This order effective July 21, 1977, supersedes the material appearing at 37 FR 24051 of November 11, 1972, and 38 FR 30757 of November 7, 1973.

SEC. 1. *Purpose.* .01 This order prescribes the functions and organization of the Office of Audits.

.02 This revision reflects the transfer of the Interagency Auditor Training Center to the Office of Audits (subparagraph 5.06), and generally updates the language of the Order.

SEC. 2. *Status and line of authority.* The Office of Audits, a Departmental office, shall be headed by a Director, who shall report and be responsible to the Assistant Secretary for Administration.

SEC. 3. *Functions.* .01 Pursuant to the authority vested in the Assistant Secretary for Administration by Department Organization Order 10-5, and subject to such policies and directives as the Assistant Secretary for Administration may prescribe, the Office shall conduct audits of all organizational units of the Department except as the Assistant Secretary for Administration may otherwise determine with respect to particular auditing tasks for designated organizational units. The audits may (a) encompass the operating, administrative, Automatic Data Processing (ADP), and financial activities of units, including the administration for compliance with applicable law, economy and efficiency, and achievement of desired results, or (b) concern selected claims, costs, cost proposals, and cost and pricing data arising from contracts, grants, subsidies, loans or other similar agreements entered into, or proposed by, organizational units. The Office may also, by agreement, conduct audits for other Government organizations on a reimbursable basis, with the approval of the Assistant Secretary for Administration.

.02 The Director of Audits shall be the adviser to, and serve as the representative of, the Assistant Secretary for Administration on all internal and external audit matters of the Department, and shall serve as adviser to other Departmental officials with respect to these matters. The Director shall represent the Department in conferences and negotiations with officials of other Federal agencies or other groups with respect to audit matters.

.03 The Director of Audits shall be responsible for the Interagency Auditor Training Center (IATC). Subject to such policies and directives as the Director of Audits may prescribe, the Director, Interagency Auditor Training Center shall be responsible for the day-to-day management and operation of the Center.

SEC. 4. *Specified authority.* In addition to the authority implicit in and essential to carrying out the functions assigned the Office, the Director of Audits is expressly delegated the authority to arrange with other Federal, State and local agencies, and other organizations, to make external audits.

SEC. 5 *Organization.* Under the direction and supervision of the Director, Office of Audits, the functions of the Office shall be organized and carried out as provided below:

.01 The Deputy Director of Audits shall be the chief operating aide to the Director of Audits on substantive audit matters and shall be responsible for managing the audit staff. In consultation and cooperation with the Office of Personnel, the Deputy Director shall be responsible to the Director of Audits for obtaining a high quality professional staff, for developing and prescribing programs designed to further the career development of individual staff members, and for obtaining appropriate recognition of the professional character of the work done by members of the audit staff. The Deputy Director shall perform such other duties and assignments as the Director of Audits may prescribe. The Deputy Director shall also perform the functions of the Director in the latter's absence.

.02 The Program, Planning and Review Staff shall develop (a) policies, procedures, and standards for planning, programming, executing, and reporting on all internal audits, and (b) policies and procedures for all management and administrative matters for the Office of Audits. It shall coordinate, review and revise, as appropriate, individual audit programs and audit plans applicable to internal audits prepared by the operating divisions in the Office; maintain surveillance, through audit site visits, reports and conferences, over internal audits in process to determine compliance with approved policies, plans, and programs; post-review selected internal audits in detail as a quality control; review, reference, edit, and process internal audit reports, maintain follow-up on all audit findings and recommendations; coordinate responses to and comments on General Accounting Office reports; and carry out such other duties and assignments as the Director of Audits may prescribe.

.03 The External Audit Policy Staff shall develop Departmentwide policies, procedures, and standards for the execution of and reporting on all external audits. It shall maintain surveillance, through audit site visits, reports and conferences, over external audits in process to determine compliance with established policies; post-review selected external audits in detail as a quality control; maintain follow-up on external audit recommendations; in consultation with Regional Offices, prepare standard audit guides and standard audit programs for accounting systems surveys and financial audits for all Departmental contracts and grant and loan programs; maintain liaison with other Federal agencies and other groups on all matters pertaining to external audits; and carry out such other duties and assignments as the Director may prescribe.

.04 The Internal Audit Divisions shall carry out, on a cyclical basis, comprehensive audits of the operating, administrative, ADP, and financial activities of organizational units, or special audits relating thereto. Each Audit Division is assigned, as specified below, a group of

organizations of the Department which normally it will audit:

Division and Organizations to Audit

Internal Audit Division 1—National Bureau of Standards, National Oceanic and Atmospheric Administration, National Technical Information Service, Office of Telecommunications, Patent and Trademark Office.

Internal Audit Division 2—Domestic and International Business Administration Maritime Administration; Bureau of the Census; Bureau of Economic Analysis; United States Travel Service; National Fire Prevention and Control Administration.

Internal Audit Division 3—Economic Development Administration; Office of Minority Business Enterprise; Office of the Secretary; Regional Commissions.

.05 The Regional Offices (located in Atlanta, Chicago, Dallas, New York, San Francisco, and Washington, D.C.) shall carry out, or arrange for, site audits of documentation in support of claims, costs, cost proposals, and cost and pricing data arising from selected contracts, grants, subsidies, loans, and other similar agreements, entered into or proposed by organizational units. The Regional Offices shall carry out or arrange for site audits of contracts, grants or similar agreements, or proposals thereto, as requested by the Department officials and agreed to by the Director of Audits. The Regional Offices shall make any necessary arrangements with other Federal, State, and local agencies, or with any other organizations, for the performance of audits of such contracts, grants, or other agreements, on a reimbursable or other basis, and shall prescribe the scope of such audits and maintain liaison with the auditing agency or organization. The Regional Offices will carry out such other duties and assist in performing internal audits as the Director may prescribe.

.06 The Interagency Auditor Training Center shall conduct interagency training oriented to the specific needs of the Government auditor by making available a comprehensive training program specifically designed to satisfy the training needs of Government audit offices. The Center is operated as an independent reimbursable cost center under a working capital fund arrangement with all costs of the Center recovered through tuition charges. The Director of Audits shall act as Chairman of the IATC Board of Directors, which is composed of representatives of IATC sponsoring offices, and convene the Board, as appropriate, to discuss and provide advice on broad policies and problems related to the operation of the Center.

ELSA A. PORTER,
Assistant Secretary for Administration.

United States Travel Service

INTERNATIONAL TRAVEL PROMOTIONAL PROJECTS

Availability of Matching Funds

Notice is hereby given to state and local government and non-profit organizations that the United States Travel Service (USTS) will have available matching funds for international travel promotional projects during the 1978 Fiscal Year budgetary period, October 1, 1977 through September 30, 1978.

Applicants must use the USTS application form, SF-424. The substantive regulations governing the program appear in the Code of Federal Regulations, Volume 15, Part 1200 (15 C.F.R. Part 1200). The guidelines governing administrative requirements are contained in Federal Management Circular 74-7; the guidelines covering allowable and non-allowable costs are found in Federal Management Circular 74-4. Applications for these funds must be postmarked by September 26, 1977. Interested parties may obtain the above documents upon written request to:

Grants Office, United States Travel Service, U.S. Department of Commerce, Washington, D.C. 20230.

Due to the funding level authorized for matching grants in Fiscal Year 1978 and the numbers of applications anticipated, the added limitations listed below will apply.

I. LIMITATIONS

A. Only one award will be granted per applicant, with two exceptions:

1. Individual applicants may also participate in one additional regional application; and

2. States are eligible for two grants provided that at least one of the proposed projects is a cooperative effort between the State and one or more major cities in the State.

B. Applications must be limited to one of the following seven international tourism projects:

1. Advertising;
2. Tour Development;
3. Visitor Facilitation;
4. Research;
5. Media Product Information;
6. Travel Trade Development;
7. International Convention Sales.

C. Projects may be conducted in one market country only.

D. The maximum amount available for matching consideration will be $10,000. The minimum amount for which one may apply is $2,500, excepting International Convention Sales.

E. All applications will be evaluated and rated on a scale of 1 to 100 points based on general criteria (50 points) and specific project criteria (50 points).

II. GENERAL CRITERIA

The general criteria, based on the completeness of information required on the grant application form, will carry a value of up to 50 points. Particular emphasis should be placed on Part III, the Program Narrative Statement, and Part IV, Assurances. Incomplete documentation will result in point deduction.

Grant applications for advertising, tour development, travel trade development and media product information *must* include information indicating that the marketing strategies for these projects were based on travel marketing research.

III. SPECIFIC CRITERIA

Specific criteria applicable to the particular project proposal will carry a value of up to 50 points.

A. *Advertising.* Advertising applications should provide planned campaign details including sample layouts, copy and specific media plans. If these materials are not available, a general outline of media plans and objectives will be accepted, provided that specific campaign details are forwarded to the Grants Office prior to their actual placement in the media.

Applications for advertising grants will be evaluated according to the following:

1. Adequacy of the applicant's basic marketing approach (25 points), including: a. Existence of economic, marketing and statistical data necessary to develop marketing and advertising strategy, and b. Creative interpretation of this strategy; and
2. Expected reach of the project in relation to its cost and short-term impact on the market (25 points).

B. *Tour Development.* Applications for tour development grants will be evaluated according to the following:

1. Planning of the travel mission (25 points), including:
   a. Focus upon gaining the interest of qualified foreign wholesalers, and
   b. Effort made to educate foreign retail outlets on the benefits and features of tour destinations to be sold; and
2. Implementation of the program (25 points), including:
   a. Time frame as it relates to the projected results, and
   b. Tourists and revenues produced in relation to project cost (a minimum of 25-1 return on investment is suggested).

C. *Visitor Facilitation.* Visitor facilitation programs include the establishment of such local services as language interpretation facilities; hospitality services for foreign visitors (training of hotel, restaurant, local transportation employees, etc.); use of international signs and symbols; and the establishment of currency exchange facilities within the local banking community.

Applications for visitor facilitation grants will be evaluated according to the following:

1. A determination of need for the services proposed based on number of visitors who will use them (20 points);
2. The plan designed to implement the project (10 points);
3. The availability of resources necessary to complete the proposed project (10 points); and

4. The long-term viability of the project or service without the need for additional Federal funding (10 points).

D. *Research.* Applications for research grants will be evaluated according to the following:

1. Demonstration of need for this type of research; expected results; compatibility of project with total economic development plan of the community; coordination of project with other organizations; and project follow-up (5 points);
2. Compatibility with national and international tourism issues (5 points);
3. Need for assistance in applicant's area and potential for tourism development in the area (20 points);
4. Quality and reliability of data-gathering techniques to be utilized (15 points); and
5. Value of project in terms of its contribution and usefulness to those who may wish to use it as a model in their efforts to undertake similar projects (5 points).

E. *Media Product Information.* Media product information projects include the development of familiarization tours for journalists, dissemination of product information on the destination, and identification of the best media approaches.

Applications for media product information grants will be evaluated according to the following:

1. Program content and potential acceptance by the target media (20 points);
2. Correlation of media program with applicant's overall tourism marketing strategy (20 points); and
3. Project cost versus media space time return (a minimum 10-1 return on investment is suggested) (10 points).

F. *Travel Trade Development.* Travel Trade Development projects are those which support ongoing marketing programs directed toward the members of the travel trade industry in foreign market countries.

Applications for travel trade development grants will be evaluated according to the following:

1. Techniques designed to create an awareness and encourage selling of the destination to the consumer (15 points);
2. Implementation time and project life after grant expiration (15 points); and
3. Goals of program and method proposed to measure program results (20 points).

G. *International Convention Sales.* The following conditions apply to all international convention grants:

1. Applications will be considered only for equipment and services to provide simultaneous language translations at international meetings;
2. The international meeting must have an expected registration of at least 50 foreign participants;
3. Funding may not exceed $10,000 or half the cost of the services and equipment, whichever is less. Allowable funding is as follows: a. $10.00 per foreign participant from 50 to 500, b. $5.00 per foreign participant from 501 to 1,000, and c. $2.50 per foreign participant over 1,001;
4. The final technical report must include a listing, by country, of the numbers of foreign participants.

Applications for international convention sales grants will be evaluated according to the following:

1. Verification that the group is an international convention (5 points);
2. Verification that the international convention has a valid U.S. affiliate (5 points);
3. Coordination with USTS in site decision (25 points);
4. Number of foreign attendees (5 points);
5. Estimated revenue (5 points); and
6. Capability of destination area to accommodate convention participants (5 points).

SONYA J. GILLIAM,
Management Information Assistant, Office of State City Affairs, U.S. Travel Service.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1977

Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to procurement list.

SUMMARY: This action adds to procurement list 1977 commodities to be produced by workshops for the blind or other severly handicapped.

EFFECTIVE DATE: August 12, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION CONTACT:

C.W. Fletcher (703-557-1145).

SUPPLEMENTARY INFORMATION: On June 24, 1977, and April 22, 1977, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (42 FR 32288 and 20844) of proposed additions to procurement list 1977, November 18, 1976 (41 FR 50975).

After consideration of the relevant matter presented, the Committee has determined that the commodities listed below are suitable for procurement by the Government under 41 U.S.C. 46-48(c), 85 Stat. 77.

Accordingly, the following commodities are hereby added to Procurement List 1977:

CLASS 7510

Board, Wall Calendar, 7510-00-789-2455

CLASS 7520

Book Ends (Steel, Beige) 7520-00-139-6158

C. W. FLETCHER,
Executive Director.

PROCUREMENT LIST 1977

Proposed Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed addition to procurement list.

SUMMARY: The committee has received a propsal to add to procurement list 1977 a commodity to be produced by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: September 15, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher (703-557-1145).

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

If the Committee approves the proposed addition, all entities of the Government will be required to procure the commodity listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodity to procurement list 1977, November 18, 1976 (41 FR 50975):

CLASS 8465

Necklace, Personal Identification 8465-00-[illegible]

C. W. FLETCHER,
Executive Director.

COUNCIL ON ENVIRONMENTAL QUALITY

ENVIRONMENTAL IMPACT STATEMENTS

August 1 Through August 5, 1977

The following is a list of environmental impact statements received by the Council on Environmental Quality from August 1 through August 5, 1977. The date of receipt for each statement is noted in the statement summary. Under Council Guidelines the minimum period for public review and comment on draft environmental impact statements is forty-five (45) days from this FEDERAL REGISTER notice of availability. (September 26, 1977) The thirty (30) day period for each final statement begins on the day the statement is made available to the Council and to commenting parties.

Copies of individual statements are available for review from the originating agency. Back copies are also available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

DEPARTMENT OF AGRICULTURE

Contact: Mr. Ernest Deck, Coordinator, Environmental Quality Activities, U.S. Department of Agriculture Room 307A, Washington, D.C. 20250 202-447-6827.

FOREST SERVICE

Draft:

Cougar Lakes Wilderness Study, Yakima, Lewis Counties, Wash., August 5: Proposed is the development of a long-term management direction for the Cougar Lakes Wilderness Study consisting of 176,791 acres. The preferred alternative proposes the classification of approximately 138,854 acres of National Forest land as wilderness under the

Wilderness Act of 1964. The area is within the Naches and Tieton Ranger Districts of the Mt. Baker-Snoqualmie National Forest and the Packwood Ranger District of the Gifford Pinchot National Forest. (ELR Order No. 70956.)

Final

Mohawk Unit Plan, Plumas and Tahoe National Forest, Plumas, Sierra Counties, Calif., August 2: This statement concerns six different land use plans located within portions of the Beckwourth, LaPorte and Quincy Ranger Districts (Plumas National Forest) and the Downieville Ranger District (Tahoe National Forest) in California. These land use plans apply to 120,620 acres of National Forest land. Approximately 1,365 acres of private land are planned for acquisition in Plumas County and approximately 1,135 in Sierra County. Comments made by: USDA, EPA, DOI, DOT, COE, AHP State and local agencies and concerned groups and individuals. (ELR Order No. 70944.)

Alpine Unit Plan, Toiyabe National Forest, California, Nevada, August 5: Proposed is a land use plan for the 221,529 acre Alpine Planning Unit, Toiyabe National Forest. The unit is located in Alpine County, California with smaller portions in Eldorado County, California and Douglas County, Nevada. The plan establishes objectives and policies for the land, water, air, recreation and wilderness, timber, range, wildlife, and human and community development resource systems. Temporary adverse effects will result on existing vegetation soil movement, air and water quality, and wildlife habitat. Comments made by: EPA, AHP, USDA, DOT, HEW, DOI, State and local agencies, and concerned individuals and groups. (ELR Order No. 70957.)

Big Creek Dam, Selway Bitteroot Area, Ravalli County, Mont., August 5: Proposed is the reconstruction of the existing Big Creek Dam in the 1,239,840-acre Selway-Bitteroot Wilderness, Montana. The statement discusses the importance of stored water provided by the dam in maintaining agricultural production on 5,250 acres of land owned by the 44 shareholders who operate the dam under special use permit. Alternative methods of reconstruction are analyzed, and the use of motorized equipment is proposed both for transporting materials to the site and in construction. Adverse impacts include disturbance of vegetation and soil, and subjection of the lake system and its fishery to unnatural water level fluctuations. Comments made by: USDA, DLAB, EPA, AHP, DOI, State and local agencies, and concerned groups and individuals. (ELR Order No. 70955.)

Green Mountain National Forest, Timber Management Plan, several counties, Vt., August 3: Proposed is a 10-year Management Plan for the Green Mountain National Forest to cover the period of January 1, 1977 to September 30, 1986. The program harvest for the period will average 69 percent of the potential yield, which is 206.6 M cunits of sawlogs and 256.0 M cunits of products annually. The plan also discusses silvicultural prescriptions, reforestation, timber stand improvement, transportation development, and protection. Adverse effects include the temporary degradation of the visual resource, and temporary increases in stream turbidity. Comments made by: EPA, DOI, State and local agencies, and concerned groups and individuals. (ELR Order No. 70947.)

RURAL ELECTRIFICATION ADMINISTRATION

Draft

Boardman Coal Plant, Morrow County, Oreg., August 4: Proposed is the use of REA financing by Pacific Northwest Generating Company for a 10% share of the Boardman Coal Plant and associated transmission and support facilities. The project includes a 1400-acre cooling reservoir, a 500-acre ash disposal area, a 500 kv transmission line (approximately 17 miles) and a 230 kv transmission line (approximately 17.5 miles). Operation of the unit will result in the emission of nitrogen and sulfur oxides. Transmission right-of-way will require approximately 1,650 acres of land for the 39 miles of lines. Air and noise pollution levels will be increased. (ELR Order No. 70949.)

SOIL CONSERVATION SERVICE

Draft

Pine Creek Watershed, Scott County, Tenn., August 3: Proposed is a watershed project to reduce floodwater damages to farmland and to floodplain within the city of Oneida, Tennessee. The plan calls for an increased amount of conservation land treatment; a multiple-purpose structure for flood prevention and municipal water supply; a multiple-purpose structure for flood prevention and recreation; and, channel work to increase design capacity and to incorporate improved SCS channel stability requirements. Adverse effects include the disturbance of 171 acres of flood plain. (ELR Order No. 70946.)

Tri-Creek Watershed, Monroe County, Wis., August 4: Proposed is a project for watershed protection, flood prevention, and recreational development in Monroe County, Wisconsin. To date, one floodwater retarding structure (No. 1) has been installed at a cost of about $1,039,000 and land treatment measures have been installed at a cost of about $104,700. The remaining planned works of improvement include conservation land treatment, four floodwater retarding structures, and one multiple-purpose structure for flood prevention and recreation. Adverse effects include increased air and noise pollution and the elimination of 32 acres of cropland, 66 acres of forestland, and 6 acres of grassland. (ELR Order No. 70951.)

DEPARTMENT OF DEFENSE, AIR FORCE

Contact: Col. Luis F. Dominguez, Departpartment of the Air Force, Room 5D 431, Pentagon, Washington, D.C. 20330, 202-697-7799.

Draft

MX: Buried Trench Construction and Test, Yuma County, Ariz., August 5: Proposed is the construction of two sections of underground tunnel in the San Cristobal Valley on the Luke Air Force Range in Yuma County, Arizona. The proposed construction project will provide essential cost and construction data to analyze conceptual protective structures for the mobile, land-based Intercontinental Ballistic Missile (ICBM) System known as MX. The trench will also serve as a test bed for mechanisms designed to punch through the tunnel roof and erect a dummy missile to simulate launch position. Long-term aesthetic degradation will result. (ELR Order No. 70954.)

DEPARTMENT OF DEFENSE, ARMY CORPS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Department, Attn: DAEN-CWR-P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue, SW., Washington, D.C. 20314, 202-693-6795

Draft

Lake Rebecca Park Development, Minnesota, August 2: Proposed is a plan for the enhancement of fish and wildlife values and the development of public use (recreation) facilities at Lake Rebecca, a backwater lake located in Hastings, Minnesota, adjacent to Lock and Dam No. 2 on the Mississippi River. This statement presents information concerning existing conditions on and related to the site, and a plan based upon the needs of the community, the capability of the resource, and the willingness of the local sponsor to participate. (St. Paul District.) (ELR Order No. 70942.)

Apra Harbor, Guam—Rivers and Harbors, Trust Territory of the Pacific, August 2: This statement examines the feasibility of expanding the existing port facilities and evaluates commercial navigation and related land resource problems in the Apra Harbor area, Guam. The proposed plan would provide additional berths by extending the existing bulkhead 400 feet eastward in a straight alignment and deepen the existing access channel to a project depth of −35 feet. The Channel would be dredged in a configuration 400 feet long and varying between 200 and 400 feet wide. (Pacific Ocean District.) (ELR Order No. 70937.)

Final

Black River Flood Control Project, Harnett County, N.C., August 1: Proposed is the construction of a 5.1 mile long, 35 foot bottom width channel to reduce flooding along the Black River near Dunn. Adverse effects include the loss of about 90 acres of bottomland through clearing and a possible reduction in the natural productivity of additional hardwood bottomlands, loss of natural resources in 5.8 miles of black water stream habitat, and degradation of Rhodes Pond. (Wilmington District.) Comments made by: USDA, HEW, EPA, USCG, concerned groups, and individuals. (ELR Order No. 70930.)

Supplement

Lake Brownwood, Pecan Bayou (S-2), Brown County, Tex., August 2: This statement supplements a final EIS filed with CEQ in September, 1975. Proposed is the construction of a composite earth filled embankment and protective measures for the spillway at Lake Brownwood on Pecan Bayou, Colorado River. The proposed project will preserve the present values of the lake for flood control, water supply, recreation, and other related purposes. The project will result in a major loss of agricultural production on 383 acres of cropland to be utilized as material for the embankment. (ELR Order No. 70938.)

ENVIRONMENTAL PROTECTION AGENCY

Contact: Please refer to the separate notice published by EPA in this issue of the FEDERAL REGISTER for the appropriate EPA contact.

Final

Grand Strand Region Wastewater System, Horry County, Ga., August 4: Proposed is the construction of regional wastewater facilities to service the Grand Strand 201 area in South Carolina. The project consists of 3 wastewater treatment facilities with accompanying outfall lines and interceptor systems. Plant A will be a 6.0 MGD facility discharging into the Intracoastal Waterway. Plants G and C will have capacities of 6.0 MGD and 2.4 MGD respectively discharging into the Waccama River. Adverse impacts include soil erosion and a decrease in biological productivity of the flood-plain. (Region IV.) Comments made by: COE, DOD, DOC, HEW DOI, HUD, State and local agencies, and interest groups. (ELR Order No. 70950.)

Des Moines 208 Waste Treatment, Dallas, Polk, and Warren Counties, Iowa, August 2: Proposed is the implementation of the Des Moines Metropolitan Areawide Waste Treatment Management Plan. The proposed plan includes structural and nonstructural programs for the control of point, intermittent point and nonpoint pollution sources. Temporary adverse effects resulting from construction activities will be the disruption

and relocation of wildlife, augmented construction noise levels, disturbance of existing vegetation, and disruption of existing land uses. (Region VII.) Comments made by: DOT, DOI, HEW, COE, USDA, State and local agencies, and concerned individuals. (ELR Order No. 70939.)

FEDERAL ENERGY ADMINISTRATION

Contact: Mr. Robert Stern, Director, Office of Environmental Programs, Federal Energy Administration, New Post Office Building, Room 7119, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, 202-566-9760.

Supplement

Naptha Allocation for SNG Production (S-1), Pike County, Ind., August 4: This statement is the "Conservation Supplement" to a Draft EIS filed with CEQ in December 1976 pertaining to the construction and operation of the proposed Indiana Gas Company's synthetic natural gas plant to be located in Pike Township, Indiana. The Federal Energy Administration determined that the DEIS should be supplemented by the inclusion of a conservation section, as a result of comments received on the draft. (ELR Order No. 70952.)

Weeks Island/Cote Blanche Mines (S-1) Iberia and St. Mary Counties, La., August 5: This statement supplements a final EIS filed with CEQ in January 1977, and relates to the development of an 80 million barrel crude oil storage facility at the Weeks Island Mine and a 27 million barrel crude oil storage facility at the Cote Blanche Island Mine. The oil transportation systems proposed in the Final EIS have been revised to provide direct connection by pipeline to the existing oil distribution system at St. James, Louisiana. This supplement is concerned with the construction and operation of this revised oil distribution system. (ELR Order No. 70958.)

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Contact: Mr. Richard H. Brown, Director, Office of Environmental Quality, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410, 202-755-6308.

Final

Belinda City Subdivision, Wilson Co., Wilson County, Tenn., August 2: Proposed is the granting of an application by Belinda City, Inc., a private development company, for HUD Subdivision Feasibility Analysis. The purpose of such application is to attempt to qualify proposed housing construction for FHA Home Mortgage Insurance and VA Home Loan Guarantees. The site of the proposed development is within two miles of the Nashville-Davidson County line, and its development will affect both Wilson and Davidson Counties in Middle Tennessee. Marginally productive agricultural and woodlands will be converted into a primarily residential community. Comments made by: FPC, HEW, DOT, USDA, TVA, COE, GSA, DOI, EPA, ERDA, State and local agencies, concerned groups, and individuals. (ELR Order No. 70934.)

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Contact: Dr. Myron S. Malkin, Director, Space Shuttle Program, National Aeronautics and Space Administration, Washington, D.C. 20546, 202-755-3247.

Draft

Space Shuttle Program (2), August 5: The proposed program entails the development of a reusable space shuttle system for carrying payloads to near-earth orbit and back to earth, production of the necessary vehicles, and operations beginning in 1979 and extending for at least a decade. This revision of a 1972 broad program statement considers systems design changes and other recently derived information in assessing environmental effects. Potential adverse effects include air pollution and noise from rocket exhausts at test and launch sites, sonic boom at launch and landing sites and a small decrease in stratospheric ozone concentration. (ELR Order No. 70961.)

NATIONAL CAPITAL PLANNING COMMISSION

Contact: Patricia Spillenkothen, Chief, Office of Environmental Affairs, National Capital Planning Commission, 1325 G Street, NW., Washington, D.C., 202-724-0215

Draft

Washington, D.C., Civic Center, District of Columbia, August 4: Proposed are a site location and program for the Washington, D.C. Civic Center and adoption of related modifications to the Comprehensive Plan and the Urban Renewal Plan. The action involves the transfer of jurisdiction over U.S. Reservation 174 from the National Park Service to the District of Columbia. The site consists of three privately held blocks and a small triangle of park land bounded by Ninth Street H Street, Eleventh Street, and New York Avenue, N.W., and has an area of 9.7 acres. The center will cover approximately 90% of the site and will consist of a ground level exhibit hall, two levels of meeting and restaurant space, and underground parking—approximately 896,500 gross square feet of enclosed floor area. (ELR Order No. 70941.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street, SW., Washington, D.C. 20590, 202-426-4357

FEDERAL HIGHWAY ADMINISTRATION

Draft

University Blvd., U.S. 90—Persons Dr., Mobile County, Ala., August 1: Proposed is the construction of sections of University (Highpoint) Boulevard, a north-south arterial route through the western area of the city of Mobile, Alabama. The project begins at U.S. Highway 90 and ends at Persons Drive North of U.S. Highway 98. The total length of the project, including sections already open to traffic is 7.8 miles; the length of sections remaining to be constructed is approximately 4.7 miles. The new facility will be a 5-lane urban highway with curb and gutter. Adverse effects include the relocation of as many as 9 families. (Region 4.) (ELR Order No. 70931.)

I-494, 24th Avenue—Miss R. Bridge, Minnesota, August 1: The proposed action provides for the construction of the only uncompleted section of the I-494 694 beltway route that encircles the Twin Cities metropolitan area. This section would be approximately 11 miles long and would pass through the cities of Bloomington, Eagan, Mendota Heights, Inver Grove Heights, Sunfish Lake, and South St. Paul. The proposed section of I-494 will be a 6-lane divided freeway. It will begin near 24th Avenue in Bloomington and extend eastward to the Mississippi River Bridge in South St. Paul. A 4(f) statement is included concerning portions of Fort Snelling State Park. (Region 5.) (ELR Order No. 70932.)

Corridors C and D, Rail Relocation, Lincoln, Lancaster County, Nebr., August 2: Proposed is a demonstration project to alleviate highway/rail conflicts, financed under Section 163 of the 1973 General-Aid Highway Act. The project covers Corridors C and D which are two of six proposed rail-corridor improvement programs for Lincoln, Nebraska designated as Corridors A-F. The Corridor C CR&P, UP and BN railroads, separate, parallel movements into a single common corridor. The relocation and consolidation will result in eliminating a total of 36 existing highway rail crossings. (ELR Order No. 70936.)

I-235 (Central Expressway), to I-35 and I-40, Oklahoma County, Okla., August 2: Proposed is the construction of a multi-lane, directionally-divided, controlled-access highway for the purpose of connecting the existing North Broadway Extension and Interstate 35/40 in Oklahoma City, Oklahoma. Also included in this proposal is the upgradings of the existing I-35 I-40 Interchange. Five I-235 alternatives and their respective impacts are discussed. Subject to the alternate selected, up to 180 acres of land would be acquired and up to 680 housing units, 54 businesses, and 8 institutions would be displaced. (Region 6.) (ELR Order No. 70940.)

Final

Columbus-Phenix City North Bypass, Alabama and Georgia, August 2: Proposed is the construction of a four-lane, limited access facility between an interchange just inside the Georgia line north of Columbus to State Route 85 (U.S. 27A). Approximately 10 households, and no businesses will be displaced. The Georgia project will ultimately link with Alabama project M-2022 and provide a limited access connector on the north side of the City of Columbus, Georgia and Phenix City, Alabama extending from S.R. 85 (Columbus-Manchester Expressway) in Georgia to U.S. 431 in Alabama. Comments made by: DOC, USDA, HUD, DOI, EPA, COE, and State and local agencies. (ELR Order No. 70935.)

Final

S.R. 43, Winona County, Minn., August 1: Proposed is a 6.6 mile relocation of Minnesota Highway 43 from Interstate 90 to Wilson to U.S. 61-14 in Winona. This two-lane highway is being proposed for reconstruction as a four-lane expressway with controlled access and having access points at selected sites along the route. Adverse effects include the acquisition of 75 acres of agricultural cropland, 55 acres of woodland, nine residences and three businesses. Also considered to be detrimental is 7,150 feet of channel change relocation. (Region 5.) Comments made by: DOI, HEW, COE, USDA, AHP, USCG, DOT, EPA, State and local agencies. (ELR Order No. 70933.)

Tellico Plains-Robbinsville Highway, North Carolina-Tennessee, August 4: Proposed is the completion of the Tellico Plains-Robbinsville Highway, Tennessee Federal-aid Secondary Route 165 and North Carolina Federal-aid Secondary Route 3023. The unconstructed portion approximately 19.2 miles in length extends from Santeetlah Gap in North Carolina to a point in Tennessee, 2.5 miles west of Beech Gap. About 16.7 miles of the proposal is located in Graham County, N.C., and 2.5 miles in Monroe County, Tenn. Construction will require the clearing of 307 acres of forest and the crossing of 13 live streams. (Region 4.) Comments made by: USDA, COE, DOC, EPA, FPC, GSA, HEW, DOI, ICC, OEO, TVA, State and local agencies. (ELR Order No. 70953.)

Everett Bypass, Bedford County, Pa., August 2: The proposed action is the construction of the Everett Bypass in Bedford County, Pa. The project consists of 2.5 miles of relocated U.S. 30 in conjunction with a 2.5 mile relocation of Pennsylvania Traffic Route 26 north of the Everett Borough business

district. The U.S. 30 relocation will be a 4-lane divided highway with limited access and the T.R. 26 relocation will be a 2-lane highway with free access. Adverse impacts include the displacement of 58 residential dwelling and 14 businesses and the elimination of 210 acres of forested and tillable agricultural land, and subsequently, an associated amount of wildlife habitat. (Region 3.) Comments made by: EPA, COE, USDA, DOI, HUD, State and local agencies, interest groups. (ELR Order No. 70943.)

Route 15 and Route 6 Relocations, Mansfield, Tioga County, Pa., August 3: The proposed highway improvements are intended to provide 4-lane limited access relocation of the portion of Traffic Route 15 from Sebring to Mansfield and Traffic Route 6 from east of Mansfield to west of Mansfield. The project will displace an unspecified number of families and businesses and will contribute to development along the route. (Region 3.) Comments made by: USDA, COE, HUD, GSA, EPA, FPC, DOT, DOI, State and local agencies. (ELR Order No. 70945.)

Supplement

I 95, Petersburg to I-64 Interchange (S-1), Henrico County, Va., August 1: This statement supplements a draft EIS filed with CEQ in July 1976. The proposed project is a coordinated action which involves the completion of Interstate Route 95 on new location from south of Petersburg to the vicinity of the proposed interchange of Interstate Route 95 and Interstate Route 64 in Henrico County east of Richmond which retains an Interstate connection between I-85 and I-95 south of Petersburg. The statement defines the need for the overall project and presents supplemental information on alternates in the northern part of the study area. (Region 3.) (ELR Order No. 70929.)

VETERANS ADMINISTRATION

Contact: For housing programs—Mr. Lyman T. Miller, Assistant Director for Construction and Valuation, Veterans Administration, 810 Vermont Avenue, Washington, D.C. 20420 (202-389-2691); Medicine and surgery—Mr. Jon E. Baer, Chief, Environmental Planning Division, Veterans Administration, Washington, D.C. (202-389-3316).

Draft

VA Cemetary at Riverside, Calif., Riverside County, Calif., August 3: Proposed is the development of a new cemetary for the interment of Veterans at Riverside, Calif. The 750 acre site will include approximately 500 burial acres with a capacity of 437,000 burials, plus additional space for columbariums: Initial construction will supply burial sites for 40,000 interments, and Administration Building, Maintenance Center, and a water impoundment area which will serve a dual function not only as a vocal point of landscape, but as storage for irrigation water. Adverse impacts include additional traffic generated by funeral processions and visitors to the site. (ELR Order No. 70948.)

NICHOLAD C. YOST,
Acting General Counsel.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 776-5; PP 6G1750/T124]

HEXADECYL CYCLOPROPANECARBOXYLATE

Extension of Temporary Tolerances

On July 8, 1976, the Environmental Protection Agency (EPA) gave notice (41 FR 28002) that in response to a pesticide petition (PP 6G1750) submitted to the Agency by Zoecon Corp., 975 California Ave., Palo Alto CA 94304, temporary tolerances were established for residues of the insecticide hexadecyl cyclopropanecarboxylate in or on the raw agricultural commodities apples and pears at 3 parts per million (ppm) and citrus fruits at 1 ppm (all of which are intended for the fresh-fruit market only). These temporary tolerances expired June 30, 1977.

Zoecon Corp. requested a one-year extension of these temporary tolerances both to permit continued testing to obtain additional data and to permit the marketing of the above raw agricultural commodities when treated in accordance with the provisions of an experimental use permit that was extended under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973 89 Stat. 751; 7 U.S.C. 136 (a) et seq.).

The scientific data reported and all other relevant material were evaluated, and it was determined that an extension of the temporary tolerances would protect the public health. Therefore, the temporary tolerances have been extended on condition that the pesticide is used in accordance with the experimental use permit with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. Zoecon Corp. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire June 30, 1978. Residues not in excess of 3 ppm remaining in or on apples and pears and 1 ppm in or on citrus fruits (all intended for the fresh-fruit market only) after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Special Registrations Section, Registration Division (WH-567), Office of Pesticide Programs, Room 315, East Tower, 401 M St. SW., Washington DC 20460 (202/755-4851).

(Section 408(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346(a)(j))))

Dated: August 4, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

[FR Doc.77-23251 Filed 8-11-77;8:45 am]

[FRL 776-3]

IOWA

Approval of State Application for Drinking Water Primary Enforcement Responsibility

In accordance with the provisions of Section 1413 of the Safe Drinking Water Act (SDWA), (88 Stat. 1661; 42 U.S.C. 300f et eq.) and 40 CFR 142 (41 FR 2918, January 20, 1976), Mr. Larry E. Crane, Executive Director, Iowa Department of Environmental Quality, has submitted to the Environmental Protection Agency (EPA) an application to assume primary enforcement responsibility over public water supply systems in the State of Iowa.

Notice is hereby given that the Regional Administrator, EPA, Region VII, has approved this application for primary enforcement authority, to become effective on (30 days after the date of publication of this notice). This action is based on a thorough evaluation of the state's public water supply supervision program in relation to the requirements of 40 CFR 142.10, including the adoption and implementation of:

1. State primary drinking water regulations;
2. An inventory of public water supply systems;
3. A systematic program of sanitary surveys;
4. A state program for certification of laboratories;
5. State laboratory facilities certified by EPA;
6. A public water supply system plan review program;
7. Adequate statutory or regulatory enforcement authority;
8. Record-keeping and reporting procedures;
9. A program for issuing variances and exemptions;
10. A plan for providing safe drinking water under emergency circumstances.

This evaluation has shown that the Iowa program fulfills all requirements for obtaining primary enforcement authority.

Any interested person may request a public hearing to consider the Regional Administrator's determination within 30 days of the publication of this notice. If a public hearing is requested and granted, this determination shall not become effective until such time, following the hearing, as the Regional Administrator issues an order affirming or rescinding the determination. Requests for hearing shall be addressed to:

Kathleen Q. Camin, Ph.D., Regional Administrator, U.S. Environmental Protection Agency, 1735 Baltimore, Kansas City, Mo. 64108.

and shall include the following information:

1. The name, address, and telephone number of the individual, organization, or other entity requesting a hearing.
2. A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such hearing.
3. The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

A complete copy of the Iowa application for primary enforcement responsibility is available for public inspection during normal business hours at the Office of the Regional Administrator and at the following location in Iowa:

The Iowa Department of Environmental Quality, 3920 Delaware Avenue, Des Moines, Iowa 50316.

[FRL 776-6; PP 7G1902/T125]

OXADIAZON

Establishment of Temporary Tolerances

Rhodia, Inc., P.O. Box 125, Monmouth Junction, NJ 08852, submitted a pesticide petition (PP 7G1902) to the Environmental Protection Agency (EPA). This petition requested that temporary tolerances be established for combined residues of the herbicide oxadiazon (2-*tert*-butyl -4- (2, 4-dichloro-5-isopropoxyphenyl-Δ^2 -1,3,4-oxadiazolin-5-one) and its metabolite 2-*tert*-butyl-4-(2, 4-dichloro - 5 - hydroxyphenyl) - Δ^2 - 1,3,4 - oxadiazolin-5-one in or the raw agricultural commodities peanut hulls (shells) at 1 part per million (ppm) and peanuts (nutmeat) and peanut forage and hay (dry vines) at 0.5 ppm.

These temporary tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with an experimentail use permit that has been issued under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (86 Stat., 973, 89 Stat. 751; 7 U.S.C. 136 (a) et seq).

An evaluation of the scientific data reported and other relevant material showed that the requested tolerances were adequate to cover residues resulting from the proposed experimental use, and it was determined that the temporary tolerances would protect the public health. The temporary tolerances have been established for the pesticide, therefore, with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.
2. Rhodia, Inc., must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on requests make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire May 13, 1978. Residues not in excess of 1 ppm remaining in or on peanut hulls and 0.5 ppm in or on peanuts and peanut forage and hay after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicates such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Special Registration Section, Registration Division (HH-567), Office of Pesticide Programs, Room 315, East Tower, 401 M St., SW. Washington, D.C. 20460 (202-755-4851).

(Section 408(j) of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 346a(j)).)

Dated: August 4, 1977.

DOUGLAS D. CAMPT,
Director,
Registration Division.

[FR Doc 77-23252 Filed 8-11-77;8:45 am]

[FRL 776-7; PP 5G1579/T126]

5-CHLORO-3-METHYL-4-NITRO-1H-PRYAZOLE

Extension of a Temporary Tolerance

On June 22, 1977, the Environmental Protection Agency (EPA) gave notice (42 FR 31642) that in response to a pesticide petition (PP 5G1579) submitted to the Agency by Abbott Laboratories, Agricultural and Veterinary Products Div., North Chicago, IL 60064, a temporary tolerance was established for residues of the plant regulator 5-chloro-3-methyl-4-nitro-1*H*-pyrazole in or on the raw agricultural commodity oranges at 0.1 part per million (ppm). This temporary tolerance is scheduled to expire April 30, 1978.

Abbott Laboratories requested a two-month extension of this temporary tolerance both to permit continued testing to obtain additional data and to permit the marketing of the above raw agricultural commodity when treated in accordance with the provisions of an experimental use permit that was extended under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

The scientific data reported and all other relevant material were evaluated, and it was determined that an extension of the temporary tolerance would protect the public health. Therefore, the temporary tolerance has been extended on condition that the pesticide is used in accordance with the experimental use permit with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.
2. Abbott Laboratories must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary tolerance expires June 30, 1978. Residues not in excess of 0.1 ppm remaining in or on oranges after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerance. This temporary tolerance may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Special Registrations Section, Registration Division (WH-567), Office of Pesticide Programs, Room 315, East Tower, 401 M St., SW., Washington, D.C. 20460 (202-755-4851).

Dated: August 4, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

FEDERAL COMMUNICATIONS COMMISSION

TV BROADCAST APPLICATIONS READY AND AVAILABLE FOR PROCESSING

Adopted: July 27, 1977.

Released: August 4, 1977.

By the Chief, Broadcast Bureau

Notice is hereby given, pursuant to Section 1.572(c) of the Commission's Rules, that on September 13, 1977, the TV broadcast applications listed in the attached Appendix will be considered as ready and available for processing. Pursuant to Section 1.227(b)(1) and Section 1.591(b) of the Commission's Rules, an application in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on September 12, 1977 which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and tendered for filing at the offices of the Commission in Washington, D.C., by the close of business on September 13, 1977.

The attention of any party in interest desiring to file pleadings concerning any pending TV broadcast application, pursuant to Section 309(d)(1) of the Communications Act of 1934, as amended, is directed to Section 1.580(i) of the Commission's Rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary

FEDERAL ENERGY ADMINISTRATION

VOLUNTARY AGREEMENT AND PLAN OF ACTION TO IMPLEMENT INTERNATIONAL ENERGY PROGRAM

Meeting

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (Pub. L. 94-163), notice is hereby provided of a meeting of the Industry Working Party (IWP) to the International Energy Agency (IEA) to be held on August 23 and 24, 1977, at the offices of Exxon Corporation, 1251 Avenue of the Americas, New York, beginning at 9:00 a.m. on August 23. The agenda is as follows:

1. Prepare the documents for a response to questions referred to the IWP by the Standing Group on the Oil Market (SOM) on the petroleum price and cost reporting system and on the financial reporting system.

2. Finalize procedures for reporting the IWP response to the SOM.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, this meeting will not be open to the public.

Issued in Washington, D.C., August 8, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

FEDERAL POWER COMMISSION

[Docket No. RP76-4]

NATIONAL FUEL GAS SUPPLY CORP.

Order Approving Pipeline Rate Settlement With Reserved Issue

AUGUST 5, 1977.

On September 27, 1976, the Presiding Administrative Law Judge certified to the Commission a proposed settlement agreement in the captioned proceeding. On April 18, 1977, National Fuel filed a revision to the settlement agreement. If approved, the certified settlement agreement together with the April 18, 1977, revision would resolve all issues in the proceeding except that of rate design, which issue is reserved for hearing. For the reasons set forth below, the Commission finds that the proposed settlement agreement is reasonable and should be approved.

This proceeding was initiated on August 15, 1975, when National Fuel Gas Supply Corp. (National Fuel) tendered for filing tariff sheets designed to produce an annual increase in jurisdictional revenues of $12,484,000 based upon the base period ending April 30, 1975, as adjusted. The August 15, 1975, filing included some adjustments to cost of service occurring outside of the test period. National Fuel was advised of this deficiency by letter dated September 12, 1975, and on September 22, 1975, National Fuel submitted revised material which excluded the out-of-period costs and reduced the proposed increase to $11,905,000. By order issued October 21, 1975, the Commission accepted the proposed increase, as corrected, for filing, suspended the effectiveness of the increased rates until March 1, 1976, and set the matter for hearing.

Following the conclusion of settlement discussions among the parties, the proposed settlement agreement was submitted to the Presiding Administrative Law Judge with a request that it be certified to the Commission. Public notice of the certification was issued on October 6, 1976, with comments due on or before October 22, 1976. The Commission staff filed timely comments in support of the agreement. No other comments were received.

On February 23, 1977, a conference was held to discuss the proper rate treatment of the cost of National Fuel's gas production. Under the settlement agreement certified on September 27, 1977, this issue was reserved for decision by the Commission. As a result of the conference, National Fuel filed with the Commission on April 18, 1977, revisions to the settlement agreement which purported to resolve the corporation-owned production issue and which reduced the settlement cost of service by $23,666. Notice of the filing was issued on May 9, 1977, with comments due on or before May 23, 1977. Timely comments in support of the revision to the settlement were filed by the staff, the New York Public Service Commission and the Pennsylvania Public Utilities Commission. No adverse comments were received.

The settlement rates as shown in Appendix A are predicated upon a total jurisdictional cost of service of $225,674,133, as set forth in Appendix B. The settlement cost of service includes a rate of return on National Fuel's net investment rate base of 9.70 percent. The return on common equity is set at 12 percent. (See Appendix C.) The settlement rates reflect estimated annual sales of 201,037,000 Mcf, an increase from the 199,463,975 Mcf originally estimated in National Fuel's filing. Purchased gas costs included in the settlement cost of service totaling $162,935,680, reflect supplier rates in effect as of March 1, 1976, and do not include the cost of emergency purchases.

Article I of the settlement provides that within ten days of Commission approval, the company will file revised tariff sheets reflecting settlement rates to be effective March 1, 1976.

Article V sets forth the method by which refunds will be made. The rates originally filed (exclusive of the 1.41 cents per Mcf PGA surcharge) are 113.87 cents per Mcf for Rate Schedule G-1 and 118.45 cents per Mcf for Rate Schedule G-1A. Settlement rates as shown in Appendix A are 109.76 cents and 114.63 cents per Mcf respectively. Therefore, the refund shall be calculated at the rate of 4.11 cents per Mcf for Rate Schedule G-1 sales and 3.82 cents per Mcf for sales made under Rate Schedule G-1A.

Article VI identifies rate design as the only reserved issue. The parties stipulate that any changes to rate design made by Commission order in this proceeding shall have prospective effect only. The hearing on the rate design matter was held on September 21, 1976, and the initial decision was issued by the Presiding Administrative Law Judge on December 10, 1976. The issue is now before the Commission for final decision.

Based upon a review of the record in this proceeding, including the settlement agreement itself and the pleadings, evidence, and comments submitted in support thereof, the Commission finds the proposed settlement represents a reasonable resolution of the issues in this proceeding in the public interest and that the settlement agreement should accordingly be approved and adopted, as hereinafter ordered.

The Commission orders:

(A) The settlement agreement in this proceeding, certified to the Commission on September 27, 1976, as revised on April 18, 1977, is incorporated by reference and is approved and adopted.

(B) Within 10 days after the date of this order National Fuel shall file revised tariff in accordance with the terms of the settlement agreement and of this order.

(C) National Fuel shall refund to its customers all amounts collected since March 1, 1976, in excess of settlement rates plus interest at nine percent per annum. Refunds to each customer shall be made, pursuant to the settlement agreement by a credit to the first billing subsequent to the effective date of the settlement rates. Within 15 days after all such refunds are made, National Fuel shall submit a report of such refunds and interest to the Commission.

(D) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, the staff or any other party or person affected by this order in any proceeding now pending or hereafter instituted by or against National Fuel or any other person or party.

(E) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

ALABAMA-TENNESSEE NATURAL GAS CO.

Revisions and Additions to FPC Gas Tariff

AUGUST 5, 1977

Take notice that on July 15, 1977, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), P.O. Box 918, Florence, Ala. 35630, tendered for filing as part of its FPC Gas Tariff, Third Revised Volume No. 1, tariff sheets designed to accomplish a settlement of the remaining issues in this proceeding not heretofore resolved. The newly filed tariff sheets are proposed to become effective on August 12, 1977.

Pursuant to an agreement of the parties, a new Paragraph (e) to Section 4 of Rate Schedule G-1 is contained in Substitute First Revised Sheet No. 6 which provides for a Determination of Billing Demand for buyers using supplemental gas supplies in addition to their purchase of natural gas from Alabama-Tennessee.

Also in accordance with the agreement of the parties, a new Rate Schedule T-1 providing a new transportation service is contained in Original Sheet Nos. 13-A through 13-E. The rate for this new service consists of a commodity charge of 20¢ for all gas transported under the new Rate Schedule T-1. A new section 24 to Section 22 of the General Terms and Conditions has been added as contemplated by the Initial Decision, and will be effectuated by First Revised Sheet No. 36-D through E, Third Revised Sheet No. 36-F, Second Revised Sheet No. 36-G and First Revised Sheet No. 36-H to permit arrangements be-

NATIONAL FUEL GAS SUPPLY CORP.—*Docket No. RP76-4—Capitalization and rate of return*

[FR Doc.77-23279 Filed 8-12-77;8:45 am]

tween Buyers to protect their service by transferring gas volumes amongst themselves with delivery by Alabama-Tennessee to the receiving Buyer.

There are also included in the filing revisions to Paragraphs 1 and 3 to Article I of the Form of Service Agreement to enable its customers to obtain supplemental supplies of gas, which would be transported by Alabama-Tennessee under specified ocnditions, to the extent that Alabama-Tennessee is unable to meet the full requirements of a Buyer. These changes would be effected by First Revised Sheet No. 37 and Substitute First Revised Sheet Nos. 38 and 39. A new Form of Service Agreement for use under the Transportation Service Rate Schedule is provided for in Original Sheet Nos. 42–A through 42–E.

Alabama-Tennessee requests a waiver of the thirty-day notice provision of Section 4(d) of the Natural Gas Act and § 154.51 of the Commission's Regulations to permit the filed tariff sheets to become effective on August 12, 1977.

Alabama-Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected State regulatory Commissions.

Any person desiring to be heard or to protests said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C 20426, in accordance with Sections 1.8 and 1.10. All such petitions or protests should be filed on or before August 15, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-23300 Filed 8-11-77;8:45 am]

[Docket No. RP77-110]

ALABAMA-TENNESSEE NATURAL GAS CO.

Proposed Changes in FPC Gas Tariff

AUGUST 3, 1977.

Take notice that on July 19, 1977 Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), P.O. Box 918, Florence, Ala. 35630, tendered for filing as part of its FPC gas Tariff, Third Revised Volume No. 1 the following tariff sheets:

First Revised Sheet No. 33
First Revised Sheet No. 34
Original Sheet No. 34–A
Original Sheet No. 34–B

The above-designated tariff sheets are to become effective on August 18, 1977.

Alabama-Tennessee states that it is negotiating for new supplies to supplement its present supply from its sole supplier, Tennessee Gas Pipeline Company, which has been subjected to severe curtailments in recent years. Alabama-Tennessee further states that in order to contract for any new supply or supplies it is necesary that it be able to recoup from its customers the cost of such new supplies. The purpose of this filing, it is stated, is solely to accomplish that purpose.

Alabama-Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected State regulatory Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10. All such petitions or protests should be filed on or before Augsut 15, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-23284 Filed 8-11-77;8:45 am]

[RP72-110 (PGA77-10)]

ALGONQUIN GAS TRANSMISSION CO.

Rate Change Pursuant to Purchased Gas Cost Adjustment Provision

AUGUST 5, 1977.

Take notice that Algonquin Gas Transmission Company ("Algonquin Gas"), on July 15, 1977, tendered for filing Thirty-Second Revised Sheet No. 10 and Alternate Thirty-Second Revised Sheet No. 10 to its FPC Gas Tariff, First Revised Volume No. 1.

Algonquin Gas, by its June 15, 1977 filing, has asked permission to track certain purchased gas costs related to gas supplied by Texas Eastern Transmission Corporation ("Texas Eastern") pursuant to the Emergency Natural Gas Act of 1977. Since the Commission has not yet accepted the above-mentioned filing, Algonquin Gas is filing these tariff sheets pursuant to its Purchased Gas Cost Adjustment Provision set forth in Section 17 of the General Terms and Conditions of its FPC Gas Tariff, First Revised Volume No. 1. Thirty-Second Revised Sheet No. 10 includes the cost of purchased gas related to gas supplied by Texas Eastern pursuant to the Emergency Natural Gas Act of 1977. Alternate Thirty-Second Revised Sheet No. 10 excludes the above-mentioned purchased gas costs. The rate adjustment, amounting to a net increase of $0.0093 per MMBtu under Thirty-Second Revised Sheet No. 10 and $0.0047 per MMBtu under Alternate Thirty-Second Revised Sheet No. 10 in Algonquin Gas' sales rates under applicable rate schedules, is being filed to amortize the balance in Algonquin Gas' Unrecovered Purchased Gas Cost Account.

The proposed effective date of the revised tariff sheets is September 1, 1977.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23288 Filed 8-11-76;8:45 am]

[Docket No. RP72-142 (PGA77-7)]

CITIES SERVICE GAS CO.

Proposed Changes in FPC Gas Tariff

AUGUST 5, 1977.

Take notice that Cities Service Gas Company (Cities Service) on July 7, 1977, tendered for filing proposed changes in its FPC Gas Tariff, Second Revised Volume No. 1. Cities Service states that the proposed changes are based solely on increased purchase gas costs which will result from filings by one of its pipeline suppliers, Oklahoma Natural Gas Gathering Corporation (ONGG). The proposed effective date is August 23, 1977.

ONGG's increased rate reflected on its Twelfth Revised Sheet PGA–1 was accepted by Commission order issued June 22, 1977, in Docket No. RP72–115 (PGA 77–2) and permitted to become effective July 1, 1977.

Cities Service states that it has filed its Twenty-first Revised Sheet PGA–1 to reflect the rate on ONGG's Twelfth Revised Sheet PGA–1.

Cities Service states that copies of its filing were served on all jurisdictional customers, interested state commissions and all parties to the proceeding in Docket Nos. RP72–142 and RP76–135.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before August 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this

filing are on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23286 Filed 8-11-77;8:45 am]

[Docket No. CP77-521]

COLUMBIA GULF TRANSMISSION CO.

Pipeline Application

AUGUST 5, 1977.

Take notice that on July 25, 1977, Columbia Gulf Transmission Company (Columbia Gulf), P.O. Box 683, Houston, Texas 77001, filed in Docket No. CP77–521 an application for a certificate of public convenience and necessity authorizing the transportation of natural gas for Texas Eastern Transmission Corporation (Texas Eastern), all as more fully set forth in the application, which is on file with the Commission and open to public inspection.

Applicant proposes to transport for Texas Eastern up to 90,000 Mcf/d of gas from Blocks 620 and 606, West Cameron Area, Offshore Louisiana. The gas will be transported through Columbia Gulf's facilities from a point of delivery in West Cameron Block 606 to a point in West Cameron Block 601, where it will be delivered to Tennessee Gas Pipeline Company (Tennessee) for the account of Texas Eastern. Tennessee will receive the gas in Block 601 as part of an exchange arrangement between Tennessee and Texas Eastern.

Any person desiring to be heard or to make any protest with reference to said application, on or before August 29, 1977, should file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23292 Filed 8-11-77;8:45 am]

[Docket No. ER77-529]

COLUMBUS AND SOUTHERN OHIO ELECTRIC CO.

Filing of Rate Schedule

AUGUST 5, 1977

Take notice that Columbus and Southern Ohio Electric Company (CSO), on July 29, 1977, tendered for filing proposed changes in its F.P.C. Electric Service Tariff contained in F.P.C. Docket No. E–9407. CSO indicates that the proposed changes would increase revenues from jurisdictional sales and service by $2,501,000 based on the twelve-month period ending June 30, 1978. CSO further indicates that the fuel adjustment clause contained in the proposed rate schedule has not been changed or altered from that which was in effect prior to the filing and conforms with present Commission regulations concerning the form of such clauses.

CSO states that it presently serves the Cities of Westerville, Jackson, and the Village of Glouster, all in Ohio, at wholesale rates which became effective as of June 2, 1975 (F.P.C. Docket No. E–9407).

CSO states that it also presently serves the City of Columbus, Ohio at wholesale contract rates which became effective as of January 1, 1976 (F.P.C. Docket No. ER76–459). CSO further states that it intends to notify the City of Columbus, pursuant to the terms of its contract with the City of Columbus, of its intention to terminate that contract as of December 31, 1977.

CSO requests waiver of the sixty-day provision contained in Section 35.13(b)(4)(i) and 35.13(b)(5)(i) of the Commission's regulations and asks that the rate schedule be made effective July 1, 1977. CSO states that the additional revenue is needed to help to offset increases in the cost of providing electric service as well as increases in the cost of facilities and capital required to provide such services.

According to CSO a copy of the filing has been served upon the Cities of Westerville, Jackson and Columbus, and the Village of Glouster.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary

[Docket No. ER77-445]

DUKE POWER CO.

Supplement to Electric Power Contract

AUGUST 4, 1977

Take notice that Duke Power Company (Duke Power) tendered for filing by letter dated July 11, 1977, a supplement to the Company's Electric Power Contract with Crescent Electric Membership Corporation, Inc. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FPC No. 248.

Duke Power further states that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for an increase in capacity and a reallocation of SEPA capacity and energy to preference customers. Duke Power indicates that the supplement also includes an estimate of sales and revenue for the twelve months immediately preceding and for the twelve months immediately succeeding the effective date.

Duke Power requests waiver of the Commission's notice requirements to allow for an affective date of June 20, 1977.

According to Duke Power a copy of this filing was mailed to Crescent Electric Membership Corporation, Inc. and to the North Carolina Utilities Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commisison, 825 North Capitol Street, N.E., Washington, D.C 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary

[Docket No. ER77-516]

FLORIDA POWER CORP.

Filing

AUGUST 3, 1977

Take notice that on July 14, 1977, Florida Power Corporation ("Florida

Power") tendered for filing a Contract For Interchange Service Between Florida Power Corporation and Florida Power & Light Company. Florida Power indicates the Contract replaces Florida Power's Rate Schedule FPC No. 75 and Supplement No. 1 and provides for the following services: emergency interchange energy, scheduled interchange energy, and economy interchange energy. Florida Power & Light Company's certificate of concurrence was included with the filing. Florida Power asks that the Contract be permitted to become effective on August 14, 1977.

According to Florida Power, copies of the filing were served upon Florida Power & Light Company and the Florida Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-524]

GEORGIA POWER CO.

Filing of Revised Tariff Sheet

AUGUST 3, 1977.

Take notice that Georgia Power Company (Georgia Power) on July 22, 1977, tendered for filing Second Revised Sheet No. 3 to its FPC Electric Tariff, Original Volume No. 3.

Georgia Power states that the revision amends the Index of Purchasers under its transmission service tariff to reflect that the City of Dalton, Georgia (Dalton) began taking service thereunder on June 1, 1977. Georgia Power's filing also contained an executed Intergrated Transmission Service Agreement with Dalton for transmission service, effective June 1, 1977.

Georgia Power requests waiver of the Commission's notice requirements to allow for an effective date of June 1, 1977.

Georgia Power states that it served copies of the filing on the Board of Water, Light & Sinking Fund Commissioners, City of Dalton, Georgia.

Any person desiring to be heard or to protest said application should file a Petition to Intervene or Protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a Petition to Intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23283 Filed 8-11-77;8:45 am]

[Docket No. CP66-110 et al., CP70-19, et al., CP71-222, et al.]

GREAT LAKES GAS TRANSMISSION CO.

Petition To Amend

AUGUST 3, 1977.

Take notice that on July 26, 1977, Great Lakes Transmission Company (Petitioner), 2100 Buhl Building, Detroit, Michigan 48226, filed in Docket Nos. CP66-100, et al., CP70-19, et al and CP71-222, et al. a petition to amend the Commission's orders of June 6, 1976 (37 FPC 1070), April 30, 1970 (43 FPC 635) and June 1, 1971 (45 FPC 1034) issued in the instant dockets (respectively) pursuant to Section 3 of the Natural Gas Act so as to authorize the continued importation of natural gas from Canada under Petitioner's Contract Nos. 1, 2, and 3 at an increase import rate of $2.16 (United States) per billion Btu's effective September 21, 1977, all as more fully set forth in the Petition to amend which is on file with the Commission and open to public inspection.

It is indicated that the orders as set forth above authorized Petitioner to import certain quantities of gas from Canada at a point on the United States-Canadian Border, near Emerson, Manitoba, Canada, purchased from TransCanda Pipeline Limited (TransCanada) pursuant to three different contracts (Contracts Nos. 1, 2, and 3).

Petitioner states that pursuant to the Commission's order of December 17, 1976 in Docket Nos. CP66-110, et al., it is presently authorized to import gas from Canada at the rate of $1.94 (Canadian) per billion Btu's effective January 1, 1977. It is indicated that the Canadian Government has instructed the National Energy Board (NEB) to amend all existing export licenses applicable to the sale of gas by TransCanada to Petitioner to establish a new border export price of $2.16 (United States) per billion Btu's effective September 21, 1977. It is stated that the NEB would soon amend all pertinent TransCanada export licenses to reflect the new price.

Petitioner indicates that it is imperative that this petition for amended import authorization be filed at this time to afford the Commission the maximum possible time before September 21, 1977, to act thereon.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before August 26, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23280 Filed 8-11-77;8:45 am]

[Docket No. ES77-48]

GULF STATES UTILITIES CO.

Application

AUGUST 5, 1977.

Take notice that on July 27, 1977, Gulf States Utilities Co. (Applicant) filed an application seeking an order pursuant to section 204 of the Federal Power Act authorizing the Applicant to enter into (1) a Guaranty Agreement with the Trustee of up to $23,000,000 principal amount of Refunding Bonds to be issued by the Industrial Development Board, Inc., of the Parish of Calcasieu, State of Louisiana, to refund the $3,000,000, 6¾ percent, due 12-1-84, $3,000,000, 7¼ percent, due 12-1-89, and $14,000,000, 7⅞ percent, due 12-1-04, bonds previously sold to finance the construction of air and water pollution control facilities relating to the Roy S. Nelson generating station located in the Parish of Calcasieu, La., and (2) a similar Guaranty Agreement of additional Bonds of up to $5,000,000 principal amount to be issued by such Board to finance construction of additional pollution control facilities at such station.

The proceeds of the refunding issue would be used to purchase U.S. Government obligations sufficient in amount to make interest payments on the outstanding Bonds as they come due and redeem the outstanding bonds in full in 1984. Under the terms of such Bonds, the deposit of such government obligations would operate to discharge the Bonds.

Applicant is incorporated under the laws of Texas with its principal business office at Beaumont, Tex., and is engaged in the electric utility business in portions of Louisiana and Texas. Natural gas is purchased at wholesale and distributed at retail in the City of Baton Rouge and vicinity.

Applicant will lease the additional pollution control facilities to the Board pursuant to a Lease Agreement. The Board will sublease such additional pollution control facilities to Applicant.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1977, file with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

To enable the Company to meet the scheduled timetable desired in this Application, the Company respectfully requests that the Commission issue its order authorizing these issued as far prior to August 18, 1977, as possible.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23298 Filed 8-11-77;8:45 am]

[Docket No. ER77-531]

ILLINOIS POWER CO.

Proposed Tariff Change

AUGUST 5, 1977.

Take notice that Illinois Power Co. (Illinois Power) on July 29, 1977, tendered for filing proposed changes in its FPC Electric Service Tariff, IP-FPC 26, IP-FPC 28, and IP-FPC 30, applicable to Village of Ladd, City of Oglesby and Cedar Point Light & Water Co., respectively. Illinois Power states that the proposed changes would increase revenues from jurisdictional sales and service by $163,096 based on the twelve month consumption period ended December 31, 1976.

Illinois Power further states that the rate schedules affected were permitted to become effective on January 1, 1976, subject to further order of the Federal Power Commission in Docket No. E-9520. Illinois Power indicates that it has subsequently experienced increased construction and capital costs and operating expenses which have necessitated filing for increased rates. Illinois Power requests an effective date of September 26, 1977.

According to Illinois Power copies of the filing were served upon the Company's three wholesale jurisdictional customers, and also to the Illinois Commerce Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23296 Filed 8-11-77;8:45 am]

[Docket No. ES77-49]

KANSAS POWER & LIGHT CO.

Application

AUGUST 5, 1977.

Take notice that on July 27, 1977, the Kansas Power & Light Co. (Applicant) filed an application seeking authority pursuant to section 204 of the Federal Power Act to issue up to $50,000,000 in the aggregate principal amount of short-term, unsecured promissory notes in the form of commercial paper, and authorizing Applicant to issue said notes from and after August 1, 1977, until and on August 31, 1978, with a final maturity date for any of said notes of not later than August 31, 1979.

Applicant is incorporated under the laws of the State of Kansas with its principal business office at Topeka, Kans.

The interest rate applicable to the commercial paper promissory notes will be, in the case of notes issued to commercial paper dealers, the market rate (or discount rate) at the date of issuance for commercial paper of comparable quality and of the particular maturity sold to commercial paper dealers, and in the case of commercial paper placed directly with regular purchasers of such commercial paper for their own accounts, the market rate (or discount rate) at the date of issuance for commercial paper of comparable quality and of the particular maturity placed directly by the issuer thereof. Applicant contemplates the issuance of promissory notes and "roll-over" of commercial paper promissory notes, without further application to this Commission, at any time and from time to time until August 31, 1978, each of such notes to have a maturity date of not later than August 31, 1979.

The proceeds will be used to finance in part Applicant's construction program to August 31, 1979. The authorization to issue up to $50,000,000 and the authorization of Applicant to issue said notes not later than August 31, 1978, with final maturities of said notes not later than August 31, 1979, will allow Applicant more freedom in selecting the appropriate times under market conditions to fund its short-term debt.

Any person desiring to be heard or to make any protest with reference to the application should, on or before August 24, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23295 Filed 8-11-77;8:45 am]

[Docket No. ES77-47]

KENTUCKY UTILITIES CO.

Application

AUGUST 5, 1977

Take notice that on July 26, 1977, the Kentucky Utilities Co. (Applicant) filed an application with the Federal Power Commission, pursuant to section 204 of the Federal Power Act, for authorization to issue its short-term notes to commercial banks and to commercial paper dealers; the aggregate principal amount of all such notes and/or commercial paper at any time outstanding not to exceed the following amounts during each of the following years: 1977—$80 million, 1978—$100 million, 1979—$120 million, 1980—$140 million, 1981—$160 million.

Applicant is incorporated under the laws of the State of Kentucky with its principal business office at Lexington, Ky., and is engaged in the generation, transmission, distribution and sale of electrical energy in 78 counties in central, southeastern, and western Kentucky.

The proceeds from the issuance of the notes and/or commercial paper will be added to the general funds of the Applicant and used principally to finance, temporarily, a part of the Company's construction expenditures for the year 1977 through 1981, inclusive.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1977, filed with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23297 Filed 8-11-77;8:45 am]

[Docket No. RP72-149 (PGA77-7)]

MISSISSIPPI RIVER TRANSMISSION CORP.

Proposed Change in Rates

AUGUST 5, 1977.

Take notice that Mississippi River Transmission Corp. ("Mississippi") on July 20, 1977, submitted for filing Sub-

stitute Fifty-Sixth Revised Sheet No. 3A to its FPC Gas Tariff, First Revised Volume No. 1, effective July 2, 1977. This tariff sheet is being filed pursuant to the Federal Power Commission's order issued June 20, 1977, to reflect the reduced rate change of United Gas Pipe Line Co. ("United"), effective July 2, 1977.

Mississippi also submitted for filing six (6) copies of Substitute Fifty-Seventh Revised Sheet No. 3A to its FPC Gas Tariff, First Revised Volume No. 1, to be effective August 1, 1977. Mississippi states that Substitute Fifty-Seventh Revised Sheet No. 3A was submitted for the sole purpose of reflecting the appropriate August 1, 1977, cumulative PGA adjustment resulting from the United revision, effective July 2, 1977.

Mississippi submitted schedules containing computations supporting the rate changes to be effective July 2, 1977, and August 1, 1977. Mississippi states that copies of its filing were served on Mississippi's jurisdictional customers and the State Commissions of Arkansas, Illinois, and Missouri.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission in accordance with section 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene unless such petition has previously been filed. Copies of the filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23287 Filed 8-11-77;8:45 am]

[Docket No. RP76-106 and RP71-125 (PGA 77-3) (AP77-2)]

NATURAL GAS PIPELINE CO. OF AMERICA

Purchased Gas Cost Adjustment to Rates and Charges and Tracking Adjustments Under the Terms of the Settlement Agreement in Docket No. RP76-106

AUGUST 5, 1977.

Take notice that on July 18, 1977, Natural Gas Pipeline Co. of America (Natural) submitted for filing as part of its FPC Gas Tariff, Third Revised Volume No. 1, the below listed tariff sheets, to be effective September 1, 1977:

Second Substitute Thirty-first Revised Sheet No. 5
Substitute Seventh Revised Sheet No. 5A

These tariff sheets reflect Base Rates in effect subject to refund in Docket No. RP76-106.

Natural states the purpose of the filing is to track producer and pipeline supplier price changes including the purchase of methane gas from Calorific Anerobic Process, Inc., authorized by the Commission in Docket No. CP75-147, and to recover accumulated deferred purchased gas costs as of May 31, 1977, through unit rate adjustments computed pursuant to provisions of its Purchased Gas Cost Adjustment Clause. The combined effect of these unit adjustments results in a reduction in Natural's cumulative PGA Adjustment of (8.82)¢.

Natural also filed the below listed alternate tariff sheets to its FPC Gas Tariff:

Third Revised Volume No. 1: Second Substitute Thirty-first Revised Sheet No. 5; Substitute Seventh Revised Sheet No. 5A.
Second Revised Volume No. 2: Second Substitute Fourth Revised Sheet No. 270.

Natural states the purpose of this filing is to reflect tracking adjustments under the terms of the settlement agreement in Docket No. RP76-106 to track changes for Stingray transportation costs and reductions in the level of advance payments included in rate base. An alternate computation of the advance payment adjustment was included to reflect the elimination of certain advances which go beyond a five year repayment period should the Commission deny Natural's pending request for authorization to retain these advances in rate base.

Natural requested waiver of the Commission regulations to the extent, if any is required, to put the proposed tariff sheets into effect September 1, 1977.

Copies of the filing have been mailed to all parties in Docket No. RP76-106 and to interested state regulatory agencies.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with section 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23299 Filed 8-11-77;8:45 am]

[Docket No. RP77-115]

PACIFIC GAS TRANSMISSION CO.

Rate Change

AUGUST 5, 1977.

Take notice that on July 25, 1977, Pacific Gas Transmission Co. tendered for filing a "Notice of Rate Change to Reflect Increase in the Price of Canadian Gas in Cost of Service Charges and Request for Expedited Consideration."

PGT states that its filing is made in compliance with this Commission's orders in Docket No. RP73-111 which require PGT to make filings pursuant to Section 4 of the Natural Gas Act before there is reflected in PGT's cost of service charges any increase in the cost of gas imposed or required by Canadian authorities.

PGT indicates that its filing will effect increases in rates charged under its PL-1 Rate Schedule which is applicable to sales of gas made by PGT to its one customer for sale, Pacific Gas and Electric Company.

The filed changes in rates will reflect in PGT's cost of service charges certain increases manadated by Canadian authorities in the price of gas imported from Canada, commencing September 21, 1977. PGT presently obtains its entire supply of gas from Canada at a present border price of $1.94 (Canadian) per Mcf of 1,000 Btu gas. PGT recites that by Order dated July 7, 1977, the Canadian National Energy Board (NEB) amended existing export licenses, effective September 21, 1977, to establish a border price of the Canadian dollar equivalent of $2.16 (U.S.) per Mcf of 1,000 Btu gas payable in Canadian dollars in accordance with a monetary exchange formula specified by the NEB. On the basis of present volumes and Btu content, PGT estimates that the effect of the September 21, 1977, increase would be approximately $128,600,000 (U.S.) on an annualized basis.

PGT advises that copies of its filing have been mailed to its customers and to interested state commissions. PGT requests that expedited consideration be given to the instant filing.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.18 and 1.10). All such petitions or protests should be filed on or before August 17, 1977.

Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23289 Filed 8-11-77;8:45 am]

[Docket Nos. RP73-64 (PGA77-2) (DCA77-2) and RP77-31]

SOUTHERN NATURAL GAS CO.

Proposed Changes in FPC Gas Tariff

AUGUST 5, 1977.

Take notice that Southern Natural Gas Co. (Southern), on July 18, 1977, tendered for filing proposed changes to its FPC Gas Tariff, Sixth Revised Volume No. 1, to become effective on July 1, 1977, July 2, 1977, and August 1, 1977. Such filing is pursuant to the Commission's order issued June 30, 1977, in Docket No. RP73-64 (PGA77-2) (DCA77-2). Southern states that tariff sheets tendered for filing reflect adjustments to the PGA Surcharge Adjustment portion of its rates to reflect elimination of certain costs described as follows:

1. Substitute Twenty-Fifth Revised Sheet No. 4A to be effective July 1, 1977, reflects a 0.345 cent reduction from 6.768 cents to 6.423 cents in the PGA Surcharge Adjustment consisting of (1) 0.279 cent resulting from the elimination of $638,030 of purchased gas cost related to purchases made at rates in excess of the rates established in Opinion No. 770-A and (2) 0.066 cent resulting from the elimination of $150,955 in claimed costs of emergency gas which were not paid to other parties or which did not result in obtaining emergency gas supplies.
2. Second Substitute Twenty-Fifth Revised Sheet No. 4A, to be effective July 2, 1977, and Substitute Twenty-Sixth Revised Sheet No. 4A, to be effective August 1, 1977, reflect a 0.066 cent reduction from 6.768 cents to 6.702 cents in the PGA Surcharge Adjustment resulting from the elimination of $150,955 in claimed costs of emergency gas which was not paid to other parties or which did not result in obtaining emergency gas supplies.

Southern states that Substitute Twenty-Sixth Revised Sheet No. 4A is being filed to replace Twenty-Sixth Revised Sheet No. 4A filed on June 27, 1977, in its general rate increase filing in Docket No. RP77-31. Southern also moves to place into effect Substitute Twenty-Sixth Revised Sheet No. 4A in lieu of Twenty-Sixth Revised Sheet No. 4A subject to the same conditions as contained in its Agreement and Undertaking filed on June 27, 1977.

Copies of the filing were served upon the company's jurisdictional customers, interested state commissions, and the parties of record in Docket No. RP77-31.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP75-127]

TEXAS EASTERN TRANSMISSION CORP. AND TENNESSEE GAS PIPELINE CO.

Joint Petition To Amend Pipeline Certificate

AUGUST 5, 1977.

Take notice that on July 20, 1977, Texas Eastern Transmission Corp. (Texas Eastern), P.O. Box 2521, Houston, Tex. 77001, and Tennessee Gas Pipeline Co. (Tennessee), P.O. Box 2511, Houston, Tex. 77001, (Petitioners) filed in Docket No. CP75-127 a petition to amend Commission order issued July 18, 1975, to authorize the inclusion of two additional exchange points and to allow an increase in the exchange volumes previously authorized for and between the Petitioners.

Petitioners state that pursuant to a Transportation and Exchange Agreement dated October 17, 1974 (Agreement), an exchange arrangement involving volumes produced in East Cameron Block 281 and Eugene Island Block 349, Offshore Louisiana had been initiated. Due to increases in production in said blocks and Texas Eastern obtaining the right to purchase West Cameron Blocks 606 and 620 production, Petitioners seek authorization to add the point of interconnection of Columbia Gulf Transmission Co.'s (Columbia Gulf)[1] facilities and Columbia Gulf and Tennessee's Project 601 facilities (Block 601 West Cameron Area) and the point of interconnection of Tennessee's facilities in East Cameron Block 281 and Petitioners' jointly owned Project 281 facilities (East Cameron Block 281) to the authorized Agreement; and to increase the authorized exchange volume of 140,000 Mcf/d to 230,000 Mcf/d.

Any person desiring to be heard or to make any protest with reference to said application, on or before August 29, 1977, should file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-23291 Filed 8-11-77;8:45 am]

[Docket Nos. RP71-130, et al.]

TEXAS EASTERN TRANSMISSION CORP.

Proposed Changes in FPC Gas Tariff

AUGUST 5, 1977.

Take notice that Texas Eastern Transmission Corp. (Texas Eastern) on July 29, 1977, tendered for filing Second Revised Sheet No. 93 and Second Revised Sheet No. 94 as part of its FPC Gas Tariff, Fourth Revised Volume No. 1. Texas Eastern proposes that the tariff filing become effective on September 1, 1977.

The purpose of the instant filing is to implement, with one modification, the "storage sprinkling" provision contained in the Stipulation and Agreement submitted herein to the Commission. The procedures in the aforesaid settlement agreement are modified by eliminating any phasing-in period for the "storage sprinkling" provision; and instead upon implementation of the proposed tariff revisions, Texas Eastern would calculate curtailments on the basis of end-use data attached to the Stipulation and Agreement. In Opinion No. 787-A, the Commission noted that Texas Eastern had agreed to make a tariff filing incorporating a provision for "storage sprinkling", but that the Commission was "procedurally unable to modify Texas Eastern's present filing which includes priority 2 treatment of storage."

Texas Eastern states that if the proposed tariff revisions are suspended by the Commission, it will not move to put them into effect.

Copies of the filing have been served upon Texas Eastern's customers and interested State commissions.

Any person desiring to be heard or to make any protest with reference to said filing should on or before August 17, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Any person who has heretofore filed a notice or petition to intervene in this proceeding need not file again. The tariff filing which was made with the Commission is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23293 Filed 8-11-77;8:45 am]

[1] Columbia Gulf will in the near future file their related transportation application as concerns WC 606 and 620 production.

[Docket No. RP77-114]

WESTERN TRANSMISSION CORP.

Proposed Changes in F.P.C. Gas Tariff

AUGUST 5, 1977.

Take Notice that Western Transmission Corp. on July 25, 1977, tendered for filing proposed changes in its F.P.C. Gas Tariff, Original Volume No. 1. The proposed changes would increase revenues from jurisdictional sales by $128,934 annually, based on sales volumes and costs for the twelve months ended April 30, 1977, as adjusted for the Test Period. Western states the principal reasons for the proposed rate increase are: (1) increased costs of operations and (2) the need to earn a return on its utility investment. The proposed effective date is September 1, 1977.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8, 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests must be filed on or before August 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary,

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt and Approval of a Proposed Report

A request for clearance of a proposed report intended for use in collecting information from the public was accepted by the Regulatory Reports Review Staff, GAO, on July 28, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice is to inform the public of such receipt and the action taken by GAO.

FEDERAL MARITIME COMMISSION

The Federal Maritime Commission requested special handling for clearance of proposed General Order 37—Financial Responsibility for Oil Pollution Cleanup (Alaska Pipeline) (46 CFR 543) and related Form FMC-224P—Application for Certificate of Financial Responsibility (Alaska Pipeline). Subsection 204(c) of the Trans-Alaska Pipeline Authorization Act provides that owners and operators of vessels carrying Trans-Alaska Pipeline oil to a United States port shall be jointly and severally liable for all damages including cleanup costs sustained by any person or entity, public or private, resulting from discharges of oil from such vessels. Financial responsibility for $14,000,000 of such liability must be demonstrated before any vessel can load or carry Alaska Pipeline oil. The responsibility for implementing this requirement has been delegated to the Federal Maritime Commissions.

The Commission's General Order 37, served on July 26, 1977, and effective upon publication in the FEDERAL REGISTER, requires the operator of any vessels carrying Alaska oil subject to subsection 204(c) of the Act to obtain and carry on board the vessels Certificates of Financial Responsibility (Alaska Pipeline) (Form FMC-224P) in order to load oil at the pipeline terminal for carriage to any U.S. port, or to participate in the carriage of such oil before it has been off-loaded ashore at a U.S. port.

Approximateely 50 respondents will be subject to the reporting requirements of General Order 37 at an estimated one hour per annual response. FMC estimates 100 respondents for Form FMC-224P and one-half hour per response.

GAO granted clearance of Form FMC-224P and General Order 37 on July 29, 1977, under numbers B-180233 (R0461) and B-180233 (R0462) respectively because of the similarity to Form FMC-224 and General Order 27 which we had previously reviewed and cleared.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

JOINT USE ADMINISTRATIVE OFFICE

Records System Closure

AUGUST 8, 1977.

This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Commissioner of Indian Affairs by 230 DM 2. The purpose of this notice is to notify the public that the Project Officer has discontinued activities relating to enumeration collections and has closed the Navajo-Hopi Joint Use Project Records System. On February 10, 1977, the District Court accepted the recommended partition line of the mediator, ordered the land partitioned and declared the lands to be part of the respective tribes' reservations. The Joint Use Area was thus formally eliminated. There is no longer any requirement to maintain an enumeration records system.

RAYMOND V. BUTLER,
Acting Deputy Commissioner of Indian Affairs.

[FR Doc.77-23377 Filed 8-11-77;8:45 am]

Bureau of Land Management

[NM 31227]

NEW MEXICO

Application

AUGUST 4, 1977.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Llano, Inc., has applied for one 4½-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, N. MEX.

T. 22 S., R. 25 E.,
Sec. 9, NE¼NE¼;
Sec. 10, W½NW¼.

This pipeline will convey natural gas across 0.48 of a mile of public land in Eddy County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

RAUL E. MARTINEZ,
Acting Chief, Branch of Lands and Minerals Operations.

[FR Doc.77-23264 Filed 8-11-77;8:45 am]

[Wyoming 60228]

WYOMING

Application

AUGUST 3, 1977.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Marathon Pipe Line Co. of Casper, Wyo., filed an application for a right-of-way to construct a 3 inch and 4 inch pipeline for the purpose of transportation of crude oil and other synthetic liquid fuels across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 47 N., R. 91 W.,
Sec. 6,
Sec. 7,
Sec. 18,
Sec. 19.
T. 46 N., R. 92 W.,
Sec. 1,
Sec. 2,
Sec. 3,
Sec. 12.
T. 47 N., R. 92 W.,
Sec. 13,
Sec. 24,
Sec. 34.

This pipeline right-of-way will transport oil and other synthetic liquid fuels within T. 47 N., R. 91 W., T. 46 N., R. 92 W., and T. 47 N., R. 92 W., in Washakie County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should include their name and address and send them to the District Manager, Bureau of Land Management, 1700 Robertson Avenue, P.O. Box 119, Worland, Wyo. 82401.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands and Minerals Operations.

Fish and Wildlife Service

CONVENTION ON INTERNATIONAL TRADE IN ENDANGERED SPECIES OF WILD FAUNA AND FLORA

Commercial Export of Bobcat, Lynx, River Otter, and American Ginseng

The purpose of this notice is to clarify what information will be required for the commercial international export of the bobcat (*Lynx rufus*, excluding the Mexican bobcat, *L. r. escuiapae*), lynx (*Lynx canadensis*), river otter (*Lutra canadensis*), American ginseng (*Panax quinquefolius*) and other specimens included on Appendix II of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (Convention), TIAS 8249 (1973). The Convention was established to protect species of wild fauna and flora against overexploitation through international trade. A complete list of all species included in the Convention Appendices may be found in Section 23.23 of Title 50, Code of Federal Regulations.

Appendix II includes those species not necessarily now threatened with extinction but which may become so unless trade in them is subject to strict regulation. In addition, Appendix II includes any other species whose similarity to threatened or potentially threatened species requires that they be regulated because of the risk of confusion. Appendix II serves as a means of monitoring as well as restricting trade.

The international export of any Appendix II specimens requires an export permit issued by the U.S. Management Authority under the Convention (MA), the Federal Wildlife Permit Office of the Fish and Wildlife Service. Under the Convention, Appendix II specimens include any readily recognizable parts or derivatives of animals and any parts or derivatives of plants that are specified in the Appendix. Therefore, fur garments made of several Appendix II pelts may only be exported under a permit that authorizes export of each constituent pelt. Export permits may only be issued if the MA is satisfied that the specimens were not taken in violation of State or Federal law and, in addition, only if the Endangered Species Scientific Authority (ESSA) has advised the MA that the export will not be detrimental to the survival of the species involved. Regulations concerning these permits are found in Part 23 of Title 50, Code of Federal Regulations.

If acquired by an exporter before the Convention became effective for the species, specimens may be exported with only an accompanying certificate issued by the MA. Such certificates, as opposed to export permits, do not require the above two findings of the MA and the ESSA. These certificates may be obtained by filing a Form 3-230 with the MA and attaching the supplementary information specified in 50 CFR 23.15 (c), in addition to complying with any other Federal or State laws applicable to certain Appendix II species. Dates when the Convention became effective for different species are indicated in Section 23.23. The Convention became effective on July 1, 1975 for American ginseng, and became effective on February 4, 1977 for the bobcat, lynx, and river otter.

Species in the Appendices that were captive bred or artificially propogated may also be exported with only an accompanying certificate. Such a certificate may be obtained by filing a Form 3-200 with the MA and attaching the supplementary information specified in 50 CFR 23.15(c). Certain species may also be subject to other Federal or State laws, which must be complied with.

The MA and the ESSA recognize that exporters may have obtained Appendix II specimens taken during the 1976-77 trapping or collecting season, or earlier, without awareness of impending export regulations under the Convention, which became generally effective on May 23, 1977. For this reason, and because the impact on wild populations of the 1976-77 season is now past, the MA and the ESSA intend to allow export of this inventory without the same degree of scrutiny that will be required in the future.

The MA and the ESSA hereby adopt the following approach concerning the international commercial export of the bobcat, lynx, river otter, and American ginseng obtained before or during the 1976-77 season. The MA will presume and be satisfied that these specimens were not taken in violation of State or Federal law unless evidence is presented to the contrary, and the ESSA will advise the MA that export of these specimens is not detrimental to the survival of the species. However, export of these specimens will be allowed under this policy only if exporters obtain an export permit or certificate from the MA. The applicant must enter in an attachment to the permit, as specifically as possible, the destination of the shipments and a table with the following column headings: Species, Number or Quantity, State of Taking, and Trapping/Collecting Season. This table must be completed to the best of the applicant's ability, and should be similar to the purely hypothetical following examples:

Species	Number	State where removed from the wild	Season
Bobcat (*Lynx rufus*)	500 pelts	Montana	September 1976 to March 1977.
Bobcat (*Lynx rufus*)	500 pelts	Wyoming	Do.
Otter (*Lutra canadensis*)	200 pelts	Louisiana	September 1976 to December 1977.
Ginseng (*Panax quinquefolius*)	100 lb	Tennessee	Do.

If information is available only for some specimens

Bobcat (*Lynx rufus*)	500 pelts	Montana	September 1976 to March 1977.
Bobcat (*Lynx rufus*)	500 pelts	Unknown	Unknown
Otter (*Lutra canadensis*)	200 pelts	do	Do.
Ginseng (*Panax quinquefolius*)	100 lb	do	Do.

Such permits may be granted for a single transaction or a series of transactions over a specified period of time. A copy of the permit must accompany shipments being exported and must be validated by an authorized Federal official at the port of export. Exporters should be aware that the ESSA will establish a future date after which commercial export will be prohibited for pelts and roots allegedly obtained during or before the 1976–77 season, excepting those pelts and roots qualifying for a pre-Convention certificate of exemption as discused above. This time limit is necessary because of the extreme difficulty in verifying previous season inventories.

In late August or early September, the MA and the ESSA expect to publish separate documents in the FEDERAL REGISTER to clarify the type of information to be required for the international export of Appendix II specimens taken from the wild after the date of publication. Exporters will be required to specify for each pelt or pound of ginseng exported the State of taking and trapping/collecting season. All Convention export permits issued by the MA for these species will be expressely subject to these and any subsequent requirements or policies established by the MA or the ESSA. The ESSA will indicate those States of origin for particular species from which further international exports must be prohibited by the MA. Exporters are now given notice that for one or more of these four species, the ESSA may be unable to find that any international export from the 1977–78 season will not be detrimental to the survival of the species, and in this event the MA will be required to prohibit international export of these specimens. For other States, from which international export was not initially prohibited, the ESSA will specify international export limits on a State-by-State basis for the 1977–78 season. Although these preliminary ESSA findings on acceptable levels of international export for the 1977–78 season will be published in late August or early September, the ESSA recognizes that some information may not come to the attention of the ESSA until after the notice is published. Therefore, the ESSA will solicit comment upon the preliminary findings in that notice, will consider comments carefully, and will republish ESSA findings in the Fall of 1977, including any appropriate modifications.

Persons involved either directly or indirectly with the international trade in furs are encouraged to develop tagging programs through the assistance of State agencies, trappers, hunters, collectors and middlemen including domestic processors. No other system appears to provide a comparable degree of certainty as to the origin of pelts. Provided that a State holds recipient of tags accountable for their own use within the State and prohibits export from the State of untagged pelts, the MA and the ESSA prima facie will be satisfied the tagged pelts were obtained consistent with State law and will accept the exporters' information on place and time of taking, as derived from the tagging records. Evidence other than tags will be subject to close scrutiny. The MA and the ESSA are seeking cooperation of the States to implement tagging programs as rapidly as possible.

Persons involved in the international trade of wild American ginseng should be prepared to require documentation from their suppliers stating the quantity, locality (at least to State), and the season for all ginseng they intend to export. In addition, documentation will be required to affirm that any State and local laws concerning the collecting of wild ginseng are complied with.

All correspondence regarding the biological and trade status of the bobcat, lynx, river otter, and American ginseng should be made to:

Dr. William Y. Brown, Executive Secretary, Endangered Species Scientific Authority, 18th and C Streets NW., Washington, D.C. 20240.

All correspondence concerning export permits or certificates should be made to:

Director, U.S. Fish and Wildlife Service (FWS/WPO), Washington, D.C. 20240

Telephone inquiries should be made to:

Availability of Draft Environmental Statement; Proposed Foothills Project in Colorado

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared an environmental statement on the proposed Foothills Project in Colorado, and invites written comments by September 26, 1977.

The draft statement analyzes environmental impacts that would result from implementation of the proposal of the Board of Water Commissioners for the City and County of Denver to construct, operate, and maintain water diversion facilities on federally managed lands on the South Platte River 25 miles southwest of Denver, Colorado, as a part of the proposed Foothills Project.

Copies of the draft statement are available at the following locations:

Eagle County, 55 Broadway, Eagle, Colorado 81631.
Arapahoe County, 2069 West Littleton Boulevard, Littleton, Colorado 80120.
Clear Creek County, P.O. Box 547, Georgetown, Colorado 80444.
Douglas County, 300 Wilcox, Castle Rock, Colorado 80104.
Gilpin County, P.O. Box 366, Central City, Colorado 80427.
Jefferson County, 1700 Arapahoe, Golden, Colorado 80149.
Summit County, P.O. Box 1538, Breckenridge, Colorado 80424.
Park County, P.O. Box 128, Fairplay, Colorado 80440.
Teller County, P.O. Box 248, Cripple Creek, Colorado 80813.

Single copies of the draft statement can be obtained from the District Manager, Canon City District Office, Bureau of Land Management, 3080 East Main Street, P.O. Box 311, Canon City, Colorado 81212; the Area Manager, Northeast Resource Area Headquarters, Bureau of Land Management, 1010–10th Street, Golden, Colorado 80401; or the State Director, Colorado State Office, Bureau of Land Management, Room 700 Colorado State Bank Building, 1600 Broadway, Denver, Colorado 80202.

Written comments on the draft environmental statement should be submitted by September 26, 1977, to the District Manager, Canon City District Office, Bureau of Land Management, 3080 East Main Street, P.O. Box 311, Canon City, Colorado 81212.

Oral and written comments will also be received at a public hearing on September 14, 1977, at the Weyer Auditorium, Denver Public Library, 1357 Broadway, Denver, Colorado 80202. Hearing times are scheduled at 9:00 a.m., 1:00 p.m. and 7:00 p.m.

Oral testimony of ten minutes maximum duration will be accepted from each witness at the hearing in lieu of written comments, or in addition to any written comments submitted by such witness. The ten-minute time limitation will be strictly enforced. Complete text of prepared speeches may be filed with the presiding officer at the hearing whether or not the speaker has been able to finish with oral delivery in the allotted ten minutes.

Speakers will be heard, if present, in their established order on the witness list. After the last listed witness has been heard, the presiding officer will consider the request of any other person present and wishing to testify. Only one witness will be allowed to represent the viewpoints of a single organization. However, any witness will be permitted to give germane testimony if offered as the views or opinions of a private citizen.

Written requests to testify orally should be received at the Canon City District Office at the above address prior to close of business on September 9, 1977. Requests should identify the organization represented, should be signed by the prospective witness, and should state the approximate time (morning, afternoon, or evening) for giving oral testimony. The cutoff date is necessary so that a witness list can be made available on the day before the public hearing.

Comments on the draft environmental statement, whether written or oral, will receive equal consideration in preparation of a final environmental statement.

Dated: August 10, 1977.

LARRY E. MEIEROTTO,
Deputy Assistant Secretary of the Interior.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

CONTROLLED SUBSTANCES IN SCHEDULES I AND II

Final 1977 Revised Aggregate Production Quota Thebaine

Section 306 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 826) requires the Attorney General to establish aggregate production quotas for all controlled substances in Schedules I and II each year. This responsibility has been delegated to the Administrator of the Drug Enforcement Administration pursuant to § 0.100 of Title 28 of the Code of Federal Regulations.

On June 21, 1977, a notice of the proposed revised aggregate production quota for 1977 for Thebaine was published in the FEDERAL REGISTER (42 FR 31504). All interested parties were invited to comment on or object to the proposed aggregate production quota on or before July 18, 1977. No comments or objections were received.

Therefore, under the authority vested in the Attorney General by Section 306 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 826), and delegated to the Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations, the Administrator of the Drug Enforcement Administration hereby orders that the revised aggregate production quota for the controlled substance listed below, expressed in grams of anhydrous base, be established as follows:

Basic class:	*Issued 1977*
Thebaine	3,824,500

This order is effective August 12, 1977.

Dated: August 8, 1977.

PETER B. BENSINGER,
Administrator Drug Enforcement Administration.

[FR Doc 77-23388 Filed 8-11-77 8:45 am]

Immigration and Naturalization Service

PROCESSING OF SILVA CASES

Applications for Adjustment of Status to That of a Lawful Permanent Resident Filed by Natives of the Western Hemisphere Pursuant to the Court Order in Zambrano v. Levi

On July 25, 1977, the Deputy Commissioner of the Immigration and Naturalization Service directed a memorandum to the Regional Commissioners of the Eastern, Northern, Southern and Western Regions respectively, concerning the possible eligibility for permanent residence under section 245 of the Immigration and Nationality Act of certain natives of Western Hemisphere countries resulting from the order entered June 21, 1977 by the U.S. District Court for the Northern District of Illinois (Eastern Division) in *Zambrano v. Levi*, 76 C 1456. The memorandum also set forth instructions for the acceptance and processing of such applications submitted by these individuals. This memorandum is reproduced below as a Notice in the FEDERAL REGISTER to advise and inform the individuals who may be eligible to file applications for permanent residence as a result of the *Zambrano* case and for the information of the general public. The order in the *Zambrano* case is reproduced as an appendix to this notice. For further information contact James G. Hoofnagle, Jr., (202) 376–8373. The text of the Deputy Commissioner's memorandum reads as follows:

MEMORANDUM

JULY 25, 1977

To: Regional Commissioner, Eastern, Northern, Southern, Western.
From: Deputy Commissioner
Subject: Processing of Silva cases

The Act of November 2, 1966 provided for the adjustment of status within the United States of Cuban refugees. When the Western Hemisphere numerical limitations went into effect on July 1, 1968, it was administratively decided, in the absence of any clear statutory directive on the matter, that Western Hemisphere visa numbers should be utilized for such adjustments. This practice continued from July 1, 1968 until September 30, 1976 and involved a total of 144,946 numbers that would otherwise have been available for Western Hemisphere visa applications.

Several separate court actions were instituted challenging the government's use of visa numbers for Cuban adjustment, one of which was filed on an individual named plaintiff basis (the Zambrano case), while another was filed as a class action suit (Silva case). The Zambrano case has now been concluded. By stipulation it was held that the use of visa numbers for Cuban adjustment was contrary to law. Accordingly, on June 21, 1977 the court issued an order directing that visa numbers be made available to the named plaintiffs from those numbers previously misallocated to the Cuban adjustment program. Thus the basic legal issues, as well as the overall obligation to recapture the 144,946 numbers in question have been resolved. While the class action Silva case has not been concluded, the only matter still under consideration is the nature and scope of the court order to be issued in behalf of the "class" plaintiffs. Based on the initial proposed order as drafter by the plaintiffs, there are a number of areas yet to be re-

solved which may delay the issuance of a final order in this case.

As noted above, the Zambrano case resolved the legalities and provided judicial authority for proceeding as expeditiously as possible to effectuate the recovery of the 144,946 visa numbers in question. Consequently, in view of the administrative burden involve and the fact that such burden will only be aggravated by further delay, it has been decided to proceed under the authority of the Zambrano case to resolve the "Cuban number" situation without waiting for a final order in the Silva case.

In general, the numbers will be reserved for Western Hemisphere applicants with a priority before January 1, 1977. Moreover, inasmuch as there is a continuing statutory obligation to issue the 120,000 Western Hemisphere visa numbers provided for in the Immigration and Nationality Act, the restoration of the Cuban numbers will only be remedial if issued in addition to these 120,000. This signifies that the restored numbers will of necessity be allocated to Western Hemisphere countries with a backlog of registrants.

Applications for adjustment of status to that of a permanent resident are to be accepted from otherwise eligible aliens who meet the criteria as laid down by the Zambrano decision. Basically these are immigrants chargeable to the Western Hemisphere limitation who have an established priority date prior to January 1, 1977 and who have been in the United States since prior to March 11, 1977.

The applicants must meet the requirements for eligibility under Section 245 in all respects. A visa is presumed to be immediately available to them as a result of the court order.

For those aliens who qualify as described under the Zambrano decision, permission to accept employment is granted nunc pro tunc as of December 31, 1976. Such alleviative action is based on the concept that had not the provisions of the Act of November 2, 1966 been misinterpreted insofar as Cuban refugee visa chargeability was concerned, those persons within the Silva case would have had visa numbers available to them prior to the 1st of January 1977.

Additionally if the applicant claims to have been inspected and admitted or paroled but cannot prove such action, the application shall be accepted provisionally and the applicant is to be advised such acceptance is conditioned upon his subsequent establishment of the alleged inspection and admission or parole to the satisfaction of the District Director prior to adjudication.

Application for adjustment of status in behalf of aliens covered by the Zambrano decision shall be made by filing Form I-485 in accordance with pertinent instructions appearing thereon. Processing is to be performed in the usual manner except that Form I-181 should not be forwarded to the State Department for visa number assignment prior to adjudication. Upon final approval an information copy of the completed Form I-181 will be furnished to the visa control office for number deduction. This form is to be noted in the "provisions of law" block with the symbol "SA" to denote it is a Silva type case.

Due to the unusual circumstances of the Zambrano-Silva cases and in order to make every effort consistent with our limited resources to be in compliance with the court order, a priority has been assigned calling for the processing of one such Zambrano-Silva case for every three regular adjustment cases handled. To maintain control and assure responsiveness to the court, those cases coming within the terms of the Zambrano decision are to be kept separate and apart from all other adjustment cases. They are to be filed in chronological order of receipt and assigned for processing in the one-to-three ratio as herein described with the oldest being assigned first.

Within the terms of an expected court order progress reports will be required periodically indicating the numbers and dispositions of the Zambrano-Silva cases already processed. Accordingly, such information is to be captured and maintained on a ready basis pending further specific instructions.

Except as provided by this office, or by the court, applications may be accepted through December 31, 1979.

MARIO T. NOTO.

APPENDIX

The Zambrano Case

UNITED STATES DISTRICT COURT, NORTHERN DISTRICT OF ILLINOIS, EASTERN DIVISION

Patricia Zambrano, et al., Plaintiffs, vs Edward Levi, et al., Defendants.
No. 76 C 1456.

ORDER

Pursuant to the stipulation of the parties to this litigation it is found that: (1) Between July 1, 1968 and October 1, 1976, the Immigration and Naturalization Service and the Department of State charged against the Western Hemisphere quota a number of Cuban refugees who received adjustment of status in the United States under the Act of November 2, 1966 (80 Stat. 1161); (2) The charging of these adjusted Cuban refugees against the Western Hemisphere quota was contrary to law, and improperly contributed to the backlog of immigrant visa applicants from the Western Hemisphere; and (3) Immigrant visa numbers would have in the past been available or would today be immediately available to plaintiffs Juan and Margarita Zambrano, if adjusted Cuban refugees had not been improperly charged against the Western Hemisphere quota.

It is therefore ordered, That the defendants make an immigrant visa number immediately available to each of the named alien plaintiffs without charging these visa numbers against the current Western Hemisphere quota or the single foreign state limitation.

Dated: June 21, 1977.

JUDGE JOHN F. GRADY

[Order No. 741-77]

PRIVACY ACT OF 1974

Adoption of Routine Uses for Systems of Records

On March 18, 21, and 30, 1977, and May 9, 1977, there were published in the FEDERAL REGISTER in accordance with section 3(e) (4) and (11) of the Privacy Act, 5 U.S.C. 552a(e) (4) and (11), notices of proposed routine uses (42 FR 15146, 15149, 15349, 16875, and 23558) with the notices of systems of records reprinted in their entirety. The routine uses related to the following systems of records: Justice/Tax-005, Tax Division Special Project Files; Justice/DEA-INS-111, Automated Intelligence Records System (Pathfinder); Justice/INS-001, the Immigration and Naturalization Service Index System; Justice/FBI-010, Employee Travel Vouchers and Individual Earnings Records; Justice/FBI-011, Employee Health Records; Justice/FBI-012, Time Utilization Record-Keeping (TURK) System; Justice/CIV-001, Civil Division Case File System; Justice/CIV-002, Civil Division Case File System; Customs Section and Justice/CIV-003, Office of Alien Property File System.

In addition on May 4, 1977, the following system-wide routine use was proposed (42 FR 22612):

Release of information to the National Archives and Records Service: A record from a system of records may be disclosed as a routine use to the National Archives and Records Service (NARS) in records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

No comments were received with respect to these proposed routine uses. Pursuant to the authority vested in me by 5 U.S.C. 552a, these routine uses are hereby adopted.

Dated: August 1, 1977.

GRIFFIN B. BELL,
Attorney General.

JUSTICE/TAX-005

System name:

Tax Division Special Projects Files.

System location:

U.S. Department of Justice; Tax Division; 10th and Constitution Avenue NW., Washington, D.C. 20530.

Categories of individuals covered by the system:

Persons referred to in potential or actual cases under the jurisdiction of the Criminal Section of the Tax Division.

Categories of records in the system:

The system consists of investigatory files, records and associated documents and information indexed by individual name and entity and relating to matters assigned, referred or of interest to the Criminal Section of the Tax Division.

Authority for maintenance of the system:

This system is established and maintained pursuant to 28 CFR 0.70 and 0.71.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

A. Materials maintained in this system may be used by Division attorneys and attorneys in other appropriate offices, boards and divisions for purposes of pursuing investigative leads and for purposes of initiating, developing, preparing and prosecuting criminal and civil tax cases.

B. Additionally, a record maintained in this system of records may be disseminated as a routine use as follows: (1) In any case in which there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature, the material in question may be disseminated to the appropriate federal, state, local, or foreign agency charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing such law; (2) In the course of investigating the potential or actual violation of any law whether civil, criminal, or regulatory in nature, or during the course of a trial or hearing or the preparation for a trial or hearing for such violation, material may be disseminated to a federal, state, local or foreign agency, or to an individual or organization, if there is reason to believe that such agency, individual, or organization possesses information relating to the investigation, trial or hearing and the dissemination is reasonably necessary to elicit such information or to obtain the cooperation of a witness or an informant; (3) Material may be disseminated to the appropriate federal, state, local, or foreign court or grand jury in accordance with established constitutional, substantive, or procedural law or practice; (4) Material may be disseminated to federal, state or local administrative or regulatory proceeding or hearing in accordance with the procedures governing such proceeding or hearing; (5) Material may be disseminated to an actual or potential party or his attorney for the purpose of negotiation or discussion on such matters as settlement of the case or matter, plea bargaining, or informal discovery proceedings; (6) Material that has been referred to the Tax Division may be disseminated to the referring agency to notify such agency of the status of a potential or actual case or of any decision or determination that has been made; (7) Material may be disseminated to a foreign country pursuant to an international treaty or convention entered into and ratified by the United States or to an executive agreement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Material contained in this system is stored manually.

Retrievability:

Material is retrieved by the name of an individual or entity both manually and through the use of an automated data retrieval system.

Safeguards:

Information contained in the system is safeguarded and protected in accordance with Department rules and procedures governing access, production and disclosure of any materials contained in its official files.

Retention and disposal:

Currently there are no provisions for the disposal of material in this system.

System manager(s) and address:

Assistant Attorney General; Tax Division; U.S. Department of Justice; 10th Street and Constitution Avenue NW., Washington, D.C. 20530.

Notification procedure:

An inquiry concerning this system should be directed to the System Manager listed above.

Record access procedures:

To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to the applicability of an exemption to a specific record shall be made at the time a request for access is received. A request for access to a record contained in this system shall be made in writing, with the envelope and the letter clearly marked "Privacy Access Request". Include in the request the name of the individual involved, his birth date and place, or any other identifying number which may be of assistance in locating the record, the name of the case or matter involved, if known, the name of the judicial district involved, if known, and any other information which may be of assistance in locating the record. The requestor will also provide a return address for transmitting the information. Access requests will be directed to the System Manager listed above.

Contesting record procedures:

Individuals desiring to contest or amend information maintained in the system should direct their request to the System Manager listed above, stating clearly and concisely what information is being contested, the reasons for contesting it, and the proposed amendment to the information sought.

Record source categories:

Internal Revenue Service, Department offices and employees, and other federal, state, local, and foreign law enforcement and non-law enforcement agencies, private persons, witnesses, and informants.

Systems exempted from certain provisions of the act:

The Attorney General has proposed exemption of this system from subsections (c) (3), (c) (4), (d) (1), (d) (2), (d) (3), (d) (4), (e) (1), (e) (2), (e) (3), (e) (4) (G), (e) (4) (H), (e) (4) (I), (e) (5), (e) (8), (f), and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 552 (b), (c), and (e) and have been published in the FEDERAL REGISTER.

Justice/DEA-INS-111

System name:

JUSTICE/DEA-INS-111, Automated Intelligence Records System (Pathfinder).

System location:

Drug Enforcement Administration, 1405 Eye Street, N.W., Washington, D.C. 20537 and El Paso Intelligence Center (EPIC), El Paso, Tex. 79902.

Categories of individuals covered by the system:

(1) Those individuals who are known, suspected, or alleged to be involved in (a) narcotic trafficking, (b) narcotic-arms trafficking, (c) alien smuggling or transporting, (d) illegally procuring, using, selling, counterfeiting, reproducing, or altering identification documents relating to status under the immigration and nationality laws, (e) terrorist activities (narcotic, arms or alien trafficking/smuggling related), (f) crewman desertions and stowaways, and (g) arranging or contracting a marriage to defraud the immigration laws; (2) In addition to the categories of individuals listed above, those individuals who (a) have had citizenship or alien identification documents put to fraudulent use or have reported them as lost or stolen, (b) arrive in the United States from a foreign territory by private aircraft, and (c) are informants or witnesses (including non-implicated persons) who have pertinent knowledge of some circumstances or aspect of a case or suspect; may be the subject of a file within this system; and (3) In the course of criminal investigation and intelligence gathering, DEA and INS may detect violations of non-drug or non-alien related laws. In the interests of effective law enforcement, this information is retained in order to establish patterns of criminal activity and to assist other law enforcement agencies that are charged with enforcing other segments of criminal law. Therefore, under certain limited circumstances, individuals known, suspected, or alleged to be involved in non-narcotic or non-alien criminal activity may be subject to a file maintained in this system.

Categories of records in the system:

In general, this system contains computerized and manual intelligence information gathered from DEA and INS investigative records and reports. Specifically, intelligence information is gathered and collated from the following DEA and INS records and reports: (1) DEA Reports of Investigation (DEA-6), (2) DEA and INS Intelligence Reports, (3) INS Air Detail Office Index (I-92A), (4) INS Anti-Smuggling Indices (G-170), (5) INS Marine Intelligence Index, (6) INS Fraudulent Document Center Index, (7) INS Terrorist Index, and (8) INS Reports of Investigation and Apprehension (I-44, I-213, G-166).

Authority for maintenance of the system:

This system has been established in order for DEA and INS to carry out their law enforcement, regulatory, and intelligence functions mandated by the Comprehensive Drug Abuse Prevention and Control Act of 1970 (84 Stat. 1236), Reorganization Plan No. 2 of 1973, the Single Convention on Narcotic Drugs, (18 UST 1407), and Sections 103, 265, and 290 and Title III of the Immigration and Nationality Act, as amended, (8 U.S.C. 1103, 1305, 1360, 1401 et seq.). Additional authority is derived from Treaties, Statutes, Executive Orders and Presidential Proclamations which DEA and INS have been charged with administering.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

This system will be used to produce association and link analysis reports and such special reports as required by intelligence analysis of DEA and INS. The system will also be used to provide "real-time" responses to queries from federal, state, and local agencies charged with border law enforcement responsibilities.

Information from this system will be provided to the following categories of users for law enforcement and intelligence purposes provided a legitimate and lawful "need to know" is demonstrated: (a) Other federal law enforcement agencies, (b) state and local law enforcement agencies, (c) foreign law enforcement agencies with whom DEA and INS maintain liaison, (d) U.S. intelligence and military intelligence agencies involved in border criminal law enforcement, (e) clerks and judges of courts exercising appropriate jurisdiction over subject matter maintained within this system, and (f) in the event there is an indication of a violation or potential violation of law whether civil, criminal, regulatory, or administrative in nature, the relevant information may be referred to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute or rule, regulations, or order issued pursuant thereto.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Manual subsets of the Pathfinder Information System are maintained on standard index cards and manual folders. Standard security formats are employed.

The automated Pathfinder Information System is stored on digital computers in the Drug Enforcement Administration Office of Intelligence Secured Computer facilities located at DEA Headquarters and El Paso, Tex.

Retrievability:

Access to individual records can be accomplished by reference to either the manual indices or the automated information system. Access is achieved by reference to personal identifiers, other data elements or any combination thereof.

Safeguards:

The Pathfinder System of Records is protected by both physical security methods and dissemination and access controls. Fundamental in all cases is that access to intelligence information is limited to those persons or agencies with a demonstrated and lawful need to know for the information in order to perform assigned functions.

Physical security when intelligence files are attended is provided by responsible DEA and INS employees. Physical security when files are unattended is provided by the secure locking of material in approved containers or facilities. The selection of containers or facilities is made in consideration of the sensitivity or National Security Classification, as appropriate, of the files, and the extent of security guard and/or surveillance afforded by electronic means.

Protection of the automated information system is provided by physical, procedural, and electronic means. The master file resides in the DEA Office of Intelligence Secured Computer System and is physically attended or safe-guarded on a full time basis. Access or observation to active telecommunications terminals is limited to those with a demonstrated need to know for retrieval information. Surreptitious access to an unattended terminal is precluded by a complex authentication procedure. The procedure is provided only to authorized DEA and INS employees. Transmission from DEA Headquarters to El Paso, Tex., is accomplished via a dedicated secured line.

An automated log of queries is maintained for each terminal. Improper procedure results in no access and under certain conditions completely locks out the terminal pending restoration by the master controller at DEA Headquarters after appropriate verification. Unattended terminals are otherwise located in locked facilities after normal working hours.

The dissemination of intelligence information to an individual outside the Department of Justice is made in accordance with the routine uses as described herein and otherwise in accordance with conditions of disclosure prescribed in the Privacy Act. The need to know is determined in both cases by DEA and INS as a prerequisite to the release of information.

Retention and disposal:

Records maintained within this system are retained for fifty-five (55) years.

System manager(s) and address:

Assistant Administrator for Intelligence, Drug Enforcement Administration, 1405 Eye Street NW., Washington, D.C. 20537, and Associate Commissioner, Management, Immigration and Naturalization Service, 425 Eye Street NW., Washington, D.C. 20536.

Notification procedure:

Inquiries should be addressed to Freedom of Information Unit, Drug Enforcement Administration, 1405 Eye Street NW., Washington, D.C. 20537.

Record access procedures:

Same as notification procedure.

Contesting record procedures:

Same as notification procedure.

Record source categories:

DEA intelligence and investigative records/reports; INS investigative, intelligence and statutory mandated records/reports; records and reports of other federal, state and local agencies; and reports and records of foreign agencies with whom DEA maintains liaison.

Systems exempted from certain provisions of the act:

The Attorney General has proposed exemption of this system from subsection (c) (3) and (4), (d), (e) (1), (2), and (3), (e) (4) (G), (H), and (I), (e) (5) and (8), (f), (g), and (h) of the Privacy Act pursuant to 5 U.S.C. 552a (j) and (k).

JUSTICE/INS–001

System name:

The Immigration and Naturalization Service Index system which consists of the following subsystems.

A. Agency information control record index.

B. Alien address report index.

C. Alien enemy index.

D. Automobile decal parking identification system for employees.

E. Centralized index and records relating to, but not limited to aliens lawfully admitted for permanent residence and United States citizens (Master index).

F. Congressional Mail Unit correspondence control index.

G. Document vendors and alterers index (Service documents).

H. Enforcement branch indices: (1) Air detail office index system; (2) Anti-smuggling index (general); (3) Anti-smuggling information centers systems for Canadian and Mexican borders; (4) Border Patrol Academy index; (5) Border Patrol sectors general index system; (6) Contact index; (7) Criminal, immoral, narcotic, racketeer, and subversive indices; (8) Enforcement correspondence control index; (9) Fraudulent document center index system; (10) Informant index; (11) Suspect third party index.

F. Border Patrol Sector Headquarters: (1) Blaine, Washington; (2) Buffalo, New York; (3) Chula Vista, California; (4) Del Rio, Texas; (5) Detroit, Michigan; (6) El Centro, California; (7) El Paso, Texas; (8) Grank Forks, North Dakota; (9) Havre, Montana; (10) Houlton, Maine; (11) Laredo, Texas; (12) Livermore, California; (13) Marfa, Texas; (14) McAllen, Texas, (15) Miami, Florida; (16) New Orleans, Louisana; (17) Ogdensburg, New York; (18) Spokane, Washington; (19) Swanton, Vermont; (20) Tucson, Arizona; (21) Yuma, Arizona.

G. Border Patrol Academy—Los Fresnos, Texas.

H. Charlotte Amalie, St. Thomas, Virgin Islands.

I. Sub offices in foreign countries: (1) Athens, Greece; (2) Frankfurt, Germany; (3) Naples, Italy; (4) Palermo, Italy; (5) Rome, Italy; (6) Tokyo, Japan; (7) Vienna, Austria.

J. El Paso Intelligence Center (EPIC)—El Paso, Texas. Addresses of each office are listed in the telephone directories of the respective cities listed above under the heading "United States Government, Immigration and Naturalization Service."

Categories of individuals covered by the system:

A. Agency information control record index (Location A, supra).

1. United States citizens, resident and non-resident aliens named in documents classified for National Security reasons.

2. Individuals referenced in documents classified for National Security reasons.

B. Alien address reports (Form I–53), 1975 and subsequent years (Location A, supra); 1974 and previous years (Locations: C, D, and H supra).

C. Alien enemy index (Location: A supra):

1. Alien enemies who were interned during World War II.

2. Americans of Japanese ancestry (Nisei) who returned to Japan and, during World War II, either accepted employment by the Japanese Government or became naturalized in Japan.

D. Automobile decal parking identification for employees. (Location B–4 supra).

Current Service employees of this office who have the privilege of parking their cars on government premises, have a decal for their cars for parking identification.

E. Centralized index (Master index). (Locations: A, C, D, E and I supra):

1. Aliens lawfully admitted for permanent residence, and United States citizens; and individuals who are under investigation, were investigated in the past, or who are suspected of violating the criminal or civil provisions of treaties, statutes, Executive orders and Presidential proclamation administered by the Immigration and Naturalization Service, hereinafter referred to as the Service, and witnesses and informants having knowledge of such violations.

F. Congressional Mail Unit (Location A, supra):

1. Aliens lawfully admitted for permanent residence and United States citizens named in correspondence received including, but not necessarily limited to: (a) employees and past employees; (b) federal, state and local officials, and (c) members of the general public.

2. Aliens lawfully admitted for permanent residence and United States citizens named in reports or correspondence received, as individuals investigated in the past or under active investigations for, or suspected of volatipns of, the criminal or civil provisions of statutes enforced by the Service, including Presidential proclamations and Executive orders relating thereto, and witnesses and informants having knowledge of violations.

G. Document vendors and alterers index (Service documents) (Location B–4; duplicates are housed in several Service offices in the southwest region). This index relates to, but is not limited to, aliens lawfully admitted for permanent residence and United States citizens.

H. Enforcement Branch Indices:

1. Group one—(Locations: A, B, C and E, supra)—contact index; informant index; anti-smuggling index (General); criminal, immoral, narcotic, racketeer and subversive indices; and suspect third party index—all relate to same general categories of individuals as follows:

(a) Aliens lawfully admitted for permanent residence, and citizens who are in a position to know or learn of, and assist in locating aliens illegally in the United States.

(b) Aliens lawfully admitted for permanent residence, and citizens who are former or present members of an organization subversive in nature, whether foreign or domestic, and are willing to appear as government witnesses, to testify as to their knowledge of an individual's membership therein, or as to the nature, aims and purpose of the organization, or as to the identification, publication, distribution and authenticity of the literature of such organzation, or are in possession of information relative to such organization or on specific individuals and are willing to cooperate with the Immigration and Naturalization Service, or who although they have not been members of subversive organizations, are in possession of information relating to such organizations or members thereof, and are willing to cooperate with the Service on a continuing basis;

(c) Aliens lawfully admitted for permanent residence, and citizens who are known or suspected of being professional arrangers, transporters, harborers, and smugglers of aliens, who operate or conspire to operate with others to facilitate the surreptitious entry of an alien over a coastal or land border of the United States and witnesses having knowledge of such matters;

(d) Aliens lawfully admitted for permanent residence and citizens who are known or suspected of being habitual or notorious criminals, immorals, narcotic violators or racketeers, or subversive functionaries or leaders;

(e) Aliens lawfully admitted for permanent residence, and citizens who are known, or believed, to be engaged in fraud operations involving the preparation and submission of visa petitions and other applications for Service benefits, or the preparation and submission of applications for immigrant visas and/or Department of Labor certifications, or the filing of false United States birth registrations for alien children to enable parents who are immigrant visa applicants to evade the labor certification requirements or to enable such children to pose as citizens.

2. Group two—relate to specific categories of individuals as follows:

(a) Air detail office index system (Location: J, supra). (1) The majority of the system contains information relating to United States citizens and aliens lawfully admitted for permanent residence who are pilots and/or owners of private aircraft and who have engaged in flying between the United States and foreign countries. (2) The system also contains information of an investigative nature relative to pilots, owners, and

associates, including United States citizens and aliens lawfully admitted for permanent residence, who engage in, or are suspected of being engaged in, illegal activity, such as alien smuggling or entry without inspection.

(b) Anti-smuggling information centers for the Canadian border and Mexican border. (Location: Northern Border: F-19, supra—Southern Border: J, supra). Categories of individuals include United States citizens and aliens lawfully admitted for permanent residence who are smugglers or transporters of illegal aliens, or who are suspects in the violation of statutes relating to smuggling and transporting illegal aliens.

(c) Border Patrol Academy index system—(Location: G, supra). United States citizens who are: students in attendance at the Border Patrol Academy; former students who have attended the Academy; and officers attending advanced training classes at the Academy.

(d) Border Patrol Sectors general index—(Locations: F, supra). (1) United States citizens who are past or present employees of the Service; and (2) United States citizens and aliens lawfully admitted for permanent residence classified as law violators, witnesses, contacts, informants, members of the general public, federal, state, county and local officials.

(e) Fraudulent Document Center index system—(Location: J, supra). The system contains information relating to United States citizens and/or aliens lawfully admitted for permanent residence categorized as members of the general public, Notaries Public, state and local birth registration officials and employees, immigration law violators, vendors of documents, donors of documents, midwives and witnesses. Also included in the system are names and information of fictitious non-existent individuals such as may be used by counterfeiter or alterer of citizenship documents.

3. Group three—(a) Enforcement correspondence control index—(Location: A, supra—Associate Commissioner, Enforcement). (1) Aliens lawfully admitted for permanent residence and citizens of the United States named in correspondence received, including but not necessarily limited to: a. employees and past employees; b. federal, state, and local officials; and c. members of the general public. (2) Aliens lawfully admitted for permanent residence and citizens of the United States named in documents, reports or correspondence received as individuals under investigation, or investigated in the past, or suspected of violation of the criminal or civil provisions of the statutes enforced by the Service, including Presidential Executive Orders and Proclamations relating thereto, and witnesses and informants having knowledge of violations.

I. Examinations branch indexes (Location: A, supra (duplicates are in some local offices)). Aliens lawfully admitted for permanent residence and United States citizens and individuals who are violators or suspected violators of the criminal or civil provisions of statutes enforced by the Service.

J. Extension training program enrollees (Location: A, supra) contains the names of Service employees, and other federal agency employees enrolled in extension training program courses.

K. Finance Section indexes—(Locations: A and B, supra):

(1) Individuals who are indebted to the United States Government for goods, services, or benefits or for administrative fines and assessments;

(2) Employees who have received travel advances or overpayments from the United States Government, who are in arrear in their accounts, or who are liable for damage to Government property;

3. Vendors who have furnished supplies, material, equipment, and services to the Government;

4. Employees, witnesses and special deportation attendants who have performed official travel; and

5. Employees and individuals who have a valid claim against the Government.

L. Freedom of Information correspondence control index (Locations: A; B; C; D; E; F; G; H and I, supra). Individuals who request under the Freedom of Information Act, access to, or copies of, records maintained by the Service.

M. Intelligence Index—(Locations: A and B, supra) Aliens who have been lawfully admitted to the United States for permanent residence and United States citizens, who have, or who are suspected of having violated the criminal or civil provisions of the statutes enforced by the Service.

N. Microfilmed manifest records—(Locations: A, C-26, C-10, C-20, and C-29, supra) Aliens lawfully admitted for permanent residence to the United States and United States citizens.

O. Naturalization and citizenship indexes:

(1) Naturalization and citizenship docket cards (Locations: C and E supra, except E-6, 7, 8 and 13). Aliens lawfully admitted for permanent residence and citizens of the United States, and other individuals seeking benefits under Title III of the Immigration and Nationality Act of 1952, as amended.

2. Examiner's docket lists of petitioners for naturalization. (Locations: C and E supra, Except E-6, 7-8, and 13.) Petitioners for naturalization and beneficiaries.

3. Master docket list of petitioners for naturalization pending one year or more. (Locations: A, B, C and E supra, Except E-6, 7, 8 and 13.) Petitioners for naturalization and beneficiaries.

P. Pending Investigations—(Location: A, supra) Employees, former employees, other Government agency employees, designated to perform immigration functions, witnesses, informants, and certain persons having contacts with Service operations.

Q. Properly issued to employees—(Locations: A, B, C, E and F, supra). Employees of the Service who have been issued property and have in addition signed for receipt of the property on Form G-570.

R. Security system—Location: A supra). United States citizens and aliens lawfully admitted for permanent residence to the United States currently employed with the Service who have been cleared for access to documents and materials classified in the interest of National Security.

S. White House and Attorney General correspondence control index—(Location: A, supra). Citizens and aliens lawfully admitted for permanent residence to the United States named in correspondence received, including, but not necessarily limited to: (a) employees and past employees of the Service; (b) federal, state and local officials; and (c) members of the general public.

T. Health Record System (Location: A, supra). Persons at Location A, supra, who need health services or who require emergency treatment.

U. Personal Data Card System (Locations: A and B, supra). Employees and former employees of the Service.

V. Compassionate Cases System. (Locations: A and B-1 and 4, supra). Employees of the Service.

W. Emergency Reassignment Index (Locations: B, C, E and F). Employees of the Service.

X. Alien Documentation, Identification, and Telecommunication (ADIT) system—(Location A, supra). Aliens lawfully admitted for permanent residence, commuters and others authorized frequent border crossings, nonimmigrant persons other than transients.

Categories of records in the system:

A. Agency information control record index system contains:

1. Top secret and secret material originated, received or transmitted by Service officers that has been classified as National Security information including all copies prepared from a controlled document.

2. Confidential material originated by another agency which is received by this Service including all copies prepared from a controlled document.

3. All investigative reports, responses to security checks, and material of an intelligence nature concerning individuals, organizations, movements, conditions in foreign countries, received from sources within the Department of Justice and other federal intelligence sources.

B. Alien address report index. This system contains information such as name, address, occupation, date of admission into the United States and Alien Registration number.

C. Alien enemy index. This system contains a microfilm index of each file opened on these individuals.

D. Automobile decal parking identification system for employees vehicles. This system contains a list by number of each DJ decal car sticker issued by the Security Division to regional employees who require car parking permission.

E. Centralized index and records relating to permanent resident aliens, and citizens of the United States (Master index). The system consists of records relating to the categories of individuals described in E-1, supra. The records contain various Service forms, applications and petitions for benefits under the immigration and nationality laws, reports of investigation, sworn statements, and reports, correspondence and memoranda.

Records which may be accessed electronically are limited to index and file locater data including name, identifying number, date and place of birth, date and port of entry, coded status transaction data, and location of relating records or files.

F. Congressional mail unit. This system contains a permanent index record for each report or piece of correspondence received. Information maintained in the index of this subsystem is that which is entered on a 3" x 5" index card. The index record is solely a locator reflecting the name of the individual and the number of the file in which specific information concerning the individual is maintained.

G. Document vendors and alterers index (Service documents). This system consists of "mug book" containing photos of alleged immigration law violators involved in the supply of fraudulent documents, and data relating to the pictured violators including: name, aliases, vital statistics, method of operation, list of convictions, present location, and source material.

H. Enforcement branch.

1. Group one—contact index; informant index; anti-smuggling index (general); criminal, immoral, narcotic, racketeer and subversive indices; and suspect third party index: These systems of records are maintained on the following.

(a) Form G-598, "Contact Record".

(b) Form G-169, "Informant Record."

(c) Form G-170, "Smuggler Information Index Card".

(d) Alphabetical index cards reflecting the name of the individual and the file in which specific information concerning the individual is housed. Some index cards reflect the individuals biographic data, address, etc., and may contain a brief description of the individual's activities.

2. Group two. (a) Air detail office index. The primary record in the system is Form I-92A, Report of Private Aircraft Arrival, which is executed by the inspecting official upon arrival of a private aircraft from foreign territory. There are also indices, forms, investigative reports, records, and correspondence relative to aircraft arrivals, failure to report for inspection, and known or suspected alien smuggling operations wherein aircraft are utilized. In addition, microfiche containing names of owners of aircraft of United States registry are maintained at this location.

(b) Anti-smuggling information centers for the Canadian and Mexican borders. This system contains G-170, Smuggler Information Index Card, other index cards, and correspondence relating to anti-smuggling activities. Two indices of active smugglers are compiled, one for the Canadian border and the other border for the Mexican border area. These indices are in loose leaf booklet form and are distributed to Border Patrol offices in the respective border areas.

(c) Border Patrol Academy index. This system contains general information and correspondence regarding the student's academic progress in training. The information is maintained on the following forms. (1) SW 91—Probationary Achievement Report. (2) SW 91A—Scholastic Grade Worksheets. (3) SW 91B-10 BTC Achievement Report Immigration Inspector. (4) SW 91C-10 BTC Achievement Report Investigator. (5) SW 96—Class Rating Form. (6) SW 128—Training Data. (7) SW 282—Registration Information Form. (8) 446—Conduct and Efficiency Report of Probationary Employee 5½ and 10 months exam grades.

(d) Border Patrol sectors general index. (1) This system contain indices, forms, reports and records relating to activities of the Border Patrol. Included in the various segments of the system are the following numbered and titled forms: a. Form I-44—Record of Apprehension or Seizure; b. Form I-215W—Affidavit—witness; c. Form I-263A and I-263B—Record of Sworn Statement; d. Form I-195—Criminal Prosecution Control Card; e. Form I-263W—Records of Sworn Statement—witness; f. Form I-326—Prosecution Reports; g. Form G-170—Smuggler Information Index Card; h. Form G-296—Report of Violation of Section 239, Immigration and Nationality Act; i. Form G-330—Notice of Action Information; j. Form G-445—Conduct and Efficiency Evaluation of Probationary Appointees; and k. Form G-598—Contact Record. (2) This system also contains copies of correspondence and memoranda between offices of the Service and with outside agencies and individuals, as well as photographs of some violators of the immigration laws or of individuals suspected of being involved in immigration law violations. (3) The Service lookout book and booklets of indexes of active smugglers are at each location; however, these are duplicated records which are reported separately in other systems of records.

(e) Fraudulent document center index. This system contains birth certificates, baptismal certificates, and other identification documents used by aliens to support their fraudulent claims to United States citizenship. Most of the documents are genuine, however, there are also counterfeit and altered documents in the system. Also within the system are cross indexes investigative reports, and records of individuals involved in fraud schemes and of individuals whose documents have been put to fraudulent usage. Correspondence and memoranda, between the Fraudulent Document Center and other Service Offices, outside agencies and individuals are retained.

3. Group three—(a) Enforcement correspondence control index. This system contains a semi-permanent index record for each document, report or piece of correspondence received. Information maintained in the system is that which is entered on Form G-617, "Correspondence Control Card", and CO Form 147, "Call-Up Index—Domestic Control." The index record is primarily a locator reflecting the name of the individual and the file in which specific information concerning the individual is housed.

I. Examinations branch:

(1) Examinations correspondence control index: contains a semi-permanent index record for each document, report of price of correspondence received. Information maintained in the system is that which is entered on Form G-617 "Correspondence Control Card". The index record is primarily a locator reflecting the name of the individual and the file in which specific information concerning the individual is housed.

(2) Service lookout System contains names of violators, alleged violators and suspected violators of the criminal or civil provisions of statutes enforced by the Service.

J. Extention training program enrollees. The system contains a folder for each enrollee. Each folder contains a complete record of the enrollee's test scores, correspondence and dates of every action taken with regard to the mailing of lesson materials, receipt of tests, scoring and mailing out test results and dates certificates were completed and mailed.

K. (1) Accounts with creditors. The records consist of vendors' invoices, purchase orders, travel vouchers and claims filed by appropriation for the fiscal year from which payment is chargeable.

(2) Accounts with debtors. The records consist of bills for inspection services performed under the Act of March 2, 1931 (8 U.S.C. 1353a); fees, fines, penalties and deportation expenses assessed pursuant to the Immigration and Nationality Act; and employee indebtedness for travel advances, for the unofficial use of Government facilities and services, for damage to or loss of Government property, and for the erroneous or overpayment of compensation for travel expenses.

L. Freedom of Information correspondence control index. The system contains an index record for each piece of correspondence received requesting information under the Freedom of Information Act.

M. Intelligence index. This system contains a semi-permanent index record for each document, report, bulletin or correspondence received. The index is categorized by name, violation, and activity. The index is primarily a locator reflecting the category, source of material and specific housing of information.

N. Microfilmed manifest records. Microfilmed indices, and arrival and departure manifests reflecting brief biographical data and facts of arrival or departure. The arrival records for certain ports date from 1891 and departure

records date from 1900. The records are not complete; certain records were destroyed and were not microfilmed.

O. (1) Naturalization and citizenship docket cards. Docket cards consist of 3" x 5" or 5" x 8" index cards arranged alphabetically according to name of applicant, beneficiarcy or petitioner, indicating type of application submitted, date of receipt, file and /or petition number, and court number wherein petition for naturalization was filed. The docket cards are locators for the files in which specific information concerning the individuals is maintained.

(2) Examiner's docket lists of petitioners for naturalization. Lists of petitioners for naturalization (Form N–476) are arranged chronologically for each court exercising naturalization jurisdiction, showing petition number, petition filing date, file number, court number, name of petitioner for naturalization, name of beneficiary in whose behalf a petition is filed, proposed recommendation by the naturalization examiner and reasons for the continuance. The lists serve as locators for the files in which specific information concerning the petitioners is maintained.

(3) Master docket lists of petitions for naturalization pending one year or more. Master docket lists of petitions for naturalization (Form N–476) pending for a year or more are arranged chronologically for each court exercising naturalization jurisdiction showing the petition number, petition filing date, petitioner's name, recommendation and issues and reason why petition is still pending. The lists serve as locators for the files in which specific information concerning the petitioners is maintained.

P. Personnel investigators index. Contains two separate card index files, one for cases under active investigation, and the other for formerly active cases now closed. These cards are locator cards listing names of investigation subjects, their locations, and the allegations under investigation. Two relating sets of temporary work folders exist housing open/closed allegations of misconduct and investigative reports.

Q. Property issued to employees. The records consist of a Form G–570, 'Record-Receipt-Property Issued to Employee,' which lists property issued to an employee. The Form G–570 lists the employee's name, description of the property, serial number, date received and employee's initials, and finally date returned and supervisor's initials.

R. Security system index. The system is comprised of 3' x 5' index cards filed alphabetically which reflect levels of access clearances granted to employees of the Service and the dates when the clearances were granted.

S. White House and Attorney General correspondence control index. Contains an index record for each piece of correspondence addressed to the President and the Attorney General, with certain exceptions, which has been referred to this Service for appropriate attention. Information maintained in the system is that which is entered on Form G–617, "Correspondence Control Card." The index record is primarily a locator reflecting the name of the correspondent and/or the subject individual of the correspondence and the file in which specific information concerning the individual is housed.

T. Health Record System. The record consists of a 5" x 7" index card that lists the name, date and treatment given any person in the Health Unit.

U. Personal Data Card System. The record consists of a 3" x 5" card for each employee or former employee (G–74). The entries on the card (G–74) include name, date of birth, height, weight, sex, blood type, photograph, and color of hair and eyes.

V. Compassionate Cases System. The record consists of 3" x 5" index card containing employee's name, position, grade, present location, date request received in Central Office, date circulated to compassionate committee, disposition, new location of employee whose request is granted; and a folder containing copy of employee's Form G–410, employee's request (memo), local and regional recommendations, doctor's statement (where applicable), record of committee action, and response to employee.

W. Emergency Reassignment Index. The record consists of a 3" x 5" card (G–560) which reflects the name, age, grade, title, official station, residence, telephone number and emergency assignment activity.

X. Alien Documentation, Identification and Telecommunication (ADIT) system. The records consist of formatted data base records of personal and biographical information such as name, date of birth, picture and fingerprint coordinates, height, mother's first name, father's first name, city town/village of birth.

Authority for maintenance of the system:

A. General, applicable to all Service index systems, includes but is not limited to: Sections 103, 265 and 290 and Title III of the Immigration and Nationality Act, hereinafter referred to as the Act (66 Stat. 163), as amended, (8 U.S.C. 1103; 8 U.S.C. 1305; 8 U.S.C. 1360), and the regulations pursuant thereto.

B. Specific, applicable to some of the indices, including but not limited to: (1) Executive Order 11652, and 28 C.F.R. 17.79—agency control information record index, and access clearance information system. (2) 31 U.S.C. 66a—Finance branch indices. (3) Title III of the Act, as amended, (8 U.S.C. sections 1401 through 1503), and the regulations promulgated thereunder—naturalization and citizenship indices. (4) Sections 235 and 287 of the Act, as amended, (8 U.S.C. 1225; and 8 U.S.C. 1357), and the regulations promulgated pursuant thereto in personnel investigations. (5) Section 231 of the Act, as amended, (8 U.S.C. 1221)—manifest records. (6) 40 U.S.C. 483—property management system. (7) 5 U.S.C. 4113—extension training program. (8) 5 U.S.C. 552. The Freedom of Information Act, requires certain record keeping, this system was established and is maintained in order to enable the Service to comply with this requirement. (9) 5 U.S.C. 301—Health Record System, Personal Data Card System, and Compassionate Cases System. (10) Executive Order 11490—Emergency Reassignment Index.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

This system of records is used to serve the public by providing data for responses, when authorized, to written inquires, complaints, and so forth. It is also used to administer the management, operational, and enforcement activities of the Service. The records are used by officers and employees of the Service and the Department of Justice in the administration and enforcement of the immigration and nationality laws, and related statutes, including the processing of applications for benefits under these laws, detecting violations of these laws, and for referrals for prosecution.

A. Relevant information contained in this system of records maintained by the Service to carry out its functions may be referred, as a routine use, to clerks and judges of courts exercising naturalization jurisdiction for the purpose of filing petitions for naturalization and to enable such courts to determine eligibility for naturalization or grounds for revocation of naturalization.

B. Relevant information contained in this system of records maintained by the Service to carry out its functions may be referred, as a routine use, to the Department of State in the processing of petitions or applications for benefits under the Immigration and Nationality Laws Act, and all other immigration and nationality laws, including treaties and reciprocal agreements.

C. Relevant information contained in this system of records maintained by the Service to carry out its functions may be provided, as a routine use, to other federal, state, and local government law enforcement and regulatory agencies, foreign governments, the Department of Defense, including all components thereof, the Department of State, the Department of the Treasury, the Central Intelligence Agency, the Selective Service System, the United States Coast Guard, the United Nations, Interpol, and individuals and organizations during the course of investigation in the processing of a matter or a proceeding within the purview of the immigration and nationality laws, to elicit information required by the Service to carry out its functions and statutory mandates.

D. In the event that this system of records maintained by the Service to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in this system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto.

E. In the event that this system of records maintained by the Service to carry out its functions indicates a violation or potential violation of the immigration and nationality laws, or of a general statute within Service jurisdiction, or by regulation, rule, or order issued pursuant thereto, the relevant records in this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal and to opposing counsel in the course of discovery.

F. A record from this system of records may be disclosed, as a routine use, to a federal agency, in response to its request, in connection with the hiring or rentention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

G. A record from this system of records may be disclosed, as a routine use, to a federal, state or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a decision of this Service concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

H. Indication of a violation or potential violation of the laws of another nation, whether civil or criminal, may be referred to the appropriate foreign agency charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing such laws; indication of any such violation or potential violation may also be referred to international organizations engaged in the collection and dissemination of intelligence concerning criminal activity.

I. Relevant information contained in this system of record may be disclosed, as a routine use, to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A–19 at any stage of the legislative coordination and clearance process as set forth in that circular.

J. A record from this system may be disclosed to other Federal agencies for the purpose of conducting national intelligence and security investigations.

K. Information contained in this system of records may be disclosed to an applicant, petitioner or respondent or to his or her attorney or representative (as defined in 8 CFR 1.1(j)) in connection with any proceeding before the Service.

Release of information to the news media: Information permitted to be released to the news media and the public pursuant to 28 C.F.R. 50.2 may be made available from systems of records maintained by the Department of Justice unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

Release of information to Members of Congress. Information contained in systems of records maintained by the Department of Justice, not otherwise required to be released pursuant to 5 U.S.C. 552, may be made available to a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and at the request of the individual who is the subject of the record.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

General.

Storage:

Generally, information is stored manually; in some instances, in automated index systems. The actual records relating to individuals are stored in file folders at the addresses located in locations A, B, C, E, F, and H, supra.

Retrievability:

In general, records are indexed alphabetically by name and/or 'A' file number or petition and court number, some include date and port of entry. Access: most systems are accessed manually. In some cases, index records may be accessed electronically from remote terminals.

Safeguards:

Each system of records is safeguarded and protected in accordance with Department of Justice and Service rules and procedures.

Retention and disposal:

a. The period of retention for alien registration records is 100 years from the closing date or date of last action.

b. Materials retained in correspondence portion of subject files are normally retained no longer than two years and are then either microfilmed or destroyed by burning.

c. Materials retained in policy portions of subject files are retained indefinitely.

d. Indexes and records not enumerated above are generally retained only so long as they serve a useful purpose.

e. Microfilmed manifest records are retained permanently.

f. Freedom of Information Act index cards and materials kept in the correspondence portion of files are retained for one year; the disposal is by burning, shredding or pulverizing.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Exceptions to the general practices above:

Storage:

a. Air detail office index systems Forms I–92 are filed in rotary index machines by calendar year. Suspect files are in letter size cabinets, both are operated manually.

b. Alien address reports, I–53, are microfilmed from 1975 and subsequent. In 1973 and 1974 they are filed in cabinets in Service offices and in Federal Record Centers.

c. Alien enemy index information is maintained in the system and is on microfilm. The actual files are stored in Federal Record Centers.

d. Intelligence indices are stored, not by name, but by organization, activity or violation.

e. Some systems are stored numerically, or by subject, or by court and petition number or time sequence, as well as alphabetically.

f. Alien Documentation, Identification and Telecommunication (ADT) system information is stored on magnetic tape and disk. Original forms completed by the individuals to whom the records pertain are filed with other records in subsystem E, "Centralized index and records."

g. Centralized index records which can be accessed electronically are stored on magnetic disk and tape.

Access:

a. Centralized index records stored on magnetic disk are accessed from remote terminals located in INS offices on the Department of Justice Telecommunications System (JUST).

Retrievability:

Aircraft data is filed in numerical sequence (air detail office index system).

Retention and disposal:

a. Access clearance index is maintained on a current basis. Cards forms completed by the index are destroyed upon the resignation, death or retirement of the employee.

b. Air detail office index, Form I–92A forms information is retained for 5 years.

c. Border Patrol examination papers are destroyed 6 months after the trainee officer completes his probationary year.

d. Finance indices: Accounts with creditors and debtors are retained by the Service for 2 years from the close of the fiscal year to which they relate and are then transferred to the Federal Record Centers pending their ultimate disposition. The records are disposed of in accordance with General Service Administration regulations.

e. Intelligence indices: Intelligence bulletins are retained indefinitely.

f. Index Form G–617 is maintained for three years, then destroyed. However, in the White House and Attorney General

Correspondence Indexes, form G–617 information is retained through the administration of each President and one year beyond.

g. Index Form CO–147 is maintained until the subject matter is finally acted upon and is then destroyed.

h. Personnel investigations are generally destroyed in June of the year following the one year anniversary of the close of the investigation. Operation Clean Sweep cases are being retained as a package until the program is terminated. Criminal matters of unusual sensitivity are retained as long as there is a useful need.

i. Health Unit records :The records are retained for a period of 6 years after the date of the last entry therein. The records are disposed of by burning, shredding, macerating or pulverizing.

j. Indexes relating to law violators and witnesses are retained for 3 years and then destroyed. General correspondence is retained for no longer than 2 years. Investigative matters of a routine nature may be disposed of when the investigation is closed. Information on present and past employees is retained only as long as such information serves a useful purpose.

k. Naturalization examiners docket lists and master docket lists of petitioners for naturalization are retained for two years, disposal is by tearing, shredding, pulverizing, or burning. Naturalization and citizenship docket cards are purged after applications are rejected, closed, petitions non-filed, applications granted, or denied, the disposal is by tearing the cards.

l. Personal Data Card System: The record is retained for a period of 3 years after an employee is separated and then destroyed (Location: A, supra). The record is retained until an employee is separated and then destroyed (Location: B, supra). The records are disposed of by burning, shredding, macerating or pulverizing (Locations: A and B, supra).

m. Compassionate Cases System: The records are retained for 3 years and then destroyed. The records are disposed of by burning, shredding, macerating or pulverizing.

n. Emergency Reassignment Index: The records are retained on a current basis and are destroyed upon the transfer, separation, retirement or death of the employee. The records are destroyed by burning.

o. Alien Documentation Identification and Telecommunication (ADIT) system records are maintained until naturalization, death or other material change in status of the individual, or until the registration card is relinquished.

p. Centralized index records stored on magnetic disk and tape are undated periodically and maintained for the life of the relating record. Original index cards are microfilmed, then destroyed.

System manager(s) and address:

A. The system manager, service-wide is the Associate Commissioner, Management (Location: A supra)

B. The Associate Commissioner, Management is the sole manager of the following systems: (1) Agency information control record index; (2) Alien address report (I–53); (3) Alien enemy index; (4) Centralized index (Master index); (5) Congressional mail unit index; (6) Document veendors and alters; (7) Enforcement correspondence control index; (8) Examinations correspondence control index; (9) Finance unit indexes; (10) Freedom of Information Act correspondence control index; (11) Intelligence indexes; (12) Microfilmed manifest records; (13) Property issued to employees; (14) Access clearance information system; (15) White House and Attorney General correspondence control index; (16) Health Record System; and (17) Alien Documentation, Identification and Telecommunication (ADIT) system.

C. The following official for Service personnel investigations: Director, Internal Investigations (Location: A supra).

D. The following officials (for inquiry for special need) by category:

(1) Alien address reports for portion of system maintained: (a) Associate Commissioner, Management; (b) District Directors (Locations: C supra); and/or (c) Officers in Charge—(Locations:—E supra).

(2) Investigation units indices for: Contact index; enforcement index; anti-smuggling index (general); criminal, immoral, narcotic, racketeer and subversive indices; and suspect third party index, the managers are the ranking Service officer, of the Service offices in which such indices are maintained—(Location: A, B, C and E supra).

(3) Border Patrol unit indices. (a) Air detail office index: Deputy Director (Location: J, supra). (b) Anti-smuggling information center: (1) Canadian Border: Chief Patrol Agent (Location: F–19 supra); and (2) Mexican Border: Deputy Director (Location: J, supra). (c) Fraudulent Document Center: Deputy Director (Location: J, supra). (d) Border Patrol Academy: Chief Patrol Agent (Location: G supra). (e) Border Patrol sector general indices: Chief Patrol Agent (Location: F–1 thru 21 supra).

(4) Assistant Regional Commissioner, Security (Location: B–4 supra) For automobile decal identification system.

(5) Chief, Employee Development Branch, Office of Assistant Commissioner, Personnel (Location: A supra) for extension training program enrollee file.

(6) Naturalization and Citizenship indexes. (a) Naturalization and citizenship docket cards: District Directors and Officers in Charge (Locations: C and E supra, except E–6, 7, 8 and 13). (b) Docket lists of Petitioners for Naturalization Form N–476: District Directors and Officers in Charge (Locations: C and E supra, except E–6 and 8). (c) Docket lists of petitions pending at least one year (Form N–476): The Associate Commissioner Mgt. (Location: A supra), Regional Commissioners (Location: B supra), District Directors and OIC's (Locations: C and E supra, except E–6, 7, 8 and 13).

(7) Personal Data Card System: Associate Commissioner, Management (Location: A supra); Regional Commissioners (Location: B supra).

8. Compassionate Cases System: Associate Commissioner, Management (Location: A, supra); Regional Commissioners (Locations: B–1 and 4, supra).

(9) Emergency Reassignment Index: Regional Commissioners (Location: B, supra); District Directors (Location: C, supra); Officers in charge (Location: E, supra); and Chief patrol agents (Location: F, supra).

Notification procedure:

A. Address inquiries to the respective systems managers listed in System Manager supra, except Finance unit inquiries shall be addressed to the office of the Service at which the individual did business (for locations see Location supra) and Freedom of Information Act inquiries shall be addressed to the office of the Service nearest the requestor's place of residence or if known, the office of the Service where the requestor knows his record is located.

B. Systems totally exempt from disclosure pursuant to 5 U.S.C. 552a (j) and (k).

(1) Agency information control index system; (2) Anti-smuggling index (general); (3) Anti-smuggling information centers system for Canadian and Mexican Borders; (4) Contact index; (5) Criminal, immoral, narcotic, racketeer and subversive indexes; (6) Document vendors and alterers index; (7) Informant index; (8) Intelligence indexes; (9) Service look out system; (10) Suspect third party index; (11) Emergency Reassignment Index.

Record access procedures:

In all cases, requests for access to a record from any record subsystem shall be in writing or in person; if request for access is made in writing, the envelope and letter shall be clearly marked "Privacy Access Request". The requester must include a description of the general subject matter and, if known, the relating numerical identifier. The request must also include sufficient data to identify a relating record, such as the individual's full name, date and place of birth, and if appropriate, the date and place of entry into the United States, or departure from the United States. The requester shall also provide a return address for transmitting the information. Most of the systems contain records which the Attorney General has exempted from disclosure pursuant to 5 U.S.C. 552a (j) and (k) and records which are classified pursuant to Executive order. The requester will be accorded access to the records relating to himself only to the extent that such records are not within the scope of exemptions and are not classified.

Contesting record procedures:

Any individual desiring to contest or amend information maintained in the system should direct his request to the office of this Service nearest his residence, or in which he believes a record concerning him may exist, (see Notification, supra), stating clearly and concisely what information is being contested, the reasons for contesting it, and the proposed amendment to the information.

Record source categories:

The basic information contained in these records is supplied by the individual on Department of State and Service applications and reports; inquiries and/or complaints from members of the general public, members of the Congress; referrals of inquiries and/or complaints directed to the White House or to the Attorney General by members of the general public; Service reports of investigation, sworn statements, correspondence and memoranda; official reports, memoranda and writing referrals from other government agencies, including Federal, state and local; from the various courts and regulatory agencies; and information from foreign government agencies and international organizations.

The source of the data in the Freedom of Information Act correspondence control index is those individuals who seek information under the Act.

The information contained in the Emergency Reassignment Index is supplied by the individual and the Associate Commissioner, Management.

Nearly all the systems contain information received from sources which are exempted from disclosure pursuant to 5 U.S.C. 552a (j) and (k).

Systems exempted from certain provisions of the act:

The Attorney General has exempted this system from subsections (c) (3) and (4), (d), (e) (1), (2) and (3), (e) (4) (G), (H) and (I), (e) (5) and (8), (f), (g), (h) of the Privacy Act pursuant to 5 U.S.C. 552a (j) and (k). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and have been published in the FEDERAL REGISTER.

Justice/FBI–010

System name:

Employees Travel Vouchers and Individual Earnings Records.

System location:

Federal Bureau of Investigation, 10th and Pennsylvania Avenue NW., Washington, D.C. 20535. Records pending audit are located at Federal Records Centers.

Categories of individuals covered by the system:

Former and current employees of the FBI.

Categories of records in the system:

Payroll, travel and retirement records of current and former employees of the FBI.

Authority for maintenance of the system:

The head of each executive agency, or his delegate, is responsible for establishing and maintaining an adequate payroll system, covering pay, leave and allowances, as a part of the system of accounting and internal control of the Budget and Accounting Procedures Act of 1950, as amended, 31 U.S.C. 66, 66a and 200(a).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

These records are used by Departmental personnel to prepare and document payment to employees of the FBI and to carry out financial matters related to the payroll or accounting functions.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system—Storage:

Manual (paper files).

Retrievability:

The records can be retrieved by name and either social security account number or employe identification number.

Safeguards:

Accessed by Bureau employee at FBI Headquarters and by Field Office employees at Records Centers. Transmittal document contains Bureau statement concerning security, i.e., who may access or view records. Records are maintained in rooms under the control of employees during working hours and maintained in locked file cabinets in locked rooms at other times. Security guards further restrict access to the building to authorized personnel only.

Retention and disposal:

Employee travel vouchers—retained indefinitely. Individual earnings records—retained 56 years after date of last entry.

System manager(s) and address:

Director, Federal Bureau of Investigation, 9th and Pennsylvania Avenue, NW., Washington, D.C. 20535.

Notification procedure:

Written inquiries, including name, date of birth, and social security number, to determine whether this system contains records about an individual may be addressed to Director, Federal Bureau of Investigation, 9th and Pennsylvania Avenue, NW., Washington, D.C. 20535.

Record accessing and contesting procedures:

Written inquiries, including name, date of birth and social security number, requesting access or contesting the accuracy of records may be addressed to: Director, Federal Bureau of Investigation, 9th and Pennsylvania Avenue, NW., Washington, D.C. 20535.

Record source categories:

Travel vouchers turned in by individual employees for official business. Pay records—time and attendance records, pay determined by the agency

Systems exempted from certain provisions of the Act:

None

JUSTICE/FBI–011

System name:

Employee Health Records

System locations:

Federal Bureau of Investigation, Finance and Personnel Division, Health Service, 9th and Pennsylvania Avenue, NW., Washington, D.C. 20535, and the following field offices: New York, Newark, Philadelphia, Chicago, Los Angeles, San Francisco, and FBI Academy, Quantico, Virginia. Addresses for these offices can be found in Justice FBI–999, the appendix of Field Offices for the Federal Bureau of Investigation published at 41 FR 40002–3 (September 16, 1976).

Categories of individuals covered by the system:

Current and former employees of the FBI.

Categories of records in the system:

Records of visits to health facilities relating to sickness, injuries or accidents.

Authority for maintenance of the system:

The head of each agency is responsible, under 5 U.S.C. 7902, for keeping a record of injuries and accidents to its employees and for reducing accidents and health risks. These records are maintained under the general authority of 5 U.S.C. 301 so that the FBI can be kept aware of the health related matters of its employees and more expeditiously identify them.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

These records are maintained by the FBI to identify matters relating to the health of its present and former employees. Information is available to employees of the FBI whose job function relates to identifying and resolving health matters of former and current personnel of the FBI.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system—Storage:

Filing of 3×5 index record cards

Retrievability:

These index cards are retrievable by the name of an individual.

Safeguards:

These records are maintained by FBI personnel during working hours and in locked file cabinets during non-working hours. Security guards further restrict access to the building to authorized personnel.

Retention and disposal:

These 3×5 index cards are maintained for the duration of an employee's service

with the FBI unless the resolution of a health related problem warrants retention beyond this period.

System manager(s) and address:

Director, Federal Bureau of Investigation, 9th and Pennsylvania Avenue, NW., Washington, D.C. 20535.

Notification procedure:

Written inquiries, including name, date of birth and social security number, to determine whether this system of records contains records about an individual may be addressed to: Director, Federal Bureau of Investigation, 9th and Pennsylvania Avenue, NW., Washington, D.C. 20535.

Record access and contesting procedures:

Written inquiries, including name, address and social security number, requesting access or contesting the accuracy of records may be addressed to: Director, Federal Bureau of Investigation, 9th and Pennsylvania Avenue, NW., Washington, D.C. 20535 and the above-mentioned field offices at addresses referred to in Justice/FBI–999.

Record source categories:

Employees of the Federal Bureau of Investigation originate their own records.

Systems exempted from certain provisions of the Act:

None.

JUSTICE/FBI–012

System name:

Time Utilization Record-Keeping (TURK) System.

System location:

Administrative Services Division, Federal Bureau of Investigation, J. Edgar Hoover Building, 9th and Pennsylvania Avenue, NW., Washington, D.C. 20535.

Categories of individuals covered by the system:

Special Agents, Accounting Technicians, Investigative Assistants, and Laboratory Technicians.

Categories of records in the system:

System contains bi-weekly time utilization data of Special Agents, Accounting Technicians, Investigative Assistants and Laboratory Technicians.

Authority for maintenance of the system:

This system of records is maintained under the authority of 31 U.S.C. 66a which requires the head of the Department, or his delegate, to establish a system of accounting and internal control designed to provide full disclosure of the financial results of the FBI's activities; adequate financial information needed for the FBI's management purposes and effective control over the accountability for all funds, property and other assets for which the FBI is responsible.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

For the purpose of producing cost accounting reports reflective of personnel utilization, records may be made available to the General Accounting Office, the Office of Management and Budget and the Treasury Department.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system—Storage:

Information maintained in the system is stored electronically on magnetic tapes and discs for use in a computer environment.

Retrievability:

Information is retrieved by name and or social security number.

Safeguards:

Information is safeguarded and protected in accordance with the FBI's Computer Center regulations that permit access and use by authorized personnel only.

Retention and disposal:

Bi-weekly magnetic tapes are retained for a period of 3 years. Hard copy records are retained in accordance with instructions contained in General Records Schedule 8, and GSA Bulletin FPMR–47 Archives and Records. Hard copy records will be destroyed, magnetic tapes will be erased and reused.

System manager(s) and address:

Director, Federal Bureau of Investigation, 9th and Pennsylvania Avenue, NW., Washington, D.C. 20535.

Notification procedures:

Same as above.

Record accessing and contesting procedures:

Written requests for access to information may be made by an employee through his supervisor or by former employees by writing to: Federal Bureau of Investigation, 9th and Pennsylvania Avenue, NW., Washington, D.C. 20535 (Attn: Administrative Services Division). Contesting of any information should be set out in written detail and forwarded to the above address. A check of all supportive records will be made to determine the factual data in existence.

Record source categories:

Source of information is derived from daily time utilization recording made by the employees.

Systems exempted from provisions of this Act:

None.

JUSTICE/CIV–001

System name:

Civil Division Case File System.

System location:

U.S. Department of Justice; 10th and Constitution Avenue, N.W.; Washington, D.C. 20530.

Categories of individuals covered by the system:

Any and all parties involved in the cases handled by the Civil Division will have identifying data contained in this system.

Categories of records in the system:

1. The main record of the system is the case file which is retained on each case under the jurisdiction of the Civil Division except for those cases for which files are maintained in the Civil Division Case File System: Customs Section and the Office of Alien Property File System, and constitutes the official record of the Department of Justice. All record material relating to a case is retained in the file. Each case is assigned a number comprised of the category designation for the subject matter; the code number for the judicial district where the action originated, and the number of cases of that category which have arisen in that district.

2. Alphabetical and numerical indices are utilized as a means of access to the proper file by the cross-referencing of the names of all parties to a suit with the file number. Forms CV–54 and carbon-interleaf index cards are used in these indices.

3. A Docket Card Index is maintained on each case in order to follow the progress of all Division cases and to obtain statistical data for monthly and fiscal reports. However, all information contained on the cards has been taken from the record material contained in the official file.

Authority for maintenance of the system:

General authority to maintain the system is contained in 5 U.S.C. 301 and 44 U.S.C. 3101. The particular system was established in accordance with 28 CFR 0.77(f) and was delegated to the Civil Division pursuant to the memorandum from the Deputy Attorney General, dated July 17, 1974.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses.

Any record pertaining to any case or matter in the Civil Division may be disseminated to any other component of the Department of Justice, including the F.B.I. and the United States Attorneys' Offices, for use in connection with the consideration of that case or matter or any other case or matter under consideration by the Civil Division or any other component of the Department of Justice. A record maintained in this system of records may be disseminated as a routine use of such record as follows: (1) in any case in which there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature, the record in question may be disseminated to the appropriate federal, state, local or foreign agency charged with the responsibility for investigating or prosecuting such violation or charged with enforcing or implementing such law; (2) in the course of investigating the potential or actual violation of any law, whether civil, criminal or regulatory in nature, or during the course of a trial or hearing, or the preparation for a trial or hearing for such violation, a record may be disseminated to a federal, state, local or foreign agency, or to an individual or organization, if there is reason to believe that such agency, individual or organization possesses information relating to the investigation, trial or hearing and the dissemination is reasonably necessary to elicit such information or to obtain the cooperation of a witness or an informant; (3) a record relating to a case or matter may be disseminated in an appropriate federal, state, local or foreign court or grand jury proceeding in accordance with established constitutional, substantive, or procedural law or practice; (4) a record relating to a case or matter may be disseminated to a federal, state, or local administrative or regulatory proceeding or hearing in accordance with the procedures governing such proceeding or hearing; (5) a record relating to a case or matter may be disseminated to an actual or potential party or his attorney for the purpose of negotiation or discussion of such matters as settlement of the case or matter, plea bargaining, or formal or informal discovery proceedings; (6) a record relating to a case or matter that has been referred by an agency for investigation, prosecution, or enforcement, or that involves a case or matter within the jurisdiction of an agency, or where the agency or officials thereof are a party to litigation or where the agency or officials may be affected by a case or matter, may be disseminated to such agency to notify the agency of the status of the case or matter or of any decision or determination that has been made, or to make such other inquiries and reports as are necessary during the processing of the case or matter; (7) a record relating to a person held in custody pending or during arraingnment, trial, sentence or extradition proceedings, or after conviction or after extradition proceedings, may be disseminated to a federal, state, local or foreign prison, probation, parole, or pardon authority, or to any other agency or individual concerned with the maintenance, transportation, or release of such a person; (8) a record relating to a case or matter may be disseminated to a foreign country pursuant to an international treaty or convention entered into and ratified by the United States or to an executive agreement; (9) a record may be disseminated to a federal, state, local, foreign, or international law enforcement agency to assist in the general crime prevention and detection efforts of the recipient agency or to provide investigative leads to such agency; (10) a record may be disseminated to a federal agency, in response to its request, in connnection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information relates to the requesting agency's decision on the matter; (11) a record may be disseminated to the public, news media, trade associations, or organized groups, when the purpose of the dissemination is educational or informational, provided that the record does not contain any information identifiable to a specific individual other than is necessary to identify the matter or where the information has previously been filed in a judicial or administrative office, including the clerk of the court; (12) a record may be disseminated to a foreign country, through the United States Department of State or directly to the representative of such country, to the extent necessary to assist such country in civil or criminal proceedings in which the United States or one of its officers or agencies has an interest; (13) a record that contains classified national security information and material may be disseminated to persons who are engaged in historical research projects, or who have previously occupied policy making positions to which they were appointed by the President, in accordance with the provisions of 28 CFR 17.60.

Release of information to the news media: Information permitted to be released to the news media and the public pursuant to 28 CFR 50.2 may be made available from systems of records maintained by the Department of Justice unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

Release of information to Members of Congress. Information contained in systems of records maintained by the Department of Justice, not otherwise required to be released pursuant to 5 U.S.C. 552, may be made available to a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and at the request of the individual who is the subject of the record.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

1) The case files utilize standard file jackets and are retained in electronic rotary power files; 2) The alphabetical and numerical index cards, as well as the docket cards, are retained in standard file cabinets.

Retrievability:

The files and docket cards must be retrieved by file number. The file number can be ascertained from the alphabetical index if the name of any party to the suit is known.

Safeguards:

Information contained in the system is unclassified. However, only attorneys who have their names recorded in the File Unit can be issued a case file. Minimal information about a case is provided from the various indices to telephone callers, since there is a problem with identifying the identity of a caller. If a party desires detailed information, he is referred directly to the attorney of record.

Retention and disposal:

When a case file is closed by the legal section, it is sent to the Federal Records Center for retention in accordance with the authorized Record Disposal Schedule for the classification of the case. Such schedules are approved by the National Archives. After the designated period has passed, the file is destroyed. However, the index and docket cards are not purged.

System manager(s) and address:

Assistant Attorney General; Civil Division; U.S. Department of Justice; 10th and Constitution Avenue, N.W.; Washington, D.C. 20530.

Notification procedure:

Address inquiries to: Assistant Attorney General; Civil Division; U.S. Department of Justice; 10th and Constitution Avenue, N.W.; Washington, D.C. 20530.

Record access procedures:

A request for information concerning the cases of the Civil Division should be submitted in writing, with the envelope and letter clearly marked "Privacy Access Request". The request should include the file number and/or the names of any litigants known to the requestor. The requestor should also provide a return address for transmitting the information. Such access requests should be submitted to the System Manager listed above. Requests may also be made by telephone. In such cases the caller will be referred to the attorney of record. The attorney, in turn, may require an official written request.

Contesting record procedures:

Individuals desiring to contest or amend information maintained in the system should direct their request to the System Manager listed above. The request should clearly state what information is being contested, the reasons for contesting it and the proposed amendment to the information sought.

Record source categories:

All litigants involved in the cases of this Division are sources of information. Such information is either contained in the record material in the case files or has been extracted from that record material and put onto docket and index cards.

Systems exempted from certain provisions of the act:

None.

JUSTICE/CIV–002

System name:

Civil Division Case File System: Customs Section.

System location:

26 Federal Plaza, New York, New York 10007, and U.S. Department of Justice Data Services Center, 10th and Constitution Avenue, N.W., Washington, D.C. 20530.

Categories of individuals covered by the system:

Any and all parties and counsel involved in the cases handled by the Customs Section of the Civil Division will have identifying data contained in this system.

Categories of records in the system:

1. The main record of the system is the case file which is retained on each case under the jurisdiction of the Customs Section of the Civil Division and constitutes the official record of the Department of Justice thereon. All record material relating to a case is retained in the file. Each file is assigned the Customs Court number given to the summons filed in that court or, in cases filed prior to October 1, 1970, to reappraisement appeals or to protests filed with the Customs Court.

The number assigned to the file will change to the number assigned by the Court of Customs and Patent Appeals, if that case becomes the subject of an appeal before that court. In addition, the Customs Section retains a log of communications received and communications sent. The correspondence is identified thereon by court (case) number, identification of the kind of communication, and the person receiving it.

2. The case file and communication logs are physically retained at the offices of the Customs Section, 26 Federal Plaza, New York, New York 10007. From these records, the Customs Section inputs certain information for conversion into a data processing system which is maintained at the Department of Justice Data Services Center, 10th and Constitution Avenue, N.W., Washington, D.C. 20530. Included in the information contained in the data processing system is the identity of the parties and their counsel, as well as the merchandise involved, the port of entry and the competing statutory provisions.

3. Alphabetical and numerical indices are maintained as a means of access to the proper file number by the cross-referencing of the names of non-government parties to suits with the appropriate file (court) numbers. These indices are made of index cards and maintained in the Chief Clerk's office in the Customs Section.

Authority for maintenance of the system:

The Customs Section case files are maintained under the authority of 28 U.S.C. 2601(b) and 2632(e) and established in accordance with 28 CFR 0.45(c) which gives the Civil Division responsibility for "all litigation incident to the reappraisement and classification of imported goods, including the defense of all suits in the Court of Customs and Patent Appeals", and with 28 CFR 0.48 which designates the Chief, Customs Section, "to accept service of notices of appeals to the Court of Customs and Patent Appeals and all pleadings and other papers filed in the Customs Court, when the United States is an adverse party in any customs litigation".

Routine uses of records maintained in the system, including categories of users and the purposes of such uses.

Any record pertaining to any case or matter in the Civil Division may be disseminated to any other component of the Department of Justice, including the Federal Bureau of Investigation and the United States Attorney offices, for use in connection with the consideration of that case or matter or any other case or matter under consideration by the Civil Division or any other component of the Department of Justice.

Certain information contained in the record may also be disseminated to the U.S. Customs Service, the Department of the Treasury, the International Trade Commission, the Department of State, or any other agency of the Government whose decision is being challenged in a case assigned to the Customs Section for disposition. A record maintained in this system of records may be disseminated as a routine use of such record as follows: (1) In any case in which there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature, the record in question may be disseminated to the appropriate federal, state, local or foreign agency charged with the responsibility for investigating or prosecuting such violation or charged with enforcing or implementing such law; (2) in the course of investigating the potential or actual violation of any law, whether civil, criminal or regulatory in nature, or during the course of a trial or hearing, or the preparation for a trial or a hearing for such violation, a record may be disseminated to a federal, state, local or foreign agency, or to an individual or organization, if there is reason to believe that such agency, individual or organization possesses information relating to the investigation, trial or hearing and the dissemination is reasonably necessary to elicit such information or to obtain the cooperation of a witness or an informant; (3) a record relating to a case or matter may be disseminated in an appropriate federal, state, local or foreign court or grand jury proceeding in accordance with established constitutional, substantive, or procedural law or practice; (4) a record relating to a case or matter may be disseminated to a federal, state, or local administrative or regulatory proceeding or hearing in accordance with the procedures governing such proceeding or hearing; (5) a record relating to a case or matter may be disseminated to an actual or potential party or his attorney for the purpose of negotiation or discussion of such matters as settlement of the case or matter, plea bargaining, or formal or informal discovery proceedings; (6) a record relating to a case or matter that has been referred by an agency for investigation, prosecution, or enforcement, or that involves a case or matter within the jurisdiction of an agency, or where the agency or officials thereof are a party to litigation or where the agency or officials may be affected by a case or matter, may be disseminated to such agency to notify the agency of the status of the case or matter or of any decision or determination that has been made, or to make such other inquiries and reports as are necessary during the processing of the case or matter; (7) a record relating to a person held in custody pending or during arraignment, trial, sentence or extradition proceedings, or after conviction or after extradition proceedings, may be disseminated to a federal, state, local or foreign prison, probation, parole, or pardon authority, or to any other agency or individual concerned with the maintenance, transportation, or release of such a person; (8) a record relating to a case or matter may be disseminated to a foreign country pursuant to an international treaty or convention entered into and ratified by the United States or to an executive agreement; (9) a record may be disseminated to a federal, state, local, foreign, or international law enforcement agency to assist in the general crime prevention and detection efforts of the recipient agency or to provide investigative leads to such agency; (10) a record may be disseminated to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information relates to the requesting agency's decision on the matter; (11) a record may be disseminated to the public, news media, trade associations, or organized groups, when the purpose of the dissemination is educational or informational, provided that the record does not contain any information identifiable to a specific individual other than is necessary to identify the matter or where the information has previously been filed in a judicial or administrative office, including the clerk of the court; (12) a record may be disseminated to a foreign country, through the United States Department of State or directly to the representative of such country, to the extent necessary to assist such country in civil or criminal proceedings in which the United States or one of its officers or agencies has an interest; (13) a record that contains classified national security information and material may be disseminated to persons who are engaged in historical research projects, or who have previously occupied policy making positions to which they were appointed

by the President, in accordance with the provisions of 28 CFR 17.60; (14) copies of the summons (protest and reappraisement appeals, where appropriate) and the communication logs are made available to employees of the private contractor who services the data processing system in New York for the purpose of enabling such employees to extract all pertinent information from said documents so that such information may be encoded and converted to punch card form.

Release of information to the news media: Information permitted to be released to the news media and the public pursuant to 28 CFR 50.2 may be made available from systems of records maintained by the Department of Justice unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

Release of information to Members of Congress: Information contained in systems of records maintained by the Department of Justice, not otherwise required to be released pursuant to 5 U.S.C. 552, may be made available to a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and at the request of the individual who is the subject of the record.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

(1) The case files utilize standard file jackets or envelopes and are maintained in standard file cabinets; (2) The alphabetical index cards are maintained in standard file cabinets; (3) The communication logs are maintained in looseleaf binders and, when not being currently referred to, are also maintained in standard file cabinets; (4) The information in the data processing system is maintained on tapes stored in the Data Services Center.

Retrievability:

(1) The case files must be retrieved by number. The file number may be ascertained from the alphabetical index when the name of any non-government litigant is known. (2) The information contained in the data processing system may be retrieved through the retrieval tool activiated by an attorney making a request for a report to the computer technician who codes the request on a form in the format of the retrieval language. The action words of the retrieval reports are: List=lists the case numbers of the cases which satisfy certain criteria such as plaintiff's name, counsel's name, court number, merchandise, competing statutory provisions, Government counsel. Write=output and the full history for any case specified by case number. Write*=a limited case history for any case specified by case number. Count=tallying the number of cases in the data base contained in the request.

Safeguards:

(1) Information contained in the system is unclassified. However, only attorneys in the Customs Section who have responsibility for the case may properly obtain a case file. Correspondence and telephone calls about particular cases are referred to the attorney having responsibility for the case. In the attorney's absence, another attorney covering for the absent attorney or the Chief of the Section may respond to the telephone call or correspondence. The index files and the communication logs are utilized only by the personnel of the Customs Section in locating or verifying information contained in the system. (2) Information from the data processing system may be obtained only by attorneys on the basis of requests made in writing on a proper form supplied by the Customs Section. The request is made of the computer technician. Normally these requests are mailed to the technician in charge at the Data Services Center, but occasionally the request may be related telephonically by the computer technician.

Retention and disposal:

(1) Closed case files are sent to the Federal Records Center for retention in accordance with the authorized Records Disposal Schedule for the classification of the case. Such schedules are approved by the National Archives. After the designated period is passed, the file is destroyed. The communication logs are sent to the Federal Records Center for retention in accordance with the authorized records disposal schedule after five years. After the designated period those records are also destroyed. The index cards, however, are not purged. (2) Periodically, the inactive cases will be purged from the main tape in the data processing system and transferred to the historical tape where the information will be retained indefinitely. There is a provision in the data processing system to delete and remove an entire case history from the main or historical tape. This may be done on request from the Chief of the Customs Section and such removed cases will not be saved or written on any other tape.

System manager(s) and address:

Assistant Attorney General, Civil Division, U.S. Department of Justice, 10th and Constitution Avenue, N.W., Washington, D.C. 20530.

Record access procedures:

A request for information concerning the cases of the Customs Section of the Civil Division should be submitted in writing, with the envelope and letter clearly marked "Privacy Access Request". The request should include the file number and/or the names of any non-government litigant known to the requestor. The requestor should also provide a return address for transmitting the information. Such access request should be submitted to the Assistant Attorney General, Civil Division, U.S. Department of Justice, 10th and Constitution Avenue, N.W., Washington, D.C. 20530.

Contesting record procedures:

Individuals desiring to contest or amend information maintained in the system should direct their request to the Assistant Attorney General, Civil Division, Department of Justice, 10th and Constitution Avenue, N.W., Washington, D.C. 20530. The request should clearly state what information is being contested, the reasons for contesting it, and the proposed amendment to the information sought.

Record source categories:

All litigants involved in the cases of this Division are sources of information. Such information is either contained in the record material in the case files or has been extracted from that record material and put on communication logs and/or index cards.

Systems exempted from certain provisions of the act:

None.

JUSTICE/CIV–003

System name:

Office of Alien Property File System.

System location:

550 11th Street, N.W., Washington, D.C. 20530.

Categories of individuals covered by the system:

Any and all parties involved in the cases, claims and matters handled by the Office of Alien Property may have identifying data contained in this system.

Categories of records in the system:

1. This system consists of indices and files relative to enemy-owned property, reporting sources, ownership, vesting, and claims for the return thereof. Each vesting order is assigned a general file number, and each claim has a separte file number. Separate account files are maintained on vested property for each alien account.

2. Alphabetical and numerical indices are utilized as a means of access to the proper general file by the cross-referencing of the names of all individual former property owners and claimants with the general files.

3. Records of litigation involving the Office of Alien Property are contained in this system. There are also alphabetical and numerical indices to facilitate access to these cases.

Authority for maintenance of the system:

The Office of Alien Property files are maintained under the authoriyt of 44 U.S.C. 3101 and 50 U.S.C. App. 40, Title II of the International Claims Settlement Act, and was established in accordance with 28 CFR 0.47 which states in part "The Office of Alien Property shall be a part of the Civil Division * * *" and thereafter describes the authority,

rights, privileges, powers, duties and functions of that office.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses.

Any record pertaining to any case or matter in the Civil Division may be disseminated to any other component of the Department of Justice, including the Federal Bureau of Investigation and the United States Attorney Offices, for use in connection with the consideration of that case or matter or any other case or matter under consideration by the Civil Division or any other component of the Department of Justice.

Certain information contained in the record may also be disseminated to the U.S. Customs Service, the Department of the Treasury, the International Trade Commission, the Department of State, or any other agency of the Government whose decision is being challenged in a case assigned to the Customs Section for disposition. A record maintained in this system of records may be disseminated as a routine use of such record as follows: (1) In any case in which there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature, the record in question may be disseminated to the appropriate federal, state, local or foreign agency charged with the responsibility for investigating or prosecuting such violation or charged with enforcing or implementing such law; (2) in the course of investigating the potential or actual violation of any law, whether civil, criminal or regulatory in nature, or during the course of a trial or hearing, or the preparation for a trial or hearing for such violation, a record may be disseminated to a federal, state, local or foreign agency, or to an individual or organization, if there is reason to believe that such agency, individual or organization possesses information relating to the investigation, trial or hearing and the dissemination is reasonably necessary to elicit such information or to obtain the cooperation of a witness or an informant; (3) a record relating to a case or matter may be disseminated in an appropriate federal, state, local or foreign court or grand jury proceeding in accordance with established constitutional, substantive, or procedural law or practice; (4) a record relating to a case or matter may be disseminated to a federal, state, or local administrative or regulatory proceeding or hearing in accordance with the procedures governing such proceeding or hearing; (5) a record relating to a case or matter may be disseminated to an actual or potential party or his attorney for the purpose of negotiation or discussion of such matter as settlement of the case or matter, plea bargaining, or formal or informal discovery proceedings; (6) a record relating to a case or matter that has been referred by any agency for investigation, prosecution, or enforcement, or that involves a case or matter within the jurisdiction of an agency, or where the agency or officials thereof are a party to litigation or where the agency or officials may be affected by a case or matter, may be disseminated to such agency to notify the agency of the status of the case or matter or of any decision or determination that has been made, or to make such other inquiries and reports as are necessary during the processing of the case or matter; (7) a record relating to a person held in custody pending or during arraignment, trial, sentence or extradition proceedings, or after conviction or after extradition proceedings, may be disseminated to a federal, state, local or foreign prison, probation, parole, or pardon authority, or to any other agency or individual concerned with the maintenance, transportation, or release of such a person; (8) a record relating to a case or matter may be disseminated to a foreign country pursuant to an international treaty or convention entered into and ratified by the United States or to an executive agreement; (9) a record may be disseminated to a federal, state, local, foreign or international law enforcement agency to assist in the general crime prevention and detection efforts of the recipient agency or to provide investigative leads to such agency; (10) a record may be disseminated to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information relates to the requesting agency's decision on the matter; (11) a record may be disseminated to the public, news media, trade associations, or organized groups, when the purpose of the dissemination is educational or informational, provided that the record does not contain any information identifiable to a specific individual other than is necessary to identify the matter or where the information has previously been filed in a judicial or administrative office, including the clerk of the court; (12) a record may be disseminated to a foreign country, through the United States Department of State or directly to the representative of such country, to the extent necessary to assist such country in civil or criminal proceedings in which the United States or one of its officers or agencies has an interest; (13) a record that contains classified national security information and material may be disseminated to persons who are engaged in historical research projects, or who have previously occupied policy making positions to which they were appointed by the President, in accordance with the provisions of 28 CFR 17.60; (14) records are also available to the public for inspection and distribution as set forth at 8 CFR 503.1, including (a) Annual Reports of the Office of Alien Property, and (b) final determinations, opinions, and orders in cases heard or reviewed within the Office of Alien Property; (15) records and documents are available for inspection by persons properly and directly concerned in connection with claims filed with the Office, records in cases heard or reviewed in the Office, and authorizations for sale and records of bids in public sales and orders for their acceptance or rejection and notifications thereof; (16) any record or portion thereof may also be disseminated to the Department of the Treasury and to the Foreign Claims Settlement Commission as a matter of routine use when such record relates to matters within the jurisdiction of the Office of Foreign Assets Control, Department of the Treasury, or claims being processed before the Foreign Claims Settlement Commission; (17) any record or portion thereof relating to an estate or trust matter under the jurisdiction of the probate courts of the several states may be disseminated to the parties and their representatives or to the courts, in proceedings involving the property owned or claimed to have been owned by a designated national of an enemy country under the provisions of the Trading with the Enemy Act; (18) any record may be disseminated to the Department of State for any negotiation or other action relating to the Office of Alien Property or to any subject matter which is, or was at one time, under the jurisdiction of the Office of Alien Property.

Release of information to the news media: Information permitted to be released to the news media and the public pursuant to 28 CFR 50.2 may be made available from systems of records maintained by the Department of Justice unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

Release of information to Members of Congress: Information contained in systems of records maintained by the Department of Justice, not otherwise required to be released pursuant to 5 U.S.C. 552, may be made available to a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and at the request of the individual who is the subject of the record.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Information in the system is stored in standard file jackets, and on index cards, within standard filing cabinets.

Retrievability:

The files and index cards must be retrieved by file numbers, which can be ascertained from alphabetical indices if the name of the non-government party is known, or from numerical indices relating to the various vesting orders, accounts, claims, or cases.

Safeguards:

Information in the system is regarded as confidential, pursuant to 8 CFR 503.17. Departmental rules and procedures are in force that insure that only Departmental attorneys and their authorized agents have access to this information.

Retention and disposal:

A file is closed when one of the following occurs:

1. The vesting order has been complied with and the property disposed of pursuant to the Trading with the Enemy Act, and all claims have been processed.
2. A case involving the Office of Alien Property has ended by the final termination of the litigation through a compromise settlement, court decision or any other method of termination for court cases.

The file is then retained in the Federal Records Center for a number of years and thereafter may be destroyed. Index cards are retained for as long as may be practicable.

System manager(s) and address:

Assistant Attorney General, Civil Division; U.S. Department of Justice, 10th and Constitution Avenue, N.W., Washington, D.C. 20530.

Notification procedure:

Address inquiries to Assistant Attorney General, Civil Division, U.S. Department of Justice, 10th and Constitution Avenue, N.W., Washington, D.C. 20530.

Record access procedures:

A request for access to a record within the Office of Alien Property system involving matters of privacy and which is not otherwise available to the party requesting the same should be submitted in writing, with the envelope and letter clearly marked "Privacy Access Request". The request should include file or account numbers and/or the names of any known non-government parties. The requester should also provide a return address for transmitting the information. Such access requests should be submitted to the System Manager listed above.

Contesting record procedures:

Individuals desiring to contest or amend information maintained in the system should direct their request to the System Manager listed above. The request should clearly state what information is being contested, the reasons for contesting it and the proposed amendment to the information sought.

Record source categories

All claimants to property, as well as former depositories, are sources of information, also other offices and agencies operating under provisions of the Trading with the Enemy Act.

Systems exempted from certain provisions of the act:

None.

DEPARTMENT OF LABOR

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Notice of Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is caculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.
2. Employment trends in the same industry in the local area.
3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.
4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).
5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to: Deputy Assistant Secretary for Employment and Training, 601 D St., NW, Washington, D.C. 20213.

Signed at Washington, D.C., this eighth day of August 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training

Applications Received During the Week Ending August 5, 1977

Name of applicant	Location of enterprise	Principal product or activity
Wilson Engineering Co	Fairmont, W. Va	Steel fabricating
MERR Enterprises, Inc	Douglas, Ga	Holiday Inn motel and restaurant complex.
John Robert Jones	Red Springs, N.C	Grain drying and storing facility.
AGE Box Co	Cibolo, Tex	Manufacture of corrugated [illegible] pute
Frazier & Frazier Industries	Coolidge, Tex	Manufacture of quality grey iron
[illegible]	Green Valley, Ariz	Investment rental casitas

Occupational Safety and Health Administration

STANDARDS ADVISORY COMMITTEE ON CUTANEOUS HAZARDS

Nomination of Members

Notice of Establishment and Request for

Notice is hereby given of the intention to form a Standards Advisory Committee on Cutaneous Hazards as authorized by Section 7(b) of the Williams-Steiger Occupational Safety and Health Act of 1970 (29 U.S.C. 656). The function of this committee will be to review the hazards of skin exposure to corrosives, sensitizers, irritants and carcinogens in order to prepare recommendations for an effective standard to control these hazards.

The Assistant Secretary for Occupational Safety and Health requests nominations for membership on this committee in the following categories: employee, employer, state and public. No member of the committee (other than representatives of employers and em-

ployees shall have an economic interest in any proposed rule.

Nominations must include: (1) a letter of recommendation from an organization of the same category as the nominee, or in the case of the public category from an appropriate organization or individual; (2) a resume of the nominee's related qualifications including address, business and home telephone numbers; and (3) a statement that the nominee is aware of the nomination and is willing to serve as a committee member. The term of membership will be for the duration of committee activities not to exceed 180 days from the date of the organizational meeting.

Nominations should be submitted no later than September 9 to:

Stephen Kaffee, Division of Consumer Affairs, Occupational Safety and Health Administration, Room N-3635, Department of Labor Building, 3rd Street and Constitution Avenue, NW., Washington, D.C. 20210. 202-523-8024.

Signed at Washington, D.C. this 5th day of August 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

Office of the Secretary

PROPOSED REVISION OF CONSUMER Representation Plan (CRP)

AGENCY: Office of Consumer Affairs, USDOL.

ACTION: Proposed Change in Notice of DOL Consumer Representation Plan.

SUMMARY: On September 28, 1976, the Department of Labor (DOL) published in the FEDERAL REGISTER (41 FR 42815) a Consumer Representation Plan including the intention to hold an annual open meeting in each regional city to evaluate the Department's program operations, regulations and policy. Since that time a new Administration has taken office and proposed an entirely new consumer program, including the establishment of an Agency for Consumer Advocacy—currently before Congress. There are conflicting views with respect to the Administration's consumer proposals and the subject is under intense national consideration on various public and private levels. DOL is concerned that the proposed open meetings might inappropriately serve as a forum for debating the consumer proposals now before Congress and negate the purposes listed above for which the open meetings were planned. DOL therefore proposes to postpone the open meetings until such time as an effective resolution of the Administration's consumer program recommendations has been achieved.

DATES: Comments must be received on or before September 12, 1977.

ADDRESS: Send comments to Special Assistant to the Secretary for Consumer Affairs, U.S. Department of Labor, Room S-1032, 200 Constitution Avenue NW., Washington, D.C. 20210.

It is proposed to suspend until further notice that paragraph in the Department of Labor Consumer Representation Plan appearing on 41 FR 42816 which reads as follows:

Hold an annual open meeting in each of our regional cities for consumers to evaluate program operations, regulations and policy.

Signed at Washington, D.C. on the eighth day of August, 1977.

JOHN W. LESLIE,
Special Assistant to the Secretary for Consumer Affairs.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 77-50]

SPACE SHUTTLE PROGRAM

Draft Environmental Impact Statement; Public Availability

Notice is hereby given of the public availability of the draft environmental impact statement for the National Aeronautics and Space Administration (NASA) Space Shuttle Program.

A previous environmental impact statement for the Space Shuttle Program was prepared in draft, circulated for comments, and published as a final statement in 1972. Since that time, new information has become available, and a number of design changes have altered somewhat the estimates of other environmental effects. The present draft has therefore been prepared to supersede the 1972 statement, and is being issued at this time.

Comments on the draft environmental impact statement and on matters set forth therein are solicited from and may be submitted by state and local agencies and members of the public. Such comments should be submitted to the Associate Deputy Administrator, National Aeronautics and Space Administration, Washington, D.C. 20546. All comments must be recevied by October 12, 1977, in order to be considered in the preparation of the final environmental impact statement.

Copies of the draft may be obtained from NASA, Code FP, Washington, D.C. 20546, or examined at any of the following locations:

(a) National Aeronautics and Space Administration, Public Documents Room (Room 126), 600 Independence Avenue SW., Washington, D.C. 20546.

(b) Ames Research Center, NASA (Building 201, Room 17), Moffett Field, Calif. 94035.

(c) Hugh L. Dryden Flight Research Center, NASA (Building 4800, Room 1017), P.O. Box 273, Edwards, Calif. 93523

(d) Goddard Space Flight Center, NASA (Building 8, Room 150), Greenbelt, Md. 20771.

(e) Johnson Space Center, NASA (Building 1, Room 136), Houston, Tex. 77058

(f) John F. Kennedy Space Center, NASA (Headquarters Building, Room 1207), Kennedy Space Center, Fla. 32899.

(g) Langley Research Center, NASA (Building 1219, Room 304), Hampton, Va. 23365.

(h) Lewis Research Center, NASA (Administration Building, Room 120), 21000 Brookpark Road, Cleveland, Ohio 44135.

(i) George C. Marshall Space Flight Center, NASA (Building 4200, Room G-11), Huntsville, Ala. 35812.

(j) National Space Technology Laboratories, NASA (Building 1100, Room A-713), Bay St. Louis, Miss. 39520.

(k) Jet Propulsion Laboratory (Building 180, Room 600), 4800 Oak Grove Drive, Pasadena, Calif. 91103.

(l) Wallops Flight Center, NASA (Library Building, Room E-105), Wallops Island, Va. 23337.

Done at Washington, D.C., this 5th day of August 1977.

By the direction of the Administrator.

DUWARD L. CROW,
Associate Deputy Administrator, National Aeronautics and Space Administration.

NATIONAL CAPITAL PLANNING COMMISSION

DRAFT ENVIRONMENTAL IMPACT STATEMENT ON LOCATION AND PROGRAM FOR THE PROPOSED WASHINGTON CIVIC CENTER

Notice of Availability and Notice of Public Hearing

A draft Environmental Impact Statement on the location and program for the proposed Washington (D.C.) Civic Center has been prepared jointly by the District of Columbia Government and the National Capital Planning Commission and is now being circulated for public comment.

Copies of the draft EIS are available for review at all public libraries in the District of Columbia and at the Commission's offices located at 1325 G Street NW., Washington, D.C. The Commission's office hours are 8:30 A.M. to 5:00 P.M., Monday through Friday.

Interested persons are invited to submit their views on the draft EIS addressed to Ms. Patricia Spillenkothen, National Capital Planning Commission, Washington, D.C. 20576. All comments should be received by September 26, 1977 in order to receive full consideration.

A public hearing on the draft EIS will be held in the 10th Floor Conference Room of the Commission on September 8, 1977, at 7:00 P.M. Interested citizens may present oral and or written comments on the draft EIS at this hearing

DANIEL H. SHEAR,
Secretary.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

MEDIA ARTS ADVISORY PANEL

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that a closed meeting of the Media Arts Advisory Panel to the National Council on the Arts will be held on August 30-31, 1977, from 9:30 a.m. to 6:00 p.m., in Room 1422, Columbia Plaza Building, 2401 E Street NW., Washington, D.C. 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of March 17, 1977. These sessions may be closed to the public pursuant to subsection (c) (4), (6) and 9(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6377.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

MUSIC ADVISORY PANEL

Change in Meeting

Notice is hereby given that in the Notice of Meeting of the Music Advisory Panel (Jazz Section) of the National Council on the Arts for August 24-27, 1977, which was published in the FEDERAL REGISTER, Volume 42, page 39510, August 4, 1977, the following changes have been made:

Room 1422 has been changed to Room 1340.

A portion of this meeting will be open to the public on August 24, 1977, from 9:30 a.m. to 6:00 p.m. on a space available basis. The agenda for this session will include policy discussions.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6377.

Signed in Washington, D.C., on August 8, 1977.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

OFFICE OF THE FEDERAL REGISTER

EDUCATIONAL WORKSHOPS ON HOW TO USE THE "FEDERAL REGISTER"

Region V Workshops in Saint Paul, Minnesota

WHO: Any person who must use the FEDERAL REGISTER publications to keep track and to gain an understanding of Federal regulations.

WHAT: The free public workshops are being presented in cooperation with the Minnesota State Metropolitan Council of the Twin Cities Area. Each workshop will last approximately three hours, will be identical in content, and will cover the following areas:

1. A brief history of the FEDERAL REGISTER system.

2. The difference between legislation and regulations.

3. The relationship of the FEDERAL REGISTER and the Code of Federal Regulations.

4. Important elements of a typical FEDERAL REGISTER document.

5. An introduction to the finding aids of the Office of the FEDERAL REGISTER.

WHY: These workshops are part of the General Services Administration's Consumer Representation Plan and are one way of providing the public with better access to information about Federal agency actions which directly affect them. They are designed to help the public better use and understand the FEDERAL REGISTER and to seek suggestions on ways to improve FEDERAL REGISTER publications.

WHEN: 9 a.m. on September 13, 14, and 15, 1977. (Reservations required.)

WHERE: Metro Council Chambers, Metro Square Building, Seventh and Robert Streets, Saint Paul, Minnesota.

RESERVATIONS: Chuck McDew, 612-291-6421.

The Office of the FEDERAL REGISTER will not interpret specific agency regulations and the workshops will not provide a forum for the discussion of substantive questions. Rather, the workshops are designed for the person who discovers he or she has to use FEDERAL REGISTER publications to keep track and gain an understanding of Federal regulations.

AUGUST 10, 1977.

FRED J. EMERY,
Director of the Federal Register.

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

IMPORTATION FROM FINLAND OF FERROCHROMIUM AND CHROMIUM-BEARING STEEL PRODUCTS UNDER THE RHODESIAN SANCTIONS REGULATIONS

Issuance by the Government of Finland of Special Certificates Verifying Non-Rhodesian Origin of Chromium Content

Special certificates of origin are now available for importation from Finland of ferrochromium and specialty steel products under Section 530.503 of the Rhodesian Sanctions Regulations. These certificates are issued pursuant to a formal certification agreement between the Government of Finland and the Government of the United States. They will serve to establish that Finnish materials exported to the United States do not contain any chromium of Rhodesian origin.

The Government of Finland has full responsibility for administration of the detailed control measures provided for in the certification agreement. The Board of Customs of the Government of Finland will authorize producers of ferrochromium and specialty steel products to state on the commercial invoice covering products being exported to the United States that the goods have been produced under the agreed certification procedures. This special certification will be presented to Customs at the time of importation. The certificate will state that it is issued pursuant to special certification procedures agreed upon between the Government of Finland and the Government of the United States

The agreement replaces the interim arrangements which have been in effect since March 18, 1977, to permit importation of specialty steel products from Finland. After July 18, 1977, only materials certified under this agreement may be imported under Section 530.503 of the Rhodesian Sanctions Regulations (31 CFR 530.503).

Dated: August 3, 1977.

STANLEY L. SOMMERFIELD,
Acting Director.

[Notice No. 100TA]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 9, 1977

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 2202 (Sub-No. 541TA), filed July 26, 1977. Applicant: ROADWAY EXPRESS, INC., 1077 Gorge Blvd., P.O. Box 471, Akron, Ohio 44309. Applicant's representative: William O. Turney, Suite 1010, 7101 Wisconsin Avenue, Washington, D.C. 20014 Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, serving the plantsite of Ditto of California, located at or near Colfax, La., as an off-route point in connection with applicant's present regular routes, for 180 days. Taylor District Supervisor, Interstate Commerce Commission, 101 Litwin Building, Wichita, Kans. 67202.

No. MC 141150 (Sub-No. 4TA), filed July 22, 1977. Applicant: ATLAS WAREHOUSING COMPANY, 510 East Kearsley Street, P.O. Box 3551, Flint, Mich. 48506. Applicant's representative: Karl L. Gotting, 1200 Bank of Lansing Building, Lansing, Mich. 48933. Authority sought to operate as a *contract carrier* by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by retail department stores, from Saginaw and Flint, Mich., to Bay City and Essexville, Mich., and their respective commercial zones with the right of return of rejected or damaged merchandise, said transportation to be performed, under a continuing contract, or contracts, with K-Mart Corporation, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): K-Mart Corporation, C. F. Rowe Director of Transportation, 3100 West Big Beaver Road, Tory, Mich. 48084. Send protests to: Erma W. Gray, Secretary Interstate Commerce Commission, Bureau of Operations, 604 Federal Bldg. & U.S. Courthouse, 231 West Lafayette Blvd., Detroit, Mich. 48226.

No. MC 142028 (Sub-No. 6 TA), filed July 27, 1977. Applicant: ELI G. TRAVIS d.b.a. TRAVIS TRUCKING COMPANY, R. D. No. 1, Benton, Pa. 17814. Applicant's representative: Chester A. Zyblut, 366 Executive Building, 1030 Fifteenth Street, NW., Washington, D.C. 20005. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Canoes, kayaks and accessories therefor*, from Old Town, Maine, to points in the United States, except points in New Hampshire Vermont, Connecticut, Rhode Island, and Mass., under a continuing contract, or contracts, with Old Town Canoe Company, for 180 days. Supporting shipper(s): Old Town Canoe Company, 58 Middle Street, Old Town, Maine 04468. Send protests to: Paul J. Kenworthy District Supervisor, Interstate Commerce Commission, Bureau of Operations, 314 U.S. Post Office Building, Scranton, Pa. 18503.

No. MC 143377 (Sub-No. 1 TA), filed July 14, 1977. Applicant: BARRY J. WEST, d.b.a. B. J.'S SERVICE, P.O. Box 595, Littiz, Pa. 17543. Authority sought to

operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Bound and unbound paper, material*, from printing firms such as printed and partially printed material and various correspondence or instructions, between points in York, Lebanon and Lancaster Counties, on the one hand, and, on the other, points in the New York, N.Y. Commercial Zone, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): There are approximately 7 statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Charles F. Myers District Supervisor, Bureau of Operations, Interstate Commerce Commission, 278 Federal Building, 228 Walnut Street, P.O. Box 869, Harrisburg, Pa. 17108.

No. MC 143511 TA, filed July 18, 1977. Applicant: HARDINGER TRANSFER CO., INC., P.O. Box 521, Erie, Pa. 16512. Applicant's representative: Paul F. Sullivan, 711 Washington Bldg., Washington, D.C. 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except household goods, Classes A and B explosives, commodities in bulk and those requiring special equipment), in piggyback (TOFC) trailers or containers, and empty piggyback trailers or containers, between Erie County, Pa., on the one hand, and on the other, rail piggyback facilities in Cleveland, Ohio, restricted to traffic having an immediately prior or subsequent movement by rail, for 180 days. Supporting shipper(s): There are approximately 8 statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: John J. England District Supervisor, Interstate Commerce Commission, 2111 Federal Bldg., 1000 Liberty Avenue, Pittsburgh, Pa. 15222.

No. MC 143513 TA, filed July 18, 1977. Applicant: CARLOS P. GARRETT, d.b.a. GARRETT DELIVERY SERVICE, Route 7, Greer, S.C. 29651. Applicant's representative: Smith & Barbare, 635 North Academy Street, Greenville, S.C. 29601. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Pharmaceuticals and drug supplies*, between Greenville and Spartanburg, S.C., and points and places in North Carolina, South Carolina and Ga., restricted to transportation service, under a continuing contract, or contracts, with the Geer Drug Company, Inc., for 180 days. Supporting shipper(s): The Geer Drug Company, Inc., P.O. Box 5527, Spartanburg, S.C. 29304. Send protests to: E. E. Strotheid District Supervisor, Interstate Commerce Commission, Room 302, 1400 Building, 1400 Pickens Street, Columbia, S.C. 29201.

No. MC 143515 TA, filed July 22, 1977. Applicant: P & W CHARTER SERVICE, INC., 2710 E. 34th Avenue, Yakima, Wash. 98902. Applicant's representative: George R. LaBissoniere, 1100 Norton Building, Seattle, Wash. 98104. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Illegal aliens, passengers and their baggage* consisting of illegal aliens in custody of the United States Immigration and Naturalization Service, when being removed from the United States, from points in Washington to Calexico, Calif., in one way charter operation, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): United States Immigration and Naturalization Service, 815 Airport Way South, Seattle, Wash. 98134. Send protests to: R. V. Dubay, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 114 Pioneer Courthouse, Portland, Oreg. 97204.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

[Notice No. 206]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

AUGUST 12, 1977.

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before September 1, 1977. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-77052. By order entered August 5, 1977, the Motor Carrier Board approved the transfer to Wy Trucking, Inc., Branch Hill Road, Preston, Conn. 06360 of portions of the operating rights set forth in Permits No. MC 134765 (Sub-No. 1), issued March 18, 1977, and MC 134765 (Sub-No. 5), issued March 28, 1977, to Specialty Transport, Inc., 20 Wilbraham St., Palmer, Mass. 01069, authorizing the transportation of paper board, paper, waste paper, and paper products from, to, or between Versailles, Conn., to East Jaffrey, N.H., and points in New York and New Jersey within 20 miles of New York, N.Y., with certain specified places excepted; Versailles, Conn., on the one hand, and, on the other, specified places in New York and New Jersey, points in Massachusetts and Connecticut, and points in Rhode Island within 15 miles of Providence including Providence; Versailles, Conn., on the one hand, and, on the other, points in Delaware, Illinois, Indiana, Iowa, Kentucky, Maryland, Michigan, Missouri, North Carolina, Ohio, Tennessee, Virginia, West Virginia, Wisconsin, and the District of Columbia.

H. G. HOMME, Jr.,
Acting Secretary.

[S-1086-77]

CONSUMER PRODUCT SAFETY COMMISSION.

DATE AND TIME: August 17, 1977, 9:30 a.m., and 2:00 p.m.

LOCATION: 3rd Floor Hearing Room, 1111 18th St., NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED:

9:30 a.m.

1. *Evaluation of and Plan for Future Implementation of the Poison Prevention Packaging Act.* Staff from the Office of Strategic Planning and the Directorate for Engineering and Sciences will brief the Commission on proposed guidelines for managing and evaluating Commission action under the PPPA.

2. *Regulations Under CPSA Section 27(e) Regarding TRIS and other Flame-Retardant Chemicals.* The staff will brief the Commission on possible labeling requirements and requirements for test data with regard to chemically-treated flame retardant fabrics. Among the issues is the scope of the Commission's authority under section 27(e) of the CPSA.

3. *Lead to Paint Regulation.* By September 2, the Commission must publish in the FEDERAL REGISTER a rule which would ban toys, and other articles intended for use by children, bearing paint which contains more than 0.05 per cent lead, and furniture bearing such paint. At this briefing, the staff and Commission will discuss a document on which a vote will be taken at the August 18 Commission meeting.

4. *CPSC Legislative Initiatives.* The staff will brief the Commission on possible legislative plans, which the Office of Management and Budget has requested that CPSC submit with its FY 79 Budget Request.

2:00 p.m.

5. *Information and Education Minority Project Effort.* Staff from the Office of Communications will brief the Commission on proposals in the FY 78 Operating Plan to provide product safety information and education directed toward members of minority groups.

6. *Public Playground Equipment.* The Commission and staff will consider a possible schedule for action on CPSC's efforts concerning public playground equipment, and will consider responses to comments on the matter from two consumers.

CONTACT PERSON FOR ADDITIONAL INFORMATION:

Sheldon D. Butts, Assistant Secretary, Consumer Product Safety Commission, Suite 300,1111 18th St., NW., Washington, D.C. 20207, telephone 202-634-7700.

[S-1086-77 Filed 8-9-77;4:02 pm]

2

CONSUMER PRODUCT SAFETY COMMISSION.

DATE AND TIME: August 18, 1977, 9:30 a.m.

LOCATION: 3rd Floor Hearing Room, 1111-18th St. NW., Washington, D.C.

STATUS: Part is Open; Part is Closed

MATTERS TO BE CONSIDERED:

A Portion Open to the Public:

1. *Issues Raised Regarding Implementation of an Office of Public Participation, and Financial Compensation for Participants in CPSC Regulatory Actions.* At this meeting, the Commission will consider staff comments on a paper proposing to create this office. In addition, the Commission will discuss a recent decision by the U.S. Court of Appeals for the Second Circuit, which could have an effect on the Commission's proposed program of financial compensation.

2. *Hasbro Petition to Amend the Electrical Toy Regulations,* HP 75-7. In this petition, Hasbro Industries, Inc., has asked the Commission to amend labeling requirements for electrically-operated toys. The Commission will consider a draft FEDERAL REGISTER document and letter to the petitioner.

3. *Poison Prevention Packaging Act Exemption Policy.* The Commission will consider a draft FEDERAL REGISTER document which would establish interim rules for petitioning for exemption from special packaging requirements of the PPPA, and would seek comments on the interim rule.

4. *Generic Toy Regulations for Sharp Edges.* This FEDERAL REGISTER document, if approved by the Commission, would propose "technical requirements" for sharp metal and glass edges on toys. The Commission recently proposed a similar regulation for sharp points on toys.

5. *Regulations on Substantial Product Hazards, CPSA Sections 16 and 16(b).* With one draft FEDERAL REGISTER document, the Commission would propose a consolidated version of existing regulations (16 CFR Parts 1115 and 1116) governing CPSC's action with regard to substantial product hazard notifications it receives under requirements of section 15. With another document, the Commission would propose record-keeping regulations under section 16 (b).

6. *Voluntary Standards Policy.* The Commission will consider a draft policy on the relationship CPSC will establish with regard to voluntary product safety standards and voluntary standards-setting organizations.

7. *Possible Substantial Product Hazard: Dick Proctor Imports, stereo and tape deck,* ID 77-32. The staff has recommended that the Commission accept the corrective action plan which this firm has implemented to deal with a possible shock hazard which might be created by improper wiring of certain stereo units.

8. *Possible Substantial Product Hazard: Tahki Imports, Inc., and Creative Handweavers, Inc., ID 76-99 and 76-100: yarn.* These cases involve imported yarn which may have been contaminated by anthrax bacilli. The two firms instituted a recall, and, in cooperation with state and local health departments destroyed or sterilized approximately 80 percent of the suspect yarn. The staff has recommended that the Commission close the cases.

9. *Lead in Paint Regulations.* By September 2, the Commission must publish in the FEDERAL REGISTER a rule which would ban toys, and other articles intended for use by children, bearing paint which contains more than 0.05 per cent lead, and furniture bearing such paint.

B. Partially Closed to the Public:

10. *Possible Substantial Product Hazard Cases: toy rattles, bicycles, pacifiers.* These cases, involving eight different firms, involve products which could be regulated under the Federal Hazardous Substances Act, rather than under the Consumer Product Safety Act, and the staff has made recommendations for Commission action to dispose of the cases. The Commission has voted to close discussion of one of the cases, since it involves possible enforcement action. Discussion of the other cases is open to the public.

C. Closed to the Public:

11. *Possible Violation of Mattress Standard* (OS Packege #380). The Commission will consider possible alternatives for action in this alleged violation of the mattress standard, for which the staff attempted to negotiate a consent agreement.

CONTACT PERSON FOR ADDITIONAL INFORMATION:

Sheldon D. Butts, Assistant Secretary, Office of the Secretary, Suite 300, 1111 18th St. NW., Washington, D.C. 20207, telephone 202-634-7700.

[FR Doc.S-1087-77 Filed 8-9-77;3:11 pm]

3

FEDERAL MARITIME COMMISSION.

TIME AND DATE: August 17, 1977—10:00 a.m.

PLACE: Room 12126, 1100 L Street NW., Washington, D.C. 20573.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public:

1. Agreement No. 5600-35: Modification of the Philippines North America Conference Agreement to establish inland rate authority, open rate authority, unanimous voting provisions and increased admission fee.

2. 76-40, Revision of Domestic Commerce Tariff Filing Regulations (46 CFR Part 531), Consideration of Comments on Proposed Rules.

Portion closed to the public:

1. 377(I), *Pan American Health Organization* v. *Atlantic Lines, Ltd.* (Overcharge claim); Review of Settlement Officer's decision.

CONTACT PERSON FOR MORE INFORMATION:

Joseph C. Polking, Acting Secretary, 202-523-5727.

[S-1091-77 Filed 8-10-77;9:42 am]

4

FEDERAL POWER COMMISSION.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: (42 FR 40073).

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: August 10, 1977—10:00 a.m.

CHANGE IN THE MEETING: The Regular Commission meeting scheduled for Wednesday, August 10, 1977, has been cancelled. The following items will be considered at the meeting scheduled for Thursday, August 11, 1977, at 1:30 p.m.:

Item P-1, Agenda of 8/11/77, Docket No. E-7734, Mid-Continent Area Power Pool Agreement.

Item G-8, Agenda of 8/10/77, Docket No. CI76-14, San Salvador Development Company, Inc.

Item G-9, Agenda of 8/10/77, Docket No. CI74-319, James M. Forgotson, Operator Gulf Coast Venture.

Item CG-1, Agenda of 8/10/77, Docket No. RP72-157 (PGA No. 77-9), Consolidated Gas Supply Corporation.

Item CG-2, Agenda of 8/10/77, Docket No. RP72-157 (PGA No. 77-8b), Consolidated Gas Supply Corporation.

Item CG-3, Agenda of 8/10/77, Docket No. RP73-8 (PGA Nos. 77-9c and 77-10b), North Penn Gas Company.

Item CG-4, Agenda of 8/10/77, Docket No. RP72-133 (PGA No. 77-2a), United Gas Pipeline Company.
Docket No. ER77-502, Okalhoma Gas and Electric Company.

KENNETH F. PLUMB,
Secretary.

[S-1085-77 Filed 8-9-77;3:11 pm]

5

FEDERAL RESERVE SYSTEM (BOARD OF GOVERNORS).

TIME AND DATE: 10:00 a.m., Wednesday, August 17, 1977. The closed portion of the meeting will commence at the conclusion of the open discussion.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551.

STATUS: Part of the meeting will be open; part will be closed.

MATTERS TO BE CONSIDERED:

Open portion:

1. Proposed policy alternatives relating to reimbursements of Truth-in-Lending overcharges.

2. Proposed interpretation of Regulation Z (Truth in Lending) exempting credit-card systems that bill their customers on a transaction-by-transaction basis rather than on a cumulative account basis from certain of the regulation's provisions. (Proposed earlier for public comment; Docket No. R-0094).

3. Report to the Federal Deposit Insurance Corporation regarding the competitive factors involved in the proposed merger of The State Bank of Milan, Milan, Indiana, with First Bank & Trust Company of Batesville, Batesville, Indiana.

4. Any agenda items carried forward from a previously announced meeting.

Closed portion:

1. Possible amendments to Section 23A of the Federal Reserve Act to be submitted to the Congress.[1]

2. Any agenda items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Joseph R. Coyne, Assistant to the Board, 202-452-3204.

Dated: August 9, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.S-1090-77 Filed 8-9-77;9:09 am]

6

AUGUST 9, 1977.

INTERSTATE COMMERCE COMMISSION.

TIME AND DATE: 9:30 a.m., Tuesday, August 16, 1977.

PLACE: Room 4225, Interstate Commerce Commission Building, 12th and Constitution Avenue, NW., Washington, D.C.

STATUS: Open Regular Conference.

MATTER TO BE CONSIDERED: Review of Commission's Canons of Conduct (Proposed Revisions circulated August 1).

CONTACT PERSON FOR MORE INFORMATION:

Office of Information and Consumer Affairs, Douglas Baldwin, Director, telephone 202-275-7252.

The Commission's professional staff will be available to brief news media representatives on conference issues at the conclusion of the meeting.

[S-1089-77 Filed 8-9-77;9:09 am]

RAILROAD RETIREMENT BOARD.

TIME AND DATE: 10:00 a.m., August 18, 1977.

PLACE: Board's meeting room on the 8th floor of its headquarters building at 844 Rush Street, Chicago, Illinois, 60611.

SATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public:

(1) Possible relocation of the Board's headquarters.
(2) Union participation on promotion panels.
(3) Problems involving Social Security coordination.
(4) Issuance of training memorandum to the Board's field service on the subject of IMPACT (Initial Monthly Partial Annuity Certification, Tiers System)—Partial Award of Employee Age and Service Annuities.

[1] Thirty days has expired since the initial meeting at which this item was announced, and a new vote has been taken.

(5) Participation by the Board's chief actuary at the annual meeting of the Society of Actuaries in Boston this October and the celebration of the 20th anniversary of the founding of the Chair of Actuarial Science, University of Nebraska.

(6) Recommendation to install direct access terminals in the Bureau of Retirement Claims.

(7) Alternative proposal to effect partial withholding of annuity overpayments.

(8) Stenographic help for the Office of the Management Member.

Portions closed to the public:

(9) Appeal to the Board of denial of annuity application, Raymond B. Harris, Jr.

(10) Appeal to the Board of denial of annuity application, Wilbert McCullough.

(11) Appeal to the Board of denial of annuity application, Joe B. Garee.

(12) Appeal to the Board of denial of annuity application, Oscar Sherman.

CONTACT PERSON FOR MORE INFORMATION:

R. F. Butler, Secretary, of the Board, telephone 312-387-4920.

PART II

SECURITIES AND EXCHANGE COMMISSION

■

LOST AND STOLEN SECURITIES PROGRAM

Implementation

VOL. 42 NO. 156

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-13832]

PART 241—INTERPRETATIVE RELEASES RELATING TO THE SECURITIES EXCHANGE ACT OF 1934 AND GENERAL RULES AND REGULATIONS THEREUNDER

Lost and Stolen Securities

AGENCY: Securities and Exchange Commission.

ACTION: Implementation of program for reporting and inquiry with respect to missing, lost, counterfeit or stolen securities.

SUMMARY: This action provides notification of the implementation of the Lost and Stolen Securities Program, sets forth the procedures for making reports and inquiries with respect to missing, lost, stolen or counterfeit securities, and disseminates a Registration Form which must be completed by all reporting institutions before access to the data base maintained by the Commission's designee is authorized. This release is intended to aid reporting institutions in complying with the Commission's regulations promulgated in an effort to reduce securities thefts and traffic in spurious securities. This action also republishes § 240.17f–1 and reporting Form X–17F–1A in their final, amended versions and is necessary to provide reporting institutions with all substantive requirements of the Lost and Stolen Securities Program in a single document.

EFFECTIVE DATES: Reporting and record keeping requirements: October 3, 1977. Inquiry requirements and remaining provisions: January 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Gregory C. Yadley, Division of Market Regulation, Securities and Exchange Commission, Washington D.C. 20549, 202–755–7826.

SUPPLEMENTARY INFORMATION: In order to avoid duplication and to implement the Lost and Stolen Securities Program in a more efficient manner, the Securities and Exchange Commission has amended § 240.17f–1 to require that copies of reports of missing, lost, stolen or counterfeit securities be filed with a registered transfer agent for the issue. This release provides notification of this action and also sets forth the procedures for implementation of the Lost and Stolen Securities Program, including information regarding access to the data bases maintained by the Commission's designee and the Federal Reserve Banks, billing arrangements, and submission of registration forms. The release republishes § 240–17f–1 and Reporting Form X–17F–1A in their final, amended versions.

Background

The problems relating to missing, lost, counterfeit or stolen securities have been described by the Commission [1] and were the subject of a series of Congressional hearings.[2] The recommendation for a system for the receipt of reports and inquiries concerning missing, lost, stolen or counterfeit securities has been supported widely. Section 17(f) of the Act established the legislative framework for such a system by providing that every national securities exchange, member thereof, registered securities association, broker, dealer, municipal securities dealer, registered transfer agent, registered clearing agency and participant therein, member of the Federal Reserve System and bank whose deposits are insured by the Federal Deposit Insurance Corporation shall report and inquire with respect to missing, lost, counterfeit or stolen securities in accordance with rules promulgated by the Commission.

On December 6, 1976, the Commission adopted § 240.17f–1, establishing reporting and inquiry requirements with respect to missing, lost, stolen or counterfeit securities.[3] Certain technical amendments to the section were made on February 18, 1977,[4] and further amendments regarding the role of transfer agents in the Lost and Stolen Securities Program were proposed.[5]

Implementation of the Program and Appropriate Instrumentalities

In order to implement § 240.17f–1 in the most efficient manner, the Commission determined that it would be appropriate to institute a pilot program to monitor the effectiveness of the section and the system designed to carry out its provisions. Accordingly, the Lost and Stolen Securities Program will be implemented on a pilot basis until December 31, 1978. In accordance with the inquiry and reporting requirements of paragraphs (b) and (c) of § 240.17f–1, any Federal Reserve Bank or Branch is an appropriate instrumentality with respect to United States Government or Agency securities. A description of the general operating procedures of the Federal Reserve Banks is attached as Appendix III.

Section 17(f)(1)(A) of the Act states that reports and inquiries shall be made to the Commission or "other person designated by the Commission." The Commission determined that a manual, computer-assisted system would best achieve the purposes of the pilot program and that the goals of the Act would best be fulfilled by the designation of a private entity to perform certain functions under the Commission's direction. Accordingly, the Commission published "Criteria for a Lost and Stolen Securities Reporting and Inquiry System" and solicited submissions of proposed systems from entities interested in serving as the Commission's designee during the pilot program. The plans which were received were analyzed, and the Securities Information Center, Inc. ("SIC" or the "Commission's designee"), a subsidiary of ITEL AutEx, Inc. was designated to receive reports and respond to inquiries on behalf of the Commission.[6] All reports and inquiries required to be made with the Commission, therefore, shall be made with SIC. A description of SIC's general operating procedures is attached as Appendix IV.

On February 13, 1977,[7] the Commission adopted Form X–17F–1A, "Lost, Missing, Stolen, Counterfeit Securities Report," (17 CFR 249.1200) which, pursuant to paragraph (b)(6) of § 240.17f–1, shall be used for all reports. Where reports are made by telephone, telex or other means, a hardcopy confirmation of the report must still be filed with the appropriate instrumentality within the time periods specified in paragraph (b) of this section. Certain technical modifications to Form X–17F–1A and the accompanying instructions have been made, and the Form is attached as Appendix II.

Section 240.17f–1 [8]

(a) *Definitions.* Paragraph (a) defines the terms "reporting institution" and "appropriate instrumentality."

(b) *Reporting requirements.* Paragraph (b) requires financial institutions and others to report missing, lost, counterfeit or stolen securities within specified time periods. Reports with respect to U.S. Government or Agency securities or securities of certain international organizations are to be made to the nearest Federal Reserve Bank or Branch; reports with respect to all other securities are to be made to the Commission's designee. Copies of all reports must be sent to a registered transfer agent for the issue involved.[9] Where there is a substantial belief that criminal activity is involved, an additional report must be made to the appropriate law enforcement agency.[10]

Unissued certificates which are lost or stolen are also required to be reported, and appropriate instructions are provided for such reports in the Instructions to Form X–17F–1A. Coupons, however, are not required to be reported. A report is also required if a security previously reported missing, lost or stolen is recovered.

The information required to be reported is set forth in paragraph (b)(5) of this section [11] and shall be provided on Form X–17F–1A. A copy of Form X–17F–1A is annexed to this release as Appendix II, and additional copies of the Form are available from the Publication Office of the Commission or the Commission's Regional Offices. The form may be reproduced in any manner by entities subject to the section so long as the graphics and format of the Form are not altered and 8½" x 11" paper is used. In order to avoid duplication, the Commission encourages transfer agents to utilize Form X–17F–1A as their stop transfer forms.

This section requires reporting institutions to report: (1) Those securities missing, lost, or stolen from their possession or control and (2) those securities which are missing, lost or stolen from the possession or control of a person which is not a reporting institution and which securities have not been reported by another reporting institution. For example, if securities are missing from the control of a broker, the broker would be required to report. The transfer agent who receives a copy of Form X–17F–1A concerning such securities would not be required to report. In contrast, where a loss of securities is reported to the transfer agent by a non-reporting entity such as an individual, the transfer agent would be required to make a report when it receives the information.

Unless the Commission announces to the contrary, transfer agents will not be required to report stops received prior to October 3, 1977. However, the Commission may obtain and include in the data base such information obtained from insurance companies and law enforcement sources. For the purpose of paragraph (b)(2) only, but not paragraphs (b)(2)(i)–(iii), the time periods for reporting begin to run when, on the basis of all relevant circumstances, the reporting institution believes a certificate to be lost or missing as opposed to a belief that the certificate is merely misplaced or misfiled by the institution. Reporting institutions should diligently follow up on indications of non-receipt submitted by receiving institutions in order to determine their responsibilities under this section.

Counterfeit securities, including altered or forged securities, are required to be reported to the appropriate law enforcement agency as well as to the appropriate instrumentalities. Reports of recoveries of lost, missing, or stolen securities are required to be made to the appropriate instrumentality and to a registered transfer agent for the issue. Where stolen securities were reported to a law enforcement agency, a report of recovery is required to be made to such agency. Recovery may only be reported by the institution which reported the security as missing, lost or stolen. However, report of recovery may be made by a successor institution, trustee or the recovering institution where the reporting institution no longer exists. For certain exemptions applicable until December 31, 1978, see the section below entitled "Pilot Program."

(c) *Inquiry requirements.* Paragraph (c) of Section 240.17f–1 requires financial institutions to determine whether securities coming into their possession or keeping under certain circumstances have been reported as missing, lost, counterfeit or stolen. Inquiry with the appropriate instrumentality is required whenever securities are received, whether by pledge, transfer or in some other manner, unless they are received (1) from the issuer on original issue, (2) from another reporting institution, or (3) from a customer and are registered in the name of such customer or its nominee. Coupons are not required to be the subject of inquiry.

Under the section, inquiry would be required of a reporting institution whenever a non-reporting institution such as an individual submits securities in bearer form, street name or registered to a third person. All securities delivered to a reporting institution by the issuer or another reporting institution are exempt from inquiry regardless of the form of registration.[12]

The inquiry requirements as set forth in the section must be followed even though a reporting institution may determine through other means that the security is not lost or stolen. For example, if a bank takes a bearer security from a customer as collateral for a loan and the bank sends the security to the transfer agent for transfer to the bank's name or the customer's name, the bank must still make inquiry with the appropriate instrumentality.

As a practical matter, however, a reporting institution may assume the inquiry responsibility of another reporting institution. This may be a common practice where Broker A clears on a fully disclosed basis for Broker B, and Broker B's customers deliver their securities to Broker A. If Broker A, as part of its clearing arrangement, undertakes to make the required inquiry, Broker B would not have to make the inquiry.

These exceptions are intended to make inquiry unnecessary in the majority of instances and to require inquiry in those circumstances most likely to involve missing, lost, counterfeit or stolen securities. The system has been designed to avoid undue disruption to the course of normal commercial transactions.

When an inquiry reveals that the security in question has been reported as missing, lost or stolen, the inquiring institution will be provided with the name of the institution which reported the loss. In such instances, the section does not set forth any further requirements. Consequently, the inquiring institution would be expected to follow current business practices in dealing with securities which it knows to be lost or stolen.

As a part of the design of the Commission's system, inquiries will be recirculated against reports of loss which may have come in subsequent to the inquiry. Through this procedure, the system will be able to identify those securities which were negotiated before a lost or stolen securities report was received.

For certain exemptions which will be applicable until December 31, 1978, see the section below entitled "Pilot Program."

(d) *Permissive inquiry.* Paragraph (d) describes the availability of the reporting and inquiry system to any reporting entity whether or not § 240.17f–1 would require a report or inquiry. With respect to the granting of authority to make permissive inquiries, it should be pointed out that this authority is provided to allow sufficient flexibility when an inquiry is not mandated but suspicious circumstances are involved. The Commission, in allowing permissive in-

[3] Securities Exchange Act Release No. 13053, 41 FR 54923 (December 16, 1976).

[4] Securities Exchange Act Release No. 13280, 42 FR 11829 (March 1, 1977).

[5] Securities Exchange Act Release No. 13281, 42 FR 11844 (March 1, 1977).

[6] In Securities Exchange Act Release No. 13538, 42 FR 26495 (May 24, 1977), AutEx, Inc. was named as the designee. Subsequently, as a consequence of the acquisition of AutEx by ITEL Corporation, SIC was created as a wholly-owned subsidiary of ITEL AutEx, Inc.

[7] Securities Exchange Act Release No. 13280, 42 FR 11829 (March 1, 1977).

[8] Section 240.17f–1 is attached as Appendix I.

[9] Where more than one registered transfer agent performs transfer agent functions for the issue, notification to any of them will satisfy the requirements of this section. It is expected that where there are co-transfer agents, internal procedures will be established to ensure prompt notification of losses to all co-transfer agents.

[10] The following general guidelines may be useful in deciding which law enforcement agencies to notify in certain instances:

(1) *Local Police Department*—All cases involving thefts or mysterious disappearances of securities or discoveries of securities reported stolen.

(2) *Federal Bureau of Investigation*—All cases involving securities thefts of $5,000 or over, all thefts from banks, all thefts of Government securities, all counterfeits of non-Government securities, all counterfeits presented as collateral for a bank loan, all stolen or counterfeit securities involved in interstate commerce, and all counterfeit securities used in a violation of a Federal law.

(3) *U.S. Secret Service*—All cases involving counterfeits of securities which are direct obligations of the United States Government or are issued with Government backing. The Secret Service reportedly has a general interest in all counterfeit activity.

These are general guidelines. Good faith determination and notification to any of the above agencies shall be deemed compliance with paragraph (b)(1) of § 240.17f–1.

[11] One item of information required is the reporting institution's FINS number. FINS (Financial Industry Number Standard") numbers are compiled in the 1976 FINS Directory (First Edition), published by the Depository Trust Company. If an institution is uncertain as to whether it has a FINS number, it should consult this Directory, its self-regulatory organization or its trade association. If an institution has not been assigned a FINS number, a number may be obtained at no cost by writing the Depository Trust Company, Attention: FINS Publication, 55 Water Street, New York, New York 10041.

[12] It bears emphasis that not all financial institutions are reporting institutions as defined by § 240.17f–1. If in doubt as to whether an entity is a reporting institution, it is suggested that reporting institutions check the available reference works to determine whether the entity is an FDIC insured bank or other reporting institution enumerated in this section.

quiries, does not intend to incorporate an inquiry requirement into the bona fide purchaser doctrine each time a reporting institution receives a security certificate. The Commission recognizes that to require or suggest inquiry in all cases would seriously jeopardize the ability of financial institutions to function in an efficient manner.

Section 240.17f–1 also provides that the Commission may grant other persons access to the system upon such terms or conditions as it deems necessary and appropriate in the public interest and for the protection of investors. The Commission recognizes that a number of foreign banks and other financial institutions, such as insurance companies, are not included in the definition of "reporting institutions." Consequently, securities received from such institutions which are not registered in the names of those institutions or their nominees are required to be the subject of inquiry under § 240.17f–1.

The Commission is aware that this may cause hardship to certain reporting institutions. In order to alleviate this hardship and to allow those reporting institutions dealing with these non-reporting financial institutions the exemption allowed under paragraph (c) (1) (ii) of this section, the Commission encourages financial institutions not within the jurisdiction of this section to apply under paragraph (d) to become so included. The Commission, as a condition to granting such a status, will require those institutions to undertake to comply with § 240.17f–1 on the same basis as a reporting institution. Letters requesting participation in the Lost and Stolen Securities Program should be denominated "Application for Designation as a Reporting Institution Pursuant to § 240.17f–1" and should be addressed to the Division of Market Regulation.[13]

The Commission shall have the right to withdraw this designation upon written notice. The Commission will withdraw such designation if the financial institutions violates its undertaking to comply with § 240.17f–1, applicable instructions issued by the Commission, its designee, or the Federal Reserve Banks, or if it does not remit the appropriate fees which are assessed for the use of the system. Such financial institutions shall not be charged a fee greater than that charged a reporting institution of comparable size.

(e) *Exemptions.* Section 240.17f–1 provides in paragraph (e) that registered securities for which a Federal Reserve Bank or Branch is the appropriate instrumentality or counterfeits of such securities are not the subject of required reporting and inquiry. Reports with respect to such securities should continue to be made to the U.S. Treasury Department or the Federal Reserve Bank of New York, in accordance with outstanding Treasury instructions and current practices in the financial community. Where a stolen security is involved, reports are required to be made to the appropriate law enforcement agency.

With respect to coupons, the Commission stated in Release No. 34–13280 that, as a matter of interpretation, § 240.17f–1 does not require reporting and inquiry with respect to coupons.

(f) *Recordkeeping.* Paragraph (f) of section 240.17f–1 codifies the recordkeeping and record retention procedures established by the Lost and Stolen Securities Program.[14] Essentially, copies of all Forms X–17F–1A filed pursuant to this section and all confirmations of inquiry or other information received from the appropriate instrumentality must be retained for a period of three years in an easily accessible place. Sections 240.17a–3 and 240.17a–4 have also been amended to incorporate these requirements into the general recordkeeping and retention provisions applicable to certain exchange members, brokers, and dealers.

Pilot Program

In order to implement § 240.17f–1 in the most efficient manner, the Commission determined that it would be appropriate to institute a pilot program to monitor the effectiveness of the section and the system designed to carry out its provisions. Accordingly, § 240.17f–1 will be implemented on a pilot basis until December 31, 1978.

During the pilot program, the Commission will not require certain reports and inquiries to be made which otherwise would be required under the section.

1. Corporate and municipal securities not assigned CUSIP numbers will be exempt from required reporting and inquiry. Consequently, short term securities such as commercial paper are not subject to the requirements of § 240.17f–1 during the pilot program.[15]

2. Transactions involving securities of less than $10,000 face value in the case of bonds and $10,000 market value in the case of stocks will be exempt from inquiry only. All losses, including those of less than $10,000, must be reported.

3. Registered transfer agents are exempt from inquiry during the pilot program.

On the basis of the impact studies conducted and the comment letters received, the Commission believes that allowing these additional exemptions from reporting and inquiry during the pilot program will allow the efficient implementation of a system to carry out the mandate of the Act. In addition, these exemptions will allow financial institutions subject to this section an opportunity to adapt to the operation of the section without undue disruption to the course of normal commercial transactions. During the pilot program, the Commission intends to monitor the appropriateness of these special exemptions in order to determine whether they should be retained permanently. These exemptions will expire on December 31, 1978 unless they are extended by the Commission.

Appropriate Instrumentalities and Operation of Systems

Attached as Appendices III and IV to this release are descriptions of the general operations of the appropriate instrumentalities, including procedures for making reports and inquiries. With respect to securities for which a Federal Reserve Bank or Branch is the appropriate instrumentality, telephone numbers and mailing addresses pertinent for compliance with § 240.17f–1 are included in Appendix III. A map of the twelve Federal Reserve Districts is also included to assist reporting institutions in locating the closest Federal Reserve Bank or Branch.

Appendix IV contains the operating procedures and a description of the system of the Securities Information Center, Inc., the Commission's designee for receipt of reports and inquiries for which the Commission is the appropriate instrumentality. Included in these materials as Appendix V is a Registration Form which must be completed and returned to the Commission's designee no later than September 23, 1977. Each reporting institution must determine whether it will be a Direct or Indirect Inquirer of the System and so indicate on the Registration Form.

The Commission has determined that the method of allocating fees and the fees to be charged are reasonable in making available to reporting institutions information regarding missing, lost, counterfeit or stolen securities pursuant to Section 17(f) (1) (A) of the Act. Authorized signatures and an indication as to whether the entity will be a Direct or Indirect Inquirer must be provided to the Commission's designee by September 23, 1977 in order for the reporting institution to be able to fulfill the requirements of § 240.17f–1. The Commission wishes to emphasize that failure to submit the Registration Form, and if a Direct Inquirer to remit applicable fees when billed, will prevent access by a given reporting institution to the system and hence cause the reporting institution to be in violation of § 240.17f–1.

The Commission will study the operation of § 240.17f–1 and the system for reporting and inquiry during the pilot program and will make modifications where appropriate.

Effective Dates and Responsibilities of Appropriate Instrumentalities

The reporting and recordkeeping requirements of § 240.17f–1 will become effective on October 3, 1977; the inquiry requirements and the remaining provisions of the section will become effective on January 2, 1977.

The appropriate instrumentalities undertake no responsibility with regard to any party in maintaining the lists of missing, lost, counterfeit or stolen securities or responding to inquiries pertaining thereto and will not be liable for any act or failure to act with respect to any procedures set forth in § 240.17f–1.

Immobilization and Elimination of Certificates

It should be noted that this program is not intended to be a substitute for other steps which are being undertaken to improve securities processing, prevent losses and reduce the risk of theft. The Commission continues to endorse the concepts of improved securities processing and certificate immobilization and elimination through greater use of depositories and book entry systems. It is expected that this program will be developed in a manner appropriate to meet existing needs and will be flexible enough to adjust to changing circumstances.

By the Commission.

SHIRLEY E. HOLLIS,
Assistant Secretary.

AUGUST 5, 1977.

§ 240.17f–1 Requirements for reporting and inquiry with respect to missing, lost, counterfeit or stolen securities.

(a) *Definitions*—(1) *Reporting institution.* For purposes of this section, the term "reporting institution" shall include every national securities exchange, member thereof, registered securities association, broker, dealer, municipal securities dealer, registered transfer agent, registered clearing agency, participant therein, member of the Federal Reserve System and bank whose deposits are insured by the Federal Deposit Insurance Corporation.

(2) *Appropriate instrumentality.* For purposes of this section the term "appropriate instrumentality" shall mean:

(i) Any Federal Reserve Bank or Branch thereof with respect to securities issued by:

(A) The United States Government,

(B) Any agency or instrumentality of the United States Government,

(C) The International Bank for Reconstruction and Development,

(D) The Inter-American Bank, or

(E) The Asian Development Bank; and

(ii) The Securities and Exchange Commission with respect to all other securities.

(b) *Reporting requirements*—(1) *Stolen securities.* (i) Every reporting institution shall report to the appropriate instrumentality and to a registered transfer agent for the issue the discovery of the theft or loss of any security where there is substantial basis for believing that criminal activity was involved. Such report shall be made within one business day of the discovery and, if the certificate numbers of the securities cannot be ascertained at that time, they shall be reported as soon thereafter as possible.

(ii) Every reporting institution shall promptly report to the appropriate law enforcement agency upon the discovery of the theft or loss of any security where there is substantial basis for believing that criminal activity was involved.

(2) *Missing or lost securities.* Every reporting institution shall report to the appropriate instrumentality and to a registered transfer agent for the issue the discovery of the loss of any security where criminal actions are not suspected when the security has been missing or lost for a period of two business days. Such report shall be made within one business day of the end of such period except that:

(i) Securities lost in transit to customers, transfer agents, banks, brokers or dealers shall be reported by the delivering institution no later than two business days after notice of non-receipt or as soon after such notice as the certificate numbers of the securities can be ascertained.

(ii) Securities considered lost or missing as a result of securities counts or verifications required by rule, regulation or otherwise (e.g. dividend record date verification made as a result of firm policy or internal audit function report) shall be reported no later than ten business days after completion of such securities count or vertification or as soon after such count or verification as the certificate numbers of the securities can be ascertained.

(iii) Securities not received during the completion of a delivery, deposit or withdrawal shall be reported in the following manner:

(A) Where delivery of securities is through clearing agency, the delivering institution shall supply the receiving institution the certificate number of the security within two business days from the date of request from the receiving institution. The receiving institution shall report within one business day of notification of the certificate number;

(B) Where the delivery of securities is over the window and where the delivering institution has a receipt, the delivering institution shall supply the receiving institution the certificate numbers of the securities within two business days from the date of request from the receiving institution. The receiving institution shall report within one business day of notification of the certificate number;

(C) Where the delivery of securities is over the window and where the delivering institution has no receipt, the delivering institution shall report within two business days of notification of non-receipt by the receiving institution; or

(D) Where delivery of securities is made by mail or via draft, if payment is not received within ten business days, the delivering institution shall confirm with the receiving institution the failure to receive such delivery; if confirmation shows non-receipt, the delivering institution shall report within two business days of such confirmation

(3) *Counterfeit securities.* Every reporting institution shall report the discovery of any counterfeit security to the appropriate instrumentality and the appropriate law enforcement agency within one business day of such discovery.

(4) *Recovery.* Every reporting institution shall report the recovery or finding of any security previously reported missing, lost or stolen pursuant to this section to the appropriate instrumentality and to a registered transfer agent for the issue within one business day of such recovery or finding. If a report of stolen securities was made to the appropriate law enforcement agency, a report of such recovery shall also be made to such agency. Recovery may only be reported by the institution which reported the security as missing, lost or stolen.

(5) *Information to be reported.* All reports made pursuant to this section shall include, if applicable or available, the following information with respect to each security:

(i) Issuer;
(ii) Type of security and series;
(iii) Date of issue;
(iv) Maturity date;
(v) Denomination;
(vi) Interest rate;
(vii) Certificate number, including alphabetical prefix or suffix;
(viii) Name in which registered;
(ix) Distinguishing characteristics, if counterfeit;
(x) Date of discovery of loss or recovery;
(xi) CUSIP number; and
(xii) FINS number.

(6) *Forms.* All reports made pursuant to this section shall be made on Form X–17F–1A.

(c) *Required inquiries.* (1) Every reporting institution shall inquire of the appropriate instrumentality with respect to every security which comes into its possession or keeping, whether by pledge, transfer, or otherwise, to ascertain whether such security has been reported as missing, lost, counterfeit or stolen, unless

(i) The security is received directly from the issuer or issuing agent at issuance;

(ii) The security is received from another reporting institution or Federal Reserve Bank in its capacity as fiscal agent;

(iii) The security is received from a customer of the reporting institution and is registered in the name of such customer or its nominee.

(2) *Form of inquiry.* Inquiries shall be made in such manner as prescribed by the appropriate instrumentality.

(d) *Permissive reports and inquiries.* Every reporting institution may report to or inquire of the appropriate instru-

[13] The letter should identify:

1. The primary business of the financial institution.

2. Whether the financial institution is registered with or regulated by any Federal, State or foreign government or agency thereof.

3. Whether the institution engages in a retail securities business with non-institutional customers and the portion of such in relation to the institution's total business.

4. The names of the officers or principal shareholders of the financial institution. In the letter the financial institution shall agree to comply with all applicable provisions of section 240.17f–1 and applicable instructions issued by the Commission, its designee or the Federal Reserve Banks and shall agree to pay an appropriate fee for participation in the system.

[14] *See* Securities Exchange Act Release No. 13831 (August 5, 1977).

[15] A certificate is not exempt under this provision because the certificate itself does not have a CUSIP number on it. In order to be exempt, the issue of which the particular certificate is a part must not have been assigned a CUSIP number.

mentality with respect to any security not otherwise required by this section to be the subject of a report or inquiry. The Commission on written request or upon its own motion may permit reports to and inquiries of the system by any other person or entity upon such terms and conditions as it deems appropriate and necessary in the public interest and for the protection of investors.

(e) *Exemptions.* Registered securities of the United States Government, any agency or instrumentality of the United States Government, the International Bank for Reconstruction and Development, the Inter-American Development Bank, or the Asian Development Bank, and counterfeit securities of such entities are not subject to the provisions of this section relating to reporting and inquiry with the appropriate instrumentality.

(f) *Recordkeeping.* Every reporting institution shall maintain and preserve in an easily accessible place for three years copies of all Forms X-17F-1A filed pursuant to this section and all confirmations or other information received from the appropriate instrumentality or its designee as a result of inquiry.

INSTRUCTIONS

NOTE.—Section 240.17f-1 does not require reporting of coupons. Municipal or corporate securities not assigned CUSIP Numbers are not the subject of reporting and inquiry during the pilot program.

Forms for which the Commission is the appropriate instrumentality should be mailed to the Commission's designee:

Securities Information Center, Inc., Post Office Box 421, Wellesley Hills, Mass. 02181

1. *Reporting Institution*—Enter reporting institution name, address and FINS number, with Securities Information Center-assigned suffix, if any.

2. *Type of Report*—Check whether report is a new report ("Loss"), report of recovery of previously reported loss ("Recovery"), or update or correction of report other than recovery ("Update"). Additionally, if the report is a confirmation of a loss, recovery, or update made by telex or telephone, also check the box marked "Confirmation."

3. *Date*—Enter date when loss was noticed, theft occurred, when counterfeit was discovered or suspected or when security was found or recovered. When submitting updates, corrections or confirmations, enter date of loss or recovery.

4. *Type of Securities*—Check the box which most nearly describes the type of security. If none of the classifications adequately describes the security, check "Other" and describe the security in the space provided.

5. Issuer—Print or type the name of issuing company, agency or organization as set out on the security even though the security may have been lost, stolen, or missing prior to being "issued" by the appropriate authority.

6. Interest Rate—If interest rate was indicated enter this information.

7. *Maturity Date*—Enter maturity date where applicable.

8. *CUSIP Number*—Enter entire CUSIP Number.

9. *Name of Registered Holder*—Clearly print or type the full name of person (individual, company, bank, brokerage house, etc.) to whom the security is registered exactly as it appears on the security. Enter the word "Bearer" when document is a bearer security.

10. *Certificate Serial Numbers*—Enter certificate or serial number(s) including all suffixes and prefixes. If certificates have not been issued, enter the control number. Series may be indicated by the first and last numbers separated by a dash and followed by the word "Series". Certificate or serial numbers of certificates of the same CUSIP number which are not in sequential order should be listed separately on each line. If additional space is required, attach a sheet containing information in the same format as Item 10 and check Item 13a.

11. *Denomination Shares*—Enter in numerical form the amount of money represented by bonds, debentures, notes and other securities (except stock warrants and rights) as indicated on the certificates. If amount was not indicated on the certificate, enter the word "Blank".

For stocks, enter the number of shares represented by the certificates, not the par value of the stock. If number of shares is not represented, enter the word "Blank."

For warrants and rights, enter in numerical form the number of shares which the document entitles the owner to purchase.

12. *Issue Date*—Enter issue date of security. If certificates have not yet been issued, indicate this fact.

13. *Total Current Market or Face Value*—For stocks, rights and warrants, enter the approximate total current market value. For bonds, enter the face value of the certificate.

13a. *Additional Pages Attached*—For a nonsequential series of certificates having the same CUSIP number, additional pages listing securities to be reported may be attached. (See Instruction 10). If additional pages are attached, check this Item.

14. *Criminality Indicated*—If reporting a loss, check when a substantial belief of criminality is indicated.

15. *Counterfeit*—Describe distinguishing characteristics of suspected counterfeit securities.

16. *Filed with Data Bank*—Check if filed with the Commission's Designee or a Federal Reserve Bank or Branch as appropriate.

17. *Filed with Transfer Agent*—Check to indicate that you have sent a copy of this report to a Transfer Agent for the issue.

18. *Filed with Law Enforcement*—Check of you sent a copy of this report to the appropriate law enforcement agency when required.

19. *Authorized Signature*—Form X-17F-1A must have an authorized signature to be accepted by the System. With respect to those reports filed with the Commission's designee, such signatures must be on file with the designee. Copies of reports sent to a transfer agent and the appropriate law enforcement agency should contain an orginal signature.

20. *Date*—Enter date when form is signed.

APPENDIX III

REPORTS AND INQUIRIES REGARDING LOST OR STOLEN UNITED STATES GOVERNMENT AND AGENCY SECURITIES FOR WHICH THE FEDERAL RESERVE BANKS ARE THE APPROPRIATE INSTRUMENTALITY

On December 16, 1976, the Securities and Exchange Commission adopted 17 CFR 240.17f-1, which requires all financial institutions covered by the section to report to the appropriate instrumentality any instance of loss or theft of cetrain securities and, with certain exceptions, to make inquiry prior to the completion of any transaction involving these securities. The section will be implemented in two phases. The first part to be implemented will be the reporting requirement, which will go into effect on October 3, 1977. The second part, the inquiry requirement, will go into effect on January 2, 1978.

The Federal Reserve Banks have been designated as the "appropriate instrumentality" for receiving reports of and inquiries as to lost, missing, counterfeit or stolen United States Government and Agency securities. As used in this circular the term "Government and Agency securities" includes securities issued by the:

United States Treasury
Banks for Cooperatives
District of Columbia Armory Board
Export-Import Bank of the United States
Farm Credit Administration
Farmers Home Administration
Federal Financing Bank
Federal Home Loan Banks
Federal Home Loan Mortgage Corporation
Federal Housing Administration
Federal Intermediate Credit Banks
Federal Land Banks
Federal National Mortgage Association
Government National Mortgage Association (does not include Pass-Through Securities)
Small Business Administration
Student Loan Marketing Association
Tennessee Valley Authority
United States Postal Service
Washington Metropolitan Area Transit Authority
Asian Development Bank
Inter-American Development Bank
International Bank for Reconstruction and Development

Since late 1970, the Federal Reserve Banks have been operating a checklist procedure designed to assist in the identification of lost and stolen Government and Agency securities. The development of the checklist procedure had been spurred in late 1969 by a marked increase in the incidence and magnitude of thefts of United States Government and Agency securities from banks and other financial institutions.

The reporting and inquiry phases of § 240.17f-1 will be operated on a one-year pilot basis beginning January 2, 1978, when the inquiry requirement becomes effective. The section covers every national securities exchange, member thereof, registered securities association, broker, dealer, mnuicipal securities dealer, registered transfer agent, registered clearing agency, participant therein, member of the Federal Reserve System, and bank whose deposits are insured by the Federal Deposit Insurance Corporation. While the section requires reports and inquiries on Government and Agency securities from those financial institutions, the Federal Reserve Banks will also accept reports from and respond to inquiries from any other financial institution.

It should be noted that the Federal Reserve Banks undertake no responsibility with regard to any party in maintaining the list of lost or stolen securities or responding to inquiries pertaining thereto and will not be liable for any act or failure to act with respect to any procedures set forth in § 240.17f-1. Furthermore, the list maintained by the Federal Reserve Banks pursuant to such section is not a "caveat" or "stop payment" list.

REPORTS (BEGINNING OCTOBER 3, 1977)

Reports of lost, missing, counterfeit or stolen securities should be made in writing, using SEC Form X-17F-1A. A copy of the form is included in SEC Release No. 34-tc which this material is appended. Copies of the form will be available at all SEC Regional Offices after September 1, 1977. All recoveries must also be promptly reported in writing, using the same form, by the institution that reported the loss. A list of mailing addresses to which reports may be sent follows this description of reporting and inquiry procedures. A map of the twelve Federal Reserve Districts is also included to assist reporting institutions in locating the nearest Federal Reserve Bank.

INQUIRIES (BEGINNING JANUARY 2, 1978)

All financial institutions covered by § 240.17f-1 will also be required to make inquiry with respect to every bearer Government or Agency security (including registered securities assigned in blank), which comes into its possession or keeping, whether by pledge, transfer or otherwise, to ascertain whether that security has been reported as lost, missing, counterfeit or stolen unless:

(1) The security is received directly from the issuer or issuing agent at issuance, or

(2) The security is received from another reporting institution or from a Federal Reserve Bank in its capacity as fiscal agent. (All securities received from a Federal Reserve Bank are exempt from the § 240.17f-1 inquiry requirement except securities received on a withdrawal from a safekeeping or other custodial acount where the securities were not held in book-entry form.)

Inquiries, as well as requests for general information regarding the use of the Federal Reserve Bank checklist procedure, may be made by telephone as indicated in the list which follows. Response by the Federal Reserve Office will be in the form of a return call, which will be promptly confirmed in writing.

Reports of and inquiries as to registered Government and Agency securities (unless assigned in blank) are not covered by § 240.17f-1 but may be made to the appropriate transfer agent (either the U.S. Treasury Department for Treasury and Federal Land Bank issues, or the Federal Reserve Bank of New York for other Agency issues, including securities issued by international organizations). Any reports of or inquiries as to counterfeit securities should be directed to the appropriate law enforcement agencies.

The checklist procedure is designed to help recover lost or stolen securities and to prevent their use in normal commerce. Of even greater importance are measures designed to minimize the risk of loss or theft of securities. In this respect, the book-entry procedure for Government and Federal Agency securities affords the optimal solution to the problem of securities thefts. Currently more than 87 percent of the eligible marketable Government and Federal Agency issues are held in book-entry form. However, about $63 billion still remains outstanding in definitive form—much of it in the custody of banks. Both the Federal Reserve System and the Treasury have been working to extend the use of the book-entry-procedure, and banks are urged to utilize the procedure to the maximum extent possible.

APPENDIX IV

THE LOST, MISSING, STOLEN AND COUNTERFEIT SECURITIES INFORMATION SYSTEM

Description of the System

The Securities and Exchange Commission designated the Securities Information Center, Inc. (the "Designee"), a subsidiary of ITEL AutEx, Inc., to operate the Lost, Stolen, Missing and Counterfeit Securities Information System (the "system") to receive and process reports and inquiries for which the Commission is the appropriate instrumentality under 17 CFR 240.17f–1. The system is to operate as a pilot program with Reports to the system beginning on October 3, 1977, and inquiries to the system commencing on January 2, 1978. The pilot program will end on December 31, 1978.

It is the intention of the Commission and the designee to operate a system which will, with sufficient flexibility and at the lowest possible cost, meet the needs of the industry and fulfill the intent of Congress. It is estimated that during the pilot year the system will on the average process 10,000 reports and inquiries a day. In the early months of the pilot, users should anticipate minor problems which usually accompany the start-up of a new system. As experience is gained with the operation of the system, user requirements will be better defined and procedures will be modified to improve the operation of the system and insure the ultimate success of the program.

This material briefly describes how the system will operate, defines terms and service options, and provides a schedule of fees which will be charged in connection with the service.

REPORTING REQUIREMENTS

Securities and Exchange Commission Release Nos. 34–13653, 34–13280, and 13831 define the organizations (reporting institutions) which are required to report to and make inquiries of the system. The releases also specify when reports and inquiries are required. The rule provisions and important explanatory information has been republished in SEC Release No. 34–13832, to which this Description of the system is an appendix.

REPORTS

A report is a notice to the system and to a transfer agent for the issue of (1) securities lost, stolen, missing, or discovered to be counterfeit; (2) recovery of securities previously reported lost, stolen, or missing; or (3) a correction or update of a previous report other than recovery.

All reporting institutions are required to make reports enumerated in paragraph (b) of rule 17f–1 directly to the appropriate instrumentality. All reports must be made on Form X–17F–1A and signed by an authorized individual whose signature is on file with the designee. Reports for which the Commission is the appropriate instrumentality should be mailed to P.O. Box 421, Wellesley Hills, Mass. 02181.

Reports can be made voluntarily for situations in which reporting institutions are exempt from reporting requirements. However, all reports must relate to securities which have a CUSIP number and must show that number to be accepted by the system.

Preliminary reports may also be made by telephone or telex. Preliminary reports should include the reporting institution's FINS number,[1] the CUSIP number and certificate numbers (including all prefixes and suffixes) of the securities, and indication of whether or not criminality is suspected. Preliminary reports must be followed by a written report on Form X–17F–1A signed by an authorized individual and mailed to P.O. Box 421, Wellesley Hills, Mass. 02181.

The designee will send a written report confirmation to the reporting institution on a weekly basis.

On October 3, 1977, the system will be in operation to receive reports and institutions required to report must begin doing so on that date.

INQUIRIES

Inquiries are made of the system to determine if securities coming into the possession or control of a reporting institution have been previously reported as lost, stolen, missing, or counterfeit.

Reporting institutions must either be direct inquirers or indirect inquirers of the system. Direct inquirers make inquiries of the system by using telephone, telex, mail, or magnetic tape sent to the designee. Alternatively, a reporting institution can participate as an indirect inquirer by arranging with a direct inquirer to act on its behalf in making inquiries of the system.

Upon registering with the system as a direct inquirer, the reporting institution will be assigned appropriate access codes. Each time the reporting institution makes an inquiry of the system, whether on its own behalf or on behalf of another institution, the code will be used to insure that only authorized direct inquirers have access to the system.

In addition to the reporting institution's access code, the inquiry must include the institution's FINS number and the securities' CUSIP and certificate numbers (including all suffixes and prefixes). Multiple inquires can be made in a single mailing, telephone call, or telex transmission.

Institutions that anticipate a large volume of inquiries or reports on a regular basis may elect to input to the system via magnetic tape. Such reporting institutions should contact the designee for specifications and procedures.

A direct inquirer can access the system from various stations within its organization. A station is a department or branch location that will have its own access code and telephone contact.

Direct inquiries making inquiries from more than one station can register the additional stations as either primary or secondary access stations. A secondary station makes inquiries of the system directly but has its written confirmations directed by the designee to a primary access station of the institution. A primary access station receives confirmations for its own use of the system and for use by its secondary access stations, if any. At least one location of each direct inquirer must be registered as a primary access station. No other stations are required. Every secondary station must be associated with one and only one primary station.

[illegible]

After authorized access for purposes of making an inquiry has been established, the system will assign the inquiry a validation number which confirms for the direct inquirer that the inquiry was made.

The system will then search the data base to determine if the CUSIP and certificate numbers in the inquiry match those in a report previously submitted. If so, the inquiring institution will be notified immediately of the match. This positive confirmation will include instructions on how to contact the reporting institution which submitted the matching report and notice, if any, of suspected criminality.

Written confirmations of inquiries that did not result in a match (negative confirmation) will be mailed to the direct inquirer monthly along with report confirmations. Confirmations will be mailed to the primary access station.

An optional prompt written confirmation service will be available to direct inquirers at additional cost. With this service, the primary access station will receive prompt confirmation by mail of all inquiries (and whether positive or negative) and of all reports received by the system from that station or its secondary access stations. There will be one such mailing for each day on which reports and or inquiries were received from the station or its secondary access stations.

On January 2, 1978, the system will be in operation to receive inquiries, and institutions required to make inquiries must begin doing so on that date.

SCHEDULE OF CHARGES

Under a pricing structure and schedule of fees approved by the Commission, organizations that are direct inquirers will be charged (1) an annual registration fee, (2) a one-time assessment to cover system development, and (3) usage fees. An indirect inquirer must make separate arrangements with the institution that makes inquiries on its behalf to compensate that direct inquirer for its costs and services.

Fees do not cover participant's use of the mails, telephone, or telex for making reports or inquiries, nor any training or education of employees of direct or indirect inquirers in connection with the use of the system.

Registration.—This annual fee for direct inquirers covers the cost of maintaining registration data, assignment of access codes and billing of all charges.

	For the pilot year
For each primary access station	$18 00
For each secondary access station	9 00

System development.—There will be a one-time assessment to cover the costs of development of software and hardware to operate the system. The costs of development will be divided evenly among all direct inquirers and the per user charge will depend on the number of direct inquirers.

Estimated one-time assessment (based on anticipated 5,000 direct users)	$40 00

Usage.—These fees will cover the costs of verification of authorized system access, matching of reports and inquiries, notification of matches, and confirmation of inquiries.

Usage charges will be billed quarterly in advance to a single primary access station. The charges outlined below are based on estimates of the number of direct inquirers in each size classification (5,000 total) and of the aggregate number of inquiries (10,000 per day). The first quarterly billing will be adjusted to reflect the actual number of direct inquirers in each size classification. Subsequent quarterly billings will be adjusted to reflect actual aggregate volume of inquiries.

[1] Information on where your FINS number can be located is contained in SEC Release No. 34–13832, to which this material is appended.

Type	Size	Estimated Usage Charges	
Banks	Amount of Deposits	Annual	Quarterly
	Over $1 Billion	$2,400.00	$600.00
	$500 Million to $1 Billion	1,200.00	300.00
	Less than $500 Million	50.00	12.50
Securities Organizations	Annual Revenue (Most recent fiscal year)	Annual	Quarterly
	Over $25 Million	$2,400.00	$600.00
	$5 Million to $25 Million	1,650.00	412.50
	$500,000 to $5 Million	360.00	90.00
	Less than $500,000	100.00	25.00
Non-Bank Transfer Agents	Number of Shares Issued Last Year	Annual	Quarterly
	100,000 shares or more	$90.00	$22.50
	Less than 100,000 shares	50.00	12.50

PROMPT WRITTEN CONFIRMATION SERVICE (OPTIONAL)

For mailing of prompt written confirmations of all inquiries and reports received from a direct inquirer each day via mail, telephone or telex:

Each primary access station using the service (per quarter)---------- $16.00

Additional information, including procedural instructions and telephone and telex numbers, will be mailed to direct inquirers after registration forms have been received and processed.

APPENDIX V

LOST, STOLEN, MISSING, AND COUNTERFEIT SECURITIES INFORMATION SYSTEM

Registration Form

Organizations required by Securities and Exchange Commission Rule 17f-1 (under section 17(f) of the Securities and Exchange Act of 1934, as amended by Pub. L. 94-29 (June 4, 1975)), to make reports to and inquiries of the lost, stolen, missing, and counterfeit securities information system are shown by categories below. All such organizations must complete and return this form to the Securities Information Center, Inc. ("designee") by September 23, 1977, in order to be able to fulfill their responsibilities under the law.

Fill out and return this form to: Securities Information Center, Inc., Post Office Box 421, Wellesley Hills, Mass. 02181.

Entities ("reporting institutions") required to make reports of and inquiries to the system (check each classification appropriate to you):

( ) 1. Federal Reserve System member.

( ) 2. Bank whose deposits are insured by the Federal Deposit Insurance Corporation.

( ) 3. National Securities Exchange.

( ) 4. National Securities Exchange member.

( ) 5. National Securities Exchange member firm.

( ) 6. Registered Securities Association.

( ) 7. Registered Securities Association member.

( ) 8. Securities broker.

( ) 9. Securities dealer.

( ) 10. Municipal securities dealer.

( ) 11. Registered transfer agent.

( ) 12. Registered clearing agency.

( ) 13. Participant in a registered clearing agency.

Name of reporting institution:----------

SIZE OF INSTITUTION

Check one of the following that describes the size of your organization.

Bank (all those who have checked either classification 1 or 2 above). □ More than $1 billion in deposits; □ with $500 million to $1 billion in deposits; □ less than $500 million in deposits.

Securities organization: □ With over $25 million in annual revenue; □ with more than $5 million but less than $25 million in annual revenue; □ with $500,000 to $5 million in annual revenue; □ with less than $500,000 in annual revenue.

Non-bank transfer agents (those who check only classification 11 above): □ That issue 100,000 shares or more per year; □ that issue less than 100,000 shares per year.

Method of inquiry.—Initial one of the two statements below to indicate whether you will make inquiries of the system as a "direct inquirer" or "indirect inquirer." Direct inquirers should also indicate whether they will use multiple access stations and/or the prompt confirmation service. These usage options and the charges related to each are outlined in the "description of the system."

Direct inquirer: Beginning January 2, 1978, we will make inquiries of the system directly. We agree to pay to the designee the annual registration fees of $18 for each primary access station and $9 for each secondary access station. We also agree to pay the advance quarterly usage charges and the one-time assessment for system development costs approved by the Commission and outlined in the "Description of the System," which is appended to SEC Release No. 34-----.

Direct inquirers should use the boxes below to indicate the number of stations they will use to make inquiries to the system. If these boxes are not filled, it will be presumed that there will be 1 primary and no secondary access stations, the mandatory minimum.

□ Number of primary access stations.

□ Number of secondary access stations.

Direct inquirers that wish to have the prompt written confirmation service should check the block below:

□ We wish to have the prompt written confirmation service as outlined in the "Description of the System." We agree to pay $16 per quarter for this service.

We agree to pay amounts equal to all sales, use and excise taxes, or other taxes which may be levied upon or in connection with the furnishing of the facilities or service of the system.

Terms: All fees are due and payable within ten days of date of invoicing.

Indirect inquirer: We have made arrangements with ----------

(Name of direct inquirer)

who will make inquiries of the system on our behalf. We are aware that we will receive no direct confirmations from the designee and that the institution that makes inquiries for us may pass through to us the costs of using the system on our behalf as well as additional service charges.

We understand that the Lost, Stolen, Missing, and Counterfeit Securities Information System will operate as a one-year pilot program. In addition to making reports and inquiries to the designee, we will take all other steps necessary for reporting to the appropriate instrumentality and law enforcement agencies information relating to lost, stolen, missing, and counterfeit securities.

The designee will perform its work in a businesslike manner and in accordance with reasonable standards of care. The designee does not, however, guarantee the accuracy of any information contained in the records of the system or of the responses to inquiries concerning lost, stolen, missing, or counterfeit securities furnished by it. The designee shall not be liable for any unintentional delays, inaccuracies, errors, or omissions in said responses or for any damages arising therefrom or occasioned thereby. The designee shall not be liable for non-performance or interruption of services due to fire, storms,

DEPARTMENT OF STATE

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976

Applications for Permits To Fish Off the Coasts of the United States

DEPARTMENT OF STATE

[Public Notice 561]

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976

Applications for Permits To Fish Off the Coasts of the United States

The Fishery Conservation and Management Act of 1976 (Pub. L. 94–265) (the "Act") provides that no fishing shall be conducted by foreign fishing vessels in the Fishery Conservation Zone of the United States after February 28, 1977, except in accordance with a valid and applicable permit issued pursuant to Section 204 of the Act.

The Act also requires that all applications for such permits be published in the FEDERAL REGISTER.

Applications for fishing during 1977 have been received from the Government of Japan and the Republic of Ireland and are published herewith.

Dated: August 4, 1977.

LARRY L. SNEAD,
Acting Director,
Office of Fisheries Affairs.

THE UNITED STATES OF AMERICA
DEPARTMENT OF COMMERCE
NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

APPLICATION FOR VESSEL PERMITS TO FISH WITHIN THE FISHERY CONSERVATION ZONE OF THE UNITED STATES, OR FOR ANADROMOUS SPECIES OR CONTINENTAL SHELF FISHERY RESOURCES

DATE _____ APPLICATION NO. EC(EI)-77-0001 for use of issuing Officer

In accordance with the provision of Section 204 of the Fishery Conservation and Management Act of 1976, (16 U.S.C. 1801-1882), and the governing international fisheries agreement entered into with the Government of the United States of America, which entered into force on 9 June 1977 (date), the government (or competent authority) of EIRE hereby submits this application for permits for fishing vessels under its jurisdiction to fish within the fishery conservation zone of the United States, or beyond that zone for anadromous species or Continental Shelf fishery resources subject to the jurisdiction of the United States.

The following information is submitted in support of this application (Use additional sheets as required).

A completed Fishing Vessel Identification Form for each permit that is requested; and a compilation of data contained in questions 5 and 20 in the attached Fishing Vessel Identification Form.

Submitted 22 July 77 (Date)

BUDGET RESCISSION AND DEFERRALS

Reports

OFFICE OF MANAGEMENT AND BUDGET

CUMULATIVE REPORT ON RESCISSIONS AND DEFERRALS

Status as of August 1977

This report is submitted in fulfillment of the requirements of section 1014(e) of the Impoundment Control Act of 1974 (Pub. L. 93-344). Section 1014(e) provides for a monthly report listing all current year budget authority with respect to which, as of the first day of the month, a special message has been transmitted to the Congress.

This month's report gives the status as of August 1, 1977, of the 20 rescissions and 63 deferrals contained in the first seventeen special messages transmitted to the Congress for fiscal year 1977. These messages were transmitted to the Congress on July 29, September 22, October 1, November 5, December 3, 1976, January 7 and 17, March 9 and 24, April 4 and 28, May 18, and July 7, 19, and 26, 1977.

RESCISSIONS (TABLE A AND ATTACHMENT A)

Six rescissions totaling $665.3 million in fiscal year 1977 budget authority are presently before the Congress. Table A summarizes the status of rescissions proposed as of August 1, 1977. Attachment A shows the history and status of each rescission proposed for fiscal year 1977.

DEFERRALS (TABLE B AND ATTACHMENT B)

As of August 1, 1977, $4,437.5 million in 1977 budget authority was being deferred from obligation and another $4.6 million in 1977 obligations was being deferred from expenditure. Table B summarizes the status of existing deferrals. Attachment B shows the history and status of each deferral proposed during fiscal year 1977.

INFORMATION FROM SPECIAL MESSAGES

The special messages containing information on each of the rescissions and deferrals covered by the cumulative report are contained in the FEDERAL REGISTERS of:

Tuesday, August 3, 1976 (Vol. 41, No. 150, Part VI)
Monday, September 27, 1976 (Vol. 41, No. 188, Part III)
Thursday, October 7, 1976 (Vol. 41, No. 196, Part IV)
Wednesday, November 10, 1976 (Vol. 41, No. 218, Part VII)
Wednesday, December 8, 1976 (Vol. 41, No. 237, Part II)
Thursday, January 13, 1977 (Vol. 42, No. 9, Part X)
Monday, January 24, 1977 (Vol. 42, No. 15, Part VIII)
Wednesday, March 16, 1977 (Vol. 42, No. 51, Part IV)
Wednesday, March 30, 1977 (Vol. 42, No. 61, Part VI)
Friday, April 8, 1977 (Vol. 42, No. 68, Part VI)
Wednesday, May 4, 1977 (Vol. 42, No. 86, Part VI)
Monday, May 23, 1977 (Vol. 42, No. 99, Part IX)
Wednesday, July 13, 1977 (Vol. 42, No. 134, Part VIII)
Friday, July 22, 1977 (Vol. 42, No. 141, Part V)
Friday, July 29, 1977 (Vol. 42, No. 146, Part VIII)

BERT LANCE,
Director.

TABLE A

STATUS OF 1977 RESCISSION PROPOSALS

	Amount (In millions of dollars)
Proposed rescissions	1,926.9
Withdrawn (R77-4A, Special Message No. 4, R77-13A, Special Message No. 8)	-95.0
Accepted by the Congress (R77-3, R77-5, R77-8, R77-9, R77-10, R77-11)	-711.6
Rejected by the Congress	-186.6
Adjustments	-268.4 1/
Pending before the Congress	665.3

* *

TABLE B

STATUS OF 1977 DEFERRALS

	Amount (In millions of dollars)
Proposed deferrals	7,470.7
Routine Executive releases (-2,523.1M) and adjustments (-479.9M) 2/ through August 1, 1977	-3,003.0
Overturned by the Congress	-25.6
Currently before the Congress	4,442.1 3/

1/ This amount is the difference between $721.0 million in Navy shipbuilding and conversion funds originally proposed for rescission and $452.6 million rescinded. When the rescission was proposed, these funds were already obligated for supply contracts. In testimony before the House Appropriations Committee, the Secretary of Defense concurred in the opinion that these contracts should not be terminated.

2/ An amount equal to $1,839.0 million included in the "Adjustments" column of Attachment B to this report represents superseded deferrals. This amount is not included in the "Adjustments" entry above because superseded deferrals are netted out in calculating the amount shown on the line "Deferrals proposed by the President" to avoid double counting.

3/ Includes $4.6 million of outlays in one Treasury deferral, D77-27A.

■

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

NEW GENERAL WAGE DETERMINATION DECISIONS

Ohio	OH77–2128

MODIFICATIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State.

Kansas:	
MO77–4075	Apr. 8, 1977.
MO77–4160	July 8, 1977.
Louisiana:	
LA77–4169	July 29, 1977.
Missouri:	
MO77–4033	Feb. 18, 1977.
MO77–4075	Apr. 8, 1977.
MO77–4134; MO77–4148	July 1, 1977.
MO77–4160	July 8, 1977.
Nevada:	
NV77–5072	Do.
Oklahoma:	
OK77–4164	July 15, 1977.
OK77–4168	July 29, 1977.
South Dakota:	
SD77–5084	June 17, 1977.
Texas:	
TX77–4070	Apr. 1, 1977.
TX77–4098; TX77–4157	July 8, 1977.
Wisconsin:	
WI77–2102	July 15, 1977.

SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being superseded and their dates of publication in the FEDERAL REGISTER are listed with each State.

Supersedeas Decision numbers are in parentheses following the numbers of the decisions being superseded.

Florida:	
FL77–1021 (FL77–1099)	Feb. 18, 1977.
Illinois:	
IL76–2130 (IL77–2114); IL76–2132 (IL77–2115).	Oct. 29, 1976.
IL77–2018 (IL77–2116)	Feb. 18, 1977.
Massachusetts:	
MA76–2096 (MA77–3063)	Aug. 13, 1976.
Minnesota:	
MN77–2047 (MN77–2119)	May 6, 1977.
Tennessee:	
TN76–1054 (TN77–1100)	May 21, 1976.
TN77–1047 (TN77–1074)	May 6, 1977.

Signed at Washington, D.C., this 5th day of August 1977.

RAY J. DOLAN,
Assistant Administrator,
Wage and Hour Division.

ILL-6-PEO-1

POWER EQUIPMENT OPERATORS KNOX, HENDERSON, WARREN, STARK COUNTIES; & EASTERN 5 of HENRY CO.	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
GROUP 1	11.57	.45	.55		.05
GROUP 2	11.37	.45	.55		.05
GROUP 3	10.995	.45	.55		.05
GROUP 4	10.72	.45	.55		.05
GROUP 5	10.11	.45	.55		.05

GROUP 1 - Cranes, escalated rate on crane, derricks, booms, $.01 per hour, per foot after 80 feet or boom including jib, overhead cranes, gradall, cherry pickers (and similar types over 15 ton lifting capacity (require oiler), mechanics, central concrete mixing plant operator, road pavers (27E-dual drum-tri batchers), blacktop plant operators and plant engineers, 3 drum hoist, derricks, hydro cranes, shovels skimmer scoops, koehring scoopers, draglines, backhoe, hoptoes-crane-type that require oilers, derrick boats, pile drivers and skid rigs, clamshells, locomotive cranes, dredge (all types), motor patrol, power blades dumore-elevating and similar types tower cranes (crawler mobile) and stationary, crane-type backfiller, drott yumbo and similar types considered as cranes, caisson rigs (require oilers) dozer, tourna-dozer, work boats, ross carrier and helicopter

GROUP 2 - Trench machine, pumpcrete-belt crete-squeeze-screw-type pumps and gypsum hulker and pump, dinkeys, power launches, tournapulls (all), multiple unit, earth movers, $.25 per hour for cachs coop over one scoops (all sizes), push cats, endloaders (all types), side boom, P-H one pass soil-cement machine (all similar types), wheel tractors (industrial or farm types w/dozer-hoe-end-loader or other attachments), pugmill with pump backfillers, asphalt surfacing machine, euclid loader, forklifts, form-lens finishing machine, jeeps w.ditching machine or other attachments, tunneluger, rock crushers, automatic cement and gravel batching plant , mobile drills (soil testing and similar types), requiring oiler), flaherty spreader or similar types (require oiler), heavy equipment greaser (top greaser on spread), gurries and similar type, 1 and 2 drum hoists (buck hoists and similar types freight and passenger elevators Chicago boom, boring machine and pipe jacking, machine hydro boom, starting engineer on pipeline, C.M.I. and similar types (require oiler) straw blower, hydro seeder and P.W.D and similar types

PAGE 8

DECISION NO. IL77-2114

POWER EQUIPMENT OPERATORS (CONT'D)

GROUP 3 - Tractor (track type) without power unit pulling rollers, rollers on asphalt, brick or macadam, concrete breakers, concrete spreaders, mule pulling roller, center stripper, cement finishing machines, barber greene or similar loaders, vibro tamper (all similar types), self-propelled, winch or boom truck, mechanical bull floats, mixer over 3 bags to 27E, tractor pulling power blade or elevating grader, porter rex rail, clary screed, pugmill (without pump) screed man on laydown machine, firemen and spray machine on paving

GROUP 4 - Air compressor, all air and steam valves, power subgrader, oil distributor, straight tractor, trac-air wirhout attachments, curb machines, truck crane oilers, and truck type hoptoe oilers

GROUP 5 - Herman Nelson heater, Dravo, Warner, Silent glo and similar types, one engineer will operate 1-5 and after 5, two operators will be required, self-propelled concrete saws, assistant heavy equipment greaser on spreed, roller, 5 tons and under on earth or gravel, form grader, pump 1 or 2, generator (1) or (2), weldingmachine (1) or (2) - 300 amp. or over, mixer (3) bag and under (standard capacity), bulk cement plant, crawler crane and skid rig oilers

DECISION NO. IL77-2114

Class 12	7.70	.40	.60		.035

POWER EQUIPMENT OPERATORS:

Class 1: Apsco or equal spreading machine; Backhoe; Backfiller; Boom or winch cat; Bituminous mixplace machine; Backsmith; Bituminous surfacing machine; Bulldozer; Crane; Shovel; Dragline; Truck crane; Piledriver; Concrete finishing machine or spreader machine; Concrete breaker; Concrete or pumpcrete pump; Dinky or standard locomotive; Drill well; Elevating grader; Forklifts; Rubbertired; Flex-plane; Gradall; Hi-lift; handblade, power; Hoists; Tugger type; Hoist, (2 drum) or over one; Guy-derrick; Hyster mechanic; Motor patrol; Mixer 21 cu. ft. or over; Push cat; Pulls and scrapers; Pumps; 2 well points; Pan pulverizer or pulverizer equal to pugmill; Rubber-tired farm type tractor with bulldozer or hi-lift (Over 1/2 yd.), Rubber-tired tractor w/auger; Skimmer scoops; Seaman tiller; Spreader, Jersey; Tract-air used w/drill or Hi-lift; Trenching machine; or ditching machine; Wood chipper with tractor; Self-propelled roller w/10 ft. blade; Concrete pumps; Equipment greader.

Class 2: Roller, self-propelled; Power subgrader; Elevator operator

Class 3: Rubber-tired farm type tractor w/bull dozer or hi-lift (½ yd. or less)

Class 4: Pump, one well point; All tract type tractors, pulling any type roller or disc.

Class 5: Oiler; All wheel type tractors, Oiler on 30 Hp ditches and over; Oiler; Hydra-crane with 15 ton lifting capacity or more and cranes similar to Hydra-crane w/15 ton capacity and more.

POWER EQUIPMENT OPERATORS (CONT'D)

Class 6: Air compressor w/valve driving piling air compressors, two (220 cu. ft. capacity or over); Air track drills, air track drill w/compressor; Automatic bins scales w/compressor or generator; pipeline boring machine; Bulk cement plant w/separate ompressor bulk float power operator; Concrete saws, (two); Hydra-lift (single motor); Straw mulcher blower w/spout

Class 7: Backend man on bituminous surfacing machine; Boom or winch truck; Cat wagon w/or without dump; Conveyors, two; Chip spreader, self-propelled concrete saw, on self-propelled; Form grader, Heater, (motor driven); Hoist; 1 drum; Truck crane oiler; Vibrator, Self-propelled.

Class 8: Air track drill (one); Belt drag machine, Power boom; Mechanical; Plasterers applicator; Tract-air

Class 9: Air compressor (220 cu. ft. capacity or over), one; Air compressor under (220 cu. ft.); tow; Automatic bins; Bulk cement plant w/built in compressor, running of same motor or electric motor; Firemen or switchmen; Form tamper, self-propelled; Light plants (two); Welding machine (two); Pumps (two); or combination or 2 pumps; Light plants, welding amchines air compressor (under 200 cu. ft.]; Mud jacks or wood chipper; Mixers, less than 21 cu. ft., Motor mixer w/skip or pump; Pipeline track jack

Class 10: Air compressor, under 220 cu. ft. capacity (one); Conveyor (one); Conveyor operator on self-propelled chip spreader; Heater (one); Motor drive; Light plant (one) pump (one); Welding machine (one) Ulmac or equal spreader.

RIVER WORK and LEVEE WORK on MISSISSIPPI and OHIO RIVERS

Class 11: Crane, shovel, dragline 4 yards or more, scraper, 18 yards, struck or over, dredge, derrick and piledriver, push boat operator, mechanic or 4 yards machine or over, Engine man on dredge, Levee man on dredge.

Class 12: Oiler on crane, dragline, shovel, 4 yard machine or over; Oiler on dredge.

DECISION NO. IL77-2115

TRUCK DRIVERS	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
GROUP I	9.70	.60	a28.00		
GROUP II	10.10	.60	a28.00		
GROUP III	10.30	.60	a28.00		

TRUCK DRIVERS

GROUP I: - Drivers on 2 axle trucks hauling less than 9 tons, air compressor and welding machine including those pulled by separate units, truck driver helpers, warehouseman, mechanic helpers, greasers & tiremen, pick-up trucks when hauling materials, tools, or men to and from and on the jobs site; Fork lifts up to 6,000 lbs., capacity.

GROUP II: - 2 or 3 axle trucks hauling more than 9 tons, but hauling less than 16 tons; A-frame winch trucks, hydrolifts trucks, or similar equipment when used for transportation purposes; Fork lifts over 6,000 lb. capacity; winch trucks; 4-axle combination units; ticket writers

GROUP III: - 2,3, or 4 axle trucks hauling 16 tons or more, drivers on oil distributores, water pulls, mechanic & working foreman; 5-axle or more combination units; dispatchers.

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected
$10.00
per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index $8.00
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed $_____ for _____ subscription(s) to the publications checked below:

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

List of Public Laws

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Reg. 567, Amdt. 1]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to final rule.

SUMMARY: This amendment increases the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period August 5–11, 1977. The amendment recognizes that demand for Valencia oranges that may be shipped to regulation was issued. This action will increase the supply of oranges available to consumers.

DATES: Weekly regulation period August 5–11, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3545).

SUPPLEMENTARY INFORMATION: *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of recommendations and information submitted by the Valencia Orange Administrative Committee, established under the marketing agreement, and order, and other available information, it is found that the limitation of handling of Valencia oranges as provided in this amendment will tend to effectuate the declared policy of the act.

(2) Demand in the Valencia orange markets has improved since the regulation was issued. Amendment of the regulation is necessary to permit orange handlers to ship a larger quantity of Valencia oranges to market to supply the increased demand. The amendment will increase the quantity permitted to be shipped by 50,000 cartons, in the interest of producers and consumers.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information became available upon which this amendment is based and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restrictions on the handling of Valencia oranges.

(a) *Order as amended.* The provisions in paragraph (b)(1), (i) and (ii) of § 908.867 Valencia Orange Regulation 567 (42 FR 39359) are hereby amended to read as follows:

§ 908.867 Valencia Orange Regulation 567.

* * * * *

(a) * * *

(1) * * *

(i) District 1: 280,000 cartons;

(ii) District 2: 420,000 cartons.

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: August 10, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

1977 Price and Allocation Interpretations

AGENCY: Federal Energy Administration.

ACTION: Notice of interpretations.

SUMMARY: Attached are the interpretations issued by the General Counsel of the Federal Energy Administration (FEA) during the period July 12 through August 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Kathleen Williams, Federal Building, 12th and Pennsylvania Avenue NW., Room 7132, Washington, D.C. 20461 (202–566–2454).

SUPPLEMENTARY INFORMATION: FEA interpretations issued pursuant to 10 CFR Part 205, Subpart F, are published in the FEDERAL REGISTER from time to time in accordance with the editorial and classification criteria set forth in 42 FR 7923, February 8, 1977.

FEA interpretations depend for their authority on the accuracy of the factual statement used as a basis for the interpretation (10 CFR 205.84(a)(2)) and may be rescinded or modified at any time (§ 205.85(d)). Only the persons to whom interpretations are addressed and other persons upon whom interpretations are served are entitled to rely on them (§ 205.85(c)). An interpretation is modified by a subsequent amendment to the regulation(s) or ruling(s) interpreted thereby to the extent that the interpretation is inconsistent with the amended regulation(s) or ruling(s) (§ 205.85(e)). In addition, interpretations are subject to appeal. The interpretations appended hereto are published today only for general guidance in accordance with the reasons set forth in the FEA notice cited above.

Issued in Washington, D.C., August 10, 1977.

ERIC J. FYGI,
Acting General Counsel, Federal Energy Administration.

INTERPRETATION 1977-22

To: Sea Horse Marine, Inc.

Date: July 20, 1977.

Rules Interpreted: §§ 211.51, 211.62, 211.67.

Code: GCW—AI—Crude Oil, def.; Entitlements Program; Waste Crude Oil, Reclamation of.

This is in response to your letter dated August 6, 1976, as supplemented by your letters of November 18, 1976, and May 6, 1977, in which you requested a determination of whether certain material sold by Sea Horse Marine, Inc. ("Sea Horse"), to domestic refiners may be regarded as non-domestic crude oil for purposes of the domestic crude oil allocation program (the "entitlements program") set forth at 10 CFR 211.67.

FACTS

Sea Horse recovers from the tanks of ships which transport crude oil from foreign countries to the United States residual material which adheres to the inside of the tanks when the crude oil is removed from the ships. The tanks are cleaned with water and

some detergent, which is used to dislodge the petroleum, leaving a residue of the cleaning process called petroleum slops. In addition to crude oil, the slops contain water, detergent, and small quantities of other substances such as rust particles. Petroleum slops are classified as waste for purposes of the United States customs service regulations.

Petroleum slops acquired by Sea Horse were formerly sold directly to refiners, which then had to process the material before it could be used as a refinery feedstock. Sea Horse has recently established a facility for removing salt water and heavy non-soluble impurities from the petroleum slops.

After processing, the recovered material is sold to refiners and can then be used as a refinery input in the same manner as crude oil.

ISSUE

The issue presented for interpretation is whether the material recovered from petroleum slops by Sea Horse is properly treated as non-domestic crude oil for purposes of calculating the volume of refiners' crude oil runs to stills and crude oil receipts under 10 CFR 211.51, 211.62, and 211.67.

INTERPRETATION

It is our opinion that the material recovered from petroleum slops by Sea Horse constitutes crude oil for purposes of § 211.51 and is therefore properly included in the volume of a refiner's crude oil runs to stills under § 211.62 for purposes of § 211.67. Further, to the extent that this material is reclaimed from the tanks of ships which have transported crude oil to the United States from foreign sources, the material would not constitute domestic crude oil, and thus would not give rise to any entitlement obligation under § 211.67(b) by virtue of its inclusion in a refiner's crude oil receipts under § 211.62.

Crude oil is defined in § 211.51 as:

• • • a mixture of liquid hydrocarbons including lease condensate that exists in natural underground reservoirs and remains liquid at atmospheric pressure after passing through surface separating facilities.

The petroleum slops, at the time of their acquisition by Sea Horse, have large quantities of water and other materials included therein, and are thus classified as waste pursuant to item 793.000 of the Tariff Schedules of the United States (19 U.S.C. Ch. 4, Subtitle 1). However, the presence of these additional quantities of water and other materials would not prevent the petroleum slops from being considered as crude oil under § 211.51, since in many instances crude oil produced at a lease also contains large quantities of these materials.

In your request, you indicated that Sea Horse has established a facility for removing salt water and heavy non-soluble impurities from the petroleum slops. This processing does not involve any operations similar to those performed by a refinery. By the time of delivery to a refinery, the petroleum slops are sufficiently free of water and other impurities that they can be used directly as feedstock in the same manner as other crude oil.

Because the petroleum slops are obtained from ships which transport foreign crude oil, we believe that the crude oil can properly be characterized as non-domestic crude oil. FEA has previously considered the status of crude oil recovered other than from customary production activities, e.g., separated from contaminated or waste crude oil mixtures, in reference to the FEA Mandatory Petroleum Price Regulations.[1] In the interpretations cited, the source of the waste or reclaimed crude oil was either clearly domestic or unascertainable.

It was concluded in these interpretations that firms which recover crude oil from contaminated waste crude oil mixtures are involved in activities analogous to the production of crude oil, even though the production results from reclamation processes. However, it is our opinion that regardless how the crude oil is actually recovered, it can be characterized according to its origin, as domestic or non-domestic, if the origin is clearly ascertainable.

INTERPRETATION 1977-23

To: Beacon Oil Co.

Date: July 27, 1977.

Rules Interpreted: § 212.83(c)(2).

Code: GCW—PI—Refiner Price Formula "H" Factor.

This is in response to your letter of November 5, 1975, on behalf of Beacon Oil Co. (Beacon) requesting an interpretation of 10 CFR 212.83 with respect to the reallocation of increased product costs among categories of covered products.

The issue raised by Beacon in its request for interpretation was previously considered by Federal Energy Administration (FEA) compliance personnel in FEA Region 9, during the course of an audit of Beacon. FEA regional personnel suggested that Beacon had incorrectly construed 10 CFR 212.83; for this reason Beacon seeks this interpretation. The interpretation sought by Beacon will therefore have an effect upon the conduct and outcome of FEA's audit.

FACTS

Beacon is a refiner subject to the refiner price rules, 10 CFR Part 212, Subpart E. In the period August 1973 to March 1975, Beacon recovered, in sales of No. 2 oils and general refinery products, more than its increased product costs attributable to those product categories. Beacon reallocated these overrecoveries of increased product costs from No. 2 oils and general refinery products to gasoline and maintains that this reallocation is proper under applicable FEA regulations. Beacon had recovered less than its increased product costs attributable to gasoline during this period. Reallocation was accomplished through the use of the "H" factor of the refiner formula. The "H" factor allows a refiner, in certain instances, to transfer available amounts of increased product costs from certain types of covered products to certain different types of covered products. Beacon "offset" and eliminated the overrecoveries in sales of No. 2 oils and general refinery products by attributing the excess recovery for No. 2 oils and general refinery products to its deficient recovery for gasoline. Beacon seeks a determination that its actions were in accordance with FEA price regulations.

ISSUE

May Beacon reallocate overrecoveries of increased product costs resulting from sales of No. 2 oils and general refinery products to underrecoveries of increased product costs resulting from sales of gasoline, through the use of the "H" factor in the refiner formula?

INTERPRETATION

The transfer of increased product costs among covered products is accomplished through the operation of the "H" factor in the refiner formula. During most of the time covered by FEA's audit of Beacon, FEA regulations and the prior Cost of Living Council (CLC) regulations defined the "H" factor as follows:

$H^{\prime\prime}$—The sum of the dollar amounts available in the period "u" (the current month) for inclusion in price adjustments to specific [sic, special] products which pursuant to pargaraph (c)(1)(ii) of this section the refiner elects to include in calculating the base prices of covered products other than special products for the period "u" (the current month).

$H_i^{\prime\prime}$=The portion of the total dollar amount available in the period "u" (the current month) for inclusion in price adjustments to special products of the type "i" which pursuant to paragraph (c)(1)(ii) of this section the refiner elects to include in prices of covered products other than special products for the period "u" (the current month). (10 CFR 212.83(c); 6 CFR 150.356 (c))

NOTE.—No. 2 oils (i=1) and gasoline (i=2) were treated as "special products" during this period.

In November 1974, the definitions of the "H" factors were amended and the following definitions prevailed until March 1975:

$H_i^{\prime\prime}$=*Where* $H_i^{\prime\prime}$ is negative, the portion of the total dollar amount available in the period "u" (the current month) for inclusion in price adjustments to special products of the type "i" which pursuant to paragraph (c)(1)(ii) of this section the refiner elects to include in prices of covered products other than special products and crude petroleum (i=3) for the period "u" (the current month); or, where $H_i^{\prime\prime}$ is positive (for special products i=2), the portion of the total dollar amount available in the period "u" (the current month) for inclusion in price adjustments to covered products other than special products and crude petroleum (i=3) which pursuant to paragraph (c)(1)(iv) of this section, the refiner elects to include in prices of special product (i=2) for the period "u" (the current month).

$H^{\prime\prime}$=Where $H^{\prime\prime}$ is positive, the sum of the dollar amounts available in the period "u" (the current month) for inclusion in price adjustments to special products which pursuant to paragraph (c)(1)(ii) of this section the refiner elects to include in calculating the base prices of covered products other than special products and crude petroleum for the period "u" (the current month); or, where $H^{\prime\prime}$ is negative, the portion of the dollar amounts available in the period "u" (the current month) for inclusion in price adjustments to covered products other than special products and crude petroleum (i=3) which pursuant to paragraph (c)(1)(iv) of this section the refiner elects to include in calculating the base prices of special products (i=2) for the period "u" (the current month). (10 CFR 212.83(c))

From the above definitions of the "H" factor, three details relevant to this discussion are evident: (1) the "H" factor only operates where there are 'dollar amounts available for inclusion' in any price adjustments, (2) no costs were permitted to be transferred to gasoline (i=2), by the use of the "H" factor, prior to November 1974; and (3) between November 1974 and March 1975, costs could not be directly transferred from No 2 heating oil and No. 2-D diesel fuel (i=1) to gasoline (i=2), by the use of the "H" factor.

The measurement of those costs that are "available" to a firm begins with that firm's "increased product costs." During the time period in question, August 1973 to March 1975, FEA and CLC regulations defined increased product costs as:

the sum of (1) the difference between the total cost of the crude petroleum during the month of measurement and the total cost of crude petroleum during the month of May, 1973 plus (2) the difference between the total cost of petroleum product during the month of measurement and the total cost of petroleum product during the month of May, 1973. (10 CFR 212.83; 6 CFR 150.356)

The sum of the two cost differentials identified in the quoted definition constitutes the "available" increased product costs referred to in the descriptions of the "H" factors. These two cost differentials are the "A" and "B" factors found in § 212.83, and, to the extent that these costs are not recovered in a month's sales, they may be carried forward for application in a subsequent month. When so carried forward, these costs are reflected in the "G" factor of § 212.83, but consist, nevertheless, of the two fundamental cost elements set forth in the definition. The "H" factor, by itself, has no value unless, and only to the extent that, the refiner "elects" to distribute these "available" increased product costs in accordance with the conditions applicable to the "H" factor.

Where the "H" factor allows the transference of "available" increased product costs, those costs are the increased cost of crude petroleum (the "A" factor in the refiner formulae), the increased cost of purchased petroleum products (the "B" factor) and such amounts of these two cost increases as were not previously recovered (the "G" factor).

Beacon's interpretation request reveals that Beacon did not experience unrecouped increased product costs to reflect in its "G" factor for No. 2 oils and general refinery products. Instead, Beacon experienced excessive recoveries for these products, which are involved in Beacon's purported use of the "H" factor to transfer a negative value from one product category to another. Beacon apparently perceived these overrecoveries as "available" for inclusion in price adjustments.

Between August 1973 and March 1975, CLC and FEA regulations generally provided that

• • • [i]f in any month beginning with October 1973, a firm charges prices for a [covered product] which result in the recoupment of more total revenues than the entire month of increased product costs calculated for that product pursuant to the general formula and allowable under paragraph (c)(1)(i) of this section, the amount of excess product costs recouped must be subtracted from the May 15, 1973 selling prices to compute the base price for that [covered product] for the subsequent month. (10 CFR 212.83(d)(1))

According to this provision, the overrecoveries of increased product costs (reflected in the "G" factor), resulting from Beacon's sales of No. 2 oils or general refinery products must be eliminated from the succeeding month's cost computations for that particular respective product type and are not, therefore, "available" for inclusion in price adjustments. This required disposition of the overrecoveries which appear in the "G" factor precludes the reallocation of those overrecoveries under the "H" factor because it removes these amounts from the formulae and because it must be made exclusively for the particular covered product type in which the overrecoveries occurred.

The terms and functions of the "H" factor are simple and direct. They do not allow a refiner to reallocate overrecoveries in sales of a certain type of covered product to underrecoveries in sales of a different type of covered product.

Two additional details pertinent to the proper use of the "H" factor were noted earlier. These pertain to the direction and timing of reallocation of "available" costs. We must note in this regard that, under the description of the "H" factor, even if Beacon had available increased product costs in No. 2 oils and in general refinery products, those costs could not be transferred to gasoline prior to November 1974. After November 1974, increased product costs available in No. 2 oils could have been transferred to gasoline only in months subsequent to the month in which those costs were transferred to general refinery products.

In its Request for Interpretation, Beacon presents an argument that overrecoveries are actually negative increased product costs. Beacon asserts that the transference of increased product costs is not restricted solely to positive amounts and that therefore the transference of negative amounts is permitted. This argument is based upon an incorrect view of FEA regulations. Those regulations give precise instructions on the disposition of overrecoveries, viz., that overrecoveries are to be subtracted from the May 15, 1973 selling prices of the covered product involved to compute base prices for that same covered product for the subsequent month (10 CFR 212.83(d), supra). "Negative" increased product costs are a theoretical construct advanced here by Beacon in a manner that conflicts with the requirements of FEA regulations. To do so would frustrate the purpose of the prohibition against the transfer of increased costs to, for example, No. 2 oils. This is because the transfer of a negative value from No. 2 oils to gasoline obviously would have the same impact as the transfer of a positive value from gasoline to No. 2 oils.

It is our interpretation that the "H" factor of the formulae set forth in § 212.83 does not authorize the reallocation undertaken by Beacon as described herein.

INTERPRETATION 1977-24

To: Beacon Oil Co.

Date: July 27, 1977.

Rules Interpreted: §§ 210.91, 212.91

Code: GCW-PI—Five Percent Rule; Reporting Requirements, Refiner

This is in response to your letter of November 17, 1975 on behalf of Beacon Oil Company (Beacon) requesting an interpretation of 10 CFR 212.91 with respect to those entities of a refiner which may be treated as resellers under the Federal Energy Administration (FEA) Mandatory Petroleum Price Regulations.

The issue raised by Beacon in its request for interpretation was previously considered by FEA compliance personnel in FEA Region 9, during the course of an audit of Beacon. FEA regional personnel suggested that Beacon had incorrectly construed § 212.91; for this reason Beacon seeks this interpretation. The interpretation sought by Beacon will therefore have an effect upon the conduct and outcome of FEA's audit.

FACTS

Beacon is a refiner subject to the refiner price rules, 10 CFR Part 212, Subpart E. In addition to its refining operations, Beacon engages in the purchase and resale of covered products at various terminal facilities owned by it.

Beacon maintains its refinery in Hanford, California from which it sells the covered products that it refines. In addition to the refinery, Beacon owns and operates six separate terminals, at locations other than Hanford, from which it resells covered products that it has purchased from other refiners located outside of Hanford. Beacon states, in its request, that these terminals serve different customers than those served at Hanford and that the terminals have historically maintained different prices from those in effect at Hanford. In addition, Beacon asserts that none of the products sold at the terminals is purchased from the Hanford refinery.

Since August 1973 when petroleum price controls were imposed by the Cost of Living Council, Beacon has treated these six terminals as a separate operation from its refining operation, and has established prices for terminal sales as if those sales were subject to Subpart F of Part 212, Title 10 CFR, the reseller price rules, and not Subpart E, the refiner price rules.

ISSUE

May Beacon treat all of its terminal facility operations together as a single reseller "entity" under 10 CFR Part 212, Subpart F, instead of as part of the Beacon refiner "firm," subject to Subpart E? If it may treat the terminals as a reseller entity, may Beacon nevertheless include the cost of products purchased by its reseller entity as part of the total cost of products purchased by the Beacon refiner "firm" for purposes of Part 212 and in its refiner cost allocation reports (Form FEO-96 and Form-FEA-P110-M-1)?

INTERPRETATION

Beacon, as a refiner, is subject to the refiner price regulations of 10 CFR Part 212, Subpart E. 10 CFR 212.81 provides that Subpart E applies to each sale of a covered product which is purchased or refined by a refiner except as provided in Subparts F and K. Subpart F, FEA Reseller and Retailer regulations, applies:

to each sale of a covered product (other than the first sale of crude oil) by resellers, reseller-retailers, and retailers, and to each sale of crude oil (other than the first sale) by a refiner. For purposes of this subpart, "reseller" includes any entity of a refiner (other than an entity that operates in Puerto Rico) that is engaged in the business of purchasing and reselling covered products, provided that the entity does not purchase more than 5 percent of such covered products from the refiner including any entities that it directly or indirectly controls and provided further that the entity has consistently and historically exercised the exclusive price authority with respect to sales by the entity. (10 CFR 212.91)

Beacon maintains that its six terminal operations qualify for treatment as a reseller "entity" of Beacon, in accordance with the language quoted from § 212.91, because the terminals are properly considered as an "entity of a refiner [Beacon • • •" that does not purchase from that refiner [Beacon] more than 5 percent of the covered products that it resells, and because the terminal facilities have consistently and historically exercised exclusive price authority with respect to their sales. If, as Beacon maintains, the terminals are a separate "entity," cognizable under the quoted language of § 212.91, then Beacon may treat its terminals as a reseller subject to Subpart F, provided that the specific requirements of § 212.91 are met. If the terminals are not an "entity" as so described, then the terminal operations are subject to Subpart E. Thus, the threshold question is whether the six separate terminal facilities can be recognized as an "entity of a refiner" under § 212.91.

Before an "entity of a refiner" can be identified, the "refiner" must be described. FEA regulations define the term "refiner," in part, as follows:

"Refiner" means a firm • • • which refines covered products • • • and sells those products to resellers, retailers, reseller-retailers or ultimate consumers • • •. (10 CFR 212.31)

In determining what the "firm" is, the FEA may:

Treat as a firm: (1) A parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls. • • • (10 CFR 212.31, definition of "Firm")

FEA has chosen to treat as a refiner "firm" for purposes of Subpart E, the "parent and

[1] Liquid Waste Disposal Co., Interpretation No. 74-11, July 17, 1974; Petro U.S., Inc., Interpretation No. 74-20, November 4, 1974.

the consolidated and unconsolidated entities (if any) which it directly or indirectly controls." (10 CFR 212.82).

Having established the refiner "firm" in Subpart E, FEA regulations provide that an entity of a "refiner" (as so defined in Subpart E) may nevertheless be a "reseller" under Subpart F, § 212.91.

The term "entity" is not separately defined in FEA regulations. That term, however, is used in two contexts relevant to this interpretation. First, it appears in the definition of the "firm," which is described in part, as:

Any association, company, corporation, estate, individual, joint-venture, partnership, or sole proprietorship or any other entity however organized * * * (10 CFR 212.31)

The definition treats corporations, partnerships, sole proprietorships and other business forms as "entities." It also, however, recognizes the existence of separate, unspecified "entities" that may exist irrespective of the manner of organization ("however organized"). Thus a particular type of organization or structure does not per se preclude "entity" status.

In its broad context, therefore, an "entity" can be a business organization structured in a manner different from those business organizations specified in § 212.31. Although the context noted is broad, it is not without limitation. To qualify as an entity, the organization must have the characteristics of being an "entity," i.e., independent of and distinguishable from other operations of the firm. See, e.g., FEA Interpretation 1976-4 (42 FR 7923, February 8, 1977).

To identify necessary characteristics of the entity cognizable under § 212.91, we turn to the second relevant context in which the term "entity" appears: the language of that section. For the purposes of the reseller rule, FEA has determined that an "entity of a refiner" has the requisite characteristics of a reseller where: (1) the entity is engaged in the business of purchase and resale of covered products; (2) it does not purchase more than 5 percent of such covered products from the refiner; and (3) it has consistently and historically exercised exclusive price authority in its sales. If the entity does not meet all of these criteria, its operation cannot be independently recognized under Subpart F. Beacon asserts in its submission that:

The resale operations of Beacon Oil Company are subject to Subpart F since they are entities of a refiner engaged in the business of purchasing and reselling covered products who have consistently and historically exercised the exclusive price authority with respect to their sales, but who do not purchase more than 5 percent of their covered products from the Beacon refinery.

Assuming that Beacon's assertions that its terminal facility operations meet the standards of 10 CFR 212.91 are correct, those operations appear to be an "entity of a refiner" and qualify as a reseller. The burden of proving that reseller status, however, rests with Beacon and this interpretation does not constitute a finding that those operations either meet or fail to meet those standards. Our interpretation states only that if Beacon's terminal operations, taken together, exhibit the necessary characteristics specified in § 212.91, then those operations may be considered a reseller entity of Beacon, subject to Subpart F.

Since Beacon's terminals may, upon a proper showing, be recognized as a "reseller," it is appropriate to consider the second part of Beacon's November 17 request. That request seeks the concurrence of FEA regarding the manner in which Beacon, "[resolved] the apparent conflicts between § 212.93 and (1) the reporting requirements specified in § 212.91 [sic, should be § 210.91] as exercised by FEA in FEO/FEA-96 Forms, and (2) the class of purchaser concept as specified in Rulings 1975-2 and 1974-17."

There are no facts in Beacon's submission which delineates the apparent conflicts that Beacon contends exist in the regulations and rulings it cites. With respect to the "reporting requirements," however, Beacon states that it,

Has reported all sales of covered products on the Form 96, and due to the calculations therein, has applied cost increases equally between the refiner sales and the reseller sales. . . . In performing the calculations pursuant to the instructions [to Form FEO-96], increased costs are rolled-in for both entities.

Beacon claims that this was done pursuant to the instructions to Form FEO-96, which require such data from the parent and all consolidated entities of the refiner be "taken together." Thus, it would appear that although Beacon seeks separate recognition of its terminals under Subpart F, it has, for certain calculations and reports, treated those terminals as an undifferentiated part of the "refiner," subject to Subpart E. This is, indeed, an "apparent inconsistency" between rules and reports, and is addressed in this portion of the interpretation. No other aspect of Beacon's November 17 request is addressed herein, because Beacon's request fails to provide sufficient information upon which any interpretation could be rendered.

The procedure followed by Beacon in preparing "FEO/FEA-96 Forms" is incorrect under FEA regulations, assuming that the terminals are a reseller as discussed above. FEA provides different regulatory structures for refiners and for resellers. The allocation and recovery of increased product costs and increased non-product costs and the determination of other price and cost data are computed differently for refiners than for resellers. It is, therefore, inconsistent to treat an entity as a reseller for some purposes and as a refiner for others. Both Forms FEO-96 and FEA-P110-M-1, its current replacement, are monthly cost allocation reports for "refiners" together with the consolidated and unconsolidated entities of the refiner "firm." Only those consolidated and unconsolidated entities which are part of the refiner "firm" and which are appropriate for inclusion when determining the refiner's product costs and recovery may be used in the refiner's calculations and reported upon those forms. If any entity has been excluded from the refiner "firm" for purposes of FEA regulations, it has been excluded for purposes of reports filed under those regulations. It would be inappropriate to include a reseller in those computations since a reseller is subject to Subpart F for all its calculations and by definition is not a refiner.

Thus, if the terminals are a reseller, its operations are not properly included on Beacon's Forms FEO-96. We, therefore, cannot concur in Beacon's inclusion of any data regarding the resale business of the terminals on its Forms FEO-96.

INTERPRETATION 1977-25

To: Clark Oil & Refining Corp.

Date: July 28, 1977

Rules Interpreted: § 212.85 (c)

Code: GCW-PI—Transportation Costs, Refiner

This is in response to your letter of March 3, 1977, as supplemented by further explanatory data submitted March 10, 1977, requesting on behalf of Clark Oil & Refining Corporation (Clark) an interpretation of the application of 10 CFR 212.85(c)(1) [1] with respect to four factual situations. Upon consideration of all of the information contained in the request, as supplemented, and upon consideration of all the relevant authorities, the Federal Energy Administration ("FEA") has determined that the appropriate interpretation is as follows. The items listed in Question 4 of the March 3, 1977 letter are, in accordance with discussions of March 10, 1977, deemed to be superseded by the items listed in the further supplementary data submitted by Clark on that date.

FACTS

1. Clark Maritime Corp. (CMC) is a wholly-owned subsidiary of Clark, whose marine transportation of crude oil to the United States through CMC is, in accordance with §212.85(a),[2] subject to the accounting procedures specified in § 212.85.

2. Clark has historically accounted for crude oil transportation costs predominantly on the basis of actual costs incurred, and therefore is required by § 212.85(b)(1) [3] to utilize the net cost method specified in § 212.85(c) for determination of its crude oil transportation costs.

3. CMC has term charter agreements for the use of two Very Large Crude Carriers (VLCCs), which were chartered for the primary purpose of transporting purchased foreign crude oil for processing in Clark's domestic refineries. In applying the net cost method, Clark is therefore required to calculate allowed transportation costs in accordance with § 212.85(c)(2)(iii)[4] applicable to charter status vessels.

4. At certain times Clark ships only a small quantity of its own crude oil on the chartered VLCCs, and subcharters some or all of the remaining capacity to other shippers.

5. Clark utilizes transshipment facilities in the Caribbean to offload the VLCCs onto smaller vessels capable of entering U.S. coastal ports, and owns the oil shipped to its own refineries throughout both legs of the trip.

ISSUES

1. Will shipment of a minimum quantity of crude oil owned by Clark for processing in its domestic refinery qualify the costs of a VLCC chartered by Clark for inclusion in "allowed transportation costs" as defined in § 212.85(c)(2)(iii)(A)?

2. Assuming that a chartered VLCC is used primarily in subcharter service to other shippers, would the shipment of a single barrel of crude oil for Clark's own account qualify the costs of the VLCC for inclusion in "allowed transportation costs"?

3. Does the shipment of crude oil by VLCC from a port in the Persian Gulf to a Caribbean port for offloading and transshipment to the United States constitute use of the VLCC in part for shipment of crude oil to the United States?

4. Do the following transshipment expenses qualify as allowed transportation costs under § 212.85(c)(2)(iii)(A): (a) *VLCC leg*—½ percent fee paid in-kind for use of terminal; rental of tanks at terminal; bunkers; cargo, liability, and war risk insurance; port costs, and inspection fees paid on unloading to local authorities; (b) *Transshipment leg*—vessel hire; cargo and liability insurance; inspection fees paid to United States authorities?

INTERPRETATION

1. *Shipment of minimal quantity.* Section 212.85 applies to transportation to the United States of "imported crude oil" (§ 212.85(a)), without any limitation as to threshold quantity. Accordingly, shipments of any amount require that subject firms, historically using accounting methods based predominantly on actual costs, shall calculate allowed transportation costs as provided in § 212.85(c).

2. *Use of Vessel for Subcharter.* In general terms, § 212.85(c)(1) allows the cost of subchartering a vessel to be reflected in the firm's total cost of marine transportation if the subcharter is connected with the use of that vessel for transporting the firm's own crude oil to the United States. It should, however, be noted that shipments of relatively small quantities will be carefully audited by FEA to determine whether such shipments are for the purpose of bona fide crude oil transportation to which subchartering is only incidental, or whether the shipments are designed to facilitate the pass-through of costs (through an increase in costs per ton mile) under § 212.85(c)(1) for shipping not incidental to the importation of a firm's own crude, by nominally incurring "allowed transportation costs" under § 212.85(c)(2). By the latter course, the firm will not be considered to have incurred allowable costs under § 212.85(c)(2), and may possibly raise compliance issues under 10 CFR 210.62(c), which provides that "any practice which constitutes a means to obtain a price higher than is permitted by the regulations in this chapter * * * is a violation of these regulations." In general, FEA will impose certain conditions of reasonableness on subchartering, to avoid abuse through the passthrough of costs not strictly incidental to bona fide crude oil transportation.

Where income is received by Clark from an unaffiliated subcharterer, it must be subtracted from allowed transportation costs, since § 212.85(c)(1) provides that a firm's "net transportation costs" shall be established by subtracting from its allowed costs "any income received by the firm from unaffiliated entities for the use of vessels * * * whose costs are included in the total allowed costs." The expense of the vessel becomes part of the overall pool of net costs for purposes of § 212.85(c)(3),[5] and results in an increase in costs per ton mile distributable as the cost of marine transportation of the crude oil imported by Clark.

For single voyage charters, § 212.85(c)(3) provides that voyage costs incurred under § 212.85(c)(2)(iii)(A), i.e., "payments made by the firm to unaffiliated entities incurred in connection with the use and operation of the vessel plus the cost of any bunker fuel * * *," are not to be allocated on a cost per ton mile basis. Rather, the actual costs are to be reported to FEA in the firm's monthly submission. However, income received from subchartering a portion of the capacity of a single voyage charter is to be treated as "income received by the firm from unaffiliated entities for the use of [the vessel]" under § 212.85(c)(1). The income received will thus serve to decrease the firm's total cost of importing its crude oil.

3. *Shipment in part by VLCC.* Pursuant to § 212.85(c)(2)(i), the calculation of allowed transportation costs applies with regard to "all vessels used in whole or in part by the firm for shipment of its crude oil to the United States." Accordingly, § 212.85 contemplates that vessel costs associated with a particular leg of a trip, which is ultimately completed by other vessels, can be included in allowed transportation costs. Since Clark owns the oil throughout the entire trip, and not merely on the VLCC leg, Clark satisfies the provision in § 212.85(c)(2)(i) that costs (on any leg) will be allowed where a firm ships "its" crude oil to the United States.

4. *Transshipment Costs.*—(a) *VLCC leg.* (1) Under § 212.85(c)(2)(iii)(A), fees paid for use of the terminal and rental of tanks are "payments made by the firm to unaffiliated entities incurred in connection with the use and operation of the vessel," and are therefore allowable costs, since use of the terminal facilities the VLCC leg of the trip. Moreover, such fees are allowable costs under the AFRA method (§ 212.85(d)(1)(iv)), and in the interests of symmetry will be deemed to be payments to unaffiliated entities for the purposes of § 212.85(c)(2)(iii)(A). Fees paid in-kind are allowable based on the f.o.b. purchase price.

(ii) Section 212.85(c)(2)(iii)(A) states specifically that allowed transportation costs include "bunker fuel which is supplied by the firm to the vessel for the purpose of transporting crude oil to the United States, priced at the current market price at the location where supplied." The cost of bunker fuel supplied by Clark to its chartered vessels will be allowed on this basis.

(iii) Cargo, liability, and war risk insurance, vessel hire, port costs, and inspection fees are all considered to be costs "incurred in connection with the use and operation of the vessel," and are therefore allowable under § 212.85(c)(2)(iii)(A).

(b) *Transshipment leg.* Vessel hire, cargo and liability insurance, and inspection fees are allowable on the same basis applicable to the VLCC leg.

INTERPRETATION 1977-26

To: Navajo Refining Co.

Date: July 28, 1977

Rules Interpreted: § 210.62, 212.31, Ruling 1977-1

Code: GCW-PI—Posted Price, def., Normal Business Practices.

This is in response to your November 8, 1976 request for interpretation on behalf of Navajo Refining Company ("Navajo") and Holly Corporation seeking an Interpretation of 10 CFR 212.31 (Definition of "Posted Price"). On May 17, 1977, the Regional Administrator of Federal Energy Administration ("FEA") Region VI issued a Notice of Probable Violation ("NOPV") to Navajo based upon prices paid by Navajo in first sales of domestic crude oil. On April 28, 1977, Navajo supplemented its original request for interpretation with additional documents to be used in conjunction with the information previously submitted in order to provide a more complete basis on which FEA could base its response. On May 27, 1977, Navajo submitted its written response to the NOPV, a copy of which was submitted by Navajo in conjunction with the present request for interpretation.

The Interpretation that follows is based upon all the information available to this office at this time and is intended to address only the issue set forth herein. To the extent that other issues may have arisen, or may arise, in the context of the pending compli-

[1] 10 CFR 212.85(c)(1) provides: "A firm using the Net-Cost Method for determination of its transportation costs shall establish its net transportation cost by (i) determining its allowed transportation costs, as specified in subparagraph (2), and (ii) subtracting therefrom, the sum of: (A) Any income received by the firm from unaffiliated entities for the use of vessels (other than 'equity' status vessels where transportation costs are calculated in accordance with paragraph (c)(2)(ii)(A)) whose costs are included in the total allowed transportation costs, plus (B) the product of that firm's cost per ton mile for the fiscal year, determined according to subparagraph (3) of this paragraph, times the total ton-miles of shipping during the fiscal year which does not produce income from unaffiliated companies, does not involve crude oil imported into the United States, and uses vessels (other than 'equity' status vessels where transportation costs are calculated in accordance with paragraph (c)(2)(ii)(A)) whose costs are included in its allowed transportation costs. Transportation costs not otherwise allocated to particular shipments shall be allocated according to subparagraph (3) of this paragraph. The cost of general overhead may not be included, except that a firm may include the salaries of land-based personnel directly and solely engaged in marine transportation of crude oil from foreign ports to the United States."

[2] 10 CFR 212.85(a) provides, in pertinent part: "This section prescribes the standards which refiners shall use to establish the cost of transportation by sea to the United States of imported crude oil, for the purpose of determining the landed cost of that crude oil. For purposes of this section 'firm' means a parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls. * * *"

[3] 10 CFR 212.85(b)(1) provides, in pertinent part: "For the purpose of this section, a firm shall utilize either the Net-Cost Method specified in paragraph (c) of this section, or the AFRA Method specified in paragraph (d) of this section, depending on that firm's historical accounting procedures, for the determination of its crude-oil transportation costs. A firm shall utilize the net-cost method if those procedures, have been based predominantly on actual costs; it shall utilize the AFRA method if they have been based predominantly on a nominal-cost approach such as AFRA-Worldscale."

[4] 10 CFR 212.85(c)(2)(iii)(A) provides: "Allowed transportation costs for a charter-status vessel shall be the sum of all payments made by the firm to unaffiliated entities incurred in connection with the use and operation of the vessel, plus the cost of any bunker fuel which is supplied by the firm to the vessel for the purpose of transporting crude oil to the United States, priced at the current market price at the location where supplied."

[5] 10 CFR 212.85(c)(3) provides: "Non-monthly charges shall be adjusted to a monthly basis. Except for single voyage charters, or when costs for equity status vessels are calculated as provided in 2(iii)(A), allocation of transportation costs to a shipment of crude oil shall be determined as the product of the number of cargo ton-miles of crude oil transported in that shipment times that firm's 'cost per ton mile' (CTM) estimate for that month. The CTM estimate of a firm for a given month shall be the ratio of:

(i) The firm's best estimate of its net transportation cost for the fiscal year, minus the transportation costs the firm has allocated to shipping for all previous months of the fiscal year to:

(ii) The firm's best estimate of its total shipping quantity in ton-miles for the fiscal year using vessels whose costs are included in that firm's gross transportation costs, minus the number of ton-miles of such shipping for which the firm has allocated costs in all previous months of the fiscal year. Upon determination of its actual net transportation cost for a fiscal year, but not later than 60 days beyond the end of that fiscal year, each firm shall report as an adjustment to its cost the difference between the actual value of its net transportation cost for that fiscal year and the total transportation costs allocated by the firm for the fiscal year. The ratio of the firm's net transportation costs for a fiscal year to the total amount of that firm's shipping in ton-miles for that fiscal year, is that firm's CTM for that fiscal year."

ance action, the resolution of such issues is not governed by this Interpretation.

FACTS

As we understand the facts, Navajo is a small refiner which acquires crude oil primarily in the West Texas/New Mexico field. Beginning on February 1, 1973 and continuing to the present time, Navajo has maintained a "flat" price system whereby crude oil purchased by it is paid for at a single price with no adjustments for differences in gravity. (Prior to February 1 Navajo had used a system of gravity differential adjustments whereby the first sale price was adjusted downward to reflect a penalty for crude oil gravities below 40°.) To illustrate, under a pricing system based upon adjustments for gravity differentials, a specified price (e.g., $12.60 per barrel) is set for crude oil of a specified gravity (often 40° API), and the specified price is adjusted downward by a specified increment (often 2 cents per API degree). Under this example, 40° crude oil would be priced at $12.60 per barrel and 36° crude oil would be priced at $12.52 per barrel (i.e., $12.60−(4)(.02)= $12.52). Under a "flat" price system, however, all crude oil regardless of gravity is subject to the same price.

Although your request might be construed to urge that FEA make the determination that Navajo's use of run tickets and solicitation letters constituted a "posted price" on September 30, 1975, that construction is unnecessary in light of (and would be inconsistent with) Navajo's admission that the Permian Corporation posting of $12.60 per barrel for upper tier sour grade crude oil constituted the highest posted price for that grade crude oil on September 30, 1975. Accordingly, and inasmuch as determinations such as what constituted the highest posted price on September 30, 1975 are more appropriately reached in the first instance in the context of the pending compliance action, we assume for purposes of this request that the Permian Corporation posting of $12.60 per barrel for upper tier sour grade crude oil constituted the "highest posted price" for that grade crude oil on September 30, 1975.

Navajo states that although the Permian Corporation posting of $12.60 per barrel is one which requires adjustments for crude oil gravities below 40° API, Navajo has determined ceiling prices in first sales of upper tier domestic crude oil on the basis of its historic "flat" pricing system with no adjustments for gravity differentials. The result, as we understand the facts, is that in determining ceiling prices for upper tier crude oil, Navajo has used the Permian Corporation price of $12.60 per barrel for 40° crude oil, which it has then applied to all crude oil purchases with no adjustment for gravity.

ISSUE

The issue addressed by this Interpretation is whether § 212.74 requires upper tier ceiling price determinations to be made with regard to gravity price differential adjustments, where the reference highest posted price on September 30, 1975 utilized such gravity price differential adjustments, but where a particular purchaser in the field has traditionally utilized a system of flat prices, without regard to gravity price differential adjustments.

INTERPRETATION

Assuming for purposes of this Interpretation that the Permian Corporation posting of $12.60 per barrel, which required gravity price differential adjustments, was the highest posted price in the field on September 30, 1975, upper tier ceiling prices based upon that posting are required also to reflect those gravity price differential adjustments.

Section 212.74 provides: (b) Upper tier ceiling price determination. The upper tier ceiling price for a particular grade of domestic crude oil in a particular field is (1) the highest posted price on September 30, 1975, for transactions in that grade of crude oil in that field in September 1975, or if there was no posted price in that field for that grade of domestic crude oil, the related price for that grade of crude oil which is most similar in kind and quality in the nearest field for which prices were posted; less (2) $1.32 per barrel.

"Posted Price" is defined at § 212.31 as: A written statement of crude oil prices circulated publicly among sellers and buyers of crude oil in a particular field in accordance with historic practices, and generally known by sellers and buyers within the field.

As FEA stated in Ruling 1977–1 (42 FR 3628, January 19, 1977), The posted price concept was selected [by the Cost of Living Council] because the ready availability of price bulletins (which were understood to be in normal circulation in May 1973) provided a mechanism whereby producers and purchasers alike could be able to determine the ceiling price for any grade crude oil in any particular field. Moreover, the use of price bulletins avoided the enormous administrative complexity of having to establish ceiling prices that would maintain traditional gravity and quality price differentials.

In adopting the two tier price system on February 1, 1976, applicable to all first sales of domestic crude oil, FEA made it clear that with respect to the lower tier ceiling prices, the CLC rule was being continued:

So as to avoid the many complications that might be involved were the FEA to prescribe a ceiling price without regard to historical prices, including the necessity of having to prescribe adjustments to reflect price differentials for location and quality. *Existing price differentials for old crude oil will, therefore be maintained as of May 15, 1973.* (Emphasis added, 41 FR 4931 at 4935, February 3, 1976.)

For the same reason, FEA adopted an upper tier ceiling price rule that is also based upon posted prices (which were understood to be prevalent in September 1975). The reference in Ruling 1977–1 to "having to establish ceiling prices that would maintain traditional gravity and quality price differentials" does not mean, as you suggest, that the purpose of selecting the posted price mechanism was to eliminate traditional gravity price differentials. Rather, the purpose was to maintain them without administratively having to establish a complex system of ceiling prices which incorporated those differentials where necessary.

Accordingly, when CLC adopted the two tier pricing system in August 1973, it established the ceiling price rule based on the posted price concept. This concept was chosen because posted price bulletins were easily available, were in normal circulation in May 1973, and provided the means for producers and purchasers to determine the ceiling price for any grade of crude oil in any field, without disturbing the price differentials that had been previously determined. Postings in effect on September 30, 1975 were selected as references for upper tier ceiling prices for the same reasons.

FEA recognizes that the use of posted prices as references may result in ceiling prices in particular fields which are based upon gravity differentials, or which are based upon a flat price or which are based upon both. For example, where (on September 30, 1975) two purchasers posted prices for the same field, one a flat price of $12.40, and one a price of $12.40 with price adjustments of 2 cents per degree for each gravity below 40° API, the highest posted price for all crude oil in the field, regardless of gravity, would be $12.40. This is because for any gravity crude oil produced and sold from that field, a posted price of $12.40 was applicable on September 30, 1975. However, where (on September 30, 1975) one purchaser posted a flat price of $12.30, and a different purchaser posted a price of $12.40 with price adjustments of 2 cents per degree for each gravity below 40° API, the $12.40 posting (adjusted downward) would govern for crude oil with a gravity of 35° and above; the flat price of $12.30 would govern for crude oil with a gravity below 35° API. The result is more clearly shown in the following chart:

Posting "A"	°API	Posting "B"
$12.40	40	$12.30
12.38	39	12.30
12.36	38	12.30
12.34	37	12.30
12.32	36	12.30
12.30	35	12.30
12.28	34	12.30
12.26	33	12.30

Contrary to Navajo's interpretation, 10 CFR 210.62 does not require a different result. That section, which deals with "normal business practices" requires suppliers to deal with purchasers of an allocated product according to normal business practices. References in the definition of "posted price" to written statements of crude oil prices circulated publicly among sellers and buyers of crude oil in a particular field in accordance with historic practices, refer to the requirement that for a document to qualify as a posted price, it must have been circulated in accordance with historic practices. Section 210.62, on the other hand, cannot be interpreted to suggest that ceiling prices are to be determined in accordance with historic practices, where such practices would result in prices in excess of those determined under §§ 212.73 and 212.74. This view was considered and specifically rejected by FEA in the first stage rulemaking to implement the Energy Policy and Conservation Act. (See 41 FR 4931 at 4935–36, February 3, 1976.)

INTERPRETATION 1977–27

To: J. M. Owsley.

Date: July 28, 1977.

Rules Interpreted: § 211.51, Ruling 1975–8.

Code: GCW—AI—Wholesale Purchaser-Reseller, def.; Commission Agents or Consignees.

This is in response to your letter of July 12, 1976, requesting an interpretation of the Federal Energy Administration's (FEA) Mandatory Petroleum Allocation Regulations (10 CFR Part 211), concerning your status as a wholesale purchaser-reseller.

FACTS

According to your letter, you are a Union Oil Co. of California ("Union") commissioned distributor in Pomona, Calif., under the terms of a form contract entitled "Commercial Consignment Agreement," Form 795–CA (Rev. 8–67), (the "Consignment Agreement"). The Consignment Agreement establishes a relationship whereby the distributor receives a commission for selling and delivering products to customers that he selects and title to the products remains with Union until sold. The distributor is prohibited from mixing Union's products for sale with other products. The agreement authorizes the distributor to make credit sales for his own account or for the account of Union when authorized in writing, but provides that sales for his own account, or credit sales made in violation of the written authorization by Union, are made at the distributor's risk. The distributor is fully responsible for Union products and sales revenues in his possession, and Union retains the right to check inventories and inspect and audit the distributor's records and accounts.

Control of the distributor's independent business of selling and distributing Union's products is retained by the distributor. He is required to furnish and bear all expenses connected with necessary facilities and equipment (including his bulk plant and trucks) involved in the storage, handling, and sale of Union's products, and to make provision for, and assume the responsibilities and expenses connected with, all necessary labor. Thus, all expenses incident to the conduct of the distributor's business of selling Union's products are to be paid for by the distributor.

The Consignment Agreement expressly provides that the distributor shall exercise full direction, control, and responsibility over all employees required for the operation of his business, and the distributor is required by the terms of the Consignment Agreement to provide all appropriate employer's liability, workmen's compensation, and public liability insurance for such employees and to indemnify and hold Union harmless for any claims against Union arising therefrom.

ISSUE

The issue presented for interpretation is whether a Union distributor operating pursuant to this agreement qualifies as a wholesale purchaser-reseller as defined in 10 CFR 211.51.

INTERPRETATION

A wholesale purchaser-reseller is defined in § 211.51 as "any firm which purchases, receives through transfer, or otherwise obtains (as by consignment) an allocated product and resells or otherwise transfers it to other purchasers without substantially changing its form."

Ruling 1975–8 explains that the phrase "as by consignment" is included in the definition of a wholesale purchaser-reseller to make it clear that firms which obtain and resell or otherwise transfer allocated products are not automatically excluded from the definition solely on the ground that they fail to take legal title to the product. This phrase explicitly recognizes the fact that consignment relationships, under which the consignees perform essentially the same functions as jobbers, have long existed in the petroleum industry and that such consignees should be treated under the allocation regulations in the same manner as jobbers. Therefore, those consignees which have a substantial degree of operational independence in the conduct of their business of transfer and sale of a supplier's products (rather than merely providing a distribution service between a supplier and the supplier's customers or functioning like an employee of the supplier) fully qualify as wholesale purchaser-resellers and are subject to the same benefits and obligations of the allocation program which apply to jobbers.

Ruling 1975–8 notes that there are at least three different situations in the petroleum industry in which firms take possession of allocated products without taking title to the product. Only in those situations where a firm receives product through consignment and is engaged in marketing that product to the consignee's customers, acting generally like a jobber, will the firm qualify as a wholesale purchaser-reseller.

Thus, according to the ruling, a consignee which operates in the same manner as an independent jobber, and thereby qualifies as a wholesale purchaser-reseller, will generally have most (but not necessarily all) of the following characteristics: (a) Appropriate facilities and equipment for the conduct of the business of selling and distributing its supplier's products; (b) responsibility, independent of its supplier, for its internal financial management and physical and administrative operations; (c) responsibility to its supplier and others for expenses and liabilities arising from and connected with the business of transfer and sale of its supplier's products; and (d) independent control over the disposition of the allocated product, including the right to enter into and terminate relationships with customers rather than being restricted to distributing product solely to customers designated by the supplier.

According to the terms of the Consignment Agreement, you retain a substantial measure of functional autonomy in distributing and selling Union products. Although you must account fully to Union for all products and sales revenues received, and such products must be sold at prices authorized by Union, you are fully responsible for conduct of your business and are expected to exercise independent judgment and discretion in its operation. While Union requires you to sell the products under Union's brands and trademarks, it bears no expenses under the Consignment Agreement for the costs of facilities, equipment, labor, employee benefits, or necessary insurance, and implicitly recognizes your distributorship as an independent business. Accordingly, it is our opinion that you are a wholesale purchaser-reseller as defined in 10 CFR § 211.51, and as clarified in Ruling 1975–8.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 14130; Amdts. 1-27 and 45-9]

PART 1—DEFINITIONS AND ABBREVIATIONS

PART 45—IDENTIFICATION AND REGISTRATION MARKING

Nationality and Registration Marks on Fixed-Wing Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment allows a reduction in the size of the required nationality and registration marks on certain fixed-wing aircraft and requires that each suffix letter used in the marks be a Roman capital letter. It is intended to provide relief requested by operators of the aircraft and to ensure needed uniformity of marks.

EFFECTIVE DATE: September 14, 1977.

FOR FURTHER INFORMATION CONTACT:

Raymond E. Ramakis, Flight Standards Service, Safety Regulations Division, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202–755–8716.

SUPPLEMENTARY INFORMATION: Interested persons have been afforded an opportunity to participate in the making of this amendment by a notice of proposed rule making (Notice No. 74–36) issued on November 12, 1974, and published in the FEDERAL REGISTER on November 21, 1974 (39 FR 40862). Due consideration has been given to all comments received in response to the notice. Except as otherwise discussed in this amendment, the amendment and the reasons for it are identical to the proposal and the reasons set forth in the notice.

Notice 74–36 was issued partly in response to two petitions. The Experimental Aircraft Association (EAA) petitioned for an amendment of § 45.29(b)(1) to allow display of the required nationality and registration marks no more than three inches high either in a horizontal or vertical manner on both sides of the vertical tail surface of fixed-wing small aircraft and 18-inch marks on the underside of the left wing. The Citizens Task Force on Noise Control of Seattle, Wash., petitioned the FAA to provide for under-wing markings, distinguishable by persons with normal vision for a distance of 1,000 feet.

Over 3,000 public comments were received in response to the notice. Almost all of the commentators on the proposed under-wing marks opposed them. The majority of the commentators were concerned about the cost of the under-wing marks. The FAA estimates the minimum total cost to be over 18 million dollars. This cost could be higher due to inflation, since the proposal would allow five years for compliance with the rule.

A number of opposing commentators were of the opinion that the proposed under-wing marks would not be an effective means of positive ground-to-air identification. After further consideration, the FAA agrees with these commentators. In proposing this requirement, the FAA relied on a number of cases in which violators of the Federal Aviation Regulations have been identified by under-wing marks alone or by those marks together with side or tail marks. However, after review of the comments received and all the information available on under-wing marks, it is clear that these marks are useful for identification purposes only under ideal conditions.

For these reasons, the proposed requirement for 18 inch marks on the lower surface of the left wing of fixed-wing aircraft is withdrawn, and the petition of the Citizens Task Force on Noise Control of Seattle, Wash., is denied.

In response to the EAA petition, Notice 74–36 proposed to allow 3 inch marks on the vertical tail surfaces or the sides of the fuselage on small aircraft which cannot exceed 180 knots when using 70 percent of maximum cruising power, if the proposed under-wing marks were displayed. This proposal was consistent with the current position of the Department of Defense that it no longer considers 12 inch marks as necessary for the air-to-air identification of these aircraft when they penetrate or operate in an Air Defense Identification Zone (ADIZ) or Distant Early Warning Identification Zone (DEWIZ).

Over 1,500 comments were directed to this prosopal. The majority of these commentators favored using 3 inch marks without the under-wing marks. In view of the fact that 12 inch marks on the tail or fuselage have proved only minimally successful in ground-to-air identification, the 3 inch marks provision is being adopted without the proposed under-wing requirement.

However, the FAA has determined that the reference to "maximum cruising power" may be confusing, and that it would be more appropriate to use terms used in type certificate data sheets for most small aircraft. Accordingly, the provision, as adopted, references design cruising speed (V_C), maximum structural cruising speed (V_{NO}), and maximum operating limit speed (V_{MO}). When none of these speeds exceeds 180 knots, 3 inch marks may be used on the aircraft. Three inch marks may be used on an aircraft that does not have a V_C, V_{NO}, or V_{MO}, when the maximum cruising speed has been shown to the satisfaction of the Administrator to not exceed 180 knots.

Finally, Notice 74-36 proposed to insert the words "at each location" in the lead-in portion of § 45.29(b), in order to require that the character marks be the same height, width, thickness, and spacing on both sides of the aircraft. For clarity this proposal has been adopted as a new paragraph (g) in § 45.29.

DRAFTING INFORMATION

The principal authors of this document are J. F. Zahringer, Flight Standards Service, and Joseph Dorsey, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, Parts 1 and 45 of the Federal Aviation Regulations (14 CFR Parts 1 and 45) are amended, effective September 14, 1977, as follows:

1. By amending § 1.2 by inserting the following symbol after "V_{NE}" and before "V_R":

§ 1.2 Abbreviations and symbols.

* * * * *

V_{NO} means maximum structural cruising speed.

* * * * *

2. By amending § 45.23(a) to read as follows:

§ 45.23 Display of marks; general.

(a) Each operator of an aircraft shall display on that aircraft marks consisting of the Roman capital letter "N" (denoting United States registration) followed by the registration number of the aircraft. Each suffix letter used in the marks displayed must also be a Roman capital letter.

* * * * *

3. By amending § 45.25 to read as follows:

§ 45.25 Location of marks on fixed-wing aircraft.

(a) The operator of a fixed-wing aircraft shall display the required marks on either the vertical tail surfaces or the sides of the fuselage, except as provided in § 45.29(f).

(b) The marks required by paragraph (a) of this section shall be displayed as follows:

(1) If displayed on the vertical tail surfaces, horizontally on both surfaces of a single vertical tail or on the outer surfaces of a multivertical tail. However, on aircraft on which marks at least 3 inches high may be displayed in accordance with § 45.29(b)(1), the marks may be displayed vertically on the vertical tail surfaces.

(2) If displayed on the fuselage surfaces, horizontally on both sides of the fuselage between the trailing edge of the wing and the leading edge of the horizontal stabilizer. However, if engine pods or other appurtenances are located in this area and are an integral part of the fuselage side surfaces, the operator may place the marks on those pods or appurtenances.

4. By amending § 45.29(b)(1) and adding a new § 45.29(g) to read as follows:

§ 45.29 Size of marks.

* * * * *

(b) *Height.* The character marks must be of equal height and on—

(1) Fixed-wing aircraft must be at least 12 inches high, except that marks at least 3 inches high may be displayed on small aircraft when none of the following exceeds 180 knots TAS:

(i) V_C;

(ii) V_{MO};

(iii) V_{NO}; and

(iv) If V_C, V_{MO}, or V_{NO} has not been determined for the aircraft, the speed shown to be the maximum cruising speed of the aircraft;

* * * * *

(g) *Uniformity.* The marks required by this part for fixed-wing aircraft must have the same height, width, thickness, and spacing on both sides of the aircraft.

(Sections 307(c), 313(a), and 601, Federal Aviation Act of 1958, as amended (49 U.S.C. §§ 1348(c), 1354(a), 1421); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 5, 1977.

LANGHORNE BOND,
Administrator.

[FR Doc.77-23308 Filed 8-12-77;8:45 am]

[Docket No. 75-LA-86; Amdt. 39-3007]

PART 39—AIRWORTHINESS DIRECTIVES

Canadair Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) applicable to Canadair CL-44D4 and CL-44J airplanes. It requires an inspection for cracks and replacement where necessary of the nose landing gear upper radius rods. The inspection is the result of a reported history of fatigue cracks which if left uncorrected could result in a failure of the radius rod, which may cause a collapse of the nose landing gear.

EFFECTIVE DATE: August 18, 1977. Compliance is in accordance with the schedule set forth in the airworthiness directive.

ADDRESSES: Canadair Service Information Circular No. 151-CL44, Issue 3, of October 26, 1976, may be obtained from the manufacturer at P.O. Box 6087, Montreal, Canada.

FOR FURTHER INFORMATION CONTACT:

L. Lipsius, Airframe Section, AEA-212, Engineering and Manufacturing Branch, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, telephone 212-995-2875.

SUPPLEMENTARY INFORMATION: There have been reports of damaged nose landing gear left hand upper radius rods due to fatigue cracks on aircraft with over 7,000 landings. The rule provides for rework of cracked radius rods within certain limits. A rework to the maximum limit will permit operation for only 3,000 landings or until cracks are detected, whichever occurs first. In view of the effect on air safety, notice or public procedure hereon are impractical and good cause exists for making the rule effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are L. Lipsius, Flight Standards Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

It has been determined that the expected impact of the proposed regulation is so minimal that the proposal does not warrant an evaluation.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

Canadair: Applies to all CL-44D4 and CL-44J airplanes, certificated in all categories, that have not been altered in accordance with Canadair Service Information Circular No. 151-CL44, Issue 3, dated October 26, 1976, or with an FAA-approved equivalent alteration.

Compliance required as indicated.

(a) To ensure the structural integrity and prevent failure of the following nose landing gear upper radius rods, accomplish the inspection in (1).

Item:	*Upper Radius Rod Subassembly*	*Upper Radius Rod*
1.	44-85045 LH assembly employs.	44-85084 LH Rod.
2.	44-85045-1 RH assembly employs.	44-85084-1 RH Rod.
3.	44-85045-1000 LH assembly employs.	44-85084-2 LH Rod.

(1) For parts which have accumulated 1,175 or more landings on the effective date of this airworthiness directive, inspect Items 1, 2, and 3 within the next 75 landings by a dye penetrant, eddy current, or ultrasonic method in accordance with the "Inspection Data" and "Inspection Procedure" sections of Canadair Service Information Circular No. 151-CL44, Issue 3, dated October 26, 1976, or with an FAA-approved equivalent inspection.

(2) For parts which have not accumulated 1175 landings on the effective date of this airworthiness directive, accomplish the inspection in (a)(1) before attaining 1250 landings.

(b) Repeat inspections in (a)(1) at intervals not to exceed:

(1) 60 landings for non-reworked parts Item 1 and 3;

(2) 200 landings for non-reworked part Item 2;

(3) 30 landings for reworked parts Item 1, 2, and 3.

(c) Replace cracked parts with new parts of the same part number or with approved equivalent parts, or rework cracked parts to the limitations specified in "Rework Instruction" in Canadair Service Information Circular No. 151-CL44, Issue 3, dated October 26, 1976, or with an approved equivalent procedure.

(d) Replace parts reworked to the maximum limits, specified in "Rework Instruction" in the above Service Information Circular, that have attained an additional 3,000 landings from the time of such rework, or when cracks are again detected, whichever occurs first, with new pats of the same part number or with approved equivalent parts.

(e) Equivalent inspections/procedures and parts must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region.

(f) Upon submission of substantiating data by an owner or operator through an FAA Maintenance Inspector, the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region, may adjust the inspection times specified in this AD.

Effective date: This amendment is effective August 18, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, 49 U.S.C. 1354(a), 1421, and 1423; Sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, New York, on August 4, 1977.

L. J. CARDINALI,
Acting Director, Eastern Region.

[FR Doc.77-23305 Filed 8-12-77;8:45 am]

[Docket No. 77-NE-11; Amdt. 39-3008]

PART 39—AIRWORTHINESS DIRECTIVES

Pratt and Whitney JT8D-1, -1A, -1B, -7, -7A, -7B, -9, -9A, -11, -15, and -17 Aircraft Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive requiring removal of certain number 4½ bearings, P/N 707007, from Pratt and Whitney Aircraft JT8D turbofan engines. Early failure of these bearings has caused serious engine damage.

DATES: Effective date—August 31, 1977. Compliance date—March 31, 1978.

ADDRESSES: Persons affected by this directive desiring copies of Pratt and Whitney Aircraft Alert Service Bulletin Number 4639, titled "Engine-Bearing, Number 4½—removal from service of", may obtain copies upon request to Pratt and Whitney Aircraft, Division of United Technologies Corporation, 400 Main Street, East Hartford, Connecticut 06108. This document may also be examined at Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT:

Jay J. Pardee, Propulsion Section, ANE-214, Engineering and Manufacturing Branch, Flight Standards Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone 617-273-7337.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rule Making appeared in the FEDERAL REGISTER on June 9, 1977 (42 FR 29513). The NPRM proposed removal of certain Serial Number 4-1/2 bearing, P/N 707007, by March 31, 1978.

This A.D. is being issued because there have been 23 failures of the JT8D Number 4-1/2 bearing, P/N 707007, of which four permitted contact between the concentric low and high speed shafting with resultant machining action and failure of the low turbine shaft. Three of these shaft failures have resulted in turbine blade and vane debris penetration of the engine casing and cowlings. These bearing failures have been limited to bearing Serial Numbers 800 through 999, and 100A through 214A. Since this condition is likely to exist or develop in other JT8D engines incorporating these suspect bearings, the Airworthiness Directive would require removal of Number 4-1/2 bearings, P/N 707007, Serial Numbers 800 through 999, and Serial Numbers 100A through 214A.

The bearing failures have occurred randomly with respect to operating time, and no specific time interval can be specified for bearing removal. The compliance date of March 31, 1978, is therefore based on availability of replacement bearings and the earliest possible operator removal schedule.

Comments were received from the manufacturer and the Air Transport Association concurring with the NPRM. The final rule is therefore identical to the NPRM and requires removal of certain Serial Number 4-1/2 bearings, P/N 707007, by March 31, 1978.

DRAFTING INFORMATION

The principal authors of this document are Jay J. Pardee, Engineering and Manufacturing Branch, and George L. Thompson, Regional Counsel Office.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

PRATT AND WHITNEY AIRCRAFT. Applies to Pratt and Whitney Aircraft JT8D-1, -1A, -1B, -7, -7B, -9, -9A, -11, -15, and -17 turbofan engine models containing Number 4-1/2 bearing, P/N707007, bearing Serial Numbers 800 through 999, and Serial Numbers 100A through 214A.

Compliance required as indicated. To preclude possible low turbine shaft failure, resulting from failure of the Number 4-1/2 bearing, remove from service, prior to March 31, 1978, Number 4-1/2 bearings, P/N 707007, Serial Numbers 800 through 999, and Serial Numbers 100A through 214A. Replace with an FAA approved, serviceable 4-1/2 bearing.

Affected bearings shipped in engines and shipped as spares are identified by serial number in Tables I and II of Pratt and Whitney Aircraft Alert Service Bulletin Number 4639, dated August 12, 1976, or later revision approved by the Chief, Engineering and Manufacturing Branch, New England Region.

Upon request of the operator, an FAA Maintenance Inspector, subject to prior approval of the Chief, Engineering and Manufacturing Branch, FAA, New England Region, may adjust the compliance date specified in this A.D. to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

The manufacturer's service bulletin identified and described in this directive is incorporated herein and made a part hereof pursuant to 5 U.S.C. 522(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Pratt and Whitney Aircraft, Division of United Technologies Corporation, 400 Main Street, East Hartford, Connecticut 06108. These documents may also be examined at Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, and at FAA Headquarters, 800 Independence Avenue, S.W., Washington, D.C.

A historical file on this A.D. which includes the incorporated material in full is maintained by the FAA at its Headquarters in Washington, D.C., and at New England Region.

(Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)) and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular 107.

Issued in Burlington, Massachusetts, on August 4, 1977.

WILLIAM E. CROSBY,
Acting Director,
New England Region.

NOTE.—The incorporation by reference provisions of this document was approved by the Director of the Federal Register on June 16, 1967.

[FR Doc 77-23306 Filed 8-12-77;8:45 am]

[Docket No. 77-EA-43; Amdt. 39-3013]

PART 39—AIRWORTHINESS DIRECTIVES

Lycoming Aircraft Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule (AD) amends AD 75-08-09 applicable to IO-320 type aircraft engines. The amendment will increase the AD coverage from the IO-320-B1A series to all IO-320 type engines. This results from the manufacturer's determination that the oil pump problem addressed by AD 75-08-09 had greater scope.

EFFECTIVE DATE: August 18, 1977.

ADDRESSES: Lycoming Service Bulletins may be acquired from the manufacturer at AVCO Lycoming Division, Williamsport, Pa. 17701.

FOR FURTHER INFORMATION CONTACT:

E. Manzi, Propulsion Section, Engineering and Manufacturing Branch, AEA-214, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430; Tel. 212-995-2894.

SUPPLEMENTARY INFORMATION: Due to subsequent research by the manufacturer, it was determined that additional engines should be covered by AD 75-08-09. The AD was issued originally to preclude failure of the oil pump which resulted from failure of the Woodruff Key in the pump impellers. The AD has been amended twice before to expand its coverage. This rule will include the complete IO-320 series. In view of the effect on air safety, notice and public procedure hereon are impractical and good cause exists for making the rule (AD) effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are E. Manzi, Flight Standards Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

It has been determined that the expected impact of the proposed regulation is so minimal that the proposal does not warrant an evaluation.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by amending AD 75-08-09, as follows:

1. Revise applicability paragraph to read "Applies to O-235, O-290, O-320, IO-320, LIO-320, O-360, IO-360, HO-360, HIO-360, VO-360-A1A, VO-360-A1B, VO-360-B1A, IVO-360-A1A, LIO-360, TIO-360, AIO-360, AEIO-360, O-540, and IO-540 series Lycoming engines listed below and the same series engines overhauled/remanufactured by Lycoming between December 18, 1972, and December 10, 1974, and the same series engines overhauled after December 10, 1972, at facilities other than the manufacturer, in which the provisions of Lycoming Service Instructions No. 1272 have been incorporated".

2. Revise Applicable Models column to read "IO-320 series" instead of "IO-320-B1A".

3. Revise paragraph 2 to read IO-320 instead of IO-320-B1A.

4. Insert the following paragraph before the last paragraph:

Upon submission of substantiating data thru an FAA maintenance inspector, the Chief, Engineering and Manufacturing Branch, Eastern Region, may adjust the compliance time specified in this A.D.

Effective date: This amendment is effective August 18, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, 49 U.S.C. 1354(a), 1421, and 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, N.Y., on August 4, 1977.

L. J. CARDINALI,
Acting Director,
Eastern Region.

[Airworthiness Docket No. 77-SW-28; Amdt. 39-3002]

PART 39—AIRWORTHINESS DIRECTIVES

Edo-Aire Mitchell (EAM) NSD-360 Navigation Systems

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This Airworthiness Directive (AD) is being issued to assure that the NAV flag will appear when a flag signal occurs by requiring installation of a NAV flag adapter in the circuits between the Navigation Situation Display of the NSD-360 Navigation System and any VOR/LOC converter manufactured by companies other than EAM. It has been found that an interface incompatibility results in failure of the NAV flag to appear when the VOR/LOC converter signals for a flag in the display.

DATES: Effective date September 8, 1977. Compliance requires the alteration within the next 50 hours in service after the effective date of this AD.

ADDRESSES: EAM service bulletins, placards, and parts may be acquired from the manufacturer whose address and phone number are listed in the AD.

FOR FURTHER INFORMATION CONTACT:

Tommie S. Plummer, Systems and Equipment Section, ASW-213, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Tex. 76101, Telephone No. 817-624-4911, Extension 518.

SUPPLEMENTARY INFORMATION: The display unit of the NSD-360 Navigation System includes a NAV flag to warn the pilot when the navigation signal is not reliable. This flag circuit is designed for use with VOR/LOC converters having a "gated" To-From capability for the purpose of blocking the To-From display during NAV flag conditions. Operation of the NAV system without a converter having "gated" To-From capability permits unreliable NAV flag operation and therefore could result in a navigational error of unacceptable magnitude. EAM has marketed approximately 1,500 NSD-360 systems that could have been installed without compatible VOR/LOC converters. Some units have been installed based on supplemental type certificate approvals; others have been installed by field approvals. In view of (1) the virtual impossibility of determining which aircraft models have been approved, and (2) the necessity for reliable navigation equipment when being used in the airspace in close proximity to other aircraft, the FAA finds it necessary to issue this AD against NSD-360 Navigation Systems installed in certificated aircraft without specifying the aircraft type. Since this deficiency affects air safety, notice and public procedure hereon are impractical and good cause exists for making this rule effective in less than 30 days.

Since EAM is furnishing the parts and labor to make this modification, the only impact on the aircraft owner is two hours loss of service while the aircraft is being modified, or loss of approved use of the NSD-360 system under IFR conditions until modified. Therefore, the FAA considers the aircraft owner's cost to be minimal to assure reliable navigation.

DRAFTING INFORMATION

The principal authors of this document are Tommie S. Plummer, Flight Standards Division, and Alan G. Sumberg, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, effective September 8, 1977, by adding the following new Airworthiness Directive:

EDO-AIRE MITCHELL. Applies to Model NSD-360 Navigation Systems containing any of the following Navigation Situation Display instruments: 52D136-0020, 52D136-0120, 52D136-0220, 52D136-1020, 52D136-1120, 52D136-1220, 52D137-1020, 52D137-1120, and 52D137-1220, when used with VOR/LOC converters other than the Edo-Aire Mitchell 1C707 and 1C707-1 converters. Compliance with (a) or (c) is required within the next 50 hours in service after the effective date of this AD, unless already accomplished.

(a) Install a placard stating "NSD-360 Not Approved as Primary VOR Display for IFR Navigation Prior to compliance With EAM MB-13."

(b) The placard described in subparagraph (a) is to be installed as close as practical to the affected navigation situation display and remain there until EAM NAV Flag Adapter P/N 1C775 is installed as in (c) below, at which time the placard is to be removed. EAM placard, P/N 13A895 specified by EAM Service Bulletin MB-13, is to be used to comply with (a).

(c) Install EAM NAV Flag Adapter, P/N 1C775, in accordance with installation instruction items 1 through 5, pages 2 and 3 of EAM Service Bulletin MB-13 revised May 3, 1977.

(d) The manufacturer's instructions identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to the Director, Products and Service, Edo-Aire Mitchell, P.O. Box 610, Municipal Airport, Mineral Wells, Tex. 76067, Telephone No. 817-325-2517. These documents may also be examined at the Office of the Regional Counsel, Southwest Region, FAA, 4400 Blue Mound Road, Fort Worth, Tex., and at FAA Headquarters, 800 Independence Avenue SW., Washington, D.C. A historical file on this AD which includes the incorporated material in full is maintained by the FAA at its headquarters in Washington, D.C., and at the Southwest Regional Office in Fort Worth, Tex.

This amendment becomes effective September 8, 1977.

(Sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423) and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Tex., on July 28, 1977.

PAUL J. BAKER,
Acting Director,
Southwest Region.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on June 19, 1967.

[FR Doc.77-23320 Filed 8-12-77;8:45 am]

[Airworthiness Docket No. 77-SW-23; Amdt. 39-3004]

PART 39—AIRWORTHINESS DIRECTIVES

Rockwell International Models 112, 112TC, and 114 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new Airworthiness Directive (AD) applicable to Rockwell International Models 112, 112TC, and 114 airplanes. The AD requires an increase in strength of the front seats and seat belt attachments.

DATES: Effective date: August 29, 1977. Compliance required within 100 hours or one year in service after the effective date of this AD, whichever occurs first.

ADDRESSES: Rockwell International Service Bulletins No. 112-45A dated April 7, 1977, and No. 114-5A dated April 7, 1977, or later approved revision may be obtained from Rockwell International General Aviation Division Service Center, 5001 N. Rockwell Avenue, Bethany, Okla. 73008.

FOR FURTHER INFORMATION CONTACT:

James L. Patras, Airframe Section, Engineering and Manufacturing Branch, ASW-212, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex., telephone number 817-624-4911, extension 516.

SUPPLEMENTARY INFORMATION: A proposal was published in 42 FR 31172 to require increasing the strength of the front seat and seat belt attachments in accordance with Rockwell Service Bulletins Nos. 112-45 and 114-5. Compliance time was required within 100 hours' time in service after the effective date of this AD or at the next annual inspection, whichever occurred first.

In response to the proposal, one letter was received. The commentor stated that the compliance time as written would place a burden of immediate compliance on aircraft under the annual inspection option when the annual inspection fell due immediately subsequent to the effective date of the AD.

The FAA feels this is a valid comment, and the compliance time has been rewritten to require compliance within 100 hours or one year in service after the effective date of the AD, whichever occurs first.

DRAFTING INFORMATION

The principal authors of this document are James L. Patras, Aerospace Engineer, Flight Standards Division, and Joseph A. Kovarik, Regional Counsel, Southwest Region, FAA.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), Section 39.13 of Part 39 of the Federal Aviation Regulations, is amended adding the following new Airworthiness Directive:

ROCKWELL. Applies to Rockwell Model 112, S/N 3 through 499; Model 112TC, S/N 13000 through 13149; and Model 114, S/N 14000 through 14149, certified in all categories.

Compliance required as indicated.

Within 100 hours' time in service or one year in service after the effective date of this AD, whichever occurs first, modify the front seats and belt attachments in accordance with Rockwell Service Bulletins No. 112-45A dated April 7, 1977, and No. 114-5A dated April 7, 1977, or later approved revisions, or in accordance with an equivalent method approved by the Chief, Engineering and Manufacturing Branch, Flight Standards Division Southwest Region, Federal Aviation Administration, Fort Worth, Tex.

This amendment becomes effective August 29, 1977.

(Sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Tex., on July 29, 1977.

PAUL J. BAKER,
Acting Director,
Southwest Region.

[FR Doc.77-23321 Filed 8-12-77;8:45 am]

[Docket No. 77-NW-13-AD; Amdt. 39-3014]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing Model 707-300/400/300B/300C Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: On May 18, 1977, and May 27, 1977, telegraphic Airworthiness Directives (AD's) were issued and made effective immediately to all known U.S. operators of Boeing 707-300 400 300B 300C series airplanes. The AD's required one-time inspections of the exposed portion of the rear spar upper chord of the right and left hand horizontal stabilizer for cracks. A completely severed upper chord contributed, along with other factors, to a condition which resulted in the recent inflight separation of the right hand horizontal stabilizer from a Boeing 707-321C that subsequently crashed. After evaluating the results of the above inspections, crack growth rates have been noted and repetitive inspection time intervals determined which are presented in the AD. The inspection threshold has been lowered from 10,000 landings, which was specified in the previous AD's, to 8,000 landings.

EFFECTIVE DATE: August 15, 1977.

ADDRESSES: Boeing service bulletins specified in this directive may be obtained upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 97124. These documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108.

FOR FURTHER INFORMATION, CONTACT:

Harold N. Wantiez, Engineering and Manufacturing Branch, FAA Northwest region, 9010 East Marginal Way South, Seattle, Washington 98108. Telephone 206-767-2516.

SUPPLEMENTARY INFORMATION: Preliminary information from the accident investigation of a Boeing 707-321C which crashed in Zambia, Africa, revealed that the right hand stabilizer separated from the airplane during final approach. Analysis of the fracture surfaces indicates that the upper rear spar chord of the right hand stabilizer experienced a fatigue failure sometime prior to the fatal flight. The closure rib chord also showed evidence of fatigue. On May 18, 1977, an AD was issued which required visual inspections of the stabilizer rear spar upper chord. This action was later found to be insufficient, since further investigations indicated that cracks may exist in the stabilizer rear spar upper chord which are not detectable by visual means but are de-

tectable by nondestructive testing methods (NDT). A superseding AD was issued on May 27, 1977, requiring one-time NDT inspections of the chord. On July 11, 1977, another AD was issued which required an additional one-time NDT inspection. The telegraphic AD's of May 18 and 27, 1977, were published in the FEDERAL REGISTER as AD 77-14-10, Amendment 39-2969. The inspection threshold was given as 10,000 landings in the previous AD's. After a review of many factors including inspection reports, test results, and probability analysis, it was decided that an 8,000-landing threshold would provide a reasonable starting point for future inspections. This AD supersedes the telegraphic AD's issued on May 18 and May 27, 1977, Amendment 39-2969 and constitutes FEDERAL REGISTER publication of the telegraphic AD issued July 11, 1977.

Since this condition is likely to exist in other 707-300/400/300B/300C airplanes, an AD is now issued requiring repetitive high frequency eddy current or low frequency eddy current inspections of the stabilizer rear spar upper chord from the side of the body outboard to station 92.55, in accordance with Boeing Alert Service Bulletin No. 3313, Revision 2.

This rule was coordinated with The Boeing Company and the operators through the Air Transport Association (ATA) prior to issuance.

DRAFTING INFORMATION

The principal authors of this document are Harold N. Wantiez, Engineering and Manufacturing Branch, FAA Northwest Region, and Jonathan Howe, Regional Counsel, FAA Northwest Region.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure thereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new Airworthiness Directive:

BOEING: Applies to all Boeing 707-300/400/300B/300C series airplanes upon the accumulation of, or with more than, 8,000 landings. Inspect the horizontal stabilizer rear spar upper chord, right and left hand, from the side of the body to horizontal stabilizer station 92.55 for cracks at the time intervals specified in paragraph A, in accordance with the methods of paragraph B. Airplanes with chords found cracked are to be reworked prior to further flight in accordance with one of the methods noted in paragraph C.

A. Within the next 175 landings after the effective date of this AD, unless accomplished within the previous 200 landings prior to the effective date of this AD, and thereafter at intervals not to exceed 375 landings.

B. Inspect in accordance with either the low frequency eddy current inspection procedure or high frequency eddy current inspection procedure as described in Boeing Alert Service Bulletin No. 3313, Revision 2.

C. Rework in accordance with one of the following:

1. If the forward flange of the spar chord is found cracked within the limits as described in Boeing Alert Service Bulletin No. 3313, Revision 2, the chord can remain in service after appropriate rework if reinspected in accordance with paragraph B at intervals not to exceed 375 landings.

2. If the crack penetrates the upper radius from the flange to the chord body, the chord must be replaced prior to further flight.

3. A method approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

D. Report all cracks in the chord body to the Chief, Engineering and Manufacturing Branch, FAA Northwest Region, noting airplane identification, hours time-in-service, number of landings, crack location and length.

E. With permission of the Chief, Engineering and Manufacturing Branch, FAA Northwest Region, the airplane may be flown in accordance with FAR 21.197 to a base where the inspection or repair can be accomplished.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer, may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108.

This amendment becomes effective August 15, 1977, and supersedes the telegraphic AD's issued May 18, May 27, and July 11, 1977, and Amendment 39-2969.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423) and Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Seattle, Washington, on August 5, 1977.

C. B. WALK, Jr.,
Director, Northwest Region.

NOTE.—The incorporation by reference provisions in the document were approved by the Director of the Federal Register on June 19, 1967.

[FR Doc.77-23418 Filed 8-12-77;8:45 am]

[Docket No. 77-NW-10-AD; Amdt. 39-3012]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing Model 707-300/300B/300C/400 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment to Airworthiness Directive (AD) 77-02-01 provides for additional visual inspections in areas of the upper wing skin. It also provides ultrasonic inspections for certain fastener holes and allows an additional time interval before beginning required inspections for passenger airplanes which have had the fastener hole oversizing described in Boeing Service Bulletins Nos. 2626 and 2892.

DATES: Effective date: As prescribed in the body of the AD.

ADDRESSES: Boeing service bulletins specified in this directive may be obtained upon request to Boeing Commercial Airplane Co., P.O. Box 3707, Seattle, Wash. 98124. These documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Wash. 98108.

FOR FURTHER INFORMATION, CONTACT:

Harold N. Wantiez, Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Wash. 98108, Telephone 206-767-2516.

SUPPLEMENTARY INFORMATION: This amendment provides the necessary instructions for visually inspecting the upper wing skin and rear spar chord for cracks which emanate from fastener holes common to the skin and chord. Ultrasonic inspections are also provided for the four fastener holes just outboard of body buttock line 70.5.

Boeing Service Bulletins Nos. 2626 and 2892 provide modifications which include fastener hole oversizing in the skin in the area of the beavertail and the fuel filler cap area. Since the cargo airplanes have experienced more cracks, this amendment provides an increased time interval before inspections are required on passenger airplanes.

This amendment was coordinated with the Boeing Co. and the operators through the Air Transport Association (ATA) prior to issuance.

DRAFTING INFORMATION

The principal authors of this document are Harold N. Wantiez, Engineering and Manufacturing Branch, FAA Northwest Region, and Jonathan Howe, Regional Counsel, FAA Northwest Region.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure thereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, 39.13 of the Federal Aviation Regulations (14 CFR 39), Amendment 39-2812, AD 77-02-01, is amended as follows:

§ 39.13 [Amended]

1. Revise paragraph A to read as follows:

A. Within the next 250 landings, unless accomplished within the last 250 landings and at intervals thereafter not to exceed 500 landings, accomplish the following in accordance with Boeing Service Bulletin No. 3168, Revision 1, or later FAA approved revisions.

(1) X-ray inspect the wing skin under the beavertail for cracks from the rear spar forward through stringer number 12 and the rear spar upper chord and the adjacent wing skin from W.S. 129 to W.S. 197.

(2) Visually inspect the upper wing skin for cracks emanating from the fastener holes common to the rear spar upper chord from W.S. 117 to W.S. 197.

(3) Visually inspect the aft edge of the upper wing skin under the doubler for cracks from BBL 70.5 to W.S. 117.

(4) Ultrasonic inspect the upper wing skin for cracks at the four fastener holes common to the rear spar upper chord just outboard of BBL 70.5.

(5) Wing skins and rear spar chords found cracked are to be repaired prior to further flight in accordance with Boeing Service Bulletin No. 2427 or Boeing Service Bulletin No. 2607, or in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region. Inspections are to continue until terminating action per paragraph F has been accomplished.

2. Revise paragraph C to read as follows:

C. If rear spar and/or adjacent wing skin repairs or modifications interfere with any of the inspections of paragraph A or B of this AD, inspect for cracks in accordance with (1) and (2) below or in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

(1) At the intervals specified in paragraph A or B of this AD (as appropriate to the area where repairs interfere with the required inspections):

(a) Eddy current inspect the wing skin for cracks in the area adjacent to the repairs; or

(b) If internal steel doublers are installed on the horizontal leg of the rear spar upper chord, conduct a close visual inspection of the vertical leg of the rear spar upper chord for cracks emanating from the horizontal leg. When doublers on the rear spar vertical leg prohibit a close visual inspection, inspect the exposed lower edge of the vertical leg of the rear spar upper chord for new cracks.

(2) At intervals not to exceed 4,800 landings, visually inspect the exposed wing skin and exposed upper rear spar chord from inside and outside the wing.

3. At the end of paragraph D add the following: "* * * for 707-300C airplanes and 10,000 landings after oversizing for 707 -300, -400, -300B airplanes."

4. At the end of paragraph E add the following: "* * * for 707-300C airplanes and 6,000 landings after oversizing for 707-300, -400, -300B airplanes."

5. Revise the paragraph regarding AD supersedure to read: "This supersedes AD 68-07-03 (Amendment 39-571), AD 68-16-03 (Amendment 39-629), and paragraph (a) of AD 64-11-01 (Amendment 39-763)"

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer, may obtain copies upon request to Boeing Commercial Airplane Co., P.O. Box 3707, Seattle, Wash. 98124. These documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Wash. 98108.

This amendment becomes effective August 15, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423) and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring the preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Seattle, Wash., on August 5, 1977.

C. B. WALK, Jr.,
Director, Northwest Region.

NOTE.—The incorporation by reference provisions in the document were approved by the Director of the FEDERAL REGISTER on June 19, 1967.

[Airspace Docket No. 77-EA-36]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone and Transition Area, Albany, N.Y.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the Albany, N.Y., control zone and transition area, to take into consideration the revision to the VOR instrument approach procedure for Albany County Airport.

EFFECTIVE DATE: 0901 G.m.t. October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430, Telephone 212-995-3391.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subparts F and G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the Albany, N.Y., control zone and transition area. The NPRM was published in the FEDERAL REGISTER on June 23, 1977 (42 FR 31805). The proposal resulted from a change to the instrument approach procedure.

Interested parties were given 20 days in which to submit comments. No objections to the proposal had been received.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart F and G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 GMT October 6, 1977, as published.

(Sections 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); sec. 6(c) of Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, N.Y., on July 27, 1977.

LOUIS J. CARDINALI,
Acting Director, Eastern Region.

1. Amend § 71.171 of Part 71 of the Federal Aviation Regulations by deleting the present description of the Albany, N.Y., control zone and by inserting the following in lieu thereof:

"Within a 5-mile radius of the center 42°44'43" N., 73°48'05" W., of Albany County Airport, Albany, N.Y.; within 3 miles each side of the Albany VORTAC 354° radial, extending from the 5-mile radius zone to 8.5 miles north of the VORTAC; within 4 miles each side of the Albany VORTAC 082° radial, extending from the 5-mile radius zone to 15 miles east of the VORTAC; within 2 miles each side of the extended centerline of Albany County Airport Runway 10, extending from the 5-mile radius zone to 5 miles west of the approach end of Runway 10; within 3 miles east of the VORTAC; within 2 miles radial, extending from the 5-mile radius zone to 8.5 miles south of the VORTAC."

2. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by amending the description of the Albany, N.Y., 700 foot floor transition area as follows:

Delete "Albany VORTAC 072° radial" and insert, "Albany VORTAC 082° radial" in lieu thereof.

[FR Doc.77-23316 Filed 8-12-77;8:45 am]

[Airspace Docket No. 77-EA-40]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transiton Area: Indiana, Pennsylvania

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the Indiana, Pa., Transition Area, by chang-

ing the direction of the 091 RBN bearing extension by one degree and widening the extension by approximately 1 mile on each side of the bearing. It also increases the length by 1½ miles. These adjustments result from a change in a beacon instrument approach procedure for Indiana County-Jimmy Stewart Field, Indiana, Pa.

EFFECTIVE DATE: 0901 GMT October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430, telephone 212-995-3391.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the Indiana, Pa., Transition Area. The NPRM was published in the FEDERAL REGISTER on June 23, 1977 (42 FR 31808)

Interested parties were given 30 days in which to submit comments. No objections to the proposal had been received.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 GMT October 6, 1977, as published.

(Sections 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, N.Y., on July 28, 1977.

L. J. CARDINALI,
Acting Director, Eastern Region.

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by amending the description of the Indiana, Pa transition area by deleting, "and within 3.5 miles each side of the 091° bearing from the Indiana RBN (lat. 40°37'54" N., long. 79°03'51" W.) extending from the 7-mile radius area to 9.5 miles east of the RBN.", and by inserting the following in lieu thereof, "and within 4.5 miles each side of the 090° bearing from the Indiana RBN (lat. 40°37'54" N., long. 79°03'51" W.) extending from the 7-mile radius area to 11 miles east of the RBN."

[FR Doc.77-23317 Filed 8-12-77;8:45 am]

[Airspace Docket No. 77-EA-66]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area: Corry, Pennsylvania

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the Corry, Pa., Transition Area, by changing the radial reference of the Tidioute, Pa., VORTAC by 2°, from 319° to 321°. After Docket 76-EA-98 was issued, the new VOR RWY 32 approach procedure was published showing the radial reference as 321° instead of 319° as found in the rule. Thus, the reference must be corrected to conform to the published approach.

EFFECTIVE DATE: 0901 GMT August 18, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430, telephone: 212-995-3391.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR 71) is to alter the Corry, Pa., Transition Area. The rule resulted from a change in the instrument approach procedure.

The change in radial reference of 2° is so minimal as to impose no additional burden on any person and thus notice and public procedure hereon are unnecessary.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 GMT August 18, 1977, as follows:

1. Amend the Corry, Pa., Transition Area so as to delete the reference to the 319° radial and insert in lieu thereof "321° radial".

(Section 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107

Issued in Jamaica, N.Y., on July 27, 1977.

LOUIS J. CARDINALI,
Acting Director, Eastern Region.

[Docket No. 77-SO-4]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Wilson, North Carolina, Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule designates a 700-foot transition area in the vicinity of Wilson, N.C. This action provides necessary controlled airspace for accommodation of IFR operations at the Wilson Municipal Airport.

EFFECTIVE DATE: 0901 GMT, August 11, 1977.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

C. Herman Thompson, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320, telephone 404-763-7647.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rulemaking was published in the FEDERAL REGISTER on February 17, 1977 (42 FR 9683) which proposed the designation of the Wilson, N.C., 700-foot transition area. The transition area is required to provide controlled airspace for aircraft executing a new NDB approach procedure to Runway at the Wilson Municipal Airport.

The Department of the Air Force objected to the proposed designation as it would establish transition area airspace within the perimeter of one of the most heavily used VFR low altitude training routes (TR-48) in the southeast.

The FAA does not consider the objection valid, as aircraft operating VFR on TR-48 must have a ceiling of at least 3,000 feet and visibility of five miles. With these weather minimum, both military and civil aircraft in the vicinity of Wilson will be operating on a "see-and-be-seen" basis, in accordance with Federal Aviation Regulations.

DRAFTING INFORMATION

The principal authors of this document are C. Herman Thompson, Airspace and Procedures Branch, Air Traffic Division, and Richard L. Faber, Office of Regional Counsel, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320.

ADOPTION OF AMENDMENT

Accordingly, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR 71) is amended, effective 0901 GMT, August 11, 1977, by adding the following:

WILSON, NORTH CAROLINA, 700-FOOT TRANSITION AREA

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Wilson Municipal Airport (Lat. 35°-46'00" N., Long. 77°58'00" W.); within 3 miles each side of the 223° bearing from the Wilson RBN, extending from the 6.5-mile radius area to 8.5 miles southwest of the RBN; excluding that portion that coincides with the Rocky Mount, N.C., transition area.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in East Point, Ga., on August 2, 1977.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.77-23319 Filed 8-12-77;8:45 am]

[Airspace Docket No. 77-SO-15]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Extension of Federal Airway

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment extends V-441 eastward from St. Petersburg, Fla., via Lakeland, Fla., and an intersection to Melbourne, Fla., reducing the airway distance between Lakeland and Melbourne.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION:

HISTORY

On June 23, 1977, the FAA published for comment a proposal to extend V-441 eastward from St. Petersburg, Fla., to Melbourne, Fla. (42 FR 31806). Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. The only comment received expressed no objection.

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations (FARs) extends V-441 to begin at Melbourne, Fla., and go via the INT of the Melbourne 269°T (269°M) and the Lakeland, Fla., 080°T (079°M) radials; Lakeland; to St. Petersburg, Fla., thence as it is presently described.

DRAFTING INFORMATION

The principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 307) is amended, effective 0901 GMT, October 6, 1977, as follows: In V-441 "From St. Petersburg, Fla.," is deleted and "From Melbourne, Fla., via INT Melbourne 269° and Lakeland, Fla., 080° radials; Lakeland; St. Petersburg, Fla.;" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 4, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc.77-23322 Filed 8-12-77;8:45 am]

[Airspace Docket No. 77-EA-23]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Federal Airway

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment realigns VOR Federal Airway V-37 between Morgantown, W. Va., and Ellwood City, Pa. This action is necessary to reduce aircraft radio frequency changes and provide more efficient use of the navigable airspace in and around the Greater Pittsburgh Airport Area.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. David F. Solomon, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202-426-8530.

SUPPLEMENTARY INFORMATION:

HISTORY

On June 16, 1977, the FAA proposed to amend Subpart C of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to realign VOR Federal Airway V-37 between Morgantown, W. Va., and Ellwood City, Pa., (42 30638). Interested persons were invited to participate in this rule making proceeding by submitting written comments on the proposal to the FAA. No objection was registered in the one comment received. This amendment is that proposed in the notice. § 71.123 was republished in the FEDERAL REGISTER on January 3, 1977 (42 FR 307).

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations (FARs) realigns V-37 between Morgantown, W. Va., and Ellwood City, Pa. The FAA acknowledges that the realignment will add one mile to the overall distance between Morgantown and Ellwood City. However, the FAA believes that the benefits to be gained by reducing the number of radio changes required from three to two and the improved air traffic handling capabilities will offset the extra mile of flying.

DRAFTING INFORMATION

The principal authors of this document are David F. Solomon, Air Traffic Service, and Jack P. Zimmerman, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is republished (42 FR 307) is amended, effective 0901 GMT, October 6, 1977, as follows: In V-37 "INT Morgantown 336 and Ellwood City, Pa., 177° radials" is deleted and "INT Morgantown 331° and Ellwood City, Pa., 185° radials" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 4, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc 77-23323 Filed 8-12-77;8 45 am]

[Airspace Docket No. 76-WE-31]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Federal Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment realigns V-12, V-25, V-27, V-186 and V-485 airways in the southwestern California area. This action will improve traffic

handling capabilities, reduce airway distances between air navigation aids and promote safety by helping to segregate en route and terminal traffic.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202-426-3715.

SUPPLEMENTARY INFORMATION:

HISTORY

On June 16, 1977, the FAA published for comment a proposal to realign several airways in the southwestern California area (42 FR 30639). Interested persons were invited to participate in the rule making proceeding by submitting written comments on the proposal to the FAA. The two comments received expressed no objections. Subsequent to publication of the notice of proposed rule making, it has been determined that the proposed standard west alternate to V-25 between Santa Barbara, Calif., and Paso Robles, Calif., would not improve the traffic handling capabilities as expected, and is therefore omitted from this amendment.

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations (FARs) realigns VOR Federal Airways V-12, V-25, V-27, V-186 and V-485 segments as follows:

1. V-12 from Santa Barbara, Calif., direct to Palmdale, Calif., and V-12 S from Santa Barbara to Palmdale via Fillmore, Calif.

2. V-25 from Ventura, Calif., direct to Santa Barbara, Calif.

3. V-27 from Ventura, Calif., via INT Ventura 326°T(311°M) and Fillmore, Calif., 265°T(250°M) radials; INT Fillmore 265°T(250°M) and Gaviota, Calif., 143°T(127°M) radials; to Gaviota.

4. V-186 from Fillmore, Calif., via INT Fillmore 265°T(250°M) and Santa Barbara, Calif., 123°T(107°M) radials to Santa Barbara.

5. V-485 from Ventura, Calif., direct to Fellows, Calif.

DRAFTING INFORMATION

The principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 307) is amended, effective 0901 GMT, October 6, 1977, as follows:

1. In V-12, all before "Hector, Calif.;" is deleted and "From Gaviota, Calif., via Santa Barbara, Calif.; Palmdale, Calif., including a south alternate via Fillmore, Calif.; 38 miles, 6 miles wide," is substituted therefor.

2. In V-25, all between "6 miles wide, Ventura;" and "Paso Robles, Calif.;" is deleted and "Santa Barbara, Calif.;" is substituted therefor.

3. In V-27, "6 miles wide, INT Ventura 331° and Fillmore, Calif., 268° radials; INT Fillmore 268°" is deleted and "INT Ventura 326° and Fillmore, Calif., 265° radials; INT Fillmore 265°" is substituted therefor.

4. In V-186, "From Fillmore, Calif.," is deleted and "From Santa Barbara, Calif., via INT Santa Barbara 123° and Fillmore, Calif., 265° radials; Fillmore;" is substituted therefor.

5. In V-485, all before "Priest, Calif.;" is deleted and "From Ventura, Calif., via Fellows, Calif.;" is substituted therefor.

(Secs. 307(a), 313(a), and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a) and 1510); Executive Order 10854 (24 FR 9565); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 4, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc.77-23325 Filed 8-12-77;8:45 am]

[Airspace Docket No. 76-WA-13]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

PART 73—SPECIAL USE AIRSPACE

Alteration of Federal Airway and Restricted Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: These amendments realign a segment of VOR Federal Airway identified as V-2 and V-21 Hawaii and redefine Restricted Area R-3104 Island of Kahoolawe, Hawaii, to provide sufficient distance between V-2/21 Hawaii and R-3104. These actions ameliorate the flow of air traffic by allowing simultaneous use of both areas.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Huff, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202-426-3715.

SUPPLEMENTARY INFORMATION:

HISTORY

On October 7, 1976, in the FEDERAL REGISTER (41 CFR 44193), the FAA proposed to amend Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) to realign a portion of V-2 Hawaii and V-21 Hawaii and to reduce Restricted Area R-3104, Island of Kahoolawe, Hawaii. The present distance of 2.2 NM between the centerline of V-2/21 and the northern boundary of Restricted Area R-3104 is cited in a petition for rule making filed by the Honorable Elmer F. Cravalho, Mayor of Maui, Hawaii, for revocation of Restricted Area R-3104 Kahoolawe, Hawaii, as one of the reasons for his petition. The FAA has reviewed all matters presented in the petition and supplementary memorandum and, with one exception, does not agree with the analysis presented. The FAA agrees with the petitioner regarding the need for a greater distance between the two areas (V-2/21 and R-3104). Therefore, these actions, the realignment of V-2/21 and the reduction of Restricted Area R-3104, are a partial granting of Mayor Elmer F. Cravalho's petition. Interested persons were invited to participate in this rule making proceeding by submitting written comments on the proposal to the FAA. On November 26, 1976, in FEDERAL REGISTER (41 FR 52064) the FAA extended the comment period until December 15, 1976, in order to allow commenters additional time to submit comments. Numerous comments were received and due consideration has been given to all matters presented. Except for editorial changes, and except as specifically discussed below, these amendments are those proposed in the notice. Sections 71.127 and 73.31 were republished in the FEDERAL REGISTER on January 3, 1977 (42 FR 343 and 674, respectively).

THE RULE

These amendments to Parts 71 and 73 of the Federal Aviation Regulations (FARs): (1) Align V-2 Hawaii and V-21 Hawaii via the Lanai, Hawaii, 106°T (095°M) radial; (2) establish the segment of V-2/21 Hawaii between the 22 NM fix on the south side of the Lanai, Hawaii, 106°T (095°M) radial and the 28 NM fix to an authorized width of 3 nautical miles; (3) define the northern boundary of Restricted Area R-3104A/B/C, Kahoolawe, Hawaii, via the Kahoolawe shoreline.

DISCUSSION OF COMMENTS

Of the nine written comments received by the FAA on the October 7 proposal, four commenters objected to the proposed rule. Three of the four objectors based their objection to the realignment of V-2 and V-21 on the higher minimum en route altitudes. The FAA agrees that any altitudes higher than those presently authorized for V-2 and V-21, due to terrain shielding of VOR signal as a result of the realignment of V-2/21 from the present Lanai VOR 096° to the 095° radial, would be overly restrictive on operational requirements. The FAA's review of cumulative flight check data gathered from eight flight checks in the past three years indicated that: (1) the alignment remains within 0.3°, (2) there is no scalloping or roughness in the radial, and (3) the overall station alignment runs from 0° to −1.0°, far above the national average. Therefore, the present altitudes being used for the present alignment of V-21 along the Lanai VOR 096° radial will be retained for the realignment of V-21 via the Lanai VOR 095° radial.

The Department of the Navy contended that the northern boundary of R-3104 need not be relocated and that a greater distance between V-2/21 and R-3104 could be provided by realigning V-2/21 via the Lanai VOR 092° radial to the Upolu Point VOR 295° radial thence via the Upolu Point 295° radial to Lanai VOR 096°; for V-21 thence along the presently established V-21 airway; for V-2 thence along the Upolu Point 295° radial to Upolu Point VOR. The FAA agrees that the Navy's proposal would provide the required distance for simultaneous use of both areas. However, the FAA does not find this option (a dogleg in the airway) as desirable as the actions being taken.

There was an objection to the proposed continued application of an airway width of 3 NM on one or both sides of the centerline. A primary concern was that safety would be compromised. However, the area in question is within 27 miles of the Lanai VOR, and the airway has been satisfactorily used since 1953, first with 2 miles separation between V-2/21 and R-3104. In addition, an airway with 3 NM on one or both sides of the centerline conforms to the present criteria for establishing airways.

One commenter stated that due consideration is only being given to the military users of R-3104 and W-324. The FAA does not agree. These actions of reducing the size of Restricted Area R-3104, realigning and increasing the width of V-2/V-21, Hawaii, which pass along the northern boundary of R-3104 will allow simultaneous use of both areas when R-3104 is activated. Therefore, these actions will fulfill the requirement of Section 306 of the Federal Aviation Act of 1958 (49 U.S.C. § 1347) to "give full consideration to the requirements of national defense, and of commercial and general aviation, and to the public right of freedom of transit through the navigable airspace."

Mayor Elmer F. Cravalho stated that "the action by FAA in its proposed rule making is perceived as an attempt to moot certain issues contained in the County of Maui's petition while circumventing an appropriate judicial process. Thus, the proposed rule is inappropriate unless viewed as part of the overall issues in the County of Maui's petition and unless treated by FAA in this perspective. Consequently, the proposed rule should not be enacted unless processed in said manner." The FAA agrees with the petitioner that these actions are closely related to the issues contained in the petition which are under the authority conferred to FAA by the Federal Aviation Act of 1958. Therefore, these actions are being viewed as part of the overall issues in the County of Maui's petition and are a partial grant of Mayor Elmer F. Cravalho's petition. In addition, Mayor Cravalho objected to the proposed actions based on the following: (1) The proposed modification of R-3104 is unclear in its geographic identification (via the Kahoolawe shoreline) and does not permit an interested party to comment as to whether the spacing of V-2/V-21 (2.1 NM) from R-3104 will be rectified by the proposed actions; (2) the proposed amendments do not appear to provide the necessary 3 NM spacing as required by law; (3) the minimum en route altitude would be increased by the proposed actions; (4) the notice of proposed rule making does not include the effects of the airway realignment on the airway intersection and reporting points eastward; (5) the proposed actions are inconsistent with the interim actions taken; (6) there is no indication in the notice that there is any contemplated change in Navy bombing or firing runs or patterns, or any indication that the FAA will direct any action to reduce the size of the restricted area; (7) the NPRM does indicate environmental consideration of the proposed actions.

The FAA does not agree with Items 1-4. The closest point between the Lanai 106°T radial and the Kahoolawe shoreline is greater than 3 NM. The minimum en route altitude has been discussed above. No regulatory action concerning reporting points is anticipated as a result of these actions; however, some minor changes tto airway intersections will occur as a result of moving V-2/21 one degree north. The FAA agrees that the interim action taken by FAA (realigning V-2/21 four degrees north) is not the same as the proposed actions because of the considerations of the issues presented in the commenter's petition. Because these are airspace actions and not proposed operational changes, the airspace actions do not address the operational changes such as bombing/firing run patterns. However, this notice of proposed rule making did in fact propose to reduce the size of R-3104 by proposing to redefine the northern boundary of R-3104 by the Kahoolawe shoreline. Generally, notices of proposed rule making do not indicate environmental considerations in their proposed action. However, the environmental impact of these actions have been assessed in accordance with FAA Order 1050.1B.

DRAFTING INFORMATION

The principal authors of this document are Mr. Richard Huff, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) as republished (42 FR 307 and 674) are amended, effective October 6, 1977, as follows:

PART 71

1. By amending § 71.127 (42 FR 343) to alter the following VOR Federal Airway: In V-2 Hawaii "Lanai 107°" is deleted and "Lanai 106 " is substituted therefor. In V-21 Hawaii "Lanai 107°" is deleted and "Lanai 106 " is substituted therefor After "FIR Oceanic CTA." "The airspace within R-3104 is excluded." is added.

PART 73

2. By amending § 73.31 (42 FR 674) to alter the following restricted areas: In R-3104A, R-3104B and R-3104C Island of Kahoolawe, Hawaii "20 37'00" N., Longitude 156 35'15" W.; is deleted and "20 36'20" N., Longitude 156 36'30" W.," is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348 a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., August 4, 1977.

EDWARD J. MALO,
Acting Chief, Airspace and Air Traffic Rules Division

[FR Doc.77-23324 Filed 8-12-77;8:45 am]

[Airspace Docket No. 77-WE-14]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area: Orland, Calif.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment designates a transition area at Orland, California, to provide controlled airspace for aircraft executing an instrument approach procedure established for Haigh Field, Orland, Calif.

EFFECTIVE DATE: October 6, 1977.

ADDRESSES: Copies of this final rule may be obtained from: Federal Aviation Administration, Air Traffic Division, Chief, Airspace and Procedures Branch, 15000 Aviation Boulevard, Lawndale, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Thomas W. Binczak, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, Calif. 90261; Telephone 213-536-6182.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to desig-

nate a transition area at Orland, California.

On June 27, 1977, a Notice of Proposed Rulemaking (NPRM) was published in the FEDERAL REGISTER (42 FR 32554) stating that the Federal Aviation Administration proposed to designate a transition area at Orland, Calif., to provide controlled airspace for aircraft executing an instrument approach procedure established for Haigh Field.

Interested persons were afforded an opportunity to participate in the rulemaking through submission of comments. All comments received were favorable.

DRAFTING INFORMATION

The principal authors of this document are Thomas W. Binczak, Air Traffic Division, and DeWitte T. Lawson, Jr., Esquire, Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., October 6, 1977.

§ 71.181 [Amended]

1. By amending § 71.181 (42 FR 440) of Part 71 of the Federal Aviation Regulations by designating a new Transition Area as follows:

ORLAND, CALIF.

That airspace extending upward from 700 feet above the surface within a three mile radius of Haigh Field (latitude 39°43'16" N., longitude 122°08'50" W.); and within three miles each side of the Chico VOR 253° radial, extending from the three mile radius area to twelve miles west of the VOR.

NOTE.—This amendment is issued under the authority of sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, Calif., on August 2, 1977.

FRANK HAPPY,
Acting Deputy Director,
Western Region.

[FR Doc.77-23419 Filed 8-12-77;8:45 am]

[Airspace Docket No. 77-SW-33]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Federal Airway

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The Hobby, Tex., VORTAC will be relocated from one side of the Hobby airport property to the other on October 6, 1977, to permit further airport development. V-15, V-20, V-76 airways and J-37, J-138, J-177 jet routes will automatically move slightly without redesignation in Parts 71 and 75. The description of the Humble waypoint will be changed without changing Part 75 or its geographical location. Alteration of the description of V-198 east of Hobby by one degree is required, however, to retain the present position of the Smith, Tex., intersection.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the description of V-198, east of Hobby, Tex., one degree from 090° to 091°. This will permit retention of the Smith, Tex., intersection at its present position. Because this action realigns V-198 only one degree, it is considered minor in nature and one on which the public would have no particular desire to comment. Therefore, notice and public procedure thereon are unnecessary.

DRAFTING INFORMATION

The principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, §71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 307) is amended, effective 0901 G.m.t. October 6, 1977, as follows:

In V-198 "Hobby, Tex.; INT Hobby 090°" is deleted and "Hobby, Tex.; INT Hobby 091°" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 8, 1977.

EDWARD J. MALO,
Acting Chief, Airspace and Air
Traffic Rules Division.

[FR Doc.77-23434 Filed 8-12-77;8:45 am]

[Airspace Docket No. 77-WA-11]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Terminal Control Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the Atlanta, Ga., Terminal Control Area (TCA) by adding TCA airspace where required to accommodate revised procedures, and by deleting TCA airspace that is no longer required. This amendment also makes permanent the temporary increase of the Atlanta TCA ceiling from 8,000 feet MSL to 12,500 feet MSL within a 35 mile radius of Atlanta. This amendment provides the appropriate Atlanta TCA configuration to handle current and anticipated operational requirements.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Wray McClung, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone: 202-426-8530.

SUPPLEMENTARY INFORMATION:

HISTORY

On June 20, 1977, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Atlanta TCA (42 FR 31173). Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. Four comments were received on the NPRM. The Air Transport Association of America and the Aircraft Owners and Pilots Association concurred with the proposal. The United States Air Force (USAF) and the United States Navy (USN) stated that they objected to the proposal; however, a review of their comments revealed that their objections actually were of a procedural nature and not directly related to the existing or proposed configuration of the Atlanta TCA. The FAA will continue to work with the USAF and USN to solve these procedural problems. This amendment is the same as was proposed in the notice. Section 71.401 was republished in the FEDERAL REGISTER on January 3, 1977 (42 FR 642), and the Atlanta TCA was amended (41 FR 56789, 42 FR 14861).

THE RULE

This amendment alters the Atlanta TCA by adding TCA airspace where required for revised procedures and deleting TCA airspace no longer required. It also makes permanent the temporary extension of the Atlanta TCA ceiling from 8,000 feet MSL to 12,500 feet MSL within a 35 mile radius of Atlanta. The original Atlanta TCA became operational on June 25, 1970, and has been revised several times to accommodate revised procedures and runway configurations. Profile descent procedures were instituted this year in Atlanta to minimize the amount of time high performance aircraft (turbojet aircraft and turboprop aircraft weighing more than 12,500 pounds) operate in and around terminal areas. The requirements for profile descent procedures are incorporated in the reconfiguration of the Atlanta TCA to assure that the flight paths of high performance aircraft operate at or above the designated floors while within the lateral limits of the TCA.

On April 24, 1975, a temporary test expansion of the Atlanta TCA became effective which added a ring within a 35-mile radius from 8,000 feet MSL to 12,500 feet MSL to permit containment of jet aircraft within protected airspace during transition into and out of Atlanta. The test expansion has provided additional safety for terminal jet operations without unacceptable hindrance to aircraft wishing to bypass Atlanta, and the test expansion is made permanent. Subpart K of Part 71 was republished in the FEDERAL REGISTER on January 3, 1977 (42 FR 642), and the Atlanta TCA was amended (41 FR 56789, 42 FR 14861).

DRAFTING INFORMATION

The principal authors of this document are Mr. Wray McClung, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart K of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 642) is amended, effective 0901 GMT, October 6, 1977, as follows:

In § 71.401, the Atlanta, Ga., Terminal Control Area is rewritten as follows:

Primary Airport, Atlanta Airport (Lat. 33°38'31" N., Long. 84°25'34" W.)

Area A. That airspace extending upward from the surface to and including 12,500 feet MSL, bounded on the east and west by a seven-mile radius of the Atlanta VORTAC, on the south by a line four miles south of and parallel to the Runway 09R 27L localizer courses, and on the north by a line four miles north of and parallel to the Runway 08 26 localizer courses; excluding the Charlie Brown County Control Zone.

Area B. That airspace extending upward from 2,500 feet MSL to and including 12,500 feet MSL, bounded on the east and west by a 12-mile radius of the Atlanta VORTAC, on the south by a line four miles south of and parallel to the Runway 09R 27L localizer courses, and on the north by a line four miles north of and parallel to the Runway 08 26 localizer courses; excluding the Charlie Brown County Control Zone and that airspace contained in Area A.

Area C. That airspace extending upward from 3,500 feet MSL to and including 12,500 feet MSL, bounded on the east and west by a 20-mile radius of the Atlanta VORTAC, on the south by a line eigth miles south of and parallel to the Runway 09R 27L localizer courses, and on the north by a line eight miles north of and parallel to the Runway 08 26 localizer courses; excluding that airspace contained in Areas A and B.

Area D. That airspace extending upward from 6,000 MSL to and including 12,500 feet MSL within a 25-mile radius of the Atlanta VORTAC; excluding that airspace clockwise between the Atlanta VORTAC 138 and 218 radials south of a line 12 miles south of and parallel to the Runway 09R 27L localizer courses, that airspace clockwise between the Atlanta VORTAC 323 and 031 radials north of a line 12 miles north of and parallel to the Runway 08 26 localizer courses, and that airspace contained in Areas A, B, and C.

Area E. That airspace extending upward from 8,000 feet MSL to and including 12,500 feet MSL within a 29-mile radius of the Atlanta VORTAC; excluding that airspace contained within Areas A, B, C, and D.

Area F. That airspace extending upward from 8,000 feet MSL to and including 12,500 feet MSL within a 35-mile radius of the Atlanta VORTAC; excluding that airspace contained in Areas A, B, C, D, and E.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 9, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air
Traffic Rules Division.

[FR Doc.77-23435 Filed 8-12-77;8:45 am]

[Airspace Docket No. 76-AL-9]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

PART 73—SPECIAL USE AIRSPACE

Alteration of Restricted Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: These amendments alter the Eagle River, Alaska, Restricted Areas identified as R-2203A and R-2203B, and establish an additional Restricted Area R-2203C west of the present restricted area in the vicinity of Fort Richardson, Alaska. These actions provide for the safe and efficient use of the navigable airspace and release to the flying public the airspace overlying the water in Knik Arm north of the shoreline.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Huff, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone: 202-426-3715.

SUPPLEMENTARY INFORMATION:

HISTORY

On February 24, 1977, an advanced notice in the form of a circular was circulated to interested persons stating that the FAA was considering an amendment to Part 73 of the Federal Aviation Regulations (14 CFR Part 73) that would alter Restricted Areas R-2203A and R-2203B, and establish an additional Restricted Area R-2203C west of the present restricted areas in the vicinity of Fort Richardson, Alaska. The notice generated 17 concurrences and no objections. This proposal was republished in the FEDERAL REGISTER on June 16, 1977 (42 FR 30642). Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. We received one response to the NPRM in which the commenter posed no objection to the proposal. Sections 71.151 and 73.22 were republished in the FEDERAL REGISTER on January 3, 1977 (42 FR 345 and 658, respectively). Section 73.22 was amended on February 24, 1977 (41 FR 56790) and Section 71.151 was subsequently amended with an effective date of August 11, 1977 (42 FR 29475).

THE RULE

These amendments to Parts 71 and 73 of the Federal Aviation Regulations (FARs) alter the Eagle River, Alaska, Restricted Areas R-2203A and R-2203B, and establish an additional Restricted Area R-2203C west of the present restricted area in the vicinity of Fort Richardson, Alaska. Alteration of the Eagle River, Alaska, Restricted Areas releases to the flying public the airspace overlying the water in Knik Arm north of the shoreline. In addition, the action of lowering the ceiling from 18,000 feet MSL to 11,000 feet MSL resulted in the removal of R-2203A and R-2203B from the Continental Control Area which consists of the airspace of the 48 contiguous states and Alaska at and above 14,500 feet MSL. The new Restricted Area R-2203C west of and adjacent to R-2203B, includes that airspace from the surface to 5,000 feet MSL over land area only. This additional restricted area is required to provide needed impact area to properly train field artillery battalions.

DRAFTING INFORMATION

The principal authors of this document are Mr. Richard Huff, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart D of Part 71 and Subpart K of Part 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) are amended, effective 0901 GMT, October 6, 1977, as follows:

§ 71.151 (42 FR 345 and 29475) is amended as follows:

"R-2203A Eagle River, Alaska" and "R-2203B Eagle River, Alaska" are deleted.

§ 73.22 (41 FR 56790 and 42 FR 658) is amended as follows:

In R-2203A Eagle River, Alaska, "61°17'20" N., Longitude 149°40'00" W.; to Latitude 61°17'15" N., Longitude 149°40'00" W.;" is deleted and "61°18'00" N., Longitude 149°39'45" W.; to Latitude 61°18'00" N., Longitude 149°44'00" W.; to Latitude 61°17'15" N., Longitude 149°42'25" W.;" is substituted therefor. In addition, "18,000" is deleted and "11,000" is substituted therefor.

In R-2203B Eagle River, Alaska, all between "Boundaries" and "to the point of beginning" is deleted and "Beginning at Latitude 61°24'34" N., Longitude 149°33'48" W.; thence southwesterly along the shoreline to Latitude 61°19'45" N., Longitude 149°44'00" W.; to Latitude 61°18'00" N., Longitude 149°44'00" W.; to Latitude 61°18'00" No., Longitude 149°39'45" W.; thence northeasterly along the Alaska Railroad to Latitude 61°22'00" N., Longitude 149°33'48" W.;" is substituted therefor. In addition, "18,000" is deleted and "11,000" is substituted therefor.

The following is added:

R-2203C Eagle River, Alaska

Boundaries. Beginning at Lat. 61°19'45" N., Long. 149°44'00" W.; thence westerly along the shoreline to Lat. 61°19'38" N., Long. 149°46'36" W.; to Lat. 61°19'12" N., Long. 149°46'36" W.; to Lat. 61°18'00" N., Long. 149°44'00" W.; to point of beginning.
Designated altitudes. Surface to 5,000 feet MSL.
Time of designation. Daily, Monday through Friday, other times as activated by NOTAM issued by the using agency at least 24 hours in advance.
Controlling agency. FAA, Anchorage Approach Control.
Using agency. 172nd Infantry Brigade (Alaska) Fort Richardson, Alaska.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 8, 1977.

EDWARD J. MALO,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.77-23433 Filed 8-12-77;8:45 am]

[Docket No. 17101; Amdt. No. 1085]

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase

Individual SIAP copies may be obtained from:
1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription

Copies of all SIAPs, mailed weekly, may be ordered from Superintendant of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The current annual subscription price is $150.00; add $30.00 for each additional copy mailed to the same address.

FR FURTHER INFORMATION CONTACT:

William L. Bersch, Flight Procedures and Airspace Branch (AFS-730), Aircraft Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, telephone 202-426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 9) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. § 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA forms are identified as FAA Forms 8260-3, 8260-4 and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the FEDERAL REGISTER expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the ERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The principal authors of this document are Rudolph L. Fioretti, Flight Standards Service, and Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAPs identified as follows:

* * * *Effective October 6, 1977.*

Baltimore, MD—Baltimore-Washington Int'l, VOR Rwy 10, Amdt. 11
Baltimore, MD—Baltimore-Washington Int'l, VOR Rwy 28, Amdt. 16
Baltimore, MD—Baltimore-Washington Int'l, VOR Rwy 33L, Amdt. 1
Baltimore, MD—Baltimore-Washington Int'l, VOR DME Rwy 22, Amdt. 4
Newport News, VA—Patrick Henry Int'l, LOC (BC) Rwy 25, Amdt. 7

* * * *Effective September 22, 1977.*

Tuscaloosa, AL—Tuscaloosa Muni., VOR Rwy 4, Amdt. 6
Tuscaloosa, AL—Tuscaloosa Muni., VOR Rwy 22, Amdt. 8
Bishop, CA—Bishop, VOR-A, Amdt. 2
Newburyport, MA—Plum Island, VOR Rwy 10, Amdt. 2
St. Louis, MO—Lambert-St. Louis Int'l, VOR Rwy 12L, Amdt. 7
St. Louis, MO—Lambert-St. Louis Int'l, VOR Rwy 12R, Amdt. 16
Portsmouth, OH—Greater Portsmouth Regional, VOR DME-A, Amdt. 1

* * * *Effective September 8, 1977.*

Philadelphia, PA—North Philadelphia, VOR Rwy 6, Amdt. 9
Philadelphia, PA—North Philadelphia, VOR Rwy 24, Amdt. 17

2. By amending § 97.25 SDF-LOC-LDA SIAPs identified as follows:

* * * *Effective October 6, 1977.*

Baltimore, MD—Baltimore-Washington Int'l, LOC(BC) Rwy 33L, Amdt. 4
Milwaukee, WI—General Mitchell Field, LOC Rwy 25L, Amdt. 2

* * * *Effective September 22, 1977.*

Columbia, MO—Columbia Regional, LOC (BC) Rwy 20, Amdt. 4
St. Louis, MO—Lambert-St. Louis Int'l, LOC BC Rwy 6, Amdt. 22
Cleveland, OH—Cleveland Hopkins International, LOC Rwy 28R, Originial
Columbia-Mt. Pleasant, TN—Maury County, SDF Rwy 23, Original

* * * *Effective September 8, 177.*

Philadelphia, PA—North Philadelphia, LOC (BC) Rwy 6, Amdt. 2

3. By amending § 97.27 NDB/ADF SIAPs identified as follows:

* * * *Effective October 6, 1977.*

Marathon, FL—Marathon Flight Strip, NDB Rwy 7, Original
Newport News, VA—Patrick Henry Int'l, NDB Rwy 7, Admt. 17
Milwaukee, WI—General Mitchell Field, NDB Rwy 1L, Amdt. 1
Milwaukee, WI—General Mitchell Field, NDB Rwy 7R, Amdt. 6

Title 20—Employees Benefits

CHAPTER VIII—JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

PART 901—REGULATIONS GOVERNING THE PERFORMANCE OF ACTUARIAL SERVICES UNDER THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

PART 902—RULES REGARDING AVAILABILITY OF INFORMATION

Adoption of Provisions Governing Enrollment of Actuaries and Public Availability of Information; Correction

AGENCY: Joint Board for the Enrollment of Actuaries.

ACTION: Correction of final rule.

SUMMARY: This correction is necessary to eliminate technical mistakes in the summary and supplementary information portions of the statement preceding the final rules adopted by the Joint Board for the Enrollment of Actuaries which appear at 42 FR 39200 (August 3, 1977).

EFFECTIVE DATE: January 14, 1976.

FOR FURTHER INFORMATION:

Forest D. Montgomery, Counselor to the General Counsel, U.S. Department of the Treasury, Washington, D.C. 20220 (202-566-5311).

SUPPLEMENTARY INFORMATION: The following changes are being made in the summary and supplementary information portions of the statement preceding the final rules adopted by the Joint Board for the Enrollment of Actuaries (42 FR 39200).

(1) In the summary, insert "Circuit" following the word "Columbia" in the fifth line .

(2) On page 39200, in the first paragraph immediately following the heading "'Two-tier' Enrollment System", beginning at line 4, strike the words "actuaries working on", plus the remainder of that sentence, and substitute the following words: "persons with a high level of actuarial skills examining the larger pension plans, and a second enrollment standard (or second tier) for actuaries working on smaller and simpler plans who may not possess a high level of actuarial skills." (This change is necessary to make the discussion of the suggested two classes of enrollment in the first paragraph under "'Two-Tier' Enrollment System", which refers to actuaries working on smaller and simpler plans as being in the "first tier," more consistent with the next to last paragraph under

that heading, which refers to such actuaries as being in the "second tier.")

(3) In the last sentence of the same paragraph, change "ERIS" to "ERISA."

Dated: August 10, 1977.

FOREST D. MONTGOMERY,
Acting Chairman, Joint Board for the Enrollment of Actuaries.

Title 25—Indians

CHAPTER I—BUREAU OF INDIAN AFFAIRS, DEPARTMENT OF THE INTERIOR

PART 221—OPERATION AND MAINTENANCE

Flathead Irrigation Project

AGENCY: Bureau of Indian Affairs, Department of the Interior.

ACTION: Final publication of amendment.

SUMMARY: The purpose of this amendment is to establish the lump sum assessments against the Flathead, Mission, and Jocko Valley Irrigation Districts within the Flathead Irrigation Project for the season of 1978. This action is necessary to cover the increase in operation and maintenance costs of the Irrigation Project. The notice of intent to modify was published in Volume 42, No. 117, Friday, June 17, 1977, on page 30867. Comments were invited until July 18. No comments were received, therefore, this final publication is in order.

EFFECTIVE DATE: September 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. George L. Moon, Project Engineer, Flathead Irrigation Project, Box 198, St. Ignatius, Mont. 59865. Telephone: 406-745-2661.

SUPPLEMENTARY INFORMATION: The primary author of this document is Mr. George L. Moon. It is hereby certified that the economic and inflationary impacts of this amendment have been carefully evaluated in accordance with Executive Order 11821. The three mentioned Irrigation District Boards of Commissioners have, by resolution, supported this amendment.

Accordingly, §§ 221.24, 221.26 and 221.28 are amended to read as follows:

§ 221.24 Charges.

Pursuant to a contract executed by the Flathead Irrigation District, Flathead Indian Irrigation Project, Mont., on May 12, 1928, as supplemented and amended by later contracts dated February 27, 1929, March 28, 1934, August 26, 1936, and April 5, 1950, there is hereby fixed for the season of 1978 an assessment of $550,607.19 for the operation and maintenance of the irrigation system which serves that portion of the project within the confines and under the jurisdiction of the Flathead Irrigation District. This assessment involves an area of approximately 88,097.15 acres, which does not include any land held in trust for Indians and covers all proper general charges and project overhead.

§ 221.26 Charges.

Pursuant to a contract executed by the Mission Irrigation District, Flathead Indian Irrigation Project, Mont., on March 7, 1931, approved by the Secretary of the Interior on April 21, 1931, as supplemented and amended by later contracts dated June 2, 1934, June 6, 1936, and May 15, 1951, there is hereby fixed, for the season of 1978 an assessment of $97,448.34 for the operation and maintenance of the irrigation system which serves that portion of the project within the confines and under the jurisdiction of the Mission Irrigation District. This assessment involves an area of approximately 16,241.39 acres, which does not include any land held in trust for Indians and covers all proper general charges and project overhead.

§ 221.28 Charges.

Pursuant to a contract executed by the Jocko Valley Irrigation District, Flathead Indian Irrigation Project, Mont., on November 13, 1931, approved by the Secretary of the Interior on February 26, 1935, as supplemented and amended by later contracts dated August 26, 1936, April 18, 1950, and August 24, 1967, there is hereby fixed for the season of 1978 an assessment of $45,201.30 for the operation and maintenance of the irrigation system which serves that portion of the project within the confines and under the jurisdiction of the Jocko Valley Irrigation District. This assessment involves an area of approximately 7,471.29 acres, which does not include any lands held in trust for Indians and covers all proper general charges and project overhead.

GEORGE L. MOON,
Project Engineer.

Title 27—Alcohol, Tobacco Products, and Firearms

CHAPTER I—BUREAU OF ALCOHOL, TOBACCO, AND FIREARMS, DEPARTMENT OF THE TREASURY

[T.D. ATF-45]

PART 178—COMMERCE IN FIREARMS AND AMMUNITION

Ammunition Recordkeeping Requirements

AGENCY: Bureau of Alcohol, Tobacco, and Firearms.

ACTION: Final rule (Treasury decision).

SUMMARY: This document revises ammunition recordkeeping requriements by exempting all Federal licensees from recording retail sales of certain types of ammunition. This amendment is necessary to implement statutory modifications of the Gun Control Act of 1968.

EFFECTIVE DATE: August 15, 1977.

FOR FURTHER INFORMATION CONTACT:

A. N. Stickney, ATF&E Specialist, Research and Regulations Branch, Regulations and Procedures Division (Regulatory Enforcement), Bureau of Alcohol, Tobacco and Firearms, Washington, D.C. 20226 (202-566-7626).

SUPPLEMENTARY INFORMATION: Pub. L. 91-128 amended the Internal Revenue Code of 1954 by adding section 4182(c) to provide that notwithstanding the provisions of sections 922(b)(5) and 923(g) of title 18, United States Code, no person holding a Federal firearms license shall be required to record the name, address, or other information about the purchaser of shotgun ammunition, ammunition suitable for use only in rifles generally available in commerce, or component parts of the aforesaid types of ammunition. The amendment did not affect the recordkeeping requirements for pistol and revolver ammunition or ammunition interchangeable between rifles and handguns.

Although existing regulations require all firearms licensees to keep records of the sales of all types of ammunition, the Bureau advised all firearms licensees in Industry Circular No. 69-26, dated December 4, 1969, and Industry Circular No. 70-7, dated February 2, 1970, that they no longer were required to record the name, address, or other information about the retail purchaser of shotgun ammunition, ammunition suitable for use only in rifles, or component parts for these types of ammunition. This Treasury decision updates the present regulations by implementing the provisions of Pub. L. 91-128 (83 Stat. 261).

Consequently, 27 CFR 178.125(c) which requires the maintenance of records on all sales or other dispositions of ammunition is revised to reflect the provisions of 26 U.S.C. 4182(c) and to clarify the recordkeeping requirements of a licensee on sales or other dispositions of ammunition between licensees. Paragraphs in this section are assigned headings to promote readability of the text, and citation of authority is added at the end of the section. Additionally, the title, "Assistant Regional Commissioner", wherever used in § 178.125(g) is replaced by "regional regulatory administrator" (T.D. ATF-32 (41 FR 44038)).

(The originating drafter of this Treasury decision is A. N. Stickney of the Research and Regulations Branch, Bureau of Alcohol, Tobacco, and Firearms. Officials from the Bureau and from the Treasury Department, however, participated in developing the Treasury decision, both on matters of substance and style.)

Because this Treasury decision is liberalizing in nature and requires no public initiative, it is unnecessary to issue this Treasury decision with notice and public procedure thereon under 5 U.S.C. 553(b) or subject to the effective date limitation in 5 U.S.C. 553(d). This Treasury decision is issued under the authority contained in 18 U.S.C. 926 (82 Stat. 1214).

Accordingly, 27 CFR Part 178 is amended as follows:

Section 178.125 is revised to read as follows:

§ 178.125 Record of receipt and disposition.

(a) *Ammunition received by licensed dealers.* * * *

(b) *Ammunition received by licensed collectors.* * * *

* * * * * *

(c) *Ammunition disposition.*—(1) *Sales to nonlicensees.* The sale or other disposition of ammunition, or of an ammunition curio or relic, shall be recorded in a bound record at the time a transaction is made, except that no record need be maintained for the sale of shotgun ammunition, ammunition suitable for use only in rifles generally available in commerce, or component parts of these types of ammunition. Sales or other dispositions of ammunition which are interchangeable between rifles and pistols or revolvers (for example, .22 Rimfire, .45 Pistol and Revolver, and the like) must be recorded. The bound record shall be maintained in chronological order by date of sale or disposition of the ammunition, and shall be retained on the licensed premises of the licensee for a period not less than two years following the date of the recorded sale or disposition of the ammunition.

The bound record entry shall show:

(i) The date of the transaction;

(ii) The name of the manufacturer;

(iii) The caliber or gauge (or the type of ammunition component);

(iv) The quantity of ammunition (or component);

(v) The name, address, and date of birth of the nonlicensee; and

(vi) The method used to establish the identity of the ammunition purchaser.

The format required for the bound record is as follows:

DISPOSITION RECORD FOR PISTOLS, REVOLVERS, AND INTERCHANGEABLE AMMUNITION

Date	Manufacturer	.22 Caliber Rimfire. Enter only a (✓) if 10 boxes or less. Enter number of boxes if more than 10.	Other		Purchaser				Enter a (✓) in the "Other" column if purchaser is personally known to you. Otherwise, establish the purchaser's identification.
			Caliber, gauge, or type of component	No. of boxes	Name and address	Date of birth	Height	Occupation License	Other type (specify)

However, when a commercial record is made at the time a transaction is made, a licensee may delay making an entry into the bound record if he or she complies with provisions of paragraph (d) of this section.

(2) *Sales to licensees.* Sales or other dispositions of all ammunition from a licensee to another licensee shall be recorded and maintained in the manner prescribed in § 178.122(b) for importers.

(d) *Commercial records of ammunition sales.* * * *

(e) *Firearms receipt and disposition.* * * *

(f) *Commercial records of firearms received.* * * *

(g) *Alternate records.* * * *

(h) *Requirements for importers and manufacturers.* * * *

(Sec. 5, Pub. L. 91-128, 83 Stat. 261 (26 U.S.C. 4182(c)).)

Signed: July 14, 1977.

REX D. DAVIS,
Director.

Approved: August 8, 1977.

BETTE B. ANDERSON,
Under Secretary of the Treasury.

[FR Doc.77-23507 Filed 8-12-77;8:45 am]

Title 29—Labor

CHAPTER I—NATIONAL LABOR RELATIONS BOARD

PART 102—RULES AND REGULATIONS, SERIES 8

Representation Case Procedures

AGENCY: National Labor Relations Board.

ACTION: Amendments to rules.

SUMMARY: This document establishes procedures for requests for review of representation cases and for conduct of elections pending review by the Board. The changes are designed to facilitate consideration and disposition of requests for review.

EFFECTIVE DATE: August 15, 1977.

FOR FURTHER INFORMATION CONTACT:

John C. Truesdale, Esquire, Executive Secretary, National Labor Relations Board, 1717 Pennsylvania Avenue NW., Washington, D.C. 20570.

SUPPLEMENTARY INFORMATION: Section 102.67 of the Rules and regulations of the National Labor Relations Board establishes representation case procedures providing for certain actions by the regional director upon petitions for the conduct of elections, and for Board review of such actions. The procedures have provided that when a request for review is filed from the action of the regional director directing an election, that election should not be conducted until the Board has ruled upon the request for review. The amendments to sections 102.67 (b) and (j) promulgated hereby change that procedure. Under those amendments the regional director will now conduct the election, as scheduled, irrespective of the pendency or granting of a request for review. However, all ballots which might be affected by the Board's decision on the request for review shall be segregated in an appropriate manner, and all ballots impounded without opening until the Board's final decision has issued. It is expected that this changed procedure will contribute to the stability of labor relations and the effectiveness of the Board's election process by permitting the parties to plan their election campaigns in confidence that the election will be held as scheduled, and by providing the employees the opportunity to cast their ballots at a time when they are best informed and interested concerning the election issues.

The changes in sections 102.67 (d) and (g) are designed to facilitate consideration and disposition of requests for review of regional directors' decisions, thereby further contributing to the prompt resolution of representation issues. Section 102.67(d) as amended will permit the Board to examine the record in evaluating a request for review, although such requests are still required to be a self-contained document. The amendments to section 102.67(g) will now permit the Board to rule upon the issues on review at the same time it grants the request. Such action will avoid the delay associated with the briefing time after a grant of review, when the issues are clear and readily resolved.

The National Labor Relations Board hereby promulgates amendments to § 102.67 (b), (d), (g), and (j) of its Rules and Regulations, 29 CFR 102.67, and revises those subsections to read as follows:

§ 102.67 Proceedings before the regional director; further hearing; briefs; action by the regional director; appeals from action by the regional director; statement in opposition to appeal; transfer of case to Board; proceedings before the Board; Board action.

* * * * *

(b) A decision by the regional director upon the record shall set forth his findings, conclusions, and order or direction. The decision of the regional director shall be final: *Provided, however,* That within 10 days after service thereof any party may file eight copies of a request for review with the Board in Washington, D.C. Such request shall be printed or otherwise legibly duplicated: *Provided, however,* That carbon copies shall not be filed and if submitted will not be accepted. Simultaneously therewith, copies thereof shall be served on all other parties to the proceeding and the regional director, and a statement of such service filed with the Board. The regional director shall schedule and conduct any election directed by the decision notwithstanding that a request for review has been filed with or granted by the Board. The filing of such a request shall not, unless otherwise ordered by the Board, operate as a stay of the election or any other action taken or directed by the regional director: *Provided, however,* That if a pending request for review has not been ruled upon or has been granted, ballots whose validity might be affected by the final Board decision shall be segregated in an appropriate manner; and all ballots shall be impounded and remain unopened pending such decision.

* * * * *

(d) Any request for review must be a self-contained document enabling the Board to rule on the basis of its contents without the necessity or recourse to the record; however, the Board may, in its discretion, examine the record in evaluating the request. With respect to ground (2), and other grounds where appropriate, said request must contain a summary of all evidence or rulings bearing on the issues together with page citations from the transcript and a summary of argument. But such request may not raise any issue or allege any facts not timely presented to the regional director.

* * * * *

(g) The granting of a request for review shall not stay the regional director's decision unless otherwise ordered by the Board. Except where the Board rules upon the issues on review in the order granting review, the appellants and other parties may, within 7 days after the issuance of an order granting review, file eight copies of a brief with the Board, which shall be duplicated and served in accordance with the requirements of subsection (b) of this section. A statement of such service shall be filed simultaneously with the Board. Such briefs may be reproductions of those previously filed with the regional director and/or other briefs which shall be limited to the issues raised in the request for review. Where review has been granted, the Board will consider the entire record in the light of the grounds relied on for review. Any request for review may be withdrawn with the permission of the Board at any time prior to the issuance of the decision of the Board thereon.

* * * * *

(j) Upon transfer of the case to the Board, the Board shall proceed, either forthwith upon the record, or after oral argument or the submission of briefs, or further hearing, as it may determine, to decide the issues referred to it or to review the decision of the regional director, and shall direct a secret ballot of the employees or the appropriate action to be taken on impounded ballots of an election already conducted, dismiss the petition, affirm or reverse the regional director's order in whole or in part, or make such other disposition of the matter as it deems appropriate.

[FR Doc.77-23429 Filed 8-12-77;8:45 am]

Title 32—National Defense

CHAPTER I—OFFICE OF THE SECRETARY OF DEFENSE

PART 199—IMPLEMENTATION OF THE CIVILIAN HEALTH AND MEDICAL PROGRAM OF THE UNIFORMED SERVICES (CHAMPUS)

Opportunity for Oral Presentation of Views on CHAMPUS Regulation DOD 6010.8–R

AGENCY: Office of the Secretary of Defense.

ACTION: Public hearing.

SUMMARY: This document announces a public hearing on the recently adopted CHAMPUS Regulation DOD 6010.8–R (42 FR 17972, April 4, 1977). The purpose of the hearing is to provide an opportunity for oral presentation to those who had submitted written comments on the CHAMPUS Regulation during the period April 4 to June 4, 1977, the formal comment period.

DATES: September 7, 8, and 9, 1977, between the hours of 8:30 a.m. to 12 noon, and 1:15 p.m. to 3:45 p.m.

ADDRESSES: Air Force Auditorium, Room GE086, Forrestal Building, Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Lieutenant Commander James T. Dalton, Room 3E172, Pentagon, Washington, D.C. 20301; Telephone 202–697–2115.

SUPPLEMENTARY INFORMATION: Any changes resulting from these written comments and oral presentations which operate to increase the rights, benefits, or privileges currently provided in the Regulation as published in the FEDERAL REGISTER, Part II, April 4, 1977, pages 17972 through 18032, and to be codified as 32 CFR 199, will be effective retroactively to April 4, 1977, insofar as administratively feasible. Those who submitted written views during the sixty-day comment period and who wish to supplement their views orally may request to make a presentation at the hearing by writing or calling Lieutenant Commander James T. Dalton. A request should include a general description of the subject to be addressed and the names and titles of those who will appear at the hearing to make the oral presentation. Requesters will be notified individually of the hearing schedule as soon after the close of the fourteen day period for requests as practicable.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Office of the Assistant Secretary of Defense (Comptroller).

AUGUST 8, 1977.

[FR Doc.77-23440 Filed 8-12-77;8:45 am]

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 76-210]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Niagara River, N.Y.

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This amendment revises the operation regulations for the Canadian National Railway Company drawbridge across the Niagara River, mile 0.6, to allow the draw to remain closed to the passage of vessels. The draw was last opened for the passage of vessels in 1946. The amendment will relieve the owner of the bridge of the burden of maintaining it in operable condition.

EFFECTIVE DATE: This amendment is effective on September 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank L. Teuton, Jr., Chief, Drawbridge Regulations Branch (G–WBR/73), Room 7300, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590 (202–426–0942).

SUPPLEMENTARY INFORMATION: On November 18, 1976, the Coast Guard published a proposed rule (41 FR 50842) concerning this amendment. The Commander, Ninth Coast Guard District, also published this proposal as a public notice dated December 20, 1976. Interested persons were given until January 21, 1977, to submit comments.

DRAFTING INFORMATION

The Principal persons involved in drafting this proposal are: Frank L. Teuton, Jr., Project Manager, Office of Marine Environment and Systems, and Lieutenant Edward J. Gill, Project Attorney, Office of the Chief Counsel.

DISCUSSION OF COMMENTS

Two comments were received which objected to the proposal on the grounds that there might be a need in the future for this bridge to be operational. The Coast Guard feels that since no opening for navigation has been required for 31 years, and alternate routes are available, the regulations, as proposed, should be adopted.

In consideration of the foregoing, Part 117 of Title 33 of the Code of Federal Regulations is amended by revising § 117.708 to read as follows:

§ 117.708 Niagara River; Canadian National Railway bridge (International Bridge) between Buffalo, N.Y., and Fort Erie, Ontario, Canada.

The draw need not open for the passage of vessels. However, the draw shall be returned to operable condition within six months after notification from the Commandant, U.S. Coast Guard, to take such action.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5).)

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of Economic Impact Statement under Executive Order 11821, as amended, and OMB Circular A–107.

Dated: August 8, 1977.

O. W. SILER,
Admiral, U.S. Coast Guard, Commandant.

[FR Doc.77-23467 Filed 8-12-77;8:45 am]

CHAPTER II—CORPS OF ENGINEERS, DEPARTMENT OF THE ARMY

[ER 1130-2-413]

PART 274—PEST CONTROL PROGRAM FOR CIVIL WORKS PROJECTS

AGENCY: Corps of Engineers, DOD.

ACTION: Final rule.

SUMMARY: The final rule assigns responsibilities and prescribes procedures concerning the use of chemicals in the pest control program at all Civil Works projects. It also presents guidance for the preparation and submission of pest control reports. Under the provisions of Section 4, Pub. L. 92–516, the Environmental Protection Agency is responsible for Federal certification of pesticide applicators through its development of a single Government Agency Plan (GAP). By letter dated 30 December 1976, the Administrator of the Environmental Protection Agency has stated that Federal certification will no longer be undertaken pursuant to a single GAP. Instead, the Environmental Protection Agency will exercise its responsibilities by approving individual Agency Plans which will permit each Federal Agency to certify its own employees. The Department of Defense has developed an Agency Plan for certification of its pesticide applicators which has been approved in principle and concept. It has been determined that the DOD Agency Plan satisfies the training requirement for certification of civil works personnel. Pending final approval of the DOD Agency Plan, Corps of Engineers pesticide supervisors and applicators will be certified in accordance with the criteria described in the regulation. The effect of this action is to make the public aware of the procedures concerning the use of pesticides by Corps of Engineers personnel at all Civil Works projects.

EFFECTIVE DATE: The effective date of this regulation is 15 August 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Dale Crane, (202–693–7177), Recreation-Resource Management Branch, HQDA (DAEN–CWO–R), WASH DC 20314.

NOTE: The U.S. Army Corps of Engineers has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: August 4, 1977.

JAMES N. ELLIS,
Colonel, Corps of Engineers, Chief of Staff

Accordingly, 33 CFR is amended by adding Part 274 as follows:

PROJECT OPERATION

Sec.
274.1 Purpose.
274.2 Applicability.
274.3 References.
274.4 Pesticide management.
274.5 Certification.
274.6 Division/district pest control programs.
274.7 Authorization of pesticide use.

AUTHORITY: Pub. L. 92–516, Federal Insecticide, Fungicide and Rodenticide Act of 1972 (86 Stat. 973, 21 Oct 72, 40 CFR Part 171, Federal Certification of Pesticide Applicators

PROJECT OPERATION

§ 274.1 Purpose.

The purpose of this regulation is to assign responsibilities and prescribe procedures concerning the use of chemicals in the Corps pest control program at all civil works projects. It also presents guidance for the preparation and submission of an annual pest control summary report.

§ 274.2 Applicability.

This regulation is applicable to all OCE elements and all field operating agencies having Civil Works responsibilities.

§ 274.3 References.

(a) Public Law 92–516, Federal Insecticide, Fungicide and Rodenticide Act of 1972, (86 Stat 973), 21 October 1972.

(b) Public Law 91–596, Occupational Safety and Health Act of 1970, (84 Stat. 1609, 29 USC 668). 29 December 1970.

(c) Medical Surveillance Guide, U.S. Army Environmental Hygiene Agency, January 1975.

(d) Guide for the Medical Surveillance of Pest Controllers, U.S. Army Environmental Hygiene Agency, March 1976, as amended.

(e) Pesticide Applicator Training Manual, Cornell University, Ithaca, New York, September 1974.

(f) Plan for Certification of Pesticide Applicators, DOD, June 1976.

§ 274.4 Pesticide management.

(a) *Administration.* The Division Engineer is responsible for implementation of the program, and providing for the training of pest control personnel, safe use of highly toxic materials and the proper application of restricted-use pesticides. District programs will be reviewed by the Division Engineer for the selection of suitable pest control agents, up-to-date and economical methods of control, and the proper use and maintenance of pest control equipment. Field Operating Agencies (FOA) will designate a single point of contact for pesticide matters.

(b) *Personnel actions.* Pesticide duties will be identified in applicable job descriptions whether they constitute a major duty or not. Such job descriptions will also note the employees responsibility for using personal protective equipment and clothing provided and for following established health and safety practices and procedures. Standard Form 78 medical examination will be augmented by the specific diagnostic tests for the occupations identified in § 274.4(c). Prescribed preplacement medical examinations will be provided as part of the personnel action process before anyone is permitted to perform pesticide duties

(c) *Medical surveillance.* Preplacement, periodic and pretermination medical examinations of the type and extent set forth in Section III, U.S. Army Environmental Hygiene Agency (USAEHA) "Guide for the Medical Surveillance of Pest Controllers" will be provided for personnel involved in pesticide operations. Additional information is contained in USAEHA "Medical Surveillance Guide (Guide for Job-Related Examinations)." Appropriate medical records will be maintained in official personal folders.

(d) *Personnel training.* All personnel directly involved in pest control must be properly trained in the safe application of herbicides, insecticides, rodenticides, fumigants and fungicides. The current plan for training and certification of pest control personnel requires that all pest control applicators and/or supervisors satisfactorily complete (1) the correspondence course, "Basic Pest Control Technology" NTTC 150, available from NAVFAC Technical Training Command, Norfolk, Virginia 23511 and a three day (20 hr) conference training course conducted by the Army Health Services Command (AHSC) at Fort Sam Houston, Texas 78234, for Civil Works personnel, or a three day (20 hr) special training course conducted by the Division Engineer, to include information presented in the "Pesticide Applicator Training Manual", § 274.3(e) or (2) a B.S. degree in agronomy, entomology, forestry or horticulture from an accredited college or university.

(e) *Restricted-use pesticide training.* For agency certification § 274.3(f) Civil Works supervisors and applicators using the higher toxicity Restricted-Use pesticides are required to complete Restricted-Use Pesticide training as given at Navy facilities at Jacksonville, Florida or Alemeda, California, Wichita Falls Air Base, or the Army Health Services Command, Fort Sam Houston, Texas. College and University programs which are acceptable for State certification of restricted-use pesticide applicators may be used in lieu of the above.

(f) *Coordination with EPA.* The Environmental Protection Agency is expected to publish regulations listing pesticides classified for restricted-use by October 1977. The Division Engineer will be responsible for close coordination with EPA Regional Offices in order to comply with the regulatory requirements for restricted-use pesticides.

(g) *Exposure to and protection from pesticide hazards.* Basic health and safety practices and procedures including personal protective equipment and clothing, work area layouts, storage and application considerations are identified in Appendix A of this regulation. Additional guidance is contained in Section II and Appendix A of the USAEHA "Guide for Medical Surveillance of Pest Controllers."

(h) *Contracting for pest control services.* All contracts for pest control services must receive Technical review and approval from professional pest control management personnel prior to advertisement of the contract and procurement of services. The contractor will be required to submit proof that his supervisory personnel to be employed on the contract are certified in the specific categories for operations being conducted in accordance with an approved state plan in effect in the area concerned.

§ 274.5 Certification.

Under the provisions of Section 4, Pub. L. 92–516, the Environmental Protection Agency is responsible for Federal certification of pesticide applicators through its development of a single Government Agency Plan (GAP). By letter dated December 30, 1976, the Administrator of the Environmental Protection Agency has stated that Federal certification will no longer be undertaken pursuant to a single GAP. The Department of Defense has developed an Agency Plan for certification of its pesticide applicators which has been approved in principle and concept. It has been determined that the DOD Agency Plan satisfies the training requirements for certification of Civil Works personnel. Pending final approval of the DOD Agency Plan, all Corps of Engineers pesticide applicators will be certified in accordance with the criteria described in this regulation by issue of a certificate of training and competency (DA Form 87, 1 Sep 54), signed by the Training Officer and the Division Engineer.

§ 274.6 Division/district pest control programs.

(a) *Guides.* Referenced technical manuals, and Engineer Circulars issued from time to time, will be used as guides in selecting the type of chemicals and the method of application in the control of vegetation and pests at civil works projects.

(b) *Responsibilities and reports (RCS DAEN–CWO–48).* Districts will prepare and submit to the Divisions detailed descriptions or their anticipated use of pesticides for review and approval by the appropriate Division.

§ 274.7 Authorization of pesticide use.

(a) Programs approved in § 274.6(b) must be those as described on the pesticide label. Pesticide uses which are different from the registered use, require amendment of the label, approved by the Environmental Protection Agency. Data requirements for this use must be supplied before an amendment will be made by the Agency. Substantial Time and effort are required for such action.

(b) If an unexpected outbreak of a pest requires control measures which are not according to the registered use, such control effort is viewed as an emergency measure and may be undertaken at the discretion of the Division Engineer. An emergency will be deemed to exist when:

(1) A pest outbreak has or is about to occur and no pesticide registered for the particular use, or alternative method of control, is available to eradicate or control the pest.

(2) Significant economic or health problems will occur without the use of the pesticide.

(3) The time available from discovery or prediction of the pest outbreak is insufficient for a pesticide to be registered for the particular use. In determining whether an emergency condition exists, the Administrator will also give consideration to such additional facts requiring the use of Section 18 § 274.3(a) as are presented by the applicant.

(c) Emergency operations should be documented by a request for a specific exemption, prepared by the District and forwarded through channels to HQDA (DAEN–CWO–R) WASH DC 20314 for transmittal to EPA.

(1) Each specific exemption must be requested in writing, by the head of the Federal agency or the Governor of the State involved, or other official designee, addressed to the Administrator, setting forth the following information:

(i) The nature, scope and frequency of the emergency.

(ii) A description of the pest known to occur, the places or times it may be likely to occur and the estimated time when treatment must be commenced to be effective.

(iii) Whether a pesticide registered for the particular use, or other method of eradicating or controlling the pest, is available to meet the emergency, and the basis for such determination.

(iv) A listing of the pesticide or pesticides the agency proposes to use in the event of an outbreak.

(v) Description of the nature of the program for eradication or control. Such description should include:

(A) Quantity of the pesticide expected to be applied;

(B) Specific Area or place of application;

(C) Method of application;

(D) Duration of application;

(E) Qualifications of personnel involved in such application.

(vi) Statement of economic benefits and losses anticipated with and without the exemption and under reasonable alternatives.

(vii) Analysis of possible adverse effects on man and the environment. If an Environmental Impact Statement has been prepared by an agency, in accordance with that agency's regulations implementing the National Environmental Policy Act of 1969, and is relevant to the above, it shall be submitted with the application.

(viii) Such exemptions, if granted, are valid only for the specific situation involved and are subject to such restrictions as the Administrator may prescribe in granting the exemption. Such restrictions may include, among others, limitations on the quantity of the pesticide to be used, the conditions under which the pesticide may be applied, restrictions as to the person who may apply the pesticide and the type of monitoring activities which should be conducted. Within one year of the granting of the exemption, a summary report on what action was taken to meet the emergency and on the outcome of such action, must be forwarded to HQDA (DAEN–CWO–R) WASH DC 20314, for forwarding to EPA.

APPENDIX A

PREVENTIVE SAFETY MEASURES IN HANDLING OF PESTICIDES

1. Follow the label on each container before using the contents. The manufacturers are required by law to list recommendations and precautions.

2. Weather conditions are important. Winds could carry toxic sprays and dusts to areas not under your control, causing accidental poisoning to the public or domestic animals.

3. Smoking is not permitted while pesticides are being handled.

4. All pesticides must be handled in well-ventilated areas to minimize inhalation of toxic vapors.

5. Shower and washing facilities must be near pesticide mixing areas.

6. Any contamination of skin, particularly with liquid concentrations or solutions, must be immediately washed off with detergent and water.

7. Protective clothing is used in conjunction with respiratory protective devices to prevent skin contact and inhalation of pesticides. Recommended articles of protective clothing are rubber aprons, coveralls, chemical splash goggles, safety shoes, and hard hats. A lightweight water and chemical resistant throw away type protective clothing that is impervious to herbicides is now available. In warm geographical areas this type of lightweight protective clothing would be beneficial in reducing physical stress to applicators. Additional protection is afforded by protective skin cream.

8. Clothing contaminated by spillage must be removed immediately and thoroughly laundered before wearing. Special care is required to prevent contamination of the inside of gloves.

9. Approved respirators must be worn while pesticides are being mixed, and when dusts or liquids are being handled or sprayed. Care should be exercised when selecting the respirator type to insure that it is designated specifically for the substance to be used. Each respirator must be labeled and approved by the U.S. Department of Agriculture or NIOSH. Filters or canisters must be changed after 8 hours use and more often if odor of the pesticide is detected. (Always have extra cartridges available when needed).

10. Pesticide storage, mixing, and formulation facilities:

(a) All pesticides must be stored in a dry, well ventilated, separate room, building, or covered area not accessible to unauthorized personnel or the public and placed under lock and key.

(b) Identification signs should be placed on rooms, buildings, and fences to advise of the contents and warn of their hazardous nature.

(c) Where applicable, the outside of each storage area should be labeled with "Danger," "Poison," and "Pesticide Storage" signs.

(d) Fire extinguishers must be installed near the door of materiel storage rooms. Diluted oil based pesticides are flammable and must be stored separae from other materials.

(e) All pesticide storage, mixing, and formulation areas must have adequate ventilation in order to reduce inhalation of toxic vapors. Sparkproof lighting fixtures should be installed in closed storage areas to eliminate ignition hazards.

11. Empty pesticide containers must be disposed of properly. Do not burn them. When herbicides or defoliants volatilize the resulting vapors may be poisonous to humans, and they may damage nearby plants, crops, or shrubbery; also, pesticides or defoliants containing chlorates may be a serious fire hazard when heated.

12. Glass pesticide containers should be disposed of by breaking. Chop holes in top, bottom, and sides of metal containers or crush them so they cannot collect water or be reused. After breaking or puncturing them, bury the containers at least 18 inches deep in an isolated area provided for this purpose, away from water supplies or high water tables. Records to locate such buried pesticides within the landfill site should be maintained. Post warning signs.

13. Safety programs developed for the safe handling and mixing of toxic chemicals should be coordinated with the Safety Office prior to implementation.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 772–3]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLAN

California Plan Revision: Ventura County APCD

AGENCY: U.S. Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve and, where appropriate, disapprove or take no action on changes to the Ventura County Air Pollution Control District (APCD) portion of the California State Implementation Plan (SIP) submitted by the Governor's designee. The intended effect of this action is to update rules and regulations and to correct certain deficiencies in the SIP.

EFFECTIVE DATE: August 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, 100 California Street, San Francisco, CA 94111, Attn.: David R. Souten, 415–556–7288.

SUPPLEMENTARY INFORMATION: On April 29, 1977, in 42 FR 21819, EPA published a notice of proposed rulemaking for revisions to the Ventura County Air Pollution Control District Rules and Regulations submitted on December 13, 1972; July 25, 1973; July 19, 1974; October 23, 1974; November 3, 1975; April 21, 1976; and November 10, 1976, by the California Air Resources Board for inclusion in the California SIP. Because the July 25, 1973 submission supersedes the December 13, 1972 submission, the latter submission is not addressed in this notice.

Rules concerning in-stack monitoring, gasoline vapor recovery, emergency episode action, equipment malfunction (Rule 32) and new source review have all been submitted; however, no action is being taken at this time, and these rules will be acted upon in separate FEDERAL REGISTER notices.

The changes contained in these submittals and being acted upon by this notice include the following: changes to incorporate the recodification of the California Health and Safety Code; administrative and procedural changes in fee requirements and in advisory committee and hearing board activities; the deletion of final compliance dates that have already passed; the renumbering of regulations; additions and amendments to the "Definitions" rule; new rules dealing with public records and public availability of emission data; the inclusion of levee and reservoir maintenance, range improvement, and forest management as permissible open fires; a replacement of the emission limitation for disposal of solid and liquid wastes in incinerators with a performance specification; the inclusion of control requirements for dry cleaning, metal surface coating thinners and reducers and surface cleaning and degreasing in the "Organic Solvent" rule; the addition of new source performance standards; and the addition of emission standards for hazardous air pollutants. A list of the Rules being considered by this action was published as part of the notice of proposed rulemaking and can be found in 42 FR 21819 (April 29, 1977).

No comments were received addressing the proposed action.

It is the purpose of this notice to approve all changes contained in the July 25, 1973; July 19, 1974; October 23, 1974; November 3, 1975; April 21, 1976; and November 10, 1976 submittals and incorporate them into the California SIP with the exceptions of those rules not being acted upon and the rules discussed below.

Rule 31, Public Disclosure of Data, has been revised and regulation IX, Public Records (Rule 200–204), has been added; these rules are consistent with the requirements of 40 CFR 51.10(e). These new and revised rules are being approved, and Ventura County is being rescinded from the disapproval notice in 40 CFR 52.224(a) and from the substitute regulation in 40 CFR 52.224(b).

Rule 37, Source Recordkeeping and Reporting, has been added and is consistent with the requirements of 40 CFR 51.19. This rule is being approved, and Ventura County is being rescinded from the disapproval notice in 40 CFR 52.234 (a) and from the substitute regulation in 40 CFR 52.234(d).

Rule 66, Organic Solvents, has been revised by adding three new sections that contain control requirements for dry cleaning, metal surface coating thinners and reducers, and surface cleaning and degreasing. These sections contain control requirements analogous to Federally promulgated regulations, 40 CFR 52.246, 52.253, and 52.252, respectively. These new sections are being approved, and Ventura County is being rescinded from those Federally promulgated regulations. EPA is approving Rules 72 and 73, rules establishing New Source Performance Standards and National Emission Standards for Hazardous Air Pollutants. The State of California, on behalf of the Ventura County APCD, has received delegation of authority for Rules 72.1–72.8 and for Rules 73.1–73.4. This approval does not constitute delegation of authority for Rules 72.9 and 72.10, which will be the subject of a separate FEDERAL REGISTER notice.

Regulation VII, Procedures for Variances, is being approved, however, each variance that is granted must satisfy the requirements of Section 110 of the Clean Air Act and 40 CFR Part 51 in order to be approved by EPA as a revision to the SIP.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

Pursuant to Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions. The Administrator finds good cause for making this rulemaking effective immediately since the regulations being approved are currently being enforced by the State and County Air Pollution Control Agencies, and therefore pose no further requirements on any affected facility.

(Sections 110 and 301 of the Clean Air Act, as amended, 40 U.S.C. 1857c–5 and 1857(g).)

Dated: August 8, 1977.

DOUGLAS COSTLE,
Administrator.

Subpart F of Part 52 of Chapter I, Title 40, of the Code of Federal Regulations is amended as follows:

Subpart F—California

1. Section 52.220, paragraph (c) is amended as follows:

§ 52.220 Identification of plan.

• • • • • •

(c) • • •

• • • • • •

(21) • • •

(xiii) Ventura County APCD.

(A) Rules 2, 37, 56, 59, 60, and 101.

• • • • • •

(24) • • •

(x) Ventura County APCD.

(A) Rules 2, 3, 31, 32, 200, 203, and 204.

• • • • • •

(25) • • •

(v) Ventura County APCD.

(A) Rules 2 and 125.

• • • • • •

(29) • • •

(vi) Ventura County APCD.

(A) Rules 65, 66, 72, and 73.

• • • • • •

(31) • • •

(xiii) Ventura County APCD.

(A) Rules 2, 4, 36, 40, 41, 42, 43, 104, 201, and 202.

• • • • • •

(35) • • •

(iii) • • •

(A) • • •

(B) Rules 2, 57, 72, and 73 and Regulation VII (Rules 110–129).

• • • • • •

2. Section 52.224 is amended as follows:

§ 52.224 General requirements.

(a) * * *

(8) Metropolitan Los Angeles Intrastate:

(i) Ventura County APCD.

* * * * *

3. Section 52.234 is amended as follows:

§ 52.234 Source surveillance.

(a) * * *

(4) Metropolitan Los Angeles Intrastate:

(i) Ventura County APCD.

* * * * *

4. Section 52.246 is amended as follows:

§ 52.246 Control of dry cleaning solvent vapor losses.

(a) * * *

(b) * * *

(2) In the following portions of the Metropolitan Los Angeles Intrastate Region, this section is rescinded:

(i) Ventura County APCD.

* * * * *

5. Section 52.252 is amended as follows:

§ 52.252 Control degreasing operations.

(a) * * *

(b) * * *

(2) In the following portions of the Metropolitan Los Angeles Intrastate Region, this section is rescinded:

(i) Ventura County APCD.

* * * * *

6. Section 52.253 is amended as follows:

§ 52.253 Metal surface coating thinner and reducer.

(a) * * *

(b) * * *

(2) In the following portions of the Metropolitan Los Angeles Intrastate Region, this section is rescinded:

(i) Ventura County APCD.

* * * * *

7. Section 52.273 is amended as follows:

§ 52.273 Open burning.

(a) * * *

(2) Los Angeles Metropolitan Intrastate Region:

(i) Ventura County APCD.

(A) Paragraph (A) (1) of Rule 56.

* * * * *

[FRL 777-2]

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Amendments to Subpart D; Correction

AGENCY: Environmental Protection Agency.

ACTION: Correction.

SUMMARY: This document corrects the final rule that appeared at page 51397 in the FEDERAL REGISTER of Monday, November 22, 1976 (FR Doc. 76-33966).

EFFECTIVE DATE: August 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Don R. Goodwin, Emission Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, N.C. 27711, Telephone No. 919-541-5271.

Dated August 8, 1977.

EDWARD F. TUERK,
Acting Assistant Administrator, for Air and Waste Management.

In FR Doc. 76-33966, §§ 60.45(f)(4) and 60.45(f)(5) on page 51399 are corrected as follows:

§ 60.45 [Amended]

1. In § 60.45(f)(4)(iii) "F_c=0.384 scm CO_2/J" in the fourth line is corrected to read "$F_c=0.384\times10^{-7}$ scm CO_2/J."

2. In § 60.45(f)(4)(iv) a left parenthesis is inserted in the second line between "dscm/J" and "8,740."

3. § 60.45(f)(4)(v) is corrected to read as follows:

§ 60.45 Emission and fuel monitoring.

* * * * *

(f) * * *

(4) * * *

(v) For bark $F=2.589\times10^{-7}$ dscm/J (9,640 dscf/million Btu) and $F_c=0.500\times10^{-7}$ scm CO_2/J (1,860 scf CO_2/million Btu). For wood residue other than bark $F=2.492\times10^{-7}$ dscm/J (9,280 dscf/million Btu) and $F_c=0.494\times10^{-7}$ scm CO_2/J (1,840 scf CO_2/million Btu).

* * * * *

4. In § 60.45(f)(5) the F factor and F_c factor equations in SI units are corrected to read as follows:

$$F=10^{-6}\frac{[227.2\ (\text{pct. H})+95.5\ (\text{pct. C})+35.6\ (\text{pct. S})+8.7\ (\text{pct. N})-28.7\ (\text{pct. O})]}{\text{GCV}}$$

$$F_c=\frac{2.0\times10^{-6}\ (\text{pct. C})}{\text{GCV}}$$

(Sec. 111, 114, 301(a) of the Clean Air Act as amended (42 U.S.C. 1857c-6, 1857c-9, 1857g(a)).)

[FR Doc.77-23402 Filed 8-12-77;8:45 am]

Title 43—Public Lands: Interior

CHAPTER I—BUREAU OF RECLAMATION, DEPARTMENT OF THE INTERIOR

PART 423—1976-77 DROUGHT LOANS, GRANTS, AND DEFERMENTS

Rules for Emergency Loans, Grants, and Deferments Under the Emergency Drought Act of 1977

AGENCY: Bureau of Reclamation, Interior.

ACTION: Final rules.

SUMMARY: These rules amend the rules published on April 14, 1977, in 42 FR 19610 to provide guidelines on the implementation of the Bureau of Reclamation Emergency Drought Act of 1977, approved April 7, 1977. This legislation allows qualified applicants to obtain loans, grants, and deferments to remedy the effects of actual or prospective substantial economic injury resulting from the 1976-77 drought. Areas eligible for assistance may be designated by the President or by the Secretary of the Interior. The program authorizes short-term studies and actions to increase water supplies; makes funds available for loans for the purpose of undertaking construction, management, conservation activities, or the acquisition and transportation of water which can be expected to have an effect in mitigating losses and damages resulting from the 1976-77 drought period, and provides authority to establish a water bank of available water for redistribution.

DATES: These rules are effective on publication and expire on September 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Eugene Hinds, Bureau of Reclamation, Department of the Interior, Washington, D.C. 20240 (202-343-5104).

SUPPLEMENTARY INFORMATION: These amendments bring the rules into conformity with the Memorandum of Understanding between the Bureau of Reclamation, Department of the Interior, and the Farmers Home Administration, Department of Agriculture, entered into on July 15, 1977. That agreement and these rules provide for the aid available under the Act to individual irrigators, as defined in Section 3(b) of the Act. A new § 423.22 has been added to govern applications by individual irrigators.

Section 5 of the Act provides that actions taken pursuant thereto are in response to emergency conditions. To effect their prompt implementation, it has been decided not to publish the rules in proposed form for public comment. However, the public may submit comments for consideration in possible future revisions.

Section 5 further provides that such actions are not a major Federal action significantly affecting the quality of the human environment for the purposes of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(c)).

This document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and Office of Management and Budget (OMB) Circular A-107.

The primary author of this document is Kerry McDonald, Attorney Advisor, Office of the Solicitor, Department of the Interior, Washington, D.C. 20240 (202-343-6980).

Under authority of Pub. L. 95-18, it is proposed to amend Subtitle B, Chapter I, Title 43 of the Code of Federal Regulations by amending Part 423, Subpart A, as set forth below.

Section 423.3 (following the caption) is amended to read as follows:

§ 423.3 Applicant eligibility.

(a) Irrigators in an area that has been determined by the President and/or the Secretary of the Interior to be an emergency drought impact area are eligible for loans and/or deferments. An irrigator is any person or legal entity who holds a valid existing water right for irrigation purposes within Federal reclamation projects or within projects constructed by the Secretary for Indians.

(b) Applications for assistance by individual irrigators shall be governed by § 423.22.

Section 423.4 is further amended by adding subsection (i) and (j) as follows:

§ 423.4 Definitions.

* * * * *

(i) Secretary's designee—Commissioner or whomever the Commissioner designates.

(j) Federal Reclamation Project—Any project constructed or funded under federal reclamation law and specifically including projects having approved loans under the Small Reclamation Projects Act of 1956 (70 Stat. 1044) as amended.

Section 423.15 (following the caption) is amended to read as follows:

§ 423.15 Eligibility.

Entities which qualify as irrigators under § 423.3 and which operate and maintain irrigation facilities constructed by the Bureau of Reclamation under contract with the United States are eligible for loans under this section. In addition, projects financed through loans pursuant to the Small Reclamation Projects Act of 1956 (70 Stat. 1044) as amended and irrigation projects financed with non-Federal funds are eligible: *Provided, however*, That each non-federally funded project may receive a loan of not more than $1 million, and only 15 percent of the total funds available under this authority may be used for non-federally funded projects.

Section 423.22 is added and reads as follows:

§ 423.22 Procedures for processing applications by individual irrigators for assistance.

Procedures for processing applications for assistance by individual irrigators who are eligible under § 423.3 have been agreed upon in a Memorandum of Understanding between the Bureau of Reclamation (BR) and the Farmers Home Administration (FmHA), Department of Agriculture, dated July 15, 1977. Those procedures as set forth in the Memorandum are as follows:

(a) "Irrigators" are persons or legal entities who hold a valid existing water right for irrigation purposes within Federal reclamation projects. Federal reclamation projects means any project constructed or funded under Federal reclamation law and specifically including projects having approved loans under the Small Reclamation Projects Act of 1956, as amended.

(b) FmHA shall make and service loans to individual irrigators as authorized by the Act pursuant to its SW program and applicable FmHA regulations except as modified hereby.

(c) The loans shall be only for the purposes relating specifically to irrigation and set forth in FmHA Instructions 443.2, IV A 1, A 8, B 1, B 2, and C. The loans shall be interest free. Loans for water acquisition and transportation shall be repaid over a period not to exceed 5 years. Other loans shall be repaid over a period not to exceed 5 years except such loans which generate benefits which are usable beyond 1977 shall be repaid within a period which shall be the shorter of the estimated useful life of the facilities or the reasonable payment capacity of the irrigator but in no event to exceed 40 years. All loans shall be obligated not later than September 30, 1977, and any construction related to any loan must be completed by November 30, 1977.

(d) Services rendered by FmHA pursuant to this Memorandum of Understanding shall be on a nonreimbursable basis to the irrigator. For services rendered, BR shall pay to FmHA a charge of 5 percent of principal of each loan. BR directs that FmHA disburse such service charge to itself directly upon the closing of each loan.

(e) Three million dollars shall be transferred to FmHA by Standard Form 1151, which amount shall be available for construction, management, and conservation activities. An additional sum of $5 million may be made available upon request of FmHA for the acquisition and transportation of water.

(f) Monthly report: FmHA shall submit a Standard Form 133, Report on Budget Execution, in accordance with OMB Circular A-34, to the Bureau of Reclamation, Washington, D.C. 20240, attention code 370.

(g) Accomplishment: FmHA shall submit to the Bureau of Reclamation, Washington, D.C. 20240, attention code 400, a complete report on expenditures and accomplishments under this Memorandum on January 16, 1978.

Dated: August 10, 1977.

CECIL D. ANDRUS,
Secretary of the Interior.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20665; RM-2224]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations in Hay Springs-Scottsbluff, Nebr.

Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: This Report and Order in Docket 20065 reassigns television Channel 4 in the Table of TV Assignments from Hay Springs, Nebraska, to Hay Springs-Scottsbluff, Nebr. This will permit consideration of an application by the licensee of a station on Channel 4 to change its city of license from Hay Springs to Scottsbluff.

EFFECTIVE DATE: September 15, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Jonathan David, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: August 2, 1977.

Released: August 9, 1977.

By the Chief, Broadcast Bureau:

In the Matter of Amendment of Section 73.606(b), Table of Assignments, Television Broadcast Stations. (Alliance, Hay Springs, and Scottsbluff, Nebr.).

1. The Commission has before it a "Notice of Proposed Rule Making" (39 FR 19239), in this proceeding proposing to make VHF Channel 4, now assigned to Hay Springs, Nebr., a "hyphenated" assignment. The three alternative forms of hyphenation proposed were:

City	Plan I, channel No.		Plan II, channel No.		Plan III, channel No.	
	Present	Proposed	Present	Proposed	Present	Proposed
Alliance	*13-	*12-	*13-	*13-	*12-	*13-
Hay Springs	4+	-----	4+	-----	4+	-----
Scottsbluff	10-	10-	10-	10-	10-	10-
Scottsbluff-Hay Springs	-----	4+	-----	-----	-----	-----
Alliance-Hay Springs	-----	-----	-----	4+	-----	-----
Scottsbluff-Alliance-Hay Springs	-----	-----	-----	-----	-----	4+

2. Duhamel Broadcasting Enterprises, the licensee of Hay Springs Station KDUH-TV sought (Plan I) to have the channel reassigned on a hyphenated basis to permit a change in city of license from Hay Springs to Scottsbluff and a relocation of the main studio, now near Hay Springs, to Scottsbluff, 120 kilometers (75 miles) southwest of Hay Springs. Wyneco Communications, Inc., licensee of VHF television Station KSTF, Scottsbluff, Nebr., opposed Duhamel's rule making petition and submitted a counterproposal to move it to Alliance, Nebr. Since there is no interest in any such use at Alliance, the two plans (II

and III) involving hyphenated Alliance assignments need not be discussed.

3. Our Notice observed that no change of the Channel 4 transmitter site, now located between Hay Springs and Scottsbluff, was involved and we proposed that any change in the city of license be conditioned on maintaining an auxiliary studio at Hay Springs.[1] Duhamel, in its rule making petition, had agreed to this.

4. Duhamel's Hay Springs station and Wyneco's Scottsbluff station are the only commercial[2] television facilities serving the western Nebraska panhandle, and they occupy the only two commercial television channels assigned in that area. Duhamel's Hay Springs station is a satellite of Station KOTA-TV, Rapid City, South Dakota, approximately 161 kilometers (100 miles) north of Hay Springs. Wyneco's Station KSTF, Scottsbluff, is a satellite of Station KYCU-TV, Cheyenne, Wyo.[3] Hay Springs' 1970 population of 682 represented a 17.1% decrease from the 823 total in 1960 and Sheridan County (1970 population 7,285), also experienced a sharp decline (19.5%) in population between 1960 and 1970. On the other hand, Scottsbluff (1970 population 14,507) and Scotts Bluff County (1970 population 36,432) each gained population between 1960 and 1970, at rates of 8.4% and 7.8%, respectively.

5. Station KDUH-TV moved its transmitter site from the vicinity of Hay Springs to its present location and erected a 610 meter (2,000 foot) "tall tower" so that it could obtain the support of a group of communities and the coverage of a larger population to provide the funds necessary to implement the programming responsive to the needs and interests of the area. With these facilities, for the first time KDUH-TV provided a predicted principal city signal to Scottsbluff. Duhamel sought authority to move the KDUH-TV main studio from Hay Springs to Scottsbluff, but after it was granted waiver to permit it to identify the station with Alliance and Scottsbluff as well as Hay Springs, it requested dismissal of its main studio relocation application.

6. Both Duhamel and Wyneco have adhered to the basic postures they took in their earlier filings, focusing on the economic condition of Station KDUH-TV which was thought to be of "decisional significance." However, we have concluded that this issue does not need to be and, in fact, should not be resolved in this context. Rather, arguments regarding the survival of Channel 4 as a local television outlet for the Nebraska panhandle can be better considered in connection with the application to change station location.[4] Hence, no extensive discussion of the topic is warranted here, but we do observe that the differences of opinion are substantial and have been vociferously pursued. We shall consider the other points which were discussed in the filings of Duhamel and Wyneco which do require discussion.

7. In support of a reassignment, Duhamel points to the fact that the bulk of the population and retail sales in KDUH-TV's service area are located around Scottsbluff. Duhamel argues that it needs better access to this population center and that in small markets advertisers often prefer to appear on the air to show his products live, something which is a problem due to the remoteness of the KDUH-TV studios. Duhamel states that as an "area-wide" station it needs to locate its main studio where the station's main economic support exists, and it contends that its proposal should be accepted as a "logical extension" of the "area-wide" station concepts advanced when changing site.

8. In response, Wyneco contends that Duhamel is trying to abandon Hay Springs for Scottsbluff pointing to KDUH-TV's expansion of facilities, its tri-city ID, and its earlier application for main studio relocation. Wyneco argues that the proposed reassignment and main studio change to Scottsbluff would foreclose Duhamel's continuing to provide a meaningful local service for Hay Springs. It asserts that Duhamel has provided no details regarding programming that an auxiliary Hay Springs studio would provide and asserts that the Hay Springs area would have to look to Scottsbluff for effective service and that the shift would remove the only local television outlet now available to several area communities in northwest Nebraska and southwest South Dakota.

9. The Association of Maximum Service Telecasters, Inc. ("AMST") and the Hilliard Company ("Hilliard"), licensee of AM Station KOLT, Scottsbluff, also filed formal comments. AMST's only concern is with avoiding any infringement of the Commission's mileage separation requirements. No such infringement is involved. Hilliard objects on the ground that a move to Scottsbluff would reduce the revenue raising abilities of stations in the Scottsbluff area. However, a rule making is not the appropriate place to raise what amounts to a Carroll issue—see fn. 4.

10. Duhamel seeks a hyphenated assignment to enable it to select Scottsbluff, Nebraska, as its new city of license. The hyphenated assignment is a separate matter which can be resolved in rule making, but the proposal to change the city of license can be done by application, and we can proceed with hyphenation without resolving the other issue now.[5] If we were inclined toward effecting a change in station location now, there is a serious question about whether such a modification of license to change city would be an appropriate step to take in rule making. See the recent Report and Order in Santa Ana, Calif., Docket No. 20727 (FCC 77-543) where the assignment was changed in rule making but the petitioner was directed to seek the desired change in station location by application.

11. In endeavoring to allocate television assignments in a fair, efficient, and equitable manner, we give recognition to the need for local service. When a change in an assignment could result in a loss of a community's only station, we look to be sure that the proponent has carried its burden to show that the public interest nonetheless would be served. In granting Station KDUH-TV authority to expand its facilities, we recognized that the transmitter site move would extend an alternative television signal to a greater number of people and would enhance the station's economic condition. Much of what Duhamel seeks and Wyneco dislikes has in effect already happened. With this in mind, there is all the more reason to allow consideration of whether a town of less than one thousand, losing considerable population, must remain the city of license. We believe that Duhamel has provided a sufficient basis to permit consideration of such a change, and therefore find that the adoption of Plan I would serve the public interest.

12. Accordingly, *it is ordered*, That Section 73.606(b) of the Commission's Rules IS AMENDED, insofar as the listed community is concerned, as follows, effective September 15, 1977:

	Channel No.
City: Hay Springs-Scottsbluff, Nebr.	4+

13. Authority for the adoption of the amendment contained herein appears in Sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules and Regulations.

14. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303).

FEDERAL COMMUNICATIONS COMMISSION,

WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc.77-23458 Filed 8-12-77;8:45 am]

[1] Scottsbluff already receives principal city coverage from Station KDUH-TV, and the Commission, in authorizing the site change, waived the city coverage requirements for Hay Springs, requiring Duhamel to install and maintain sufficient translators to serve those viewers who lost such servce as a result of the transmitter move.

[2] Educational VHF television Stations KTNE-TV, Alliance, and KRNE-TV, Merriman (80 kilometers (50 miles) northeast of Hay Springs) also serve the panhandle area.

[3] Duhamel has another satellite station at Lead, S. Dak., and Wyneco has another satellite at Sterling, Colo.

[4] As with "Carroll" issues, we believe that rule making does not offer the proper setting for resolving such disputes.

[5] Although the point was not emphasized in the Notice, we did point out in paragraph 28 that hyphenation is an assignment tool used "where it seemed best to postpone until the application * * * stage any unresolved * * * questions as to which of the communities warranted the assignment." While Hay Springs may not be the usual example of such a case, it does fit this test.

[Docket No. 20727; RM-2557; FCC 77-543]

PART 73—RADIO BROADCAST SERVICES

TELEVISION BROADCAST STATIONS IN RIVERSIDE AND SANTA ANA, CALIFORNIA

Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: This action assigns TV Channel 40 to Santa Ana, California, as a first commercial TV channel in that community. It also deletes the assignment of the same channel from Riverside, California, and its utilization by Station KLXA at Fontana, California, under the 15-mile rule. The licensee of Station KLXA was denied modification of its license on a permanent basis so that other interested persons may apply for this new commercial station at Santa Ana, Calif.

EFFECTIVE DATE: Non/Applicable at this time.

FOR FURTHER INFORMATION CONTACT:

Mark N. Lipp, Broadcast Bureau. (202-632-7792).

SUPPLEMENTARY INFORMATION: A separate Order will be issued upon receipt of Mexican approval.

Adopted: July 27, 1977.

Released: August 9, 1977.

By the Commission: Commissioner Washburn absent.

1. Before the Commission for consideration is the Notice of Proposed Rule Making[1] (41 FR 9568), released February 26, 1976, which proposed the assignment of UHF TV Channel 40 to Santa Ana, Calif., and the deletion of the same channel from Riverside, Calif., but which denied a request by petitioner, International Panorama TV, Inc., licensee of Station KLXA-TV (Channel 40), Fontana, Calif.,[2] to have its license modified to specify the community of Santa Ana. Comments have been filed by petitioner and by Golden Orange Broadcasting Co., Inc., permittee of UHF TV Station KGOF (Channel 56), Anaheim, Calif.

2. Santa Ana (pop. 155,762),[3] the seat of Orange County (pop. 1,420,676) is located approximately 53 kilometers (33 miles) southeast of Los Angeles. It has no local commercial TV service and its only TV assignment, Channel 50, is reserved for noncommercial use and licensed to serve Huntington Beach, Calif., under section 73.607(b) of the Commission's Rules. Orange County has one other TV assignment, Channel 56, Anaheim, Calif. (permit issued to Golden Orange Broadcasting Co., Station KGOF).

3. Riverside (pop. 140,089) is the seat of Riverside County (pop. 459,074). It has two UHF TV channel assignments, 40 and 46. Channel 40, presently licensed to serve Fontana, is the subject of this proceeding. Fontana (pop. 20,673) is located in San Bernardino County (pop. 682,233). It has no TV channel assignments listed in the Table. The other Riverside assignment, Channel 46, is used by Station KBSA, which is licensed to serve Guasti, Calif., under section 73.607(b) of the Commission's Rules.

4. In order to put this case into perspective, we here set out some of the background leading up to the Notice. Petitioner became the licensee of Channel 40 in August 1974.[4] Its predecessor already had been granted permanent authority to operate with the main studio at North Hollywood rather than at Fontana, the city of license.[5] Petitioner later moved its studio from North Hollywood to Santa Ana, but this was done without obtaining prior Commission approval as required by section 73.613(b), and the Commission imposed a forfeiture of $5,000, *International Panorama TV, Inc.*, 52 F.C.C. 2d 258 (1975). Thereafter the Commission, in a letter to petitioner dated March 25, 1975, granted temporary authority for a main studio location at Santa Ana, provided a petition to have Channel 40 reassigned to that community were filed.

5. In the Notice issued in response to this petition, we agreed to consider reassigning Channel 40 to Santa Ana, but we refused to propose a modification of petitioner's license to specify Santa Ana as it also had requested. Instead, we stated that if the channel assignment were made, petitioner, along with any other interested persons, could file applications for the channel. Santa Ana has no commercial television station and Channel 40 would become the first one available to that community. In such cases we concluded that the addition of the channel called for permitting other filings, something all the more important when the channel was the first one to be assigned to the community.

6. In rejecting the license modification approach, the Notice cited four cases[6] which related to what action the Commission should take when a frequency becomes available for the first time to a community. Our view was that the proper procedure to follow in such cases is to allow applications to be filed under section 309(a) of the Communications Act of 1934, as amended, and we found no contrary authority in the cited cases. Petitioner emphasizes that it did not intend any such change in the character of the service rendered to its coverage area as a whole, and therefore, insists that its license should be modified to reflect the change in the Table. Not only does petitioner dispute any view that a reading of these cases would lead us to conclude that modification would be inappropriate here, but it asserts that we overlooked a case, *Henderson, Nev.*, 24 R.R. 1530 (1962), where the licensee requested a change in community designation without a change in facilities and where the Commission did modify the license to specify the larger city of Las Vegas, Nev. Petitioner argues that it also seeks such a change in location to a more desirable community in order to survive against existing competition.[7] Petitioner cites these and several other cases in an effort to demonstrate that the Commission has the authority in a case such as this to modify pursuant to a request under Section 316(a) without issuing a show cause order.

7. One of the key elements in the question of the possible modification of license was the applicability of the *Ashbacker* doctrine to the present case. Petitioner argues that since it is presently occupying Channel 40 and no new service is proposed, there is no rational basis for permitting a competing application to be filed. Petitioner concedes that the *Ashbacker* doctrine ordinarily does have applicability where a new frequency becomes available to a community but argues that the doctrine does not suggest that situations be created so that competing applications can be filed.

8. Petitioner argues that if we modified its license to specify Santa Ana, we would be merely permitting the station to conform to the realities of its existing operation by having the main studio at the city of license, and it notes in passing that other stations designated to Riverside have moved closer to Los Angeles.[8] Petitioner asserts that it would not be entering a new market but would be continuing to meet the needs of its present service area. Moreover, petitioner states that it operates a station with religious programming which serves a special need of the Los Angeles area, an effort which

[1] The Commission previously denied by Memorandum Opinion and Order a petition for reconsideration of the Notice on May 25, 1976, FCC 76-486, Mimeo 40744.

[2] Channel 40 is assigned to Riverside and petitioner's station is licensed to serve Fontana under the "15-mile" rule (section 73.607(b) of the Commission's Rules).

[3] All population data are taken from the 1970 U.S. Census, as corrected.

[4] Petitioner states that the Trinity Broadcasting Network, Inc., purchased the stock of International Panorama TV, Inc., from Angel Lerma Maier on August 2, 1974.

[5] The move of the main studio to North Hollywood from Fontana was approved on November 10, 1972. The transmitter site is located on Mount Wilson, approximately 64 kilometers (40 miles) west of Fontana and 64 kilometers (40 miles) north of Santa Ana. Santa Ana is located approximately 56 kilometers (35 miles) southwest of Fontana.

[6] *Community Telecasting Co.* v. *F.C.C.*, 255 F. 2d 891 (D.C. Cir. 1958), *Community Broadcasting Co.* v. *F.C.C.*, 274 F. 2d 753 (D.C. Cir. 1960), *Rhode Island Telecasting Corp.* v *F.C.C.*, 320 F. 2d 762 (D.C. Cir. 1963) and *Louisiana Television Broadcasting Corp.* v. *F.C.C.*, 347 F. 2d 808 (D.C. Cir. 1965).

[7] Petitioner also referred to *Modesto and Stockton, Calif.*, 4 F.C.C. 2d 839 (1966), but that case only involved a change in channel, not station location as is involved here

[8] Petitioner notes that the licensee of Channel 46, assigned to Riverside and licensed to Guasti, Calif., has permanent authority to locate its studio at Los Angeles and the licensee of Channel 52 assigned and licensed to Corona, Calif., has permanent authority for a Los Angeles studio.

has been well supported by area residents.[9]

9. As to the appropriateness of reassigning the channel from Fontana to Santa Ana, petitioner stated that Fontana has never supported its station even when the main studio was located there. Furthermore, it noted that service to Fontana could be provided through the assignment of Channel 62 which could be made available in accordance with the Commission's minimum mileage separation requirements. Santa Ana is described by petitioner as the 10th largest community in California and the 88th largest in the United States. As stated in the Notice, the community is a major manufacturing, agricultural and retail sales center. Orange County, although contiguous to Los Angeles, is independent economically, socially, and governmentally.

10. In opposition, Golden Orange Broadcasting Co. argues that Channel 40 should not be reassigned to Santa Ana. Although it does not contest the assertion that Station KLXA-TV lost money under its previous operation when located in Fontana, it argues that no showing was made that the reason for the losses were the lack of support for a TV station there. On the contrary, Golden Orange believes that Channel 40's Spanish programming format, which now has been superseded, could have been a factor. Further, it contends that the proposed move only serves the private interest and convenience of petitioner, not that of the public. But, in any event, Golden Orange asserts that its own operation, when inaugurated, would respond to the need for additional local TV service in Orange County, and that the requested Santa Ana station would be merely another Los Angeles metropolitan station. This it said was a fact which specifically concerned the Commission when it assigned Channel 56 to Anaheim and announced that any TV station licensed to Orange County must provide local service and not operate as an additional Los Angeles station. Finally, Golden Orange complains that an additional TV station in Orange County could "provide a substantial economic threat to the ability of Golden Orange to operate its station successfully".

11 We believe that an adequate showing of need for a first local commercial TV station at Santa Ana has been made. The community is large and growing, with interests distinct from the central city of Los Angeles. Allegations regarding the potential economic impact on the proposed Anaheim station can more appropriately be considered in connection with the filing of an application for a station on Channel 40 at Santa Ana. With respect to the issue of the loss of local service at Fontana, we note that no interest has been expressed in the operation of a local TV station there, and that Channel 62 is available for assignment should such an interest arise in the future. As for Riverside, where Channel 40 is presently assigned, a recent proceeding to assign a VHF-TV channel there was dismissed for lack of an expression of interest. See *Riverside and San Bernardino, Calif.*, Docket No. 19742, 40 Fed. Reg. 51038 (1975). However, if an interest does develop, Channel 62 is available for assignment at Riverside. In view of the lack of demonstrated need for local commercial TV service at either Fontana or Riverside and the interest expressed at Santa Ana, we believe the public interest would be served by the assignment of Channel 40 to Santa Ana and the deletion of that channel from Riverside.

12. The answer to the question of whether to modify petitioner's license rather than open the channel to other filings depends on a reading of our authority under section 316 in the context of the *Ashbacker* doctrine. In *Ashbacker Radio Corp. v. F.C.C.*, 326 U.S. 327 (1945), the Supreme Court held that the Commission could not grant one application for an available frequency without first giving comparative consideration to other mutually exclusive applications filed for the frequency. The Commission could not, in the Court's opinion, make the requisite public interest finding as to which applicant was the best qualified to render the best service without a hearing in which all mutually exclusive applications are given comparative analysis. Since the case involved the use of an AM frequency, no amendment to the Commission's rules was necessary to establish the availability of the particular frequency. However, in administering the channels set aside for television use, the assignments are made through a Television Table of Assignments which designates those channels which are available to the various communities. Thus, the assignment of a particular TV channel to a community presents the first and only opportunity (other than filing against a renewal application) for those interested in serving that community to apply for the channel. If we were to adopt petitioner's urgings, we would be selecting a Santa Ana licensee without ever having permitted a choice to be made between applicants for that particular community. This opportunity for competing filings is not only required under *Ashbacker* but in policy terms alone is preferable because it allows us to select the applicant which will best serve the public interest. No public interest justification has been offered for adopting an approach which would foreclose the opportunity for such comparative analysis. We believe that the *Ashbacker* case reasoning applies to the instance facts where the petitioner proposes a change in its studio location and has announced its intention to no longer serve Fontana, and in fact to all cases where, in response to a petition, an assignment becomes available for the first time in a community. See, e.g., *Community Broadcasting Co., Inc. v. F.C.C., supra.*

13. Nor, contrary to petitioner's argument, do the cases cited in the Notice support a different conclusion here. Thus, in none of the cases cited on which modification was permitted did the petitioner propose to cease providing a transmission service to its formerly specified community of license. Rather, in each case it was found (either in light of specific representations that the petitioner would continue to be primarily responsible for providing for the needs of that community and/or retention of the main studio in the community) that such service would continue. See *Community Telecasting Co. v. F.C.C., supra; Rhode Island Television Corp. v. F.C.C., supra;* see also *Henderson, Nev.*, 24 R.R. 1530 (1962). The critical distinction, therefore, is whether or not there is a continuation of meaningful service to the community of license and not, as petitioner would urge, of existing facilities or service area.

14. Therefore we believe that our refusal to modify pursuant to delegated authority was not only proper, but was required. We also should point out that we have previously offered guidance on the related point of the implications of the substitution of a Class C FM channel for a Class A channel in the same community.[10] Those cases follow lines parallel to the ones we are following here. In sum, petitioner has not convinced us that there are compelling reasons to permit it to shift its operation to a new community in a manner which would exclude others who may wish to submit an application for the channel now being assigned to Santa Ana. Although twice put on notice as to our view that it would be necessary to allow the filing of competing applications, petitioner did not indicate that it would rather withdraw its proposal if its license were not modified along with the reassignment of Channel 40. Therefore, we are proceeding to reassign the channel as requested even though we are not modifying the station's license.[11]

15. Accordingly, *it is ordered*,[12] That the Television Table of Assignments (section 73.606(b) of the Commission's Rules) is amended with respect to the following communities:

City:	Channel No.
Riverside, Calif.	46
Santa Anna, Calif.	

16. Authority for the action taken herein is found in sections 4(i), 5(d)(1), 303 (g) and (r) and 407(b) of the Communications Act of 1934, as amended.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[Docket No. 20496]

PART 76—CABLE TELEVISION SERVICES

Modifying or Eliminating the Use of Signal Strength Contours for Purposes of Cable Television Systems Regulation; Correction

AGENCY: Federal Communications Commission.

ACTION: Erratum to rule change.

SUMMARY: A rule change was adopted on July 7, 1977, which included a change in cable television syndicated program exclusivity rules. The erratum corrects a designation for one paragraph, clarifies that certain material immediately following the amended language remains unchanged, and substitutes correct terminology recently adopted in cable regulation. The erratum has no substantive changes.

EFFECTIVE DATE: August 26, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Tom Hendrickson, Cable Television Bureau (202-632-6468).

Released: August 9, 1977.

In the matter of amendment of Part 76 of the Commission's rules and regulations to modify or eliminate the use of signal strength contours for purposes of cable televisions systems regulation.

In the First Report and Order in the above-entitled matter, FCC 77-480 published in the FEDERAL REGISTER at 42 FR 36831, Instruction 4 of Appendix A should be revised by substituting the phrase "community unit" in paragraphs (a) and (b) in place of the phrase "cable television system"; and redesignating the paragraph following the "NOTE" from (1) to: (i), and paragraph (ii) of the "NOTE" and all of NOTE 2 are retained without change.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.77-23459 Filed 8-12-77;8:45 am]

[9] Petitioner informs us that after taking control in August 1974, it changed the station's programming from all Spanish to religious and at the same time made a series of technical improvements. Petitioner states that its viewers supported this effort by donating over 2.5 million dollars during three fund-raising telethons. In addition, we are told, that over 1 million dollars in revocable trust funds have been committed by its viewers. These figures are set forth to inform us about what could be jeopardized if other applications were accepted.

[10] See *Cheyenne, Wyo.*, 62 F.C.C. 2d 63 (1976); *Mitchell, S. Dak.*, 62 F.C.C. 2d 70 (1976); and *Crestview and Fort Walton Beach, Fla.*, 62 F.C.C. 2d 76 (1976).

[11] Our action here is not intended to grant permanent or interim authority to operate as a Santa Ana station. Those matters are to be considered based on the filing of appropriate applications.

[12] This action is being taken subject to receipt of concurrence from the Mexican government. Upon obtaining the concurrence, an Order will be released announcing the effective date of this action and termination of this proceeding.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Seedskadee National Wildlife Refuge, Wyoming, to Public Hunting of Antelope

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to public hunting of Antelope on Seedskadee National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 3, 1977, through September 30, 1977.

H. J. Johnson, Refuge Manager, Seedskadee National Wildlife Refuge, Fontenelle Route, Via Kemmerer, Wyoming 83101, area code 307-877-6334.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special Regulations; big game; for individual wildlife refuge areas.

Public hunting of Antelope is permitted on Seedskadee National Wildlife Refuge, Wyoming. All of the refuge area, comprising 14,284 acres, and so designated by signs, is open to hunting. Maps of the area are available at the refuge office, Fontenelle Route, Via Kemmerer, Wyoming 83101 and from the office of the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, CO 80225. Hunting shall be in accordance with all applicable State regulations governing the hunting of Antelope.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

AUGUST 5, 1977.

H. J. JOHNSON,
Refuge Manager.

PART 32—HUNTING

Opening of Seedskadee National Wildlife Refuge, Wyo., to Public Hunting of Cottontail Rabbits

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to public hunting of Cottontail Rabbits on Seedskadee National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 1, 1977, through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

H. J. Johnson, Refuge Manager, Seedskadee National Wildlife Refuge, Fontenelle Route, Via Kemmerer, Wyo. 83101, Area Code 307-877-6334.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special Regulations; upland game; for individual wildlife refuge areas.

Public hunting of Cottontail Rabbits is permitted on Seedskadee National Wildlife Refuge, Wyo. All of the refuge area, comprising 14,284 acres, and so designated by signs, is open to hunting. Maps of the area are available at the refuge office, Fontenelle Route, Via Kemmerer, Wyoming 83101 and from the office of the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Col. 80225. Hunting shall be in accordance with all applicable State regulations governing the hunting of Cottontail Rabbits.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

H. J. JOHNSON,
Refuge Manager.

PART 32—HUNTING

Opening of Seedskadee National Wildlife Refuge, Wyo., to Public Hunting of Moose

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to public hunting of Moose on Seedskadee National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 24, 1977, through October 31, 1977.

FOR FURTHER INFORMATION CONTACT:

H. J. Johnson, Refuge Manager, Seedskadee National Wildlife Refuge, Fontenelle Route, Via Kemmerer, Wyo. 83101, Area Code 307–877–6334.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special Regulations; big game; for individual wildlife refuge areas.

Public hunting of Moose is permitted on Seedskadee National Wildlife Refuge, Wyo. All of the refuge area, comprising 14,284 acres, and so designated by signs, is open to hunting. Maps of the area are available at the refuge office, Fontenelle Route, Via Kemmerer, Wyoming 83101 and from the office of the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colo. 80225. Hunting shall be in accordance with all applicable State regulations governing the hunting of Moose.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

H. J. JOHNSON,
Refuge Manager.

CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 216—REGULATIONS GOVERNING THE TAKING AND IMPORTING OF MARINE MAMMALS

Incidental Taking of Marine Mammals and Importation of Yellowfin Tuna and Tuna Products

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Final rulemaking.

SUMMARY: The amendment will establish an increased allowable take and mortality of whitebelly spinner dolphin and finalize portions of the interim final amendments published in the FEDERAL REGISTER on May 16, 1977 (42 FR 24742).

EFFECTIVE DATE: August 15, 1977.

ADDRESSES: Comments or questions may be directed to Director, National Marine Fisheries Service, Washington, D.C. 20235.

FOR FURTHER INFORMATION CONTACT:

W. P. Jensen, Marine Mammal and Endangered Species Division, National Marine Fisheries Service, Washington, D.C. 20235 (202–634–7287)

SUPPLEMENTARY INFORMATION: The National Marine Fisheries Service published proposed rules in the FEDERAL REGISTER on June 9, 1977 (42 FR 29533), proposing an increase in the quota for whitebelly spinner dolphin from 7,840 to 11,219. The 1977 general permit issued to the American Tunaboat Association on April 15, 1977, was proposed to be amended in a similar fashion. The basis for the increased quota was a revision of the population estimate for whitebelly spinner from 549,000 to 690,000. One comment was received. It opposed the proposed increase, questioning whether the increase complied with the Act's ethical goal to reduce incidental mortality regardless of compliance with the scientific goal of the Act (OSP). The Director's decision published in the FEDERAL REGISTER on March 1, 1977 (42 FR 12015–12020), was to establish a quota at 7,840 based on the mid-point estimates of population and reproductive capacity of the stock. The 11,219 quota is based on the mid-point estimate of the revised population increase. Because the aggregate porpoise mortality limit for 1977 is still far below the 1976 quota, NMFS believes that this amendment is consistent with the purposes of the Act to reduce incidental mortality.

On May 16, 1977 (42 FR 24742), interim final rules were published, effective immediately, to amend the regulations affecting importations of yellowfin tuna, extend the date when an embargo would be effective and to further allow an extension of time for installation of fine mesh webbing on tuna purse seiners. Two comments were received regarding these amendments. One comment was directed toward the importation amendments and embargo date extension, and will be the subject of a separate notice regarding further proposed amendments to the importation regulations. A second comment did not oppose the amendments, but requested that a final limit be placed on allowed time extensions for installation of fine mesh webbing. The amended language provides for the granting of limited time extensions only and this is believed to be sufficient to insure full compliance with the fine mesh webbing requirement. Therefore the amendment set forth on May 16, 1977, regarding the granting of limited time extensions for installation of fine mesh webbing, is herein made final.

Accordingly, § 216.24 of the National Marine Fisheries Service marine mammal regulations (16 U.S.C. 216.24) is hereby amended as follows:

§ 216.24 [Amended]

1. Section 216.24(d)(i)(A) is amended to add, following the second sentence immediately after "in the general permit," the following clause: "except that the quota for spinner dolphin (Whitebelly) which may be taken in 1977 is limited to 2,120,000 taken; 1,402,000 encircled; and 11,219 killed."

2. Section 216.24(d)(2)(iv)(L) is amended by adding the following wording to the last sentence; "* * *, unless the Southwest Regional Director determines that the ordering of fine mesh webbing has been documented in accordance with paragraph (c)(5)(vi) but has not been delivered, or is not otherwise available to the vessel for installation, and that a limited time extension should therefore be granted."

Associate Director, National Marine Fisheries Service.

Title 41—Public Contracts and Property Management

CHAPTER 9—ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

PATENTS, DATA AND COPYRIGHTS

Final Regulations

Correction

In FR Doc. 77–19987 appearing at page 36120 in the issue for Wednesday, July 13, 1977, make the following corrections:

A. On page 36121, in the middle column, the paragraph numbered "4" should be changed to indicate that § 9–3.150–5 was removed and that §§9–3.151, 9–3.151–1, 9–3.151–2, 9–3.151–3, and 9–3.152 were added rather than revised. As corrected, paragraph 4 should read:

4. Revise §§ 9–3.150, 9–3,150–1 9–3.–150–2, 9–3.150–3, 9–3.150–4 to read as set forth below. Remove § 9–3.150–5. Add §§ 9–3.151, 9–3.151–1, 9–3.151–2, 9–3.152 to read as set forth below.

B. In § 9–9.102–2 on page 36125, under the heading "Patent Indemnity", in the second line, "$100,000" should read "$10,000".

CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

SUBCHAPTER G—TRANSPORTATION AND MOTOR VEHICLES

[FPMR Amdt. G–43]

PART 101–41—TRANSPORTATION DOCUMENTATION AND AUDIT

Audit of Payments for Transportation Services Furnished for the Account of the United States

Correction

In FR Doc. 77–20074 appearing at page 36671 as a Part IV in the issue for Friday, July 15, 1977 make the following corrections:

(1) On page 36674, the 9th entry under Subpart 101–41.8, change the table of contents entry now reading "101–41.805–3 Vouchers payable in foreign currency" to read "101–41.804–3 Combining payments due a single payee."

(2) On page 36680, first column, the last word in the section heading for § 101–41.208–4 now reading "* * * signed." should have read "* * * assigned."

(3) On page 36682, first column, in the 4th line of § 101–41.214–2(b), the word "access" should have read "excess".

(4) Also on page 36682, second column, in the 8th line of § 101–41.214–5(c), the word "initiated" should read "initialed".

(5) On page 36683, first column, at the end of the first line of paragraph (q) of § 101–41.302–1 insert the word "Transit" after the words "U.S. Government".

(6) On page 36684, third column, the second and third lines of § 101–41.304–1 are reversed and therefore should be switched.

(7) On page 36685, third column, in the section heading for § 101–41.305, the word "transmit" should read "transit".

(8) On page 36690, middle column, the 6th line from the bottom of § 101–41.503 should be deleted entirely.

(9) On page 36691, middle column, in the 7th line of § 101–41.603–2, the words "* * * paid by the carrier * * *" should have read "* * * paid the carrier * * *".

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 926]

TOKAY GRAPES GROWN IN SAN JOAQUIN COUNTY, CALIF.

Proposed Expenses, Rate of Assessment and Carryover of Unexpended Funds

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites written comment on proposed expenses of $140,642, a rate of assessment of eight cents per lug (23 pounds) of grapes for the functioning of the Industry Committee for the 1977–78 fiscal period, and approval to carry over unexpended funds from the previous fiscal period as a reserve. The Committee locally administers a Federal marketing order regulating the handling of Tokay grapes grown in San Joaquin County, Calif. The regulation would enable the Committee to collect assessments from handlers of all assessable grapes handled and to use the resulting funds for its expenses.

DATES: Comments must be received by September 2, 1977. Proposed effective dates: April 1, 1977, through March 31, 1978.

ADDRESS: Comments may be addressed to: Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Two copies of all written comments should be submitted, and they will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C., telephone 202–447–3545.

SUPPLEMENTARY INFORMATION: The proposal was submitted by the Industry Committee, established under marketing Order No. 926 (7 CFR Part 926), regulating the handling of Tokay grapes grown in San Joaquin County, Calif., under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), as the agency to administer its terms and conditions.

The proposal would add a new section reading as follows:

§ 926.217 Expenses, rate of assessment, and carryover of unexpended funds.

(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Industry Committee during the period April 1, 1977, through March 31, 1978, will amount to $140,642.

(b) *Rate of assessment.* The rate of assessment for said period, payable by each first handler in accordance with § 926.46, is fixed at eight cents ($0.08) per No. 38L grape lug (as specified in § 1380.19 of the Regulations of the California Department of Food and Agriculture) or equivalent quantity of Tokay grapes.

(c) *Reserve.* Unexpended assessment funds in excess of expenses incurred during the fiscal period which ended March 31, 1977, shall be carried over as a reserve in accordance with the applicable provisions of § 926.47.

Dated: August 10, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-23483 Filed 8-12-77;8:45 am]

FEDERAL DEPOSIT INSURANCE CORPORATION

[12 CFR Parts 308, 311]

SUNSHINE ACT AMENDMENTS

Notice of Proposed Rules

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Proposed rule.

SUMMARY: These provisions (1) amend the FDIC's implementing regulations for the Government in the Sunshine Act, and (2) implement the prohibitions against ex parte communications contained in the Sunshine Act. The amendments to Part 311 are designed to make clear that FDIC's Board considers the public interest before it closes a meeting and that individuals may photograph or record open meetings in a nondisruptive manner. The amendments to Part 308 prohibit ex parte communications between interested parties and individuals involved in the decision-making process during formal "on the record" hearings.

DATES: Written comments must be received on or before September 12, 1977.

ADDRESSES: Direct written comments to the Office of the Executive Secretary, Federal Deposit Insurance Corporation, Washington, D.C. 20429.

FOR FURTHER INFORMATION CONTACT:

Mark Rosen, Attorney, Legal Division, Federal Deposit Insurance Corporation, Washington, D.C. 20429. 202–389–4422.

SUPPLEMENTARY INFORMATION: On March 12, 1977, the Federal Deposit Insurance Corporation adopted regulations implementing the Government in the Sunshine Act (5 U.S.C. 552b). In light of its experience since that time, the FDIC believes that two provisions of the regulations are unclear. Section 311.2(d) of the regulations currently provides that individuals may witness an opening meeting, but not record, photograph, or otherwise electronically or mechanically reproduce the meeting without prior Corporation approval. The sole purpose of this provision was to prevent disturbance of meetings. It was not intended, as some have interpreted it, to require prior approval for attendance at a meeting or to prevent individuals from taking notes. The proposed amendment is intended to make clear that individuals can record the meeting without any prior notification to the Corporation in any manner they desire, provided that the proceedings are not disturbed.

The proposed amendment also makes clear that closing a meeting or portion of a meeting under the Sunshine Act is a two-step process. First, it must be determined whether the information likely to be disclosed at the meeting comes within one of the Act's exemptions. Second, the agency must decide whether the public interest requires an open meeting, despite the availability of the exemption. Although the FDIC's regulation captures this two-step process in two places (§ 311.3(b) and § 311.6(c)(2)), the proposed amendment makes an additional reference to the public interest determination in § 311.5 (Regular Procedure for Closing Meetings), where it had previously been inadvertently omitted.

Section 4 of the Government in the Sunshine Act prohibits ex parte communications between interested parties from outside the agency and persons involved in the decision-making process during formal, "on the record" hearings. An ex parte communication is an oral or written communication not on the public record with respect to which reasonable prior notice to all parties is not given. Requests for status reports, however, are not ex parte communications under the Act. The only formal hearings conducted by the FDIC to which these prohibitions apply are the administrative enforcement hearings conducted pursuant to Section 8 of the FDI Act (13 U.S.C. 1818). Therefore, the proposed implementing regulation will be added to the FDIC regulations which deal with practice and procedure during administrative hearings (12 CFR § 308).

Section 308.5(c) of the current FDIC regulations prohibits an administrative law judge from consulting any person on a fact in issue without notice to all parties. In one sense, the Sunshine Act prohibition is broader than this since it applies not only to an administrative law judge but also to any person involved in the decisional process. However, the existing regulation would prohibit ex parte communications between an administrative law judge and any person, including a person within the Corporation, while the Sunshine Act deals only with communications between outsiders and decision-makers. The prohibition against an administrative law judge communicating ex parte with a person within the Corporation on a fact in issue (§ 308.5(c) of the current regulations) is integrated into the new paragraph.

Written comments are invited and should be received on or before September 12, 1977, by the Office of the Executive Secretary, Federal Deposit Insurance Cooperation, Washington, D.C. 20429. This proposal may be changed in light of the comments received.

It is proposed that § 311.2(d) and § 311.5(b)(1) be amended, and a new paragraph (b–1) be added to § 308.5 as set forth below.

By Order of the Board of Directors, August 8, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

1. In § 311.2, paragraph (d) is amended to read as follows:

§ 311.2 Definitions.

* * * * *

(d) "Open to public observation" and "open to the public" mean that individuals may witness the meeting but not participate in the deliberations. The meeting may be recorded, photographed, or otherwise reproduced if the reproduction does not disturb the meeting.

* * * * *

(5 U.S.C. 552b, 12 U.S.C. 1819.)

2. In § 311.5, paragraph (b)(1) is amended by adding the sentence "In deciding whether to close a meeting or portion of a meeting, the Board will consider whether the public interest requires an open meeting" after the word "action."

(5 U.S.C. 552b, 12 U.S.C. 1819.)

3. In § 308.5, a new paragraph (b–1) is added and paragraph (c) is revised to read as follows:

§ 308.5 Conduct of hearings.

* * * * *

(b–1) *Ex parte communications prohibited.*

(1) For purposes of this paragraph, "ex parte communication" means an oral or written communication not on the public record with respect to which reasonable prior notice to all parties is not given, but does not include requests for status reports. The following prohibitions against ex parte communications apply from the time a proceeding is noticed for hearing unless the person responsible for the communication has knowledge that it will be noticed, in which case the prohibitions apply from the time of acquisition of such knowledge.

(2) No interested person outside the Corporation shall make or knowingly cause to be made an ex parte communication relevant to the merits of the proceeding to anyone who is or may reasonably be expected to be involved in the decisional process.

(3) No person who is or may reasonably be expected to be involved in the decisional process shall make or knowingly cause to be made an ex parte communication relevant to the merits of the proceeding to any interested person outside the Corporation.

(4) If an ex parte communication is made, or is knowingly caused to be made, the following will be placed on the public record—

(i) All such written communications;

(ii) Memoranda stating the substance of all such oral communications; and

(iii) All written responses and memoranda stating the substance of all oral responses to the materials described in (i) and (ii).

(5) Upon receipt of a communication knowingly made or caused to be made in violation of paragraph (2), the responsible party may be required to show cause why his claim or interest should not be dismissed, denied, or otherwise adversely affected. To the extent consistent with the interests of justice and the policy of the Federal Deposit Insurance Act, a knowing violation of subparagraph (2) may be grounds for a decision adverse to the responsible party.

(6) Except as authorized by law, the administrative law judge shall not consult any person or party within the Corporation on any fact in issue unless upon notice and opportunity for all parties to participate, and the administrative law judge shall not be responsible to or subject to the supervision or direction of any officer, employee, or agent engaged in the performance of investigative or prosecuting functions. Except as authorized by law, no officer, employee, or agent engaged in the performance of investigative or prosecuting functions in any case shall, in that case or a factually related case, participate or advise in the decision of the administrative law judge except as a witness or counsel in the proceedings.

(c) *Prehearing conference.*

(1) The administrative law judge may, on his own initiative or at the request of any party, direct counsel for all parties to meet with him at a specified time and place prior to the hearing, or to submit suggestions to him in writing, for the purpose of considering any or all of the following:

(i) Simplification and clarification of the issues;

(ii) Stipulations, admissions of fact and of contents and authenticity of documents;

(iii) Matters of which official notice will be taken; and

(iv) Other matters which may aid in the orderly disposition of the proceeding, including disclosure of the names of witnesses and of documents or other physical exhibits which will be introduced in evidence in the course of the proceeding.

(2) The conference shall, at the request of any party, be recorded and at its conclusion, the administrative law judge shall enter in the record an order which recites the results of the conference. This order shall include the administrative law judge's rulings upon matters considered at the conference, together with appropriate directions to the parties, if any. The order shall control the subsequent course of the proceedings, unless modified to prevent manifest injustice.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 39]

[Docket No. 77–SW–29]

AIRWORTHINESS DIRECTIVES

Bell Helicopter Textron Model 47 Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking

SUMMARY: This notice proposes to amend Part 39 of the Federal Aviation Regulations (14 CFR Part 39) to add an Airworthiness Directive (AD) applicable to certain Bell Helicopter Textron helicopters that would require an inspection to the tail rotor drive input pinion shaft for proper size and surface treatment and to replace the supporting duplex bearing with a duplex bearing of an improved type. These inspections and replacements are to insure higher reliability of these components which, if failed in flight, could result in partial loss of control of the helicopter.

DATES: Comments must be received on or before September 4, 1977. Proposed effective date of the Airworthiness Directive will be October 31, 1977.

ADDRESS: Send comments on this Notice of Proposed Rulemaking in triplicate to:

Regional Counsel, ASW–7, Attention: Docket No. 77–SW–29, Southwest Region, Federal Aviation Administration, Post Office Box 1689, Fort Worth, Texas 76101.

FOR FURTHER INFORMATION CONTACT:

Wilbur F. Wells, Propulsion Section, Engineering and Manufacturing Branch, ASW–214, Federal Aviation Administration, Post Office Box 1689, Fort Worth, Texas 76101. Telephone number 817–624–4911, extension 525.

SUPPLEMENTARY INFORMATION: A significant failure history has developed with both the part number 47–620–629

-3 or -5 duplex bearing and the input pinion shaft, part number 47-645-205-3. These items are a part of the drive arrangement for the tail rotor (used for directional control) of Bell Helicopter Textron Model 47 series helicopters. Bell Helicopter Textron Service Bulletin No. 47-77-1, dated February 14, 1977, pertains to these inspections and the replacement requirements.

Interested persons are invited to participate in the development of the final rule by submitting written comments as desire. All comments will be recorded and considered by the Director before taking final action, and the proposal may be changed as a result of the comments received. All comments will be available for examination before and after the closing date for comments in the Office of the Regional Counsel, Southwest Region, 4400 Blue Mound Road, Forth Worth, Texas.

DRAFTING INFORMATION

The principal authors of this document are Wilbur F. Wells, Aerospace Engineer, Flight Standards Division, and Alan G. Sumberg, General Attorney, ASW-7, Southwest Region, Federal Aviation Administration.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

BELL: Applies to all Model 47 helicopters with tail rotor gear boxes, part number 47-640-075-1 or -7 installed.

NOTE.—Retrofit kits incorporating these gear boxes or the associated internal gears and bearing delivered from Bell Helicopter Textron after December 1, 1976, have been verified to be in compliance with this Airworthiness Directive and will not require inspection and/or further retrofit.

Compliance required within the next 100 hours time in service after the effective date of this Airworthiness Directive unless already accomplished.

To minimize the possibility of loss of directional control of the helicopter resulting from failure of the part number 47-620-629 -3 or -5 bearing, or failure of the part number 47-645-205-3 input pinion shaft located in the part number 47-640-075 -1 or -7 tail rotor gear box, conduct the inspection and replacement activities prescribed by paragraphs 1, 2, 2a, 2b, 3 and 4 of Bell Helicopter Textron Service Bulletin No. 47-77-1, dated February 14, 1977, or later FAA approved revision. Comments in paragraphs 5 and 6 of this bulletin involving warranties, replacement parts sources or reporting activities are not a part of this Airworthiness Directive.

After accomplishment of items 1, 2, 3, and 4 of Service Bulletin No. 47-77-1, reassemble and reinstall the tail rotor gear box in accordance with the Maintenance and Overhaul Instructions for the applicable model helicopters.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Service Manager, Bell Helicopter Textron, Post Office Box 482, Fort Worth, Texas 76101. These documents may also be examined at Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76101, and at Federal Aviation Administration Headquarters, 800 Independence Avenue SW., Washington, D.C. 20591.

Equivalent means of compliance with the modifications prescribed by this Airworthiness Directive may be approved by the Chief, Engineering and Manufacturing Branch, Flight Standards Division, Southwest Region, Federal Aviation Administration, Post Office Box 1689, Fort Worth, Texas 76101.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); and CFR 11.85).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Forth, Texas on July 27, 1977.

PAUL J. BAKER,
Acting Director,
Southwest Region.

NOTE.—The incorporation by reference in this document was approved by the Director of the Federal Register on June 19, 1967.

[14 CFR Part 39]

[Docket No. 77-WE-16-AD]

AIRWORTHINESS DIRECTIVES

McDonnell Douglas Model DC-8 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require repetitive inspections of the flap link support fitting on McDonnell Douglas Model DC-8 Series airplanes for stress corrosion/fatigue cracks to preclude failure of the fitting that could result in loss of a flap.

DATES: Comments must be received on or before September 19, 1977. Proposed effective date: September 14, 1977.

ADDRESS: Send comments on the proposal to: Department of Transportation, Federal Aviation Administration, Western Region, Attention: Regional Counsel, Airworthiness Rule Docket, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009.

FOR FURTHER INFORMATION CONTACT:

Wallace M. Frei, Executive Secretary, Airworthiness Directives Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009; Telephone 213-536-6351.

SUPPLEMENTARY INFORMATION: The flap link support fittings on McDonnell Douglas DC-8 airplanes were originally made of 7075-T6 aluminum material. During the production run, however, 7075-T73 aluminum material was substituted. The -T6 and -T73 suffixes designate the heat treat process used to harden the material although the -T6 process gives superior static strength capabilities, the -T73 process gives a much improved stress corrosion threshold stress.

During the operating life of the DC-8, there have been several cases of stress corrosion cracking found in fittings made of 7075-T6 aluminum, some with as few as 3,500 hours time in service. However, there are no known cases of stress corrosion cracks in fittings of 7075-T73 aluminum.

Cracking of the 7075-T6 fitting has occurred primarily at two locations. They are on the top surface, running from and through the spring cover attach bolt holes; and in the area of the side brace attach bolt hole. Cracks in the top surface are in a non-load carrying part of the fitting and are not considered a safety problem. However, cracks in the side brace bolt hole area could cause complete loss of load carrying ability for that fitting. The flap link support fittings at the three inboard wing flap stations on the DC-8 are not failsafe and have a safe life limitation. Consequently, loss of a flap link support fitting's structural integrity could cause loss of the flap segment.

The FAA became concerned that the saw tooth edge caused by a stress corrosion crack in the side brace attach hole area could initiate fatigue cracking which would eventually lead to complete failure of the fitting at the side brace attach hole. McDonnell Douglas obtained a fitting which had been removed from service and initiated a crack in the side brace attach area where cracking has been found. The fitting was then cycled from 0 to 97% of limit load until the crack progressed to the side brace attach bolt hole. The fitting was then loaded statically until failure occurred at 104% of limit load.

Based on the data from these tests, it has been determined that the 7075-T6 fittings should be inspected for cracks in the side brace attach area at intervals not to exceed 1,000 landings in order to assure continued airworthiness of the flap system.

McDonnell Douglas has issued DC-8 Service Bulletin 27-260 containing procedures for determining the heat treat of the fittings and inspection for cracks if the fitting is determined to be the 7075-T6 heat treat condition. If cracking is found, the fitting is to be replaced.

Since this condition is likely to exist or develop in other aircraft of the same type design, the proposed AD would require compliance with the inspection and replacement requirements of DC-8 Service Bulletin 27-260.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Information on the economic, environmental, and energy impact that might result because of the adoption of the proposed rule is also requested. Communications should identify the airworthiness docket number and be submitted in duplicate to the Department of Transportation, Federal Aviation Administration, Western Region, Attention: Regional Counsel, Airworthiness Rule Docket, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009. All communications received before the closing date will be considered by the Administrator before taking action upon the proposed rule. The proposals contained in the notice may be changed in light of comments received. All comments will be available, both before and after the closing date for comments, in the Airworthiness Rule Docket for examination by interested persons.

DRAFTING INFORMATION

The principal authors of this document, are Everett W. Pittman, Aircraft Engineering Division, and Richard G. Wittry, Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend section 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

MCDONNELL DOUGLAS. Applies to Model DC-8 Series airplanes, certificated in all categories.

Compliance required as indicated.

To detect cracks and prevent failure of the flap link support fittings, comply with the following:

(a) Within the next 1,000 landings after the effective date of this AD, unless already determined, use the eddy current procedure of McDonnell Douglas DC-8 Service Bulletin 27-260 dated July 12, 1977, or later FAA approved revision, to determine whether the flap link support fittings at stations X_s 97.-906, X_f 219.498, and X_f 339 723 are 7075-T6 or 7075-T73 aluminum. If the fitting is 7075-T73 aluminum, no further action is necessary per this AD. If the fitting is 7075-T6 aluminum, accomplished Paragraph (b).

(b) Within the next 1,000 landings after the effective date of this AD, unless already accomplished, and thereafter at intervals not to exceed 1,000 landings, perform the ultrasonic inspection procedure for cracks per McDonnell Douglas DC-8 Service Bulletin 27-260 dated July 12, 1977, or later FAA approved revision.

(c) Failed or cracked fittings must be replaced with like serviceable parts before further flights.

(d) Spare parts must be examined and identified in accordance with the procedures of Paragraph (a) before installation on an airplane.

(e) Equivalent inspections and repairs may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

(f) Special flight permits may be issued in accordance with FAR's 21.197 and 21.199 to authorize operation of an airplane to a base for the accomplishment of the inspections and repairs required by this AD.

Upon request of the operator, an FAA maintenance inspector, subject to prior approval of the Chief, Aircraft Engineering Division, FAA Western Region, may adjust the repetitive inspection intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

(Sec. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, Calif., on August 3, 1977.

ROBERT H. STANTON,
Director, FAA Western Region.

[14 CFR Part 39]

[Docket No. 17127]

AIRWORTHINESS DIRECTIVES

Rolls-Royce Aero Engines, Inc., Model RB211-22B Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require an inspection for proper rigging, and re-rigging, if necessary, and modification of the cold stream reverser on certain Rolls Royce Aero Engines, Inc., Model RB211-22B engines to prevent unwanted deployment of the reverser which could seriously reduce the controllability of the airplane.

DATES: Comments must be received on or before September 29, 1977.

ADDRESSES: Send comments on the proposal in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn.: Rules Docket (AGC-24) Docket No. 17127, 800 Independence Avenue SW., Washington, D.C., 20591.

The applicable service bulletins may be obtained from: Rolls Royce Aero Engines, Inc., Aero Engine Division, P.O. Box 31, Derby, England DE 2 8BJ.

A copy of the applicable service bulletins is contained in the Rules Docket, Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Mr. D. C. Jacobsen, Chief, Aircraft Certification Staff, AEU-100, Europe, Africa, and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium. Telephone 513.38.30.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the docket number and be submitted in duplicate to the address specified above. All communications received on or before the date specified above will be considered by the Administrator before taking action upon the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

There have been reports of cold stream reverser lock mechanism failures on certain Rolls Royce Model RB211-22B engines, which the FAA believes to have been caused at least in part by misrigging of the cold stream reverser. Since this condition is likely to exist or develop in other engines of the same type design, the proposed airworthiness directive would require an inspection of the rigging of the cold stream reversers, and re-rigging, if necessary, and modification of the reverser lock indicating system on certain Rolls Royce Model RB211-22B engines.

The principal authors of this document are D. C. Jacobsen, Chief, Europe, Africa, and Middle East Region, T. Loftus, Flight Standards Service, and R. Lane, Office of the Chief Counsel.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

ROLLS-ROYCE AERO ENGINES, INC. (formerly Rolls-Royce (1971) Limited). Applies to Model RB211-22B engines that incorporate Rolls Royce Service Bulletin No. 78-3282, dated January 21, 1974, as revised September 22, 1975.

Compliance is required as indicated.

To prevent unwanted reverser operation, accomplish the following for engines that do not incorporate Rolls Royce RB211 Service Bulletin Nos. 72-4073, dated January 22, 1976, as revised February 27, 1976, 78-3753, dated June 27, 1975, as revised May 26, 1976, and 78-3769, dated June 27, 1975 (hereinafter referred to as the service bulletins), or an FAA-approved equivalent of each:

(a) Except as provided in paragraphs (b), (c), and (d) of this AD, within the next 500 hours engine time in service after the effective date of this AD, unless already accomplished, inspect the engine cold stream reverser locking mechanism rigging and re-

rig, if necessary, in accordance with Rolls Royce RB211 Maintenance Manual, Chapter 78-30-00, block 501, revision dated September 1975, or by an equivalent means approved by the Chief, Aircraft Certification Staff, Europe, Africa, and Middle East Region, FAA, c/o American Embassy, APO New York, N.Y. 09667.

(b) If compliance with paragraph (a) of this AD was accomplished prior to the effective date of this AD, and a cold stream reverser unit that affects reverser locking mechanism rigging has been disturbed or removed subsequent to compliance with paragraph (a) of this AD, but prior to the effective date of this AD, comply with paragraph (d) of this AD before further flight.

(c) If, at any time after the effective date of this AD, a cold stream reverser unit that affects reverser locking mechanism rigging is disturbed or removed, comply with paragraph (d) of this AD before further flight.

NOTE.—Chapter 78-30-00, pages 568 and 578, of the RB211 Maintenance Manual contains information on maintenance that will affect proper rigging.

(d) Re-rig the reverser in accordance with paragraph (a) of this AD or deactivate and secure the reverser mecahnism in accordance with the Rolls Royce RB211 Maintenance Manual, or an FAA-approved equivalent.

(e) Within 3,000 hours engine time in service after the effective date of this AD, unless already accomplished, modify the cold stream thrust reverser translating cowl lock indication system in accordance with the service bulletins or FAA-approved equivalents of each.

NOTE.—A service bulletin which may be helpful is Rolls Royce Service Bulletin 78-A3672, dated January 14, 1975, as revised February 17, 1976.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR § 11.85.)

The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 8, 1977.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

[Airspace Docket No. 77-EA-48]

PINEVILLE, W. VA.

Proposed Alteration of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the Pineville, W. Va., Transition Area, over Kee Field, Pineville, W. Va. The 243° radial of the Beckley VORTAC will be a reference radial for a new area extension while the extension on the 243° bearing of the Pineville, W. Va., radio beacon will be eliminated. This results from the development of a new VOR runway 25 approach procedure.

DATE: Comments must be received on or before September 12, 1977.

ADDRESS: Send comments on the proposal in triplicate to: Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J. F. K. International Airport, Jamaica, New York 11430. Telephone 212-995-3391.

The docket may be examined at the following location: FAA, Office of the Regional Counsel, AEA-7, Federal Building, J. F. K. International Airport, Jamaica, New York 11430.

COMMENTS INVITED

Interested parties may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J. F. K. International Airport, Jamaica, New York 11430. All communications received on or before September 12, 1977, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430, or by calling 212-995-3391.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the transition area over Kee Field, Pineville, W. Va. The area will be altered by establishing an area extension 5 miles each side of the Beckley VORTAC 243° radial extending from 9 miles southwest of the VORTAC to 26 miles southwest of the VORTAC and deleting the Pineville, W. Va. radio 243° bearing extension.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.-181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by amending the description of the Pineville, W. Va. 700-foot floor transition area as follows: Delete, "and within 3 miles each side of a 243° bearing from the Pineville, W. Va. radio beacon (lat. 37°36'11" N., long. 81°33'35" W.) extending from the radio beacon to 8.5 miles southwest of the radio beacon."

Insert the following in lieu thereof, "within 5 miles each side of the Beckley VORTAC 243° radial, extending from 9 miles southwest of the VORTAC to 26 miles southwest of the VORTAC."

(Sec. 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, New York, on July 28, 1977.

L. J. CARDINALI,
Acting Director,
Eastern Region.

[Airspace Docket No. 77-EA-49]

WILLIAMSBURG, VA.

Proposed Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate a Williamsburg, Va., Transition Area, over Williamsburg-Jamestown Airport, Williamsburg, Va. This designation will provide protection to aircraft executing the new instrument approach which has been developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

DATE: Comments must be received on or before September 12, 1977.

ADDRESS: Send comments on the proposal in triplicate to: Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace & Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430. Telephone 212-995-3391.

The docket may be examined at the following location: FAA, Office of the Regional Counsel, AEA-7, Federal Building, J.F.K. International Airport, Jamaica, New York 11430.

COMMENTS INVITED

Interested parties may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Building, J.F.K. International Airport, Jamaica, New York 11430. All communications received on or before September 12, 1977, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedure Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430, or by calling 212-995-3391.

Communications must identify the notice number of this NPRM Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a transition area over Williamsburg-Jamestown Airport, Williamsburg, Va. The area will commence at 700 feet above the surface extending out to a 6.5-mile radius around the center of the airport.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.-181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designating a Williamsburg, Va. transition area as follows:

WILLIAMSBURG, VA.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the center, 37°14'20" N., 76°42'28" W., of Williamsburg-Jamestown Airport.

(Sec. 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 as amended by Executive Order 11949 and OMB Circular A-107.

Issued in Jamaica, New York, on July 28, 1977.

L. J. CARDINALI,
Acting Director,
Eastern Region.

FORT INDIANTOWN GAP, PA.

Proposed Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate a Fort Indiantown Gap, Pa., Transition Area, over Muir Army Air Field, Fort Indiantown Gap, Pa. This designation will provide protection to aircraft executing the new instrument approach which has been developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

DATE: Comments must be received on or before September 12, 1977.

ADDRESS: Send comments on the proposal in triplicate to: Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430, Telephone: 212-995-3391.

The docket may be examined at the following location: FAA, Office of the Regional Counsel, AEA-7, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430.

COMMENTS INVITED

Interested parties may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430. All communications received on or before September 12, 1977, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430, or by calling 212-995-3391.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a transition area over Muir Army Air Field near Indiantown Gap, Pa. The area will commence at 700 feet above the surface. It will extend out generally to the west through northeast for approximately 14 miles; and then to the east for approximately 12 miles and to the southeast for approximately 8 miles. The southerly portions will already be covered within existing transition areas.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.-181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designating a Fort Indiantown Gap, Pa. transition area as follows:

FORT INDIANTOWN GAP, PA.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the center, 40°26'00" N, 76°34'00"

W. of Muir AAF, Fort Indiantown Gap, Pa.; within a 12-mile radius of the center of the airport, extending clockwise from a 230° bearing to a 252° bearing from the airport; within a 14.5-mile radius of the center of the airport, extending clockwise from a 252° bearing to a 037° bearing from the airport; within a 12.5-radius of the center of the airport, extending clockwise from a 037° bearing to a 086° bearing from the airport; within an 8-mile radius of the center of the airport, extending clockwise from a 086° bearing to a 136° bearing from the airport; within 4.5 miles each side of the 097° bearing from the Bellgrove, Pa. RBN, extending from the RBN to 10 miles east of the RBN.

(Section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348(a)) and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Issued in Jamaica, N.Y., on July 28, 1977.

SHAMOKIN, PA.

Proposed Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to designate a Shamokin, Pa., Transition Area, over Northumberland County Airport, Shamokin, Pa. This designation will provide protection to aircraft executing the new instrument approach which has been developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

DATE: Comments must be received on or before September 12, 1977.

ADDRESS: Send comments on the proposal in triplicate to: Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430, Telephone: 212-995-3391.

The docket may be examined at the following location: FAA, Office of the Regional Counsel, AEA-7, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430.

COMMENTS INVITED

Interested parties may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430. All communications received on or before September 12, 1977, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430, or by calling 212-995-3391.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a transition area over Northumberland County Airport, Shamokin, Pa. The area will commence at 700 feet above the surface extending out to a 6.5-mile radius around the center of the airport and to approximately 11 miles to the east. Due to contiguous transition areas, the remaining portions described in the area will be overlapped.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designating a Shamokin, Pa. transition area as follows:

SHAMOKIN, PA.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the center, 40°50'15" N., 76°33'00" W., of Northumberland County Airport, Shamokin, Pa.; within a 7-mile radius of the center of the airport, extending clockwise from a 035° bearing to a 069° bearing from the airport; within an 11.5-mile radius of the center of the airport, extending clockwise from 069° bearing to a 110° bearing from the airport; within a 10.5-mile radius of the center of the airport, extending clockwise from a 110° bearing to a 157° bearing from the airport; within an 8.5-mile radius of the center of the airport, extending clockwise from a 157° bearing to a 260° bearing from the airport; within 4.5 miles each side of the Selinsgrove, Pa. VORTAC 080° radial, extending from the 6.5-mile radius area to the Selinsgrove, Pa. VORTAC.

(Section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348(a)) and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 as amended by Executive Order 11949 and OMB Circular A-107.

Issued in Jamaica, N.Y., on July 28, 1977.

L. J. CARDINALI,
Acting Director,
Eastern Region.

[14 CFR Part 71]

[Airspace Docket No. 76-AL-16]

ALASKAN REPORTING POINTS

Proposed Designation and Redesignation

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to designate and alter two reporting points southwest of Annette Island, Alaska, for use by both high and low altitude en route air traffic to make position reports to Vancouver and Anchorage air traffic control centers. Reporting at these points will help to expedite the flow of air traffic on routes northwest of Sandspit, British Columbia, Canada.

DATES: Comments must be received on or before September 26, 1977.

ADDRESSES: Send comments on the proposal in triplicate to:

Director, FAA Alaskan Region, Attention: Chief, Air Traffic Division, Docket No. 76-AL-16, Federal Aviation Administration, 632 Sixth Avenue, Anchorage, Alaska 99501.

The official docket may be examined at the following location:

FAA Office of the Chief Counsel, Rules Docket, (AGC-24), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Alaskan Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 632 Sixth Avenue, Anchorage, Alaska 99501. All communications received on or before September 26, 1977 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR 71) to designate the MOCHA Alaska high and low altitude reporting point at Lat. 54°30'13" N., Long. 133°01'40" W. (INT Annette Island, Alaska, 237°T (210°M), and Sandspit, British Columbia, Canada, 331°T (305°M), radials) and the FRIED Alaska high and low altitude reporting point at Lat. 54°14'23" N., Long. 133°39'49" W. (INT Annette Island, Alaska, 237°T (210°M), and Sandspit, British Columbia, Canada, 313°T (287°M) radials). Because the MUZON reporting point is located near the MOCHA reporting point, it is no longer required and its rescission is being considered at this time. Only the supplementary information, and not the description of the Alaskan low altitude reporting points "MOCHA" and "FRIED" would be changed to reflect the correct radials.

ICAO CONSIDERATIONS

As part of this proposal relates to the navigable airspace outside the United States, this notice is submitted in consonance with the International Civil Aviation Organization (ICAO) International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside domestic airspace of the United States is governed by Article 12 of and Annex 11 to the Convention on International Civil Aviation, which pertains to the establishment of air navigation facilities and services necessary to promoting the safe, orderly, and expeditious flow of civil air traffic. Their purpose is to insure that civil flying on international air routes is carried out under uniform conditions designed to mprove the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace under the jurisdiction of a contracting state, derived from ICAO, wherein air traffic services are provided and also whenever a contracting state accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting state accepting such responsibility may apply the International Standards and Recommended Practices to civil aircraft in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, state aircraft are exempt from the provisions of Annex 11 and its Standards and Recommended Practices. As a contracting state, the United States agreed by Article 3(d) that its state aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

Since this action involves, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854.

DRAFTING INFORMATION

The principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Subpart I of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 626) as follows:

In § 71.211 (42 FR 638) FRIED: "(INT Nichols, Alaska, NDB 236°; Sandspit, British Columbia, Canada, NDB 314° bearings)." is deleted and "(INT Annette Island, Alaska, 237°, Sandspit, British Columbia, Canada, 313° radials)." is substituted therefor.

In § 71.211 (42 FR 638) MOCHA: "(INT Nichols, Alaska, NDB 236°; Sandspit, British Columbia, Canada, 331° bearings)." is deleted and "(INT Annette Island, Alaska, 237°, Sandspit, British Columbia, Canada, 331° radials)." is substituted therefor.

In § 71.211 (42 FR 638 MUZON: title and text is deleted.

In § 71.213 (42 FR 640) "FRIED: Lat. 54°14'23" N., Long. 133°39'49" W. (INT Annette Island, Alaska 237°, Sandspit, British Columbia, Canada, 313° radials)." is added.

In § 71.213 (42 FR 640) "MOCHA: Lat. 54°30'13" N., Long. 133°01'40" W. (INT Annette Island, Alaska, 237°, Sandspit, British Columbia, Canada, 331° radials)." is added.

(Secs. 307(a), 313(a) and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a) and 1510); Executive Order 10854 (24 FR 9565); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 5, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[14 CFR Part 71]

[Airspace Docket No. 77-EA-20]

CONTROL AREA

Proposed Alteration

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: The FAA is considering an amendment to alter the Barnegat, N.J., Control Area by expanding the boundaries approximately 25 miles northeast and lowering the 2,000 feet MSL floor in the present area to 1,200 feet and to 700 feet in the proposed expanded area. At the present time there are no charted IFR routes between the shoreline and numerous offshore oil exploration sites. This proposed action would support IFR routes to the numerous offshore oil exploration sites and encompass IFR arrival and departure procedures.

DATES: Comments must be received on or before September 12, 1977.

ADDRESSES: Send comments on the proposal in triplicate to:

Director, FAA Eastern Region, Attention: Chief, Air Traffic Division, Docket No. 77-EA-20, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430.

The official docket may be examined at the following location:

FAA Office of the Chief Counsel, Rules Docket (AGC-24), Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Huff, Airspace Regulations Branch (AAT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202–426–3715.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430. All communications received on or before September 12, 1977 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the

ency on foreign energy sources. The lowering of these airspace floors would provide the FAA with some flexibility in establishing off airway routes to the oil exploration sites adjacent to the New Jersey shoreline and encompass planned instrument approach procedures to the various oil rig sites.

ICAO CONSIDERATIONS

As part of this proposal relates to the navigable airspace outside the United States, this notice is submitted in concordance with the International Civil Aviation Organization (ICAO) International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside domestic airspace of the United States is governed by Article 12 of and Annex 11 to the Convention on International Civil Aviation, which pertains to the establishment of air navigation facilities and services necessary to promote the safe, orderly, and expeditious flow of civil air traffic. Their purpose is to insure that civil flying on international air routes is carried out under uni-

163 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 348) as follows:

In § 71.163 in Barnegat, N.J.: 1. "2,000 feet MSL" would be deleted and "1,200 feet MSL" substituted therefor.

2. Following "Lat. 39°44'00" N." add "that airspace extending upwards from 700 feet MSL beginning at Lat. 39°40'00" N., Long. 73°29'00" W.; to Lat. 39°40'00" N., Long. 72°50'00" W., to Lat. 39°34'00" N., Long. 72°50'00" W.; thence along Lat. 39°34'00" N., to the northeast edge of Control 1147; southeast along the northeast edge of Control 1147 to Lat. 39°19'00" N.; thence to Lat. 38°33'00" N., Long. 73°08'00" W.; west along Lat. 38°33'00" N., to the northeast edge of Control 1148; thence northwest along the northeast edge of Control 1148 to Long. 73°50'00" W.; to Lat. 38°58'00" N., Long 73°50'00" W.; to Lat 38°58'00" N., Long 73°13'00" W.; to Lat 39°09'00" N., Long 73°13'00" W.; to Lat. 39°09'00" N., Long 73°29'00" W., to point of beginning.

(Secs. 307(a), 313(a) and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a) and 1510); Executive Order 10854, (24 FR 9565); Sec. 6(c), Department of Transporta-

INVESTMENT COMPANY REGISTRATION AND REPORT FORMS AND REPORTING REQUIREMENTS

Extension of Comment Period for Proposed Revision of Forms, Reports and Regulations

AGENCY: Securities and Exchange Commission.

ACTION: Extension of comment period.

SUMMARY: This notice extends the period for comments on the notice published May 31, 1977, proposing a new rule and forms intended to create an integrated registration and reporting system designed to reduce both the number of forms and the duplicative information filed by management investment companies. Specifically, the Commission is proposing a revised notification of registration under the Investment Company Act of 1940 ("1940 Act"), new registration statements forms for registration of open and closed-end investment companies under the 1940 Act and of their

sult in undue delay. All interested persons are invited to submit their written views and comments in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549 on or before September 19, 1977. All such communications should refer to File No. S7–697, and will be available for public inspection at the Commission's Public Reference Room, Room 6101, 1100 L Street NW., Washington, D.C.

By the Commission.

SHIRLEY E. HOLLIS,
Assistant Secretary

INVESTMENT COMPANY ANNUAL REPORTS

Extension of Comment Period for Proposed Revision of Regulations

AGENCY:

cause of the personal commitments and schedules of members of the Association and the large volume of material that must be analyzed, it would not be feasible for it to comment by August 15, 1977, the present expiration date of the comment period. In view of this request, the Commission has authorized an extension until September 19, 1977, of the due date for submitting comments with respect to the proposed rule amendment. The Commission believes that this extension is appropriate and will not result in undue delay. All interested persons are invited to submit their written views and comments in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549 on or before September 19, 1977. All such communications should refer to File No. S7–698, and will be available for public inspection at the Commission's Public Reference Room, Room 6101, 1100 L Street, N.W., Washington, D.C.

By the Commission.

SHAMOKIN, PA.

Proposed Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to designate a Shamokin, Pa., Transition Area, over Northumberland County Airport, Shamokin, Pa. This designation will provide protection to aircraft executing the new instrument approach which has been developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

DATE: Comments must be received on or before September 12, 1977.

ADDRESS: Send comments on the proposal in triplicate to: Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430, Telephone: 212-995-3391.

The docket may be examined at the following location: FAA, Office of the Regional Counsel, AEA-7, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430.

COMMENTS INVITED

Interested parties may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430. All communications received on or before September 12, 1977, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430, or by calling 212-995-3391.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a transition area over Northumberland County Airport, Shamokin, Pa. The area will commence at 700 feet above the surface extending out to a 6.5-mile radius around the center of the airport and to approximately 11 miles to the east. Due to contiguous transition areas, the remaining portions described in the area will be overlapped.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designating a Shamokin, Pa. transition area as follows:

SHAMOKIN, PA.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the center, 40°50'15" N., 76°33'00" W., of Northumberland County Airport, Shamokin, Pa.; within a 7-mile radius of the center of the airport, extending clockwise from a 035° bearing to a 069° bearing from the airport; within an 11.5-mile radius of the center of the airport, extending clockwise from 069° bearing to a 110° bearing from the airport; within a 10.5-mile radius of the center of the airport, extending clockwise from a 110° bearing to a 157° bearing from the airport; within an 8.5-mile radius of the center of the airport, extending clockwise from a 157° bearing to a 260° bearing from the airport; within 4.5 miles each side of the Selinsgrove, Pa. VORTAC 080° radial, extending from the 6.5-mile radius area to the Selinsgrove, Pa. VORTAC.

(Section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348(a)) and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 as amended by Executive Order 11949 and OMB Circular A-107.

Issued in Jamaica, N.Y., on July 28, 1977.

L. J. CARDINALI,
Acting Director,
Eastern Region.

Director, FAA Alaskan Region, Attention: Chief, Air Traffic Division, Docket No. 76-AL-16, Federal Aviation Administration, 632 Sixth Avenue, Anchorage, Alaska 99501.

The official docket may be examined at the following location:

FAA Office of the Chief Counsel, Rules Docket, (AGC-24), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence

Avenue, SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Alaskan Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 632 Sixth Avenue, Anchorage, Alaska 99501. All communications received on or before September 26, 1977 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR 71) to designate the MOCHA Alaska high and low altitude reporting point at Lat. 54°30'13" N., Long. 133°01'40" W. (INT Annette Island, Alaska, 237°T (210°M), and Sandspit, British Columbia, Canada, 331°T (305°M), radials) and the FRIED Alaska high and low altitude reporting point at Lat. 54°14'23" N., Long. 133°39'49" W. (INT Annette Island, Alaska, 237°T (210°M), and Sandspit, British Columbia, Canada, 313°T (287°M) radials). Because the MUZON reporting point is located near the MOCHA reporting point, it is no longer required and its rescission is being considered at this time. Only the supplementary information, and not the description of the Alaskan low altitude reporting points "MOCHA" and "FRIED" would be changed to reflect the correct radials.

ICAO CONSIDERATIONS

As part of this proposal relates to the navigable airspace outside the United States, this notice is submitted in consonance with the International Civil Aviation Organization (ICAO) International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside domestic airspace of the United States is governed by Article 12 of and Annex 11 to the Convention on International Civil Aviation, which pertains to the establishment of air navigation facilities and services necessary to promoting the safe, orderly, and expeditious flow of civil air traffic. Their purpose is to insure that civil flying on international air routes is carried out under uniform conditions designed to mpriove the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace under the jurisdiction of a contracting state, derived from ICAO, wherein air traffic services are provided and also whenever a contracting state accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting state accepting such responsibility may apply the International Standards and Recommended Practices to civil aircraft in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, state aircraft are exempt from the provisions of Annex 11 and its Standards and Recommended Practices. As a contracting state, the United States agreed by Article 3(d) that its state aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

Since this action involves, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854.

DRAFTING INFORMATION

The principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Subpart I of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 626) as follows:

In § 71.211 (42 FR 638) FRIED: "(INT Nichols, Alaska, NDB 236°; Sandspit, British Columbia, Canada, NDB 314° bearings)." is deleted and "(INT Annette Island, Alaska, 237°, Sandspit, British Columbia, Canada, 313° radials)." is substituted therefor.

In § 71.211 (42 FR 638) MOCHA: "(INT Nichols, Alaska, NDB 236°; Sandspit, British Columbia, Canada, 331° bearings)." is deleted and "(INT Annette Island, Alaska, 237°, Sandspit, British Columbia, Canada, 331° radials)." is substituted therefor.

In § 71.211 (42 FR 638 MUZON: title and text is deleted.

In § 71.213 (42 FR 640) "FRIED: Lat. 54°14'23" N., Long. 133°39'49" W. (INT Annette Island, Alaska 237°, Sandspit, British Columbia, Canada, 313° radials)." is added.

In § 71.213 (42 FR 640) "MOCHA: Lat. 54°30'13" N., Long. 133°01'40" W. (INT Annette Island, Alaska, 237°, Sandspit, British Columbia, Canada, 331° radials)." is added.

(Secs. 307(a), 313(a) and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a) and 1510); Executive Order 10854 (24 FR 9565); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 5, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[Airspace Docket No. 77-EA-20]

CONTROL AREA

Proposed Alteration

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: The FAA is considering an amendment to alter the Barnegat, N.J., Control Area by expanding the boundaries approximately 25 miles northeast and lowering the 2,000 feet MSL floor in the present area to 1,200 feet and to 700 feet in the proposed expanded area. At the present time there are no charted IFR routes between the shoreline and numerous offshore oil exploration sites. This proposed action would support IFR routes to the numerous offshore oil exploration sites and encompass IFR arrival and departure procedures.

DATES: Comments must be received on or before September 12, 1977.

ADDRESSES: Send comments on the proposal in triplicate to:

Director, FAA Eastern Region, Attention: Chief, Air Traffic Division, Docket No. 77-EA-20, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430

The official docket may be examined at the following location:

FAA Office of the Chief Counsel, Rules Docket (AGC-24), Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Huff, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430. All communications received on or before September 12, 1977 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

This notice proposes to alter the Barnegat, N.J., Control Area by expanding the boundaries approximately 25 miles northeast into the confines of portions of Warning Area W-107 and Control Area 1147 and lowering the 2,000 feet MSL floor in the present area to 1,200 feet and to 700 feet in the proposed expanded area. Warning Area is specified international airspace within which may exist activities constituting a potential danger to aircraft. Warning areas are depicted on aeronautical charts to alert nonparticipants to the existence of possible hazardous conditions. However, no restriction to flight is imposed because flight within international airspace cannot legally be restricted.

The oil industry has advised the FAA that it will require IFR service for helicopters to the numerous offshore drilling sites in the mid-Atlantic Outer Continental Shelf in support of oil exploration. This project is part of the United States Government's effort to reduce dependency on foreign energy sources. The lowering of these airspace floors would provide the FAA with some flexibility in establishing off airway routes to the oil exploration sites adjacent to the New Jersey shoreline and encompass planned instrument approach procedures to the various oil rig sites.

ICAO CONSIDERATIONS

As part of this proposal relates to the navigable airspace outside the United States, this notice is submitted in conconance with the International Civil Aviation Organization (ICAO) International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside domestic airspace of the United States is governed by Article 12 of and Annex 11 to the Convention on International Civil Aviation, which pertains to the establishment of air navigation facilities and services necessary to promoting the safe, orderly, and expeditious flow of civil air traffic. Their purpose is to insure that civil flying on international air routes is carried out under uniform conditions designed to improve the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace under the jurisdiction of a contracting state, derived from ICAO, wherein air traffic services are provided and also whenever a contracting state accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting state accepting such responsibility may apply the International Standards and Recommended Practices to civil aircraft in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, state aircraft are exempt from the provisions of Annex 11 and its Standards and Recommended Practices. As a contracting state, the United States agreed by Article 3(d) that its state aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

Since this action involves, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854.

DRAFTING INFORMATION

The principal authors of this document are Mr. Richard Huff, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.163 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 348) as follows:

In § 71.163 in Barnegat, N.J.: 1. "2,000 feet MSL" would be deleted and "1,200 feet MSL" substituted therefor.

2. Following "Lat. 39°44'00" N." add "that airspace extending upwards from 700 feet MSL beginning at Lat. 39°40'00" N., Long. 73°29'00" W.; to Lat. 39°40'00" N., Long. 72°50'00" W., to Lat. 39°34'00" N., Long. 72°50'00" W.; thence along Lat. 39°34'00" N., to the northeast edge of Control 1147; southeast along the northeast edge of Control 1147 to Lat. 39°19'00" N.; thence to Lat. 38°33'00" N., Long. 73°08'00" W.; west along Lat. 38°33'00" N., to the northeast edge of Control 1148; thence northwest along the northeast edge of Control 1148 to Long. 73°50'00" W.; to Lat. 38°58'00" N., Long. 73°50'00" W.; to Lat. 38°58'00" N., Long. 73°13'00" W.; to Lat. 39°09'00" N., Long. 73°13'00" W.; to Lat. 39°09'00" N., Long. 73°29'00" W.; to point of beginning.

(Secs. 307(a), 313(a) and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a) and 1510); Executive Order 10854 (24 FR 9565); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 4, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

SECURITIES CONFIRMATIONS

Proposed Rulemaking

Correction

In FR Doc. 77-18681,appearing at page 33348 in the issue of Thursday, June 30, 1977, the following changes should be made:

1. On page 33351, third column, in the third line of § 240.10b-10(a)(6)(ii), after the comma insert the words, "if he is not a market maker in that security and if, after having received".

2. On page 33352, first column, the fifth word in the fourth line should read, "account".

3. On page 33352, second column, the second word in the fifth line of § 240.-10b-10(d)(5)(iii) should read "designated" and the fourth word in the third line of § 240.10b-10(d)(5)(iii)(A) should read, "total".

INVESTMENT COMPANY REGISTRATION AND REPORT FORMS AND REPORTING REQUIREMENTS

Extension of Comment Period for Proposed Revision of Forms, Reports and Regulations

AGENCY: Securities and Exchange Commission.

ACTION: Extension of comment period.

SUMMARY: This notice extends the period for comments on the notice published May 31, 1977, proposing a new rule and forms intended to create an integrated registration and reporting system designed to reduce both the number of forms and the duplicative information filed by management investment companies. Specifically, the Commission is proposing a revised notification of registration under the Investment Company Act of 1940 ("1940 Act"), new registration statements forms for registration of open and closed-end investment companies under the 1940 Act and of their securities under the Securities Act of 1933 ("1933 Act"), a revised annual report form for annual reports under the 1940 Act, and a new rule under the 1940 Act requiring an annual update of the 1940 Act registration statement.

DATE: Comments must be received on or before September 19, 1977.

ADDRESS: Comments should be sent to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 N. Capitol Street Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT:

Glen Payne, Special Counsel, Division of Investment Management, Securities and Exchange Commission, Washington, D.C. 20549, 202-755-0230.

SUPPLEMENTARY INFORMATION: Notice was published on May 31, 1977, 33-5829, IC-9782 [42 FR 29716, June 9, 1977] proposing the adoption of Rule 8b-16 [17 CFR 270.8b-16] under the 1940 Act [15 U.S.C. 80a et seq.] and new and amended forms under the 1933 Act [15 U.S.C. 77a et seq.] and the 1940 Act. A request for an extension of the comment period to September 19, 1977, has been submitted on behalf of the Association of Publicly Traded Investment Funds ("Association"). The Association stated that because of the personal commitments and schedules of members of the Association and the large volume of material that must be analyzed, it would not be feasible for it to comment by August 15, 1977, the present expiration date of the comment period. In view of this request, the Commission has authorized an extension until September 19, 1977, of the due date for submitting comments with respect to the proposed rule and forms. The Commission believes that this extension is appropriate and will not result in undue delay. All interested persons are invited to submit their written views and comments in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549 on or before September 19, 1977. All such communications should refer to File No. S7-697, and will be available for public inspection at the Commission's Public Reference Room, Room 6101, 1100 L Street NW., Washington, D.C.

By the Commission.

SHIRLEY E. HOLLIS,
Assistant Secretary.

August 8, 1977.

INVESTMENT COMPANY ANNUAL REPORTS

Extension of Comment Period for Proposed Revision of Regulations

AGENCY: Securities and Exchange Commission.

ACTION: Extend of comment period.

SUMMARY: This notice extends the period for comments on the notice published May 31, 1977, proposing a revision of the Commission's regulations on the filing of investment company annual reports to require that such reports be filed within 90 days (rather than the current 120 days) after the end of the fiscal year. This will make available to the staff of the Commission information relating to a company's most recent fiscal year at the time that it reviews a posteffective amendment to that company's registration statement under the Securities Act of 1933. It will also bring the required filing date for annual reports into line with the required filing date for annual reports filed by industrial companies.

DATE: Comments must be received on or before September 19, 1977.

ADDRESS: Comments should be sent to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 N. Capitol Street, Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT:

Glen Payne, Special Counsel, Division of Investment Management, Securities and Exchange Commission, Washington, D.C. 20549, 202-755-0230.

SUPPLEMENTARY INFORMATION: Notice was published on May 31, 1977, IC-9783 [42 FR 29828, June 9, 1977] proposing the adoption of an amendment to Rule 30a-1 [17 CFR 270.30a-1] under the Investment Company Act of 1940 [15 U.S.C. 80a et seq.]. A request for an extension of the comment period to September 19, 1977, has been submitted on behalf of the Association of Publicly Traded Investment Funds ("Association"). The Association stated that because of the personal commitments and schedules of members of the Association and the large volume of material that must be analyzed, it would not be feasible for it to comment by August 15, 1977, the present expiration date of the comment period. In view of this request, the Commission has authorized an extension until September 19, 1977, of the due date for submitting comments with respect to the proposed rule and forms. The Commission believes that this extension is appropriate and will not result in undue delay. All interested persons are invited to submit their written views and comments in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549 on or before September 19, 1977. All such communications should refer to File No. S7-698, and will be available for public inspection at hte Commission's Public Reference Room, Room 6101, 1100 L Street, N.W., Washington, D.C.

By the Commission.

SHIRLEY E. HOLLIS,
Assistant Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 777-1]

[40 CFR Part 211]

NOISE LABELING STANDARDS GENERAL PROVISIONS

Public Hearings; Extension of Comment Period

AGENCY: Environmental Protection Agency.

ACTION: Notice of public hearings; notice of extension of comment period.

SUMMARY: By this notice the Environmental Protection Agency announces that public hearings will be held in Washington, D.C., Cedar Rapids, Iowa, and San Francisco, Calif., concerning the general provisions of its recently proposed product noise labeling regulatory program; and that the public comment period for that proposed regulatory action is being extended from September 20, 1977, to October 28, 1977. The general provisions for the labeling program were proposed in the FEDERAL REGISTER on June 22, 1977, 42 FR 31722. The purpose of the hearings is to help provide the Agency with a complete and broad-based public response to the proposed labeling program, especially from private citizens, and consumer and public interest groups, as well as product manufacturers and retailers. The Agency believes this form of public comment, in addition to written comments, will materially aid it in identifying and addressing all of the public's questions, concerns, and data, and resolving all associated issues; in developing final noise labeling regulatory provisions, and in implementing its product noise labeling program.

DATES:

Hearings

WASHINGTON, D.C.

Date: September 16, 1977.
Place: Capitol Hilton Hotel, 16th and K Street NW., Washington, D.C. 20036.
Time: 9 a.m. to 5 p.m.

CEDAR RAPIDS, IOWA

Date: September 20, 1977.
Place: Kirkwood Community College, 6301 Kirkwood Boulevard SW., Cedar Rapids, Iowa 52406.
Time: 9 a.m. to 9 p.m.

SAN FRANCISCO, CALIF.

Date: September 22, 1977.
Place: San Francisco Hilton Hotel, Mason and O'Farrell Streets, San Francisco, Calif. 94109.
Time: 9 a.m. to 9 p.m.
Scheduling statements by September 9, 1977.

Comment period extension until October 28, 1977.

ADDRESSES: Those persons wishing to make statements at the hearings should notify the EPA at the following address by September 9, 1977, so that presentations may be scheduled: Director, Standards and Regulations Division (AW 471), Office of Noise Abatement and Control, Attn.: Noise Labeling Public Hearings, U.S. Environmental Protection Agency, Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. Ted Ricci, Project Officer, Standards and Regulations Division (AW-471), U.S. Environmental Protection Agency, Washington, D.C. 20460 (703-557-2710).

SUPPLEMENTARY INFORMATION: See following text.

In the FEDERAL REGISTER of June 22, 1977, 42 FR 31722, the Environmental Protection Agency proposed to establish the general provisions of a product noise labeling regulatory program. The proposed general provisions concern those aspects of the program which the Agency intends to implement in a uniform manner with respect to the majority of products that will be considered for possible noise labeling action. Product-specific labeling requirements for individual products or product classes will be added to the proposed provisions by future rulemaking actions.

The major purpose of the regulatory program is to provide accurate and understandable information to consumers concerning the noise generating or noise reducing properties of products so that meaningful comparisons can be made by the public concerning such properties as part of purchase or use decisions.

In the FEDERAL REGISTER notice of June 22, 1977, the Agency indicated that it would hold public hearings concerning the general provisions of the proposed noise labeling program if public response during the comment period indicated that they would be in the public interest. Public response to this date has demonstrated widespread interest in the proposed regulations. The EPA, therefore, feels that public hearings would provide a significant opportunity for it to receive a more complete indication of the public's views, questions, concerns, and ideas about the proposed federal program.

Final regulations for the product noise labeling program will be promulgated after the review of all comments received in response to the published proposal. The information gained from the hearings is necessary, therefore, for the Agency to ensure that all issues associated with the regulatory program have been identified and adequately addressed.

The EPA is especially interested in hearing from private citizens, and consumer and public interest groups, in addition to product manufacturers and retailers, during the formal comment period and at the public hearings being scheduled.

Topics appropriate for consideration at the hearings include all aspects of the Agency's product noise labeling program and the proposed general provisions. These may include, but are not limited to, aspects such as: the need for noise labeling for products; possible product candidates for labeling; product selection process; proposed label format and content; methods of displaying relative ratings for products; associated public education and awareness program; costs of the program; and methods for ensuring compliance by those who may be required to label products.

All interested parties are encouraged to attend the hearings which will be held in Washington, D.C., Cedar Rapids, Iowa, and San Francisco, Calif., on the dates and at the places and times indicated above.

All interested persons will be given an opportunity to make a statement at the hearings. Such persons should notify the EPA of their intentions to make a statement at the address and by the date indicated above. Persons who have not given such notice will be heard as time permits following the scheduled statements. If possible, it is requested that speakers submit a copy of their statement no later than the day on which they appear. The hearings will be conducted informally. Technical rules of evidence will not apply. The hearings in Cedar Rapids and San Francisco are scheduled to include some evening hour sessions to facilitate testimony by the general public. Persons wishing to be heard in the evening hours should so specify when notifying the EPA of their desire to make a statement.

The transcript of the hearings and any materials submitted for the record will become part of the official public docket for the Proposed Product Noise Labeling Standards—General Provisions, Docket No. ONAC-77-8.

The official public comment period for the proposed regulatory action is being extended because of the decision to schedule public hearings. The comment period will now extend to October 28, 1977.

Dated: August 8, 1977.

EDWARD F. TUERK,
Acting Assistant Administrator, For Air and Waste Management.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

[45 CFR Part 11]

CLOSING OF ADVISORY COMMITTEE MEETINGS

Intent To Amend Regulations

AGENCY: Health, Education, and Welfare Department.

ACTION: Notice of intent to amend rule.

SUMMARY: The Secretary of Health, Education, and Welfare has under consideration a proposed amendment to the Department's Committee Management Interim Regulations published Monday, August 23, 1976, 41 FR 35654-8. In particular, the Secretary will propose amendments to 45 CFR 11.5(a)(6) "Closing Advisory Committee Meetings." Changes are required because of the amendment to the Federal Advisory Committee Act by the enactment of the Government in the Sunshine Act (Pub. L. 94-409, § 5). That amendment changed the criteria for the closing of meetings of Federal Advisory Committees. Instead of relying on the exemption under the Freedom of Information Act, agencies now must utilize the criteria of the Government in the Sunshine Act in order to close committee meetings.

While making the technical changes required by the amendment to the Federal Advisory Committee Act, the Secretary wishes to review the Department's overall policy on the closing of advisory committee meetings. He therefore invites comments on policies and procedures regarding the closing of such meetings. In considering changes, the Secretary particularly wants to comply with the Congressional intent that, in general, meetings be open to the public. He recognizes, however, that there will be situations which will dictate that certain meetings or portions of meetings be closed. The proposed amendment to the regulation should establish criteria which must be met before a determination can be made to close a meeting or any portion of a meeting. The Secretary specifically invites comments on how such criteria may be refined in order to assure that meetings which should be closed may be closed, but to assure, to the extent feasible, that meetings which do not need to be closed are open to the public.

DATES: Comments must be received on or before September 29, 1977.

ADDRESSES: Mail comments to: Department Committee Management Officer, 330 Independence Avenue SW., Washington, D.C. 20201. Comments may be hand delivered to Room 4357, 330 Independence Avenue SW. All comments received may be reviewed in Room 4357, 330 Independence Avenue SW.

FOR FURTHER INFORMATION CONTACT:

Russell M. Roberts. (202-245-7578).

SUPPLEMENTARY INFORMATION: The following issues are presented for comment. In considering these issues, the Secretary will also consider any additional questions raised by the comments.

1. *Protection of personal privacy.* The protection of personal privacy is of great concern to the Secretary. Advisory committee meetings may be closed under present law where an open meeting would "disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy" (5 U.S.C. 552b(c)(6)).

Can guidelines be formulated which would assist a government official in determining whether the right of the public to have access to information concerning a particular individual's background, qualifications, competence, financial situation, or the like, outweigh the right of an individual to personal privacy regarding such factors of his personal life?

Should the criteria for closing meetings of committees such as the Boards of Scientific Counselors, which review in-house research activities of government employees, differ from those for peer review committees which assess the work of non-Federal principal investigators on funded or potential grants and contracts?

Would discussion in an open forum in the nature of performance evaluation or appraisal of Federal employees, whether or not engaged in research, constitute a clearly unwarranted invasion of privacy?

Should the level of position or responsibility of the Federal employee affect what constitutes a clearly unwarranted invasion of privacy?

If a Federal employee is not entitled to privacy protection, is the Department entitled to discuss performance appraisal of employees in evalulating the Department's efficiency in closed sessions because such matters relate to personnel rules and practices?

2. *Trade secrets, commercial, or financial information.* To what extent should a person supplying trade secrets, commercial, or financial information to the Department, knowing that such information will be reviewed by an advisory committee, have a role in determining whether such information is privileged or confidential, thereby participating in the deliberation to close the advisory committee meeting on that basis?

Should the Department notify persons who have submitted trade secrets, commercial, or financial information prior to submitting such information for discussion in open session by an advisory committee?

Will people doing business with the Department submit proprietary information in sufficient detail to be useful to the Department if there is a possibility that such information may be disclosed in an open committee meeting?

What other safeguards should be established to assure that proprietary interests of the providers of information are fully protected, while at the same time assuring the right of the public to attend and participate in the deliberations of advisory committees to the fullest extent possible?

3. *Law enforcement investigations.* What guidelines can be established to determine when disclosure of investigatory information might interfere with enforcement proceedings?

4. *Procedures.* The interim regulations provide that the Executive Secretary of an advisory committee is responsible for justifying why a meeting, or a portion thereof, should be closed when submitting a request to the appropriate official for a determination to close a meeting. The request is to be submitted 60 days prior to the scheduled date of the meeting. Any determination to close the meeting, or any portion thereof, must be in writing and likewise contain specific reasons to support the determination. Any such determination must be reviewed and approved by the Office of General Counsel and the Office of Public Affairs.

Are further procedural requirements appropriate to prevent the improper closing of advisory committee meetings?

5. *Separating open portions of meetings from portions which may be closed under the criteria to be formulated in the regulation.* The Secretary is concerned that any determination to close a meeting, or portion thereof, restrict such closing to the shortest reasonable time. The Secretary recognizes however that under certain circumstances discussions which may fall within the criteria for closing will intertwine with discussions of matters which do not meet such criteria.

What guidelines can be established for the least amount of time consumed in mixed discussion?

Should the determination to close a meeting include a provision that the chairman, or the Federal official required to be in attendance, may open a meeting, or portion thereof, if it appears that the discussions are not intertwined or do not otherwise meet the criteria for closing meetings?

The issues set forth above are those which reflect the special concerns of the Secretary. Interested parties need not confine their comments in response to this notice of intent to the issues set forth in this notice. Any additional issues concerning the closing of advisory committee meetings may be submitted and will be considered by the Secretary in formulating his notice of proposed rule- making.

Dated: August 6, 1977.

JOSEPH A. CALIFANO, Jr.,
Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 21352; RM-1754; FCC 77-564]

[47 CFR Part 73]

PUBLIC NOTICE OF INTENT TO SELL BROADCAST STATION

Inquiry and Memorandum Opinion and Order

AGENCY: Federal Communications Commission.

ACTION: Notice of inquiry and memorandum opinion and order.

SUMMARY: The Commission proposes a rule requiring owners of broadcast stations to publish notice of intent to sell 45 days before signing a contract of sale. The purpose is to increase minority ownership of stations. Since many station sales are arranged privately, minority investors, who are not socially or professionally close to station owners, do not hear that the stations are for sale in time to offer to buy them. The Commission also denied a petition asking that sellers broadcast notice that they have sold the station and give information concerning the buyer since its rules already provide for this.

DATES: Comments must be filed on or before October 3, 1977, and reply comments on or before November 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Carol P. Foelak, Broadcast Bureau (202-632-7792).

SUPPLEMENTARY INFORMATION:

ADOPTED: July 27, 1977.

RELEASED: August 9, 1977.

By the Commission: Commissioner Hooks issuing a separate statement.

1. This is an Inquiry into whether it would be desirable to require a licensee to give public notice of its intent to sell a broadcast station as a means of increasing minority ownership of stations.

2. This Notice is the Commission's own proposal, originally suggested by Commissioner Benjamin L. Hooks; it also deals with a petition filed February 22, 1971, by Stephen H. Paul and Howard B. Sandler (hereinafter petitioners), students at the Indiana University School of Law.

COMMISSIONER HOOKS' PROPOSAL

3. At our recent Minority Ownership Conference, minority broadcasters and investors complained that they do not learn that desirable broadcast properties are for sale until it is too late to offer to buy them. They stated that agreements for the sale of the desirable stations are made privately, a process in which they are unlikely to participate since minority investors are likely not to be socially or professionally close to those who already own broadcast stations. To remedy this problem, Commissioner Hooks proposed that a licensee be required to give notice that its station was for sale at least 45 days before signing a contract to sell it,

so that those who are not part of the existing "establishment" can learn of opportunities to acquire stations. We believe that his proposal could ameliorate this situation since it would require broadcasters to give such notice. Correspondingly, the burden involved would be very small and, indeed, there could be a benefit to the seller through receiving a higher price as a result of the larger group of buyers that might bid for the station.

4. The proposed notice requirement should not apply to any pro forma (Form 316) assignments and transfers. Clearly a notice requirement should not apply to involuntary Form 316 applications since they are involuntary and are necessarily followed by a long form transfer or assignment application when the executor, administrator, trustee, etc. disposes of the estate, bankrupt's assets, etc. Also it clearly should not apply in the case of a voluntary Form 316 application where the station is being transferred from a corporation, partnership, joint venture, or sole proprietorship to another entity with the same or similar beneficial ownership.

5. There are some situations in which a Form 316 application may be used but in which control actually passes from one individual to another, as in the case where a minority shareholder who has previously been passed on in a long form application acquires an additional interest sufficient to make him the majority shareholder. Usually these situations involve a small percentage change in ownership, often of a small station owned by a partnership or close corporation with no outsiders, "establishment" or otherwise being involved. For these reasons and for administrative convenience we believe that all Form 316 applications should be exempt from the notice requirement. Any other choice would involve us in a time consuming process of determining which Form 316 applications should be subject to the requirement and which should be exempt.

6. We would also exempt stations which are being transferred by gift, intestacy, or pursuant to the terms of a will or divorce or separation agreement. Since these stations are not being sold, there is no reason to apply a rule applicable to contemplated sales. Of course, notice would be given if the recipient decided to sell the station rather than operate it.

7. We would not apply the notice requirement to the exercise of an option not involving outsiders to purchase a controlling interest in a station. Opinions are often part of an employment agreement, given perhaps to induce a station manager to remain at the station or to accept a lower salary and are also a common part of an agreement among partners or stockholders in a close corporation. If notice were required at the time of giving the option, the notice would be meaningless; if required at the time of exercise, then options would be meaningless since the station owners could not guarantee to sell their stations at any particular price or to the optionee. Although we would anticipate good faith, we emphasize our concern that options must not be used as a means to circumvent the purpose of the notice requirement. An option would appear to be in good faith where it was coupled with some other transaction or previous relationship, such as an employment contract or agreement among partners or shareholders or where a great deal of time had passed since the option was given.

8. We believe that the proposal could enhance minority ownership opportunities. We are interested in receiving comments on any aspect of such a rule and its administration and in particular on whether our basic assumptions, that a rule would increase minority purchases while placing a minimal additional burden on broadcasters, are correct. Some of the issues which should be addressed are as follows: Would the burden on broadcasters be greater than we have assumed, with the additional waiting period causing substantial economic or other difficulties in completing station sales? Would the notice reach minority investors and actually increase the number of offers to buy? Specifically, would local notice, which would be similar to what we require for broadcast applications, be effective in reaching minority buyers throughout the country? The purpose of local notice for transfer, renewal, and other broadcast applications is to enable members of the public whom the station is supposed to serve to comment on the applications, but interested minority buyers, like any other buyers, might well be outside the station's service area. We are inclined to think that this is not really a problem because minority investors interested in broadcasting and their brokers would read the trade press which would doubtless learn of and report stations for sale when notice was given. Assuming that more minority investors learn of stations for sale, because of the notices, would this actually lead to a greater number of offers to buy with resulting purchases by them?

9. Is 45 days the appropriate time period? On the one hand, too long a delay would harm broadcasters, since a station would be operating in an uncertain status for a longer period, with lowered employee morale, employees leaving, and possible decline in revenue. On the other hand, if the time were too short, minority buyers would not be able to investigate the market and assemble the needed capital.

10. As indicated above, we need more than simple arguments pro and con and seek specific discussion of both procedural and substantive facets of a rule and its likely impact on affected parties. In commenting, parties should consider that we suggest a straightforward requirement with uncomplicated exceptions because evaluating requests for exemption from the requirement could cause more delay in the sale of a station than merely waiting 45 days before signing a contract of sale.[1]

11. Section 310(d) of the Communications Act, 47 U.S.C. section 310(d), provides in pertinent part that in acting on a transfer or assignment application "the Commission may not consider whether the public interest * * * might be served by the transfer, assignment, or disposal of the permit or license to a person other than the proposed transferee or assignee."[2] Thus enforcement of any such rule would be limited to ensuring that the seller publishes and files proof of publication of the notice with its transfer or assignment application. In accord with section 310(d), the Commission does not have the authority to interfere with the licensee's choice of a buyer. However, that does not necessarily preclude action designed to potentially increase the number of buyer from which the licensee may choose.

THE PAUL AND SANDLER PETITION

12. The petition urges that the Commission amend its ruels to require a seller to broadcast advance notice of a transfer to the local public and asks that the Commission urge Congress to amend section 310 to permit it to consider a competing transferee. To this end, petitioners propose that 30 days before filing a transfer application, the seller broadcast notice of its intent to transfer the station, announcing that a written statement concerning the transfer is available at the station and inviting interested

[1] For example, while time may be of the essence in some cases which fall within the exceptions to the Three Year Rule (Sec. 1.597(a)(3) of the Rules, 47 CFR sec. 1.597(a)(3)), it is not possible to determine which applications do fall within the exceptions until after examination of the applications. Thus as much time might be required to decide whether to waive the notice requirement as would be consumed by following the notice procedure.

[2] Congress added this language to Section 310 in 1952, because it wished to make sure that the Commission did not reinstate its former "Avco" rule. The Commission had announced the Avco rule in *Powel Crosley, Jr.*, 11 F.C.C. 1 (1945), stating that when a transfer or assignment application was filed, the Commission would give public notice and require the applicant to give public notice locally of the proposed sale and to invite others to apply for the facilities on the same contract terms. The Commission would hold the application for 60 days to allow competing applications to be filed. If no one filed another application, the original application would be considered on its merits. If others filed, all would be considered to determine which was the best qualified. If a competing applicant were preferred, the original transfer application would be denied and consent would be given to transfer to the preferred applicant if the parties made a contract and filed a new application within thirty days. The Commission followed this procedure, garnting waivers in some instances, for a few years but abandoned it in 1949. Congress amended section 310 to add the quoted language to make sure that the Commission did not reinstate the procedure. See S. Rept. No. 142, 82nd Cong. 1st Sess., 8–9 (1951).

persons to comment to the FCC on the merits of the transfer. The written statement would contain information about the buyer, its programming plans, and a statement that any interested party objecting to the transfer can file a petition to deny it. Petitioners state that public participation in the transfer process would help the Commission decide whether a transfer is in the public interest and "[t]he rationale for this proposed rule is the same rationale that underlies allowing petitions to deny renewal of licenses."

13. It appears that petitioners are unaware of our existing rules requiring publication of notice of transfers in almost the same manner they recommend. Further, the type of rule about which we are inquiring in this Notice would provide the public with even more information regarding an impeding transfer than the rules presently require.

14. Section 1.580 (c) and (d) of our Rules, 47 CFR section 1.580 (c) and (d), require a seller to publish in a local newspaper and broadcast over its station notice of the transfer or assignment application and of any major amendment to it after it tenders for filing at the Commission the ayplication or amendment. Section 1.580(f) lists information that the notice must contain, which must include the name of the transferee, the names of the partners if the transferee is a partnership, the names of officers and directors and principal stockholders if the transferee is a corporation, and a statement that a copy of the application and related material is available for public inspection at a specified location. Procedures for objecting to the applicaiton[3] are described in the FCC publication, *The Public and Broadcasting*, 39 F.R. 32288, September 5, 1974, which is required, by section 1.526(a)(6) of the Rules, 47 CFR section 1.526(a)(6), to be kept in a station's public file along with applications.

15. In summary, the present rules provide essentially all the procedures which petitioners request to enable the public to participate in the Commission's decisionmaking process on a transfer application. The seller is required to alert the public to the transfer and to provide information regarding it. Thereafter the public may participate formally or informally in the Commission's deliberations. Therefore we see no need to consider petitioners' proposal, and we will deny this part of the petition.

16. *Proposed amendment of section 310.* Petitioners also ask the Commission to urge Congress to amend section 310 of the Communications Act, 47 U.S.C. section 310, to allow the Commission to consider a competing transferee to a limited extent. Their proposal differs from the former "Avco" procedure described in footnote 3, supra, in that it would give a preference to the buyer proposed by the licensee, require the competing applicant to pay the seller's price in cash, to pay the seller's costs in the hearing and the buyer's costs if the buyer prevails (but not otherwise), and require an expedited hearing process which would take no longer than the time to process a transfer application not involving a hearing.

17. While petitioners' ideas are interesting, we do not believe their suggestions are workable as proposed. In our experience, in most cases where a transfer application is designated for hearing, to determine the transferor's or transferee's qualifications, it is withdrawn because the parties do not wish to go through the time and expense of a hearing. Petitioners' proposal for comparative hearings would not cure this problem. The transferee would still risk bearing the expenses if it lost. Also it is impossible for the Commission to speed up the hearing process to be able to conclude the hearing in the time it takes to process a routine application. As petitioners are undoubtedly aware, hearings often take months or, in many instances, years, while a routine transfer application is processed in about 90 days. The length of time of a hearing is not entirely within the Commission's control as the parties themselves take time for discovery and file various motions which often delay the process. Further, even if the entire record were certified immediately to the Commission after the conclusion of the hearing, the parties still may appeal to the courts, a right which cannot be foreclosed by the FCC. Finally, although under section 310 the Commission cannot consider a competing transferee, such an applicant can always file a competing application against the station's next renewal application and seek comparative consideration at that time.

18. Authority for the institution of this proceeding is contained in section 403 of the Communications Act of 1934, as amended.

19. Pursuant to procedures set forth in section 1.415[4] of the Commission's Rules, interested persons may file comments on or before October 3, 1977, and reply comments on or before November 1, 1977. The Commission will consider all relevant and timely comments and may also consider other relevant information before it before taking further action in this proceeding.

20. In accordance with the provisions of section 1.419 an original and five copies of all comments, replies, briefs, and other documents shall be furnished the Commission. Further, members of the general public who wish to participate informally in the proceeding may submit one copy of their comments, specifying the docket number in the heading. All filings in this proceeding will be available for examination by interested persons during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

21. *It is ordered*, That the petition filed by Stephen H. Paul and Howard B. Sandler (RM–1754) is denied.

FEDERAL COMMUNICATIONS COMMISSION
VINCENT J. MULLINS,
Secretary.

SEPARATE STATEMENT OF COMMISSIONER BENJAMIN L. HOOKS

From a procedural standpoint, I would have desired that this inquiry would have been accompanied by a rule proposal to effectuate the concept should the Commission find it meritorious.

While I freely admit that the notice of intended sale under consideration herein is by itself no panacea for the problem of negligible minority broadcast ownership, such pre-sale notice could open up the marketplace in station properties to those unsophisticated in the assignment process. If nothing else, it would also enlighten the public about the nature of broadcast station acquisition and give citizens in the licensee community an awareness of the availability of a particular station, thereby encouraging both local and minority interest.

[FR Doc 77-23457 Filed 8-12-77;8:45 am]

[3] Petitioners do not appear to be aware that section 309(d) of the Communications Act and section 1.580(i) of the Rules permit interested parties to file petitions to deny transfer applications within 30 days following public notice of their acceptance for filing and that section 1.587 of the Rules permits anyone to file an informal objection to any application, at any time before the application is granted. Moreover, section 309(b) of the Communications Act and section 1.580(b) of the Rules provide that the Commission cannot grant a transfer application earlier than 30 days following public notice of its acceptance for filing, which follows at least several days after its tendering for filing.

[4] Pursuant to section 1.430 of the Commission's Rules the various procedural requirements applicable to rule making proceeding apply to proceedings on a notice of inquiry.

[47 CFR Part 91]

[Docket No. 21342; RM-2792; FCC 77-510]

ALLOWING TRANSMISSION OF PULSED CARRIER EMISSIONS ON THE FREQUENCIES 154.570 AND 154.600 MHZ

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rule making.

SUMMARY: This notice is in response to formal petition requesting amendment of the Commission's rules and regulations to allow "pulsed carrier" emmission on the low power Business Radio Service frequencies 154.570 and 154.600 MHz.

The objective is to permit operation of a vehicle guidance system designed by the petitioner specifically for vehicles which are used to apply fertilizer, pesticides, and herbicides on farm crops. Apparently, there is a significant problem with either skipping over or overlapping areas which this guidance system would eliminate.

A rule amendment is needed because the present rules do not allow the transmission of "pulse" emissions on those frequencies.

DATES: Comments must be received on or before August 29, 1977, and reply comments must be received on or before September 9, 1977.

ADDRESS: Send comments to: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

John Wood, Industrial and Public Safety Rules Division, Safety and Special Radio Services Bureau, Federal Communications Commission, Washington, D.C. 20554 (202-632-6497).

NOTICE OF PROPOSED RULE MAKING

Adopted: July 14, 1977.

Released: July 22, 1977.

In the matter of amendment of section 91.554 (a) and (b) of the Commission's rules and regulations to allow transmission of pulsed carrier emissions on the frequencies 154.570 and 154.600 MHz.

By the Commission:

1. The Commission has before it the above-entitled petition filed by Ag Nav, Inc. (Ag Nav), requesting amendment of section 91.554 of the Commission's rules to permit pulsed carrier type emissions on the frequencies 154.570 and 154.600 MHz.

2. Ag Nav has developed a vehicle guidance system designed to facilitate the more efficient application of fertilizers, herbicides, and other chemicals used in agriculture by permitting more accurate measurement of the distance from the last applied path of chemical and thus eliminate skips and overlaps. It is claimed that there is not an effective vehicle guidance system in agricultural spraying operations, and, Ag Nav claims, this results in substantial crop damage as well as excessive use of chemicals.

3. The Ag Nav system uses a pulsed carrier, low power, narrow channel (5 kHz) VHF radio transmission technique to guide the spraying vehicles. Although only a single, simplex frequency assignment is required for each system, division of the two frequencies into three 5 kHz channels each will facilitate the operation of up to six systems in adjacent fields or within potential interference range of each other.

4. Ag Nav argues that the proposed use of the frequencies 154.570 and 154.600 MHz will have minimal impact on existing users. These frequencies are available in the Business Radio Service for low power (up to 2 watts output) general use. The petitioner's system would use about 1 watt of power and this, Ag Nav believes, would limit its interference potential to less than 2 miles. In addition, Ag Nav points out that this use will be concentrated in rural areas, whereas most existing users are in urban areas. Finally, the petitioner notes that non-voice facilities are already permitted on the subject frequencies and the proposed pulsed carrier transmission would pose no more serious interference potential.

5. Sears, Roebuck and Co. (Sears) was the only party which filed comments. Sears stated that it should be possible to accommodate the needs of Ag Nav without interfering with ordinary Business Radio communications; but, to minimize the possibility of such interference, Sears urged that any proposed rule specifically include the 2 watt power and 25 foot antenna height limits contained in section 91.554(b) (13), and (14) of the Commission's Rules, that this operation be prohibited within 25 miles of urbanized centers with a population of 100,000 or more, and that the operation be authorized on a secondary, non-interference basis to voice operations.

6. We have considered that petition and the comments on it and it appears to us that Ag Nav's proposal could be accommodated on the frequencies mentioned without disruptions or serious interference problems; that the proposal could enhance spectrum utilized; and that it would benefit the public through improved agricultural production. We have considered Sears' suggestions, but we do not believe that the restrictions proposed would be necessary, although parties may want to address this matter further in the comments.

7. In view of the foregoing, we propose to amend section 91.554(b) of the Rules to allow pulsed carrier (P0 or P2) emissions of 5 kHz bandwidth limited to peak power outputs of 1 watt centered on 154.570 and 154.600 MHz or 5 kHz above or below these frequencies. In addition, we ask for comments on whether pulsed carrier emissions should be permitted in the remaining low power frequencies now allocated in the Business Radio Service.

8. The proposed rule amendment is issued under sections 4(i) and 303(r) of the Communications Act of 1934, as amended. Pursuant to applicable procedures set forth in section 1.415 of the Commission's rules, interested persons may file comments on or before August 29, 1977, and reply comments on or before September 9, 1977. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this notice.

9. In accordance with the provisions of section 1.419 of the Commission's rules, an original and five copies of all statements, briefs, or comments filed shall be furnished the Commission. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

It is proposed that the Commission's rules and regulations be amended as follows:

Section 91.554(a) is amended by the addition of a new limitation (51) to the frequencies 154.570 and 154.600 MHz, and paragraph (b) is amended to read as follows:

§ 91.554 Frequencies available.

(a) * * *

Frequency or band	Class of station(s)	General reference	Limitations
* * *	*	*	*
MHz			
* * *	*	*	*
154.570	Mobile.....	Low power general use.	13, 14, 44, 51
154.600	...do.....	...do.....	13, 14, 43, 51
* * *	*	*	*

(b) * * *

(51) This frequency may be used, with the transmitter carrier centered on the designated frequency or 5 kHz above or below the designated frequency, with P0 or P2 emission, using a bandwidth of 5 kHz and a power not to exceed 1 watt peak power output.

* * * * * *

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. MC-88 (Sub-No. 1)]

[49 CFR Part 1307]

FREIGHT RATE TARIFFS, SCHEDULES, AND CLASSIFICATIONS OF MOTOR CARRIERS

Detention of Motor Vehicles—Alaska

AGENCY: Interstate Commerce Commission.

ACTION: Institution of proceeding to consider amending a final rule.

SUMMARY: The Interstate Commerce Commission is instituting a proceeding to consider exceptions from the free time allowances and detention charges prescribed in Ex Parte No. MC-88, Detention of Motor Vehicles Nationwide, 126 M.C.C. 803, for origins and destinations within the state of Alaska. The proceeding is being instituted in response to petitions filed pursuant to the Commission's report on reconsideration, 126 M.C.C. 803. The impact of this proceeding will be confined to origins and destinations within Alaska.

DATES: Persons wishing to participate must file statements of intent to participate on or before September 4, 1977.

ADDRESSES: Send statements of intent to participate to: Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak, Deputy Director, Section of Rates, or Harvey Gobetz, Assistant Deputy Director, Section of Rates, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423. 202-275-7963 or 275-7656.

A proceeding is instituted to consider amending 49 CFR 1307.35(e).

H. G. HOMME, Jr.,
Acting Secretary.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 20]

MIGRATORY BIRD HUNTING

Proposed Frameworks for Late Season Migratory Bird Hunting Regulations for Waterfowl

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Supplemental proposed rule.

SUMMARY: This document supplements proposed rulemakings published in the FEDERAL REGISTER on March 10 and May 25, 1977, and proposes to establish frameworks, that is, the outer limits for dates and times when shooting may begin and end, and the number of birds which may be taken and possessed for late season migratory bird hunting regulations. The Service annually prescribes hunting regulations framework to the States. The effects of this proposed rule are to facilitate the selection of hunting seasons by the States and to establish late season migratory bird hunting regulations for the 1977-78 season.

DATES: Comments due by August, 25, 1977.

ADDRESS: Comments to: Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

John P. Rogers, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240 (202-343-8827).

SUPPLEMENTARY INFORMATION: The annual process for developing migratory game bird hunting regulations is divided into those for "early" seasons adn those for "late" seasons. Early seasons include those which open before October 1 while late seasons open on or after October 1. Regulations are developed independently for early and late seasons. The early season regulations cover mourning doves, white-winged doves, band-tailed pigeons, rails, gallinules, woodcock, common snipe, sea ducks in the Atlantic Flyway, teal in September in the Central and Mississippi Flyways, lesser sandhill cranes in North Dakota and South Dakota, doves in the Virgin Islands and Hawaii, all migratory game birds in Puerto Rico and Alaska, and special falconry seasons. Late seasons include the general waterfowl seasons; special seasons for scaup and goldeneyes; extra scaup and blue-winged teal in regular seasons; most sandhill crane seasons in the Central Flyway; coots, gallinules, and snipe in the Pacific Flyway; and special falconry seasons.

Certain general procedures are followed in developing regulations for both the early and the late seasons. Initial regulatory proposals are first announced in a FEDERAL REGISTER document in early March, and opened to public comment. As additional information becomes available, and comments are received and considered to the initial proposals, a supplemental proposed rulemaking is announced in the FEDERAL REGISTER. At the termination of the comment periods and following a public hearing, the Service develops and publishes the proposed frameworks for times of seasons, season lengths, shooting hours, daily bag and possession limits, and other regulatory restraints or options. Following another public comment period, and after consideration of additional comments, the Service publishes in the FEDERAL REGISTER the final frameworks. Using these frameworks, State conservation agencies select hunting season dates and offered options. States may select more restrictive seasons and options than those offered in the Service's frameworks. The final regulations, reflected in amendments to Subpart K of 50 CFR 20, then appear in the FEDERAL REGISTER, and become effective upon publication.

On March 10, 1977, the Service published for public comment in the FEDERAL REGISTER (42 FR 1331) proposals to amend 50 CFR 20, with a comment period ending May 18, 1977. That document dealt with minor modifications in § 20.11 of Subpart B, the addition of § 20.40 in Subpart D, and with establishment of seasons, limits and shooting hours for migratory birds under §§ 20.101 through 20.107 of Subpart K. On May 25, 1977, the Service published for public comment in the FEDERAL REGISTER (42 FR 26669) a second document in the series consisting of supplemental proposed rulemaking dealing specifically with a number of supplemental or modified proposals and clarification or correction of minor portions of the earlier document. On July 5, 1977, the Service published in the FEDERAL REGISTER (42 FR 34305) a third document in the series consisting of final rulemaking dealing specifically with final frameworks from which wildlife conservation agency officials in Puerto Rico and the Virgin Islands could select season dates for hunting certain migratory birds in Puerto Rico and the Virgin Islands during the 1977-78 season. On July 5, 1977, the Service also published for public comment in the FEDERAL REGISTER (42 FR 34342) a fourth document in the series consisting of supplemental proposed rulemaking dealing specifically with proposed frameworks for early season migratory bird hunting regulations from which, when finalized, States could select season dates and daily bag and possession limits for the 1977-78 season. On July 15, 1977, the Service announced in a fifth document in the FEDERAL REGISTER (42 FR 36495) the availability of a draft environmental assessment on shooting, hours and allowed a 10-day public comment period. On July 22, 1977, the Service published in the FEDERAL REGISTER (42 FR 37552) a sixth document in the series consisting of final rulemaking dealing specifically with final frameworks (except shooting hours) for early season migratory bird hunting regulations in all States during the 1977-78 seasons from which States selected early season dates and daily bag and possession limits for the 1977-78 season. On August 9, 1977, the Service published in the FEDERAL REGISTER (42 FR 40211) a seventh document in the series consisting of final rulemaking dealing specifically with final frameworks for shooting hours for early season migratory game bird hunting regulations in all States during the 1977-78 season. On August 5, 1977, the Service delivered to the FEDERAL REGISTER an eighth document in the series consisting of final rulemaking amending Subpart K of 50 CFR 20 to set open hunting seasons, certain closed areas, shooting hours and bag and possession limits for mourning doves, white-winged doves, band-tailed pigeons, rails, woodcock, snipe, and gallinules; September teal seasons; sea ducks in certain defined areas of the Atlantic Flyway; sandhill cranes in designated portions of North Dakota and South Dakota; and migratory game birds in Alaska, Hawaii, Puerto Rico and the Virgin Islands which will be published on or about August 17, 1977. This document is the ninth in a series of proposed, supplemental, and final rulemaking documents for migratory game bird hunting regulations and deals specifically with proposed regulations frameworks for 1977-78 late hunting seasons on certain migratory game birds.

On June 21, 1977, a public hearing was held in Washington, D.C., as announced in the FEDERAL REGISTER (42 FR 26709; May 25, 1977; and 42 FR 29325; June 8, 1977) to review the status of mourning doves, woodcock, band-tailed pigeons, white-winged doves, rails, gallinules, lesser sandhill (little brown) cranes in North Dakota and South Dakota, and common (Wilson's) snipe. Proposed hunting regulations for these species were discussed plus those governing migratory game birds in Alaska, Puerto Rico, and the Virgin Islands; mourning doves in Hawaii; September teal seasons in the Mississippi and Central Flyways; and special sea duck seasons in the Atlantic Flyway. Statements or comments were invited. On August 2, 1977, a public hearing was held in Washington, D.C., as announced in the FEDERAL REGISTER (42 FR 26709; May 25, 1977; and 42 FR 34897; July 7, 1977), to review information on population status and proposed hunting regulations for waterfowl, coots, and gallinules; lesser sandhill (little brown) cranes in Colorado, New Mexico Oklahoma, Texas, Montana and Wyoming; common (Wilson's) snipe in the Pacific Flyway; and special falconry

regulations. Statements or comments were invited.

This supplemental proposed rulemaking document identifies a number of changes to the original framework proposals published on March 10, 1977, in the FEDERAL REGISTER, and as supplemented on May 25, 1977. The present supplemental proposals are briefly described as follows.

REVIEW OF PUBLIC COMMENTS AND THE SERVICE'S RESPONSE TO SAME

The public was given several opportunities to comment on regulations being proposed for late seasons during 1977–78. Altogether, 662 written public comments were received by August 4, 1977, and given consideration. The Service advised that interested persons should respond by May 18, 1977, to the initial regulatory proposals shown in the FEDERAL REGISTER dated March 10, 1977, on page 13313. One hundred twenty-eight comments were received. A supplemental proposed rulemaking appeared in the FEDERAL REGISTER on May 25, 1977 (42 FR 26669), and the public was given until July 14, 1977, to submit comments. Twenty-nine comments were submitted. The public was notified in the FEDERAL REGISTER on July 15, 1977, that a draft environmental assessment on shooting hours for migratory game birds was available for review and comment, and that comments would be considered if received by July 25, 1977 (42 FR 36495). Four written comments on the draft environmental assessment were received by July 25, 1977. Five additional written comments were received between July 26 and August 1 after the close of this comment period but were, nevertheless, considered in preparing the final environmental assessment for proposed shooting hours regulations.

Many of the earlier comments dealt with the early season regulations, and these were tabulated and analyzed in the FEDERAL REGISTER dated July 5, 1977, on page 34306, and July 22, 1977, on page 37552. Many letters contained statements on several topics. Some regulatory proposals, such as shooting hours, pertain to both early and late season proposals. Some respondents submitted more than one statement during the overall comment period. Also, some of the comments addressed topics outside the scope of the regulatory proposals, and in this regard, were irrelevant.

The following review of comments includes all those arising from the various comment periods noted above, except for those relating to the draft environmental assessment on shooting hours which were analyzed separately in the FEDERAL REGISTER dated August 9, 1977 (42 FR 40211). In addition to the written comments, four verbal statements were presented at the public hearing in Washington, D.C., on August 2, 1977, at which proposed late season regulations were reviewed and discussed. These statements were offered by the Wildlife Management Institute, the National Audubon Society, the Defenders of Wildlife, and Ducks Unlimited. In addition, two statements were filed by the Wildlife Society and the Ohio League of Sportsmen. The summary of comments and the Service's response are presented with the same numerical identification and sequence as they appeared in the March 10, 1977, FEDERAL REGISTER.

1. *Shooting hours.* Thirty-six comments on shooting hours were reported and evaluated in the FEDERAL REGISTER dated July 22, 1977, on page 37553). That document also described the litigation brought last year by Defenders of Wildlife and the decision rendered by Judge Gerhard A. Gesell of the U.S. District Court, Washington, D.C. The Service subsequently prepared a draft environmental assessment on shooting hours for migratory game birds, solicited and considered comments on it, and issued a final environmental assessment on August 1, 1977, with a declaration that the proposed shooting hours did not constitute a major Federal action which could significantly affect the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969. The Service finalized shooting hours of one-half hour before sunrise to sunset for most migratory game birds included in early season regulations in the FEDERAL REGISTER dated August 9, 1977 (42 FR 40211). In the meantime, a large number of additional communications were received on the subject of shooting hours. Of the 420 additional comments, 401 private individuals, 8 were from organizations, and 11 were from State conservation agencies. These respondents overwhelmingly favored retention of the usual one-half hour before sunrise to sunset shooting hours for migratory game bird hunting. Only 5 adverse comments, including a telegram from Wildlife Preserves, Inc., were received. The wire from Wildlife Preserves, Inc., simply urged consideration of later opening hours.

Response: The Defenders of Wildlife, the plaintiff in last year's suit, offered extensive comments on the shooting hours environmental assessment. The views of Defenders and others on the assessment were considered before the final environmental assessment on shooting hours was prepared. These comments, and the Service's response to them, was given in the FEDERAL REGISTER dated August 9, 1977, on pages 40212–40213. The provisions of the Endangered Species Act of 1973 were also taken into consideration in developing shooting hours proposals for late season regulations. In view of the information presented in the environmental assessment on shooting hours, including Section 7 consultation, and the overwhelming desire expressed by the public to retain the same hunting hours as in the past, the Service proposes to establish shooting hours of one-half hour before sunrise to sunset in the late season regulations. The Service does not believe that the proposed shooting hours jeopardize the continued existence of any endangered or threatened species of designated critical habitats or affect the Service's obligations to enhance the conservation efforts for such listed species.

2. *Framework dates for ducks and geese in the continental United States.* Thirty-four comments on these proposals were received. They were submitted by 2 waterfowl flyway councils, 12 States, 2 organizations, and 18 individuals. Of these, 24 favored the season frameworks as originally proposed. The opposing comments usually involved minor changes in the season framework to allow earlier or later hunting seasons. The latter usually supported by little or no supporting data or substantial rationale. The Atlantic Flyway Council urged that consideration be given to extending the end of the season framework for Canada geese from January 20 to January 31, 1978, to better accommodate a proposed lengthening of the Canada goose season in certain portions of that Flyway.

Response: The Service believes that it is appropriate to extend the season framework for Canada geese in the Atlanta Flyway to January 31, 1977, but that the extension should be confined to the areas where a longer season is contemplated (Delaware, a portion of southeastern Pennsylvania, and the Delmarva portions of Maryland and Virginia). Because of shorter season lengths elsewhere, there does not appear to be need to extend the framework closing date throughout the Flyway.

3. *Black ducks.* Ten comments were received regarding this species. Six favored retention of the same general hunting regulations as in the past. One organization recommended that reduced limits or closed seasons be considered for species such as the black duck which appear to be declining in abundance or for which adequate information is lacking. Another organization urged that the population status of species such as the black duck should be reviewed immediately and hunting regulations be modified as necessary. None of these statements provided new data or substantive information which would support regulatory changes.

Response: The Service in an earlier FEDERAL REGISTER dated March 10, 1977, on page 13315, reviewed black duck research and management programs, including cooperative international activities. An environmental assessment on black duck hunting regulations was prepared in August 1976. This document, which was made available to the public, reviewed the status of the species, and evaluated several management alternatives. The Service notes that recent surveys indicated decreases in black ducks wintering in the Atlantic and Mississippi Flyways. However, because of the unusual severity of the past winter and its effect upon black duck habitats and distribution, the survey results are not believed to be comparable to those from past years. No change in black duck regulations are contemplated at this time.

4. *Wood duck.* The Service announced in the FEDERAL REGISTER dated March 10, 1977, on page 13315, that it had been requested to consider ways of providing for additional harvest of southeastern wood ducks that would not increase the harvest of wood ducks from breeding populations in the North. The request was based on a general increase in eastern wood duck populations in recent years, and a recent study suggesting that southeastern wood ducks are subjected to lower shooting pressures and have higher survival rates than northern wood ducks. After considering various ways of doing this, the Service proposed in the FEDERAL REGISTER dated May 25, 1977, on page 26670, to allow additional harvest of wood ducks for a period not to exceed 9 days during the period October 1–15 in southeastern States provided that the days taken are a part of the regular waterfowl season days and that this special provision for wood ducks be subject to evaluation and reporting of results by participating States. During the October period, wood ducks would be subjected to no special restrictions under conventional regulations. In States selecting the point system, the species would be allocated 25 points during the early October season.

Fifteen comments were received; 2 were from waterfowl flyway councils, 9 from States, and 4 from individuals. Most of the comments related to the merits of a September hunting period versus an early October hunting period. One comment from an individual who conducted research investigations of southern wood duck populations, expressed the view that northern wood ducks being shot in southern areas would likely increase proportionately from September to November.

Response: Little band recovery data are available by which to assess the movement of northern wood ducks into southern areas. The Service notes that the selection of early October hunting seasons for the purpose of additional harvest of southeastern wood ducks would likely result in reduced harvests later in the season when northern wood ducks are abundant in these areas because fewer hunting days would occur then. Also, the Service does not believe that it would be desirable to set a hunting season in September when all species of ducks could be taken. An environmental assessment on wood ducks is being prepared.

5. *See ducks.* Seven comments were received from 5 States, 1 waterfowl flyway council, and 1 private conservation organization. Six of the seven comments favored continuation of special sea duck seasons in the Atlanta Flyway, as in the past. One private organization expressed the view that this and other special seasons should be eliminated in order to simplify regulations and strengthen law enforcement. No data or other supporting information were provided.

Response: The Service is of the view that elimination of this season would significantly reduce the opportunity to hunt sea ducks (scoters, eiders, and oldsquaws) and that this is unnecessary from a management standpoint.

7. *Extra blue-winged teal option.* Of the 8 comments received, 7 favored retention of this option. The dissenting statement was from an organization which provided no data or other supporting information. This organization's views, and the Service's response, are identical to those expressed above for sea ducks.

8. *Special scaup season.* Of the 8 comments received, 6 favored retention of this option. Dissenting comments were submitted by two organizations. One organization suggested elimination of the special season as a means of simplifying regulations, and thus strengthening enforcement programs. The other organization expressed concern about the population status of the goldeneye, a species which may be taken along with scaup in a limited special season with specially restricted bag limits in the Lake Champlain area of New York and Vermont. In addition, the goldeneye may be taken during regular duck hunting seasons. No data or additional information regarding the species were provided.

Response: The Service does not believe that the hunting seasons for scaup or goldeneyes pose any threat to the welfare of the two species, and therefore proposes to allow hunting as in the past. Appropriate action will be taken should harvest or population surveys indicate that it is necessary or desirable.

9. *Extra scaup option.* Eight respondents commented on the proposal to again allow the option for extra scaup during the regular duck season. These included statements from 5 States and 2 waterfowl flyway councils—all of which favored the proposal—and one organization which opposed it. The latter reiterated its opposition to allowing bonus birds in addition to the daily bag limit. No data or additional information were included in the communication.

Response: The Service is of the view that the harvest of scaup that occurs under this option is not excessive. Information from population and harvest surveys are reviewed annually and should it appear that an excessive harvest of scaup is occurring, appropriate action will be taken to modify the regulations.

10. *Mergansers.* Eleven communications were received from 6 States, 2 individuals, 2 organizations, and 1 waterfowl flyway council on this proposal. Opposition was expressed by two organizations. One simply stated its opposition without providing data or other information. The other organization expressed particular concern about the population status of the hooded merganser and the common merganser. One individual suggested that consideration should be given to prohibiting the shooting of any mergansers because they are inedible, and because the status of the hooded merganser is not satisfactory.

Response: The Service notes that the hooded merganser has been accorded special nationwide protection for many years. In States selecting conventional regulations, it is again proposed that only one hooded merganser be allowed daily. A 70-point allocation is again proposed in States selecting the point system means of establishing daily bag limits. The Service does not believe that continuation of the same hunting regulations as in the past poses any jeopardy to the welfare of mergansers. In some locales, mergansers are readily eaten and the hooded merganser especially is considered to be desirable.

11. *Canvasbacks and redheads.* Fourteen comments on one or both of these species were received and considered. Favorable comments originated from 5 States, 4 waterfowl flyway councils, and one individual. Opposing statements were received from 3 organizations and one individual. Two organizations advocated some modification of the closed areas established to protect the species. Another organization expressed concern about population levels of the species. One individual suggested that hunters should be allowed at least one bird daily in the event one were shot accidentally.

Response: The Service conducted an in-depth study of canvasback and redheads management last year in the form of an environmental assessment. Copies were made available to the public. The assessment established criteria for monitoring population levels and setting short- and long-term objectives. According to these standards, the present breeding population index of convasbacks is 12 percent above the short-term objective of 625,000 birds, and 18 percent below the long-term objective of 825,000 birds. The redhead index is 5 percent above the short-term objective of 825,000 birds, and 13 percent below the long-term objective of 1,000,000 birds. A special redhead survey conducted in mid-winter of 1976 indicated the presence of nearly a million birds in the Gulf of Mexico regions of the United States and Mexico. Drought conditions this summer in the prairies suggest that the production of both species probably will be poor. However, the Service anticipates that harvest of both species will be reduced this fall because of reductions in season length in the Mississippi and Central Flyways and the higher than usual proportion of less-vulnerable adult birds in the fall flight. The harvest of both species is restricted substantially under present regulations. Accordingly, no further restrictive measures are proposed at this time.

12. *Point System.* Two waterfowl flyway councils, 8 States, 3 individuals, and 1 organization favored retention of the point system as it is now constituted. Five individuals favored changing the point allocations of certain species, based upon local considerations.

Response: Point system allocations may be modified according to waterfowl abundance and management objectives; however, no changes are contemplated this year, except for wood ducks in southern areas in connection with an early October season option. Other regulatory measures such as season frameworks,

season lengths, and zoning are being utilized to fulfill the needs of the 1977–78 waterfowl regulatory program.

13. *Zoning.* Twenty-seven comments related to zoning proposals were identified in 42 FR 26669; May 25, 1977. These included 2 waterfowl flyway councils, 6 States, 1 organization, and a number of individuals. All were favorable except one which alleged that zoning would unduly complicate regulations.

Response: The Service proposes to allow Illinois, Indiana, Maine, Michigan, Missouri and Ohio the option to establish experimental watefowl seasons by north and south zones. The intention of this provision is to better distribute the waterfowl harvest within each State and not to increase the overall State harvest. Harvests will be monitored for 3 years, and if necessary, regulatory penalties will be imposed. An environmental assessment is being prepared on this management technique.

14. *Goose and brant seasons.* Comments were received from 4 waterfowl flyway councils, 5 States, 5 organizations, and 5 individuals. Eleven statements recommending regulations other than those proposed by the Service generally related to minor changes in season lengths in local areas or to State selections of seasons within framework opening and closing dates. The various proposals and their rationales are summarized by flyways.

Atlantic Flyway. The Atlantic Flyway Council urged that the length of the snow goose season in the Atlantic Flyway be increased to 60 days (30 days last year) and the daily bag limit be increased to 3 (2 last year) because large and concentrated populations are causing habitat destruction, increasing crop depredations, and risk of disease. The Service concurs with the recommendation on season length, and accordingly proposes a 60-day season for 1977, but proposes no change in the daily bag limit at this time. The Service believes that while the Atlantic snow goose population is relatively large, production this summer may be somewhat below average. Under these circumstances, it is believed that regulation changes should be confined to lengthening of the hunting season. The Atlantic Flyway Council recommended, and the Service proposes, that the season length for Canada geese in southeastern Pennsylvania, Delaware, and the Delmarva portions of Maryland and Virginia be increased from 70 to 90 days, and that the daily bag and possession limits be increased to 4 and 8 birds, respectively. These regulatory changes are based on the following considerations: (1) The population is at a record high and is continuing to increase; (2) excessive numbers of geese are concentrating in the above areas during winter; (3) increasing crop depredations; and (4) increasing risk of disease. Two organizations expressed concern about brant, without noting whether the concern was for the Atlantic Flyway brant or for the black brant of the Pacific Flyway. Because of heavy losses among Atlantic Flyway brant from severe habitat conditions the past winter, a closed season is proposed.

Mississippi Flyway. Louisiana requested that it be given authority to set goose seasons by east and west zones as is allowed for duck seasons. The Service concurs with the recommendation, as it is not expected to result in any significant increase in harvests. An earlier FEDERAL REGISTER dated May 25, 1977, on page 26671, proposed a harvest quota of 15,000 Canada geese (Mississippi Valley Population) in Kentucky. This proposal is modified to limit the quota to the Ballard County area only; the few geese harvested elsewhere in Kentucky belong to other management populations. Wisconsin proposed a modification of the Horicon quota zone and the establishment of a second quota zone to facilitate the management of Canada geese. The Service supports these regulatory proposals. A number of other regulatory boundary changes for Canada geese elsewhere in the flyway were recommended by the Mississippi Flyway Council and the Service concurs with these recommendations as means of improving the management of Canada geese.

Central Flyway. The Service proposes to eliminate the two-week season restriction for "dark" (Canada and white-fronted) geese in ten Missouri River counties of South Dakota. This restriction was imposed in 1976 to provide additional control over the harvest of geese in commercial hunting areas. The South Dakota Game, Fish and Parks Commission has adopted State regulations pertaining to commercial hunting (leasing of blinds), the means by which much of the hunting is conducted there.

The Central Flyway Council recommended that the daily bag limit restriction of one Ross' goose be eliminated because the geese are increasing in abundance and the regulation possibly is ineffective. The Service believes that such action should be coordinated with management efforts for the species in Canada, where it is given special protection. Also, the research studies presently underway on the species should be concluded before any such regulatory change is made.

Pacific Flyway. Concern has been expressed about lesser snow geese in the Pacific Flyway, notably the population segment which breeds on Wrangel Island, U.S.S.R. This population has declined in recent years, chiefly because of poor production caused by delayed ice and snow disappearance from the nesting area. The snow goose limit in the Pacific Flyway was reduced several years ago to 3 birds and the Service intends to retain that restriction as one means of providing greater protection to the Wrangel Island population. In addition, further restrictions on season length and bag limits have been imposed in recent years by the State of Washington in the Skagit Flats area where Wrangel Island geese concentrate during fall migration, and by State of Oregon in the area west of the Cascades where these geese may be exposed to hunting. It is expected that these special State restrictions will be continued in 1977. The Wrangel Island geese intermix with other snow geese on the wintering area in the Central Valley of California and it is not practical to apply regulatory restrictions specifically to them in this area. Two organizations expressed concern about the status of lesser snow geese in the northwest but provided no information to support regulatory changes. Several comments related to the closed areas established in California two years ago for Aleutian Canada geese. Because of recent information from field observations and banding, it is proposed to delete Mendocino County, California, from the areas closed to all Canada goose hunting. No observations of wild-produced or breeding Aleutian geese have been reported there the past two years. The lone record was from a captive-reared bird released in Alaska. It is proposed to advance the closure period for the San Joaquin closed area, California, to November 25, 1977, in order to afford more protection to Aleutian Canada geese wintering there. For further discussion about regulatory considerations for this and other endangered or threatened species, see below under "Compliance with Section 7 of Endangered Species Act of 1973." One individual recommended that the black brant season be extended to March 10. Although the black brant population has increased in recent years, the Service does not believe that the framework should be extended into March as most of the harvest would be of brant returning north to the breeding grounds. Also, major regulatory changes should be deferred until a black brant management plan, now in preparation, is completed.

15. *Whistling swans.* The Pacific Flyway Council recommended retention of the regulations as proposed, which represent no change from those of the 1976 hunting season. Two organizations expressed concern about the population status of the species, plus possibility of confusion between the whistling swan and the less abundant trumpeter swan. The hunting of whistling swans is carefully regulated in the three hunting areas (Utah and one county each in Montana and Nevada) by a permit and tag system. Hunting is permitted only in those specified areas where the trumpeter swan seldom if ever occurs. It should be noted that the trumpeter swan is not listed as either an endangered or threatened species under the Endangered Species Act of 1973, and that its population has been increasing gradually. The whistling swan population is increasing steadily. Concern is materializing about crop depredations—swans now feed in croplands of the mid-Atlantic coast, the destruction of natural wetland habitats caused by the feeding of concentrated birds, and increasing risk of disease. Consequently, no further restrictions in hunting regulations seem appropriate.

17. *Migratory game bird seasons for falconers.* This year, for the first time, extended falconry hunting seasons are being offered on a trial basis to States that agree to monitor the resultant harvest and agree to publish the provisions in State regulations, and have special falconry hunting seasons. Falconry is a permitted means of taking migratory game birds during regular hunting seasons. This proposal would allow States to set additional hunting periods, up to 107 days for regular and special seasons combined, for taking migratory game birds by falconry only. This proposal has been described in detail in the FEDERAL REGISTER dated March 10, 1977, on page 13317. Most of the 22 comments summarized in 42 FR 37533 favored the proposal. One organization, while admitting that falconry would probably have little impact upon prey populations of migratory game birds, expressed concern that the provision might increase the popularity of falconry to the detriment of wild raptor populations.

Response: The Service notes that regulations governing the taking of raptors from the wild for falconry purposes have been established and are covered under Sections 21.28 and 21.29. Since these regulations provide strict criteria and controls over the taking of raptors for falconry, the Service believes that the above proposed regulations governing the taking of migratory game birds by falconry will not be detrimental to wild raptor populations.

18. *Lesser sandhill (little brown) cranes.* Four comments were recevied regarding proposed regulations for this species. One organization stated that the crane population is declining or that inadequate population data are available.

Response: The Service is concluding a three-year study of leser sandhill cranes, and although the final report is not yet available, it seems clear that the Central Flyway population is somewhat larger and more productive than was previously believed. Hunting of the species is confined to designated portions of the Central Flyway, where all hunters must obtain special sandhill crane hunting permits. Based on results of the Service's analysis of the 1976–77 season, 7,393 cranes were taken in the Central Flyway by 5,092 active hunters. The species is extremely wary and the average bag is only 1.5 cranes pre hunter per season. The population is best inventoried during spring migration, when the bulk of the population stages in the Plate River area of Central Nebraska. In 1977, 219,000 cranes, the second highest count on record, was tallied. No hunting is allowed on sandhill cranes in other flyways.

19. *Coots.* Four waterfowl flyway councils and 6 States indicated support of the proposed coot regulations which are unchanged from past years. At the public hearing on August 2, one organization alleged that because coots are seldom eaten, and their taking should be curtailed. In some parts of the United States coots are not only taken incidentally by hunters but are specifically sought because of their eating qualities. The Service is of the opinion that there is insufficient reason to alter the hunting regulations for this abundant waterbird.

PUBLIC COMMENT INVITED

Based on the results of migratory game bird studies now in progress and having due consideration for any data or views submitted by interested parties, the amendments resulting from these supplemental proposals will specify open seasons, shooting hours, and bag and possession limits for waterfowl, coots and gallinules; lesser sandhill (little brown) cranes in portions of the Central Flyway; snipe in the Pacific Flyway; and special falconry regulations.

The Director intends that finally adopted rules be as responsive as possible to all concerned interests. He therefore desires to obtain the comments and suggestions of the public, other concerned governmental agencies, and private interests on these proposals and will take into consideration the comments received. Such comments, and any additional information received, may lead the Director to adopt final regulations differing from these proposals.

Special circumstances are involved in the establishment of these regulations which limit the amount of time which the Service can allow for public comment. Specifically, two considerations compress the time in which the rulemaking process must operate: the need, on the one hand, to establish final rules at a point early enough in the summer to allow affected State agencies to appropriately adjust their licensing and regulatory mechanisms, and on the other hand, the unavailability before late July of specific, reliable data on this year's status of waterfowl. Therefore, the Service believes that to allow a common period past August 25, 1977, is contrary to the public interests.

COMMENT PROCEDURE

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may participate in this rulemaking by submitting written comments to the Director (FWS MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Comments received will be available for public inspection during normal business hours at the Service's office in Room 2243, Department of the Interior, C Street between 18th and 19th Streets NW., Washington, D.C.

All relevant comments received by August 25, will be considered. The Service will attempt to acknowledge received comments, but substantive response to individual comments may not be provided.

ENVIRONMENTAL REVIEW

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the FEDERAL REGISTER on June 13, 1975 (40 FR 25241). The final environmental assessment on shooting hours (42 FR 40211; August 9, 1977) supplements the discussion on shooting hours in FES 75–54. Likewise, an environmental assessment on September dove hunting (42 FR 37552; July 22, 1977) supplements the discussion on dove hunting in FES 75–54.

COMPLIANCE WITH SECTION 7 OF THE ENDANGERED SPECIES ACT OF 1973

Section 7 of this act provides that, "The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act," and "by taking such action necessary to insure that actions authorized, funded, or carried out * * * do not jeopardize the continued existence of such endangered or threatened species or result in the destruction or modification of habitat of such species * * * which is determined to be critical." Consequently, the Service reviewed all migratory bird regulations being contemplated for early seasons in the United States this year and concluded in a biological opinion that none of the proposals, including shooting hours, if implemented, would result in jeopardizing the continued existence of any species designated as endangered or threatened under the act, or adversely modify their critical habitat or habitats that may be determined as critical in the future. This opinion resulted from over 500 man-hours of consultation conducted between the Office of Endangered Species and the Office of Migratory Bird Management. Likewise, the biological opinion concluded that the proposed regulations are not contrary to, and do not undermine, the Service's obligation to conserve endangered or threatened species. The proposed late season frameworks were evaluated as to possible impacts upon a number of endangered species, including the Aleutian Canada goose (*Branta canadensis leucopareia*), Mexican duck (*Anas diazi*), whooping crane (*Grus americana*), bald eagle (*Haliaeetus leucocephalus*), peregrine falcon (*Falco peregrinus*), and the Everglade kite (*Rostrhamus sociabilis plumbeus*).

Section 7 consultations are presently under way regarding the late season regulatory proposals. It is possible that the findings from the consultation, which will be included in a biological opinion, may cause modification of some of the regulatory measures proposed in this doucment. Any modifications that may be desirable will be reflected in the final rulemaking on regulations frameworks for "late seasons" scheduled for publication in the FEDERAL REGISTER on or about August 30, 1977.

As in the past, hunting regulations this year are designed, among other things, to remove or alleviate chances of conflict between seasons for migratory game birds and the protection and conservation of endangered and threatened species. An example of such consideration is the closure of a specific area in Alaska to all Canada goose hunting for the protection of the Aleutian Canada goose.

The Service's biological opinions resulting from its consultation under section 7 are considered public documents and are available for public inspection in or available by from the Office of Endangered Species and the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

DRAFTING INFORMATION

This final rulemaking was authored by Dr. John P. Rogers, Chief, Office of Migratory Bird Management.

PROPOSED REGULATIONS FRAMEWORK FOR 1977–78 LATE HUNTING SEASONS ON CERTAIN MIGRATORY GAME BIRDS

Pursuant to the Migratory Bird Treaty Act, the Secretary of the Interior has approved proposed framework for season lengths, shooting hours, bag and possession limits, and outside dates within which States may select seasons for hunting waterfowl, costs, and gallinules; cranes in parts of New Mexico, Texas, Colorado, Oklahoma, Montana, and Wyoming; common snipe in the Pacific Flyway; and special extended falconry seasons. States may be more restrictive in selecting season regulations, but may not exceed the framework provisions. For the guidance of State conservation agencies, these frameworks are summarized below.

GENERAL

States may split their seasons for ducks or geese into two segments of equal or unequal lengths. Exceptions are noted in appropriate sections.

Shooting hours in all States, on all species, and for all seasons are ½ hour before sunrise until sunset, except that September teal season shooting hours are sunrise until sunset.

States in the Atlantic, Mississippi, and Central Flyways selecting neither a September teal season nor the point system may select an extra daily bag and possession limit of 2 and 4 blue-winged teal, respectively, for 9 consecutive days designated during the regular duck season. These extra limits are in addition to the regular duck bag and possesion limits.

States in the Atlantic, Mississippi, and Central Flyways may select a special scaup-only hunting season not to exceed 16 consecutive days, with daily bag and possession limits of 5 and 10 scaup, respectively, subject to the following conditions:

1. The season must fall between October 1, 1977, and January 31, 1978, in the Atlantic, Mississippi, and Central Flyways, all dates inclusive.

2. The season must fall outside the open season for any other ducks except sea ducks.

3. The season must be limited to areas mutually agreed upon between the State and the Service prior to September 1, 1977.

4. These areas must be described and delineated in State hunting regulations.

Or, as an alternative, States in the Atlantic, Mississippi, and Central Flyways, except those selecting a point system, may select an extra daily bag and possession limit of 2 and 4 scaup, respectively, during the regular duck hunting season, subject to conditions 3 and 4 listed above. These extra limits are in addition to the regular duck limits and apply during the entire regular duck seasor..

Selection of the point system for any State entirely within a flyway must be on a statewide basis, except if New York selects the point system, conventional regulations may be retained for the Long Island Area. New York may not select the point system within the upstate zoning option. Maine may not select the point system with the State zoning option.

States that did not select their rail, woodcock, snipe, gallinule, and sea duck seasons in July should do so at the time they make their waterfowl selections.

Frameworks for open seasons and season lengths, bag and possession limit options, and other special provisions are listed below by Flyway.

ATLANTIC FLYWAY

Between October 1, 1977, and January 20, 1978, States in this Flyway may select open seasons on ducks, coots, and mergansers of: (a) 45 days, with basic daily bag and possession limits of 4 and 8 ducks, respectively, of which no more than 2 in the daily bag and 4 in possession may be black ducks; or (b) 45 days, with basic daily bag and possession limits of 5 and 10 ducks, respectively, of which no more than 1 in the daily bag and 2 in possession may be black ducks. Under either Option (a) or (b), a 50-day season may be selected provided the season is opened on a Wednesday with shooting hours beginning at noon on opening day. If the 50-day season is split, each segment must open on a Wednesday with shooting hours beginning at noon on opening day.

Except in closed areas, the limit on convasbacks and redheads is 1 canvasback daily and 1 in possession or 1 redhead daily and 1 in possession. Under the point system, canvasbacks count 100 points each and redheads count 70 points each, except in closed areas. Areas closed to canvasback and redhead hunting are:

New York—Upper Niagara River between the Peace Bridge at Buffalo, New York, and the Niagara Falls. All waters of Lake Cayuga.

New Jersey—Those portions of Monmouth County and Ocean County lying east of the Garden State Parkway.

Maryland, Virginia, and North Carolina—Those portions of each State lying east of U.S. Highway 1.

Under conventional and point system options, the daily bag and possession limits may not include more than 2 and 4 wood ducks, respectively, except that Virginia, North Carolina, South Carolina, Georgia, and Florida may split their regular hunting season in such a way that a hunting season not to exceed 9 consecutive days occurs between October 1 and October 15. During this period under conventional regulations, no special restrictions within the regular daily bag and possession limits established for the flyway in 1977 shall apply to wood ducks. Under the point system, the point value of wood ducks shall be 25 points. For other species of ducks, daily bag and possession limits shall be the same as established for the flyway under conventional or point system regulations. For those States using conventional regulations, the 9 consecutive days extra blue-winged teal option may be selected concurrent with the early wood duck season option. This exception to the daily bag and possession limits for wood ducks shall not apply to that portion of the duck hunting season that occurs after October 15.

The daily bag limit on mergansers is 5, only 1 of which may be a hooded merganser. The possession limit is 10, only 2 of which may be hooded mergansers.

The daily bag and possession limits of coots are 15 and 30, respectively.

The Lake Champlain Area of New York must follow the waterfowl seasons, daily bag and possession limits, and shooting hours selected by Vermont. This area includes that part of New York lying east and north of a boundary running south from the Canadian border along U.S. Highway 9 to New York Route 22 south of Keeseville, along New York Route 22 to South Bay, along and around the shoreline of South Bay to New York Route 22, along New York Route 22 to U.S. Highway 4 at Whitehall, and along U.S. Highway 4 to the Vermont border.

In lieu of a special scaup season, Vermont may, for the Lake Champlain Area, select a special scaup and goldeneye season not to exceed 16 consecutive days, with a daily bag limit of 3 scaup or 3 goldeneyes or 3 in the aggregate and a possession limit of 6 scaup or 6 goldeneyes or 6 in the aggregate, subject to the same provisions that apply to the special scaup season elsewhere.

New York may, for Long Island, select season dates and daily bag and possession limits which differ from those in the remainder of the State.

Upstate New York (excluding the Lake Champlain area) may be divided into three zones (West, North, South) on an experimental basis for the purpose of setting separate duck, coot and merganser seasons. Option (a) or (b) for seasons and bag limits is applicable to the zones in the Upstate area within the Flyway framework; only conventional regulations may be selected. The West Zone will be permitted the full number of days offered under Options (a) or (b), with or without the Wednesday opening with shooting hours beginning at noon on opening day. In addition, a split season without penalty may be selected in the West Zone. The North Zone and the South Zone must take a 5-day reduction in season length under either option, with or without the Wednesday opening, with shooting hours beginning at noon on opening day. The basic daily bag limit on

ducks in each zone and the restrictions applicable to Options (a) and (b) of the regular season for the Flyway also apply. Teal and scaup bonus birds, if offered, shall be applicable to the Upstate zones, but the 16-day special scaup season will not be allowed.

The zones are defined as follows:

The West Zone is that portion of Upstate New York lying west of a line commencing at a point at the north shore of the Salmon River and its junction with Lake Ontario and extending easterly along the north shore of the Salmon River to its intersection with Interstate Highway 81, then southerly along Interstate Highway 81 to the Pennsylvania border.

The North and South Zones are bordered on the west by the boundary described above and are separated from each other as follows:

Starting at the Intersection of Interstate Highway 81 and New York Route 49 and extending easterly along Route 49 to its junction with Route 8 in Utica, then southerly along Route 8 to its Intersection with U.S. Highway 20 in Bridgewater, then easterly along U.S. Highway 20 to the Massachusetts border.

Maine may be divided into two zones (North, South) on an experimental basis for the purpose of setting separate duck, coot and merganser seasons. Option (a) or (b) for seasons and bag limits is applicable to the zones within the Flyway framework: only conventional regulations may be selected. Both zones will be permitted the full number of days offered under options (a) or (b) with or without the Wednesday opening with shooting hours beginning at noon on opening day. In addition, a split season without penalty may be selected in the South Zone. The basic daily bag limit on ducks in each zone and the restrictions applicable to options (a) and (b) of the regular season for the Flyway also apply. Teal and scaup bonus bird options, if offered, shall be applicable, but the 16-day special scaup season will not be allowed.

The Maine zones are defined as follows:

North Zone—Game Management Zones 1, 2 and 3.

South Zone—Game Management Zones 4 through 8.

As an alternative to conventional bag limits for ducks, a 45-day season with a point-system bag limit may be selected by States in the Atlantic Flyway during the framework dates prescribed. A 50-day season may be selected provided the season is opened on a Wednesday with shooting hours beginning at noon on opening day. If the 50-day season is split, each segment must open on a Wednesday with shooting hours beginning at noon on opening day. Point values for species and sexes taken are as follows: In Florida only, the fulvous tree duck counts 100 points each; in all States the canvasback counts 100 points each (except in closed areas); the female mallard, black duck, mottled duck, wood duck (except in Virginia, North Carolina, South Carolina, Georgia, and Florida during the early wood duck season option), redhead (except in closed areas) and hooded merganser count 70 points each; the blue-winged teal, green-winged teal, pintail, gadwall, shoveler, scaup, sea ducks, and mergansers (except hooded) count 10 points each; the male mallard, the wood duck during the early wood duck season option in Virginia, North Carolina, South Carolina, Georgia, and Florida, and all other species of ducks count 25 points each. The daily bag limit is reached when the point value of the last bird taken, added to the sum of the point values of the other birds already taken during that day, reaches or exceeds 100 points. The possession limit is the maximum number of birds which legally could have been taken in 2 days.

In any State in the Atlantic Flyway selecting both point-system regulations and a special sea duck season, sea ducks count 10 points each during the point-system season, but during any part of the regular sea duck season falling outside the point-system season, regular sea duck daily bag and possession limits of 7 and 14 sea ducks, respectively, apply.

Coots have a point value of zero, but the daily bag and possession limits are 15 and 30, respectively, as under the conventional limits.

Between October 1, 1977, and January 20, 1978, Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, West Virginia, New Jersey, Maryland, and Virginia (excluding those portions of the cities of Virginia Beach and Chesapeake lying east of Interstate 64 and U.S. Highway 17) may select 70-day seasons on Canada geese; the daily bag and possession limits are 3 and 6 geese, respectively. However, in the area comprised of Delaware, the Delmarva Peninsula portions of Maryland and Virginia, and that portion of Pennsylvania lying east and south of a boundary beginning at Interstate Highway 83 at the Maryland border and extending north to Harrisburg, then east on U.S. Highway 22 to the New Jersey border, the Canada goose season length will be 90 days with the closing framework date extended to January 31, 1978. The daily bag limit within this area will be 4 birds with a possession limit of 8 birds. North Carolina, South Carolina, and those portions of the cities of Virginia Beach and Chesapeake lying east of Interstate 64 and U.S. Highway 17 in Virginia may select 50-day seasons on Canada geese within the October 1, 1977, to January 20, 1978, framework; the daily bag and possession limits are 1 and 2 Canada geese, respectively.

The season is closed on Canada geese in Florida and Georgia.

Between October 1, 1977, and January 20, 1978, concurrent with either the regular waterfowl season or the Canada goose season, States in the Atlantic Flyway may select 60 day seasons on snow geese (including blue geese); the daily bag and possession limits are 2 and 4 geese, respectively.

The season is closed on Atlantic brant.

For snow geese (including blue geese) the Director, U.S. Fish and Wildlife Service, shall close the season within 48 hours should such closure be necessary to avoid excessive harvest.

MISSISSIPPI FLYWAY

Between October 1, 1977, and January 20, 1978, States in this Flyway may select concurrent 45-day seasons on ducks, coots, and mergansers. The daily bag limit for ducks is 5, and may include no more than 2 mallards or 2 black ducks, or one each, and 2 wood ducks (except as noted below). The possession limit is 10, including no more than 4 mallards or 4 black ducks, or 4 in the aggregate, and 4 wood ducks (except as noted below).

Except in closed areas, the limit on canvasbacks and redheads is 1 canvasback daily and 1 in possession or 1 redhead daily and 1 in possession. Under the point system, canvasbacks count 100 points each and redheads count 70 points each, except in closed areas. Areas closed to canvasback and redhead hunting are:

Mississippi River—Entire river, both sides, from Alton Dam upstream to Prescott, Wisconsin, at confluence of St. Croix River.

Alabama—Baldwin and Mobile Counties.

Louisiana—Caddo, St. Charles and St. Mary Parishes; that portion of Ward 1 formerly designated as Ward 6 of St. Martin Parish; and Catahoula Lake in LaSalle and Rapides Parishes.

Michigan—Arenac, Bay, Huron, Macomb, Monroe, St. Clair, Tuscola, and Wayne Counties, and those adjacent waters of Saginaw Bay south of a line extending from Point au Gres in Sec. 6, T. 18 N., R. 7 E. (Arenac County) to Sand Point in Sec. 11, T. 17 N., R. 9 E. (Huron County), the St. Clair River, Lake St. Clair, the Detroit River and Lake Erie, under jurisdiction of the State of Michigan.

Minnesota—Douglas, Mahnomen, Polk, and Sibley Counties. Where the county line of any of the above counties crosses any portion of a lake, that entire lake is closed. In addition, all land in Sec. 13, T. 130 N., R. 31 W. (i.e., land between Lake Christina and Pelican Lake) is closed.

Ohio—Land and water areas comprising Erie, Ottawa and Sandusky Counties.

Tennessee—Kentucky Lake lying north of Interstate Highway 40.

Wisconsin—In the Mississippi River Zone, all that portion of Wisconsin west of the Burlington-Northern Railroad in Grant, Crawford, Vernon, LaCrosse, Trempealeau, Buffalo, Pepin, and Pierce Counties. Also, the following lakes and waters, including a strip of land 100 yards wide adjacent to the shorelines thereof: Lake Poygan in Winnebago and Waushara Counties and Lakes Winneconne and Butte des Morts, including the connecting waters thereof, in Winnebago County.

The daily bag limit on mergansers is 5, only 1 of which may be a hooded merganser. The possession limit is 10, only 2 of which may be hooded mergansers.

The daily bag and possession limits on coots are 15 and 30, respectively.

As an alternative to conventional bag limits for ducks, a 45-day season with point-system bag and possession limits may be selected by States in the Mississippi Flyway during the framework dates prescribed. Point values for species and sexes taken are as follows: except in closed areas, the canvasback counts 100 points; the redhead (except in closed areas), female mallard, wood duck (except as noted below), black duck and hooded merganser count 70 points each; the pintail, blue-winger teal, cinnamon teal, gadwall, shoveler, scaup, green-winged teal, and mergansers (except hooded merganser) count 10 points each; the male mallard and all other species of ducks count 25 points each. The daily bag limit is reached when the point value of the last bird taken, added to the sum of the point values of the other birds already taken during that day, reaches or exceeds 100 points. The possession limit is the maximum number of birds which legally could have been taken in 2 days. Coots have a point value of zero, but the daily bag and possession limits are 15 and 30, respectively, as under the conventional limits.

Kentucky, Arkansas, Tennessee, Louisiana, Mississippi and Alabama may split their regular duck hunting seasons in such a way that a hunting season not to exceed 9 consecutive days may occur between October 1 and October 15. During this period, under conventional regulations, no special restrictions within the regular daily bag and possession limits established for the Flyway shall apply to wood ducks, and under the point system, the point value for wood ducks shall be 25 points. For the other species of ducks, daily bag and possession limits shall be the same as established for the Flyway under conventional or point system regulations. In addition, the extra blue-winged teal option available to States in this Flyway that select conventional regulations and do not have a September teal season may be selected during this period. This exception to the daily bag and possession limits for wood ducks shall not apply to that portion of the duck hunting season that occurs after October 15.

In that portion of Louisiana west of a boundary beginning at the Arkansas-Louisiana border on Louisiana Highway 3; then south along Louisiana Highway 3 to Shreveport; then east along Interstate 20 to Minden; then south along Louisiana Highway 7 to Ringgold; then east along Louisiana Highway 4 to Jonesboro; then south along U.S. Highway 167 to Lafayette; then southeast along U.S. Highway 90 to Houma; then south along the Houma Navigation Channel to the Gulf of Mexico through Cat Island Pass—the season on ducks, coots and mergansers may extend 5 additional days, provided that the season opens on November 5, 1977. If the 5-day extension is selected, and if point-system regulations are selected for the State, point values will be the same as for the rest of the State.

The waterfowl seasons, limits, and shooting hours in the Pymatuning Reservoir area of Ohio will be the same as those selected by Pennsylvania. The area includes Pymatuning Reservoir and that part of Ohio bounded on the north by County Road 306 known as Woodward Road, on the west by Pymatuning Lake Road, and on the south by U.S. Highway 322.

Michigan, Illinois, Indiana, Ohio and Missouri may select hunting seasons on ducks, coots and mergansers by zones described as follows:

Michigan: *North Zone*—The Upper Peninsula. *South Zone*—The lower Peninsula.

Illinois: *North Zone*—St. Clair, Clinton, Marion, Clay, Richland and Lawrence Counties and all counties to the north. *South Zone*—The remainder of Illinois.

Indiana: *North Zone*—That portion of Indiana north of State Highway 18. *South Zone*—The remainder of Indiana.

Ohio: *North Zone*—That portion of Ohio north of U.S. Highway 30 North. *South Zone*—The remainder of Ohio.

Missouri: *North Zone*—That portion of Missouri north of a line running easterly from the Kansas-Missouri border along U.S. Highway 160 to the junction of U.S. Highway 60 in Springfield, along U.S. Highway 60 to the junction of State Highway 39, and along State Highway 34 to the Illinois-Missouri border along the Mississippi River at Cape Girardeau. *South Zone*—The remainder of Missouri.

Within each State: (1) The season must be continuous in both zones; (2) the same bag limit option must be selected for both zones; and (3) if a special scaup season is selected, it shall not begin until after the latest season closing date in the State.

Between October 1, 1977, and January 20, 1978, States in this Flyway, except Louisiana, may select 70-day seasons on geese, with daily bag and possession limits of 5 geese, to include no more than 2 white-fronted geese. Regulations for Canada geese are shown below by State.

Between October 1, 1977, and February 14, 1978, Louisiana may select 70-day seasons on snow (including blue) and white-fronted geese by zones established for duck hunting seasons, with daily bag and possession limits of 5 geese, to include no more than 2 white-fronted geese. The season on Canada geese is closed in Louisiana.

In Minnesota, in the:

(a) Lac Qui Parle Zone—the season on Canada geese closes after 45 days or when 5,000 birds have been harvested, whichever occurs first. The daily bag limit is 1 Canada goose or 2 white-fronted geese, or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese. The quota zone is that area encompassed by a boundary described as follows: beginning at Montevideo, then west on U.S. Highway 212 to U.S. Highway 75, then north on U.S. Highway 75 to State Highway 7 at Odessa, then north on County State Aid Highway 21, Big Stone County, to U.S. Highway 12, then east on U.S. Highway 12 to County State Aid Highway 17, Swift County, then south on C.S.A.H. 17 and C.S.A.H 9, Chippewa County, to State Highway 40, then east on State Highway 40 to State Highway 29, then south on State Highway 29 to point of beginning at Montevideo.

(b) Southeastern Zone (same as description in 1971)—the season for Canada geese may extend for 70 consecutive days. The daily bag limit is 1 Canada goose or 2 white-fronted geese or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese.

(c) Remainder of the State—the season on Canada geese may not exceed 45 days. The daily bag limit is 1 Canada goose or 2 white-fronted geese or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese.

In Iowa, the season for Canada geese may extend for 45 consecutive days. The daily bag and possession limits are 2 Canada geese.

In Missouri, in the:

(a) Swan Lake Zone (same description as in 1971)—the season on Canada geese closes after 45 days or when 25,000 birds have been harvested, whichever occurs first. The daily bag limit is 1 Canada goose or 2 white-fronted geese, or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese.

(b) Southeastern Area (east of U.S. Highway 67 and south of Crystal City)—State may select a 45-day season on Canada geese between December 1, 1977, and January 20, 1978, with a daily bag limit of 2 Canada geese or 2 white-fronted geese or 1 of each; and a possession limit of 4 Canada and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese.

(c) Remainder of the State—the season on Canada geese may not exceed 45 days. The daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 2 Canada geese and 2 white-fronted geese.

In Wisconsin, the harvest of Canada geese is limited to 35,000. The daily bag limit is 1 Canada goose, 2 white-fronted geese, or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese, except that in the Horicon Zone the possession limit for Canada geese is 1. In the Horicon Zone and the East Central Zone, Canada goose hunting is restricted to those persons holding valid Canada goose hunting permits issued by the State. The Horicon Zone is defined as those portions of the counties of Fond du Lac, Green Lake, Washington and Dodge enclosed by a line beginning at the intersection of County Highway N and State Highway 175 in Fond du Lac County, then southerly on State Highway 175 to its intersection with State Highway 33, then westerly on State Highway 33 to the city of Beaver Dam, then northerly on State Highway 33 to its intersection with County Highway A, then northerly on County Highway A to its intersection with County Highway S, then easterly on County Highway S to its intersection with County Highway E, then northerly on County Highway E to its intersection with County Highway N, then easterly on County Highway N to the point of beginning.

The East Central Zone is defined as those portions of Fond du Lac, Winnebago, Green Lake, Marquette, Columbia and Dodge Counties enclosed by a line beginning in Winnebago County at the intersection of State Highway 21 and U.S. Highway 45, then southerly on U.S. Highway 45 to its intersection with State Highway 175, then northerly on State Highway 175 to its intersection with County Highway N, then westerly on County Highway N to its intersection with County Highway E, then southerly on County Highway E to its intersection with County Highway S, then westerly on County Highway S to its intersection with County Highway A, then southerly on County Highway A to its intersection with State Highway 33, then southeasterly on State Highway 33 to its intersection with U.S. Highway 151, then southwesterly on U.S. Highway 151 to its intersection with U.S. Highway 16, then northwesterly on U.S. Highway 16 to its intersection with State Highway 73, then northerly on State Highway 73 to its intersection with State Highway 33, then westerly on State Highway 33 to its intersection with State Highway 22, then northerly on State Highway 22 to its intersection with State Highway 23, then northeasterly on State Highway 23 to its intersection with State Highway 49, then ortherly on State Highway 49 to its intersection with State Highway 116, then northerly on State Highway 49 to State Highway 21, then easterly on State Highway 21 to the point of beginning.

In Illinois, the harvest of Canada geese is limited to 35,000, with 29,000 birds allocated to the Southern Illinois Zone (same description as in 1971). The daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 4 Canada geese and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese. The season on Canada geese may open at a later date in the Southern Illinois Zone and extend to January 20, 1978, or until the Zone's quota of 29,000 birds is reached, whichever occurs first.

In Michigan, in the:

(a) Counties of Baraga, Dickinson, Delta, Gogebic, Houghton, Iron, Keweenaw, Marquette, Menominee and Ontonagon—the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese.

(b) Southeastern Canada Goose Management Area—the Canada goose season will open with the duck season and extend through December 9. Through November 14, the daily bag limit will be 1 Canada goose or 2 white-fronted geese or 1 of each; the possession limit is 1 Canada and 2 white-fronted geese. From November 15 through December 9, the daily bag limit will be 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese. The Management Area is encompassed by a boundary described as follows: beginning at the junction of State Highway M-21 and State Highway M-53 in Lapeer County, then south on State Highway M-53 to its junction with Interstate Highway 94, then west on Interstate Highway 94 to its junction with Interstate Highway 75, then south on Interstate Highway 75 to its junction with Gilbralter Road, then west on Gibralter Road to Flat Rock, then west on West Carlton, Oakville and Waltz Roads to the junction with Rawsonville Road, then north on Rawsonville Road to Willow Road, then west on Willow Road to U.S. Highway 23, then south on U.S. Highway 23 to State Highway M-50 in Dundee, then west on State Highway M-50 to State Highway M-52, then south on State Highway M-52 to State Highway M-34, then west on State Highway M-34 to U.S. Highway 127, then north on U.S. Highway 127 to Interstate Highway 69, then north and east on Interstate Highway 69 to State Highway M-21 in Flint, then east on State Highway M-21 to the point of beginning.

(c) Remainder of the State—the daily bag limit is 1 Canada goose or 2 white-fronted geese or 1 of each; the possession limit is 1 Canada goose and 2 white-fronted geese.

In Ohio, the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 2 Canada and 2 white-fronted geese.

In Indiana, the daily bag limit is 1 Canada goose or 2 white-fronted geese or 1 of each, except in Posey County where the daily bag limit on Canada geese is 2; the possession limit is 2 Canada and 2 white-fronted geese.

In Kentucky, the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 4 Canada geese and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese. In the Ballard County Zone, the harvest of Canada geese is limited to 15,000. This zone is described as follows: a bounday beginning at the northwest city limits of Wickliffe in Ballard County to the middle of the Mississippi River; then north along the Mississippi River to the low water mark of the Ohio River along the Illinois shore to the Ballard-McCracken County line; then along the county line south to State Road 358; then south along State Road 358 to its junction with U.S. Highway 60 at LaCenter; then southwest along U.S. Highway 60 to the northwest city limits of Wickliffe.

In Tennessee, the daily bag limit is 1 Canada goose and the possession limit is 2 Canada geese, except in that portion of the State west of State Highway 13, where the daily bag and possession limits are 2 Canada geese.

In Mississippi, in the Sardis Reservoir Area (that area encompassed by Interstate Highway 55 on the west, State Highway 7 on the east, State Highway 310 on the north and State Highway 6 on the south), the daily bag limit is 1 Canada goose and the possession limit is 2 Canada geese. In the remainder of the State, the season on Canada geese is closed.

In Alabama, the season is closed on all geeese in the Counties of Chambers, Henry, Russell and Barbour. Elsewhere in Alabama, the daily bag limit is 2 Canada geese or 2 white-fronted geese or 1 of each; the possession limit is 4 Canada and white-fronted geese in the aggregate, of which no more than 2 may be white-fronted geese.

In Arkansas, the Canada goose season will be concurrent with, and the same length as, the duck season, with a daily bag limit of 1 Canada goose and a possession limit of 2 Canada geese, except that the Canada goose season is closed in that portion of the State east of a line described as follows: beginning at the junction of State Highway 1 and the Arkansas-Missouri border, then south along State Highway 1 to the junction of U.S. Highway 65 at McGehee, then south along U.S. Highway 65 to the junction of U.S. Highway 165, then south along U.S. Highway 165 to the Arkansas-Louisiana border.

When it has been determined that the quota of Canada geese allotted to Illinois and Wisconsin, to the Swan Lake Zone of Missouri, to the Lac Qui Parle Zone of Minnesota, and the Ballard County Zone of Kentucky will have been filled, the season for taking Canada geese in the respective area will be closed by the Director upon giving public notice through local information media at least 48 hours in advance of the time and date of closing.

Geese taken in Illinois and Missouri and in the Kentucky Counties of Ballard, Hickman, Fulton, and Carlisle may not be transported, shipped, or delivered for transportation of shipment by common carrier, the Postal Service, or by any person except as the personal baggage of the hunter taking the birds.

CENTER FLYWAY

Seasons on ducks (including mergansers) and coots may be selected between October 1, 1977, and January 22, 1978, inclusive, in Central Flyway States and portions of States.

The basic season may include no more than 55 days and bag limits on ducks (including mergansers), singly or in the aggregate, are 5 daily and 10 in possession. The aggregate daily bag limit on ducks (including mergansers) may include no more than 1 hooded merganser, 2 wood ducks and 1 female mallard, and the possession limit may include no more than 2 hooded mergansers, 4 wood ducks and 2 female mallards.

The daily bag and possession limits on coots are 15 and 30, respectively.

The daily bag and possession limits, except in closed areas, may include no more than 1 canvasback or 1 redhead. Except in closed areas, canvasbacks count 100 points each and redheads 70 points each under the point system. The areas closed to canvasback and redhead hunting are:

North Dakota—that portion lying east of State Highway 3, including all or portions of 27 counties.

South Dakota—all of Marshal County; that portion of Day County east of State Highway 25; that portion of Codington County south of State Highway 20 and west of U.S. Highway 81; that portion of Hamlin County west of U.S. Highway 81; and that portion of Kingsbury County east of State Highway 25 and north of U.S. Highway 14.

Texas—the Counties of Brazoria, Chambers, Galveston, Harris, Jefferson, and Orange.

The season is closed on the Mexican duck.

As an alternative to conventional bag and possession limits for ducks, point-system regulations may be selected for States and portions of States in this Flyway. The point system season length in the High Plains Mallard Management Unit is 83 days *provided*, that the last 23 days of such season must begin on or after December 12, 1977. The High Plains Unit, roughly defined as that portion of the Ceneral Flyway which lies west of the 100th meridian, shall be described in State regulations. The season length for the Low Plains Unit (those portions of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas not included in the High Plains Mallard Management Unit) may not exceed 55 days.

The point values for species and sexes taken in the Central Flyway are as follows: except in closed areas, canvasbacks count 100 points each; female mallards, wood ducks, redheads (except in closed areas) and hooded mergansers count 70 points each; blue-winged teal, green-winged teal, cinnamon teal, scaup pintails, gadwalls, shovelers, and mergansers (except the hooded merganser) count 10 points each; all other species and sexes of ducks count 20 points each. The daily bag limit is reached when the point value of the last bird taken, when added to the sum of the point values of other birds already taken during that day, reaches or exceeds 100 points. The possession limit is the maximum number of birds which legally could have been taken in 2 days.

Coots have a point value of zero, but the daily bag and possession limits are 15 and 30, respectively, as under conventional limits.

Those portions of Colorado and Wyoming lying west of the Continental Divide, that portion of New Mexico lying west of the Continental Divide plus the entire Jicarilla Apache Indian Reservation, and that portion of Montana which includes the Counties of Hill, Chouteau, Cascade, Meagher, and Park and all counties west thereof, must select open seasons on waterfowl and coots in accordance with the framework for the Pacific Flyway.

Between October 1, 1977, and January 22, 1978, States in this Flyway may select goose seasons as follows:

(a) For the Central Flyway portions of Montana, Wyoming and Colorado, States may select seasons of 93 days, with daily bag and possession limits of 2 and 4 geese, respectively.

(b) For the Central Flyway portion of New Mexico and that portion of Texas west of U.S. Highway 81, States may select seasons of 93 days with a daily bag limit of 5 geese which may include no more than 2 dark (Canada and white-fronted) geese and a possession limit of 5 geese which may include no more than 4 dark geese.

(c) North Dakota, South Dakota, Nebraska, Kansas, Oklahoma and Texas (for that portion east of U.S. Highway 81) may select seasons of 86 days for light (snow and blue) geese and seasons of 72 days for dark (Canada and white-fronted) geese subject to the following:

Seasons for light and dark geese need not be concurrent.

The daily bag and possession limits may not exceed 5 geese during periods when such light and dark goose seasons may be concurrent.

The daily bag and possession limit may include no more than 5 light geese.

The daily bag limit may include no more than 2 dark geese and the possession limit may include no more than 4 dark geese subject to the following:

In North Dakota the daily bag limit may include no more than 1 Canada goose and 1 white-fronted goose or 2 white-fronted geese. The possession limit may include no more than 2 Canada or 2 white-fronted geese or 1 of each. The season on dark geese may not extend beyond November 13, 1977.

In South Dakota, the daily bag may include no more than 1 Canada goose and 1 white-fronted goose and the possession limit may include no more than 2 Canada geese or 2 white-fronted geese or 1 of each. The season on dark geese may not extend beyond November 27, 1977, in the Counties of Buffalo, Brule, Campbell, Charles Mix, Corson, Dewey, Gregory, Hughes, Hyde, Lyman, Potter, Stanley, Sully and Walworth.

In Nebraska, the season on dark geese may not extend beyond December 18, 1977. The daily bag limit may include no more than 1 Canada goose and 1 white-fronted goose and the possession limit may include no more than 2 Canada geese or 2 white-fronted geese or 1 of each except that, in that portion of the State west of U.S. Highway 183, prior to November 21, the daily bag limit may include no more than 2 Canada geese and the possession limit no more than 4 Canada geese.

In Kansas the season on Canada and white-fronted geese may not extend beyond December 25, 1977. The daily bag limit may include no more than 1 Canada and 1 white-fronted goose and the possession limit may include no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

In the Oklahoma Counties of Alfalfa, Bryan, Johnston, and Marshall, the State may select either:

(a) A season of 72 days with a daily bag limit of no more than 1 Canada goose and 1 white-fronted goose, and a possession limit of no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

or

(b) A season of 53 days (within the 72-day period selected for the remainder of the State) with a daily bag limit of no more than 2 Canada geese or 1 Canada goose and 1 white-fronted goose, and a possession limit of no more than 2 Canada geese and 2 white-fronted geese or 1 of each.

In the remainder of Oklahoma, the daily bag limit may include no more than 2 Canada geese or 1 Canada goose and 1 white-fronted goose and the possession limit no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

In that portion of Texas east of U.S. Highway 81, the State may select either:

(a) A season of 72 days with a daily bag limit of no more than 1 Canada goose or 1 white-fronted goose and a possession limit of no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

or

(b) A season of 64 consecutive days commencing no earlier than November 12, 1977, with a daily bag limit of no more than 1 Canada and 1 white-fronted goose and a possession limit of no more than 2 Canada geese or 2 white-fronted geese or 1 of each.

In all States in the Flyway, the daily bag and possession limits may include no more than 1 Ross' goose.

Colorado, New Mexico, Oklahoma, Texas, Montana and Wyoming may select a lesser sandhill (little brown) crane season with daily bag and possession limits of 3 and 6 respectively, within an October 1, 1977–January 31, 1978, framework as follows:

(a) 37 consecutive days from October 1 through November 6, 1977, in the Central Flyway portion of Colorado except the San Luis Valley area.

(b) 93 consecutive days between October 22, 1977, and January 31, 1978, in the New Mexico Counties of Chaves, Curry, De Baca, Eddy, Lea, Quay, and Roosevelt, and in that portion of Texas west of a boundary from the Oklahoma border along U.S. Highway 287 to U.S. Highway 87 at Dumas, along U.S. Highway 87 (including all of Howard and Lynn Counties) to U.S. Highway 277 at San Angelo, and along U.S. Highway 277 to the International Toll Bridge in Del Rio.

(c) 58 consecutive days on or after November 26, 1977, in that portion of Oklahoma west of U.S. Highway 81, and in that portion of Texas east of a boundary from the Oklahoma border along U.S. Highway 287 to U.S. Highway 87 at Dumas, then along U.S. Highway 87 to San Angelo, and west of a line running north from San Angelo along U.S. Highway 277 to Abilene, along State Highway 351 to Albany, along U.S. Highway 283 to Vernon, and then along U.S. Highway 183 east to the Oklahoma border.

(d) 37 coinsecutive days to open with the goose season in Phillips County, Montana.

(e) 30 consecutive days beginning on or after October 8, 1977, in Platte and Goshen Counties, Wyoming.

All persons hunting sandhill cranes in the above designated areas of the Central Flyway must obtain and possess valid Federal permits issued by the appropriate State conservation agency on an equitable basis without charge.

PACIFIC FLYWAY

Between October 1, 1977, and January 22, 1978, concurrent 93-day seasons on ducks, mergansers, coots, and gallinules may be selected in Pacific Flyway States and portions of States, except the Columbia Basin Area. Basic daily bag and possession limits on ducks are 7 and 14, respectively.

No more than 2 redheads or 2 canvasbacks or 1 of each may be taken daily and no more than 4 singly or in the aggregate may be possessed.

The season is closed on the Mexican duck.

The daily bag and possession limits on mergansers are 5 and 10, respectively, of which no more than 1 daily and 2 in possession may be hooded mergansers.

The daily bag and possession limits on coots and gallinules are 25 singly or in the aggregate.

For that portion of California lying south of the Tehachapi Mountains and west of the Colorado River Area (as described in Title 14 California Fish and Game Code, Section 502), the State may designate season dates differing from those in the remainder of the State.

Waterfowl season dates for Clark and Lincoln Counties, in Nevada and the Colorado River Area of California must coincide with season dates selected by Arizona for waterfowl. Waterfowl season dates for the Tule Lake Area of California must coincide with season dates selected by Oregon for waterfowl.

In the Columbia Basin Area of Washington, Oregon and Idaho, between October 1, 1977, and January 22, 1978, the season lengths for ducks, mergansers, coots and gallinules may be 100 days with all seasons to run concurrently. The daily bag limit is 7 ducks and the possession limit is 14 ducks, to include no more than 2 redheads or 2 canvasbacks or 1 of each daily, and no more than 4 singly or in the aggregate in possession. The bag limit on mergansers is 5 daily and 10 in possession, of which no more than 1 daily and 2 in possession may be hooded mergansers. The daily bag and possession limits on coots and gallinules are 25 singly or in the aggregate.

Between October 1, 1977, and January 22, 1978, 93-day seasons on geese may be selected in States or portions of States in this Flyway, except the Columbia Basin Area. The basic daily bag and possession limits are 6, provided, that the daily bag limit includes no more than 3 snow geese and 3 geese of the dark species (Canada and white-fronted); the daily bag and possession limits are proportionately reduced in those areas where special restrictions apply to Canada geese. In Washington and Idaho, the daily bag and possession limits are 3 and 6 geese, respectively.

The season is closed on the Aleutian Canada goose.

Three areas in California, described as follows, are restricted to the hunting of Canada geese in order to protect the Aleutian Canada goose for which no hunting is allowed:

(1) In the Counties of Del Norte and Humboldt there will be no open season on Canada geese during the 1977–78 waterfowl hunting season.

(2) In the Sacramento Valley in the area described as follows: beginning at Willows in Glenn County proceeding south on Interstate Highway 5 to the junction with Hahn Road north of Arbuckle in Colusa County; then easterly on Hahn Road and the Grimes-Arbuckle Road to Grimes on the Sacramento River; then south on the Sacramento River to the Tisdale By-pass; then easterly on the Tisdale By-pass to where it meets O'Banion Road; then easterly on O'Banion Road to State Highway 99; then northerly on State Highway 99 to its junction with the Gridley-Colusa Highway in Gridley in Butte County; then westerly on the Gridley-Colusa Highway to its junction with the River Road; then northerly on the River Road to the Princeton Ferry; then westerly across the Sacramento River to State Highway 45; then northerly on State Highway 45 to its junction with State Highway 162; then continuing northerly on State Highway 45–162 to Glenn; then westerly on State Highway 162 to the point of beginning in Willows, the hunting season for taking Canada geese will not open until December 15, 1977, and will then continue to the end of the 1977–78 waterfowl hunting season.

(3) In the San Joaquin Valley in the area described as follows: beginning at Modesto in Stanislaus County proceeding west on State Highway 132 to the junction of Interstate 5; then southerly on Interstate 5 to the junction of State Highway 152 in Merced County; then easterly on State Highway 152 to the junction of State Highway 59; then northerly on State Highway 59 to the junction of State Highway 99 at Merced; then northerly and westerly to the point of beginning; the hunting season here for taking Canada geese will close on November 24, 1977, at sunset.

In the Washington Counties of Adams, Franklin, Grant, Walla Walla, Lincoln, Douglas, Yakima, Benton, Klickitat, and Kittitas, and in the Oregon Counties of Morrow, Wasco, Sherman, Gilliam, Umatilla, Union, and Wallowa, the goose season must run concurrently with the Columbia Basin duck season and the bag limits for geese are to be the same as in the general goose season in their respective States.

In that portion of Idaho lying west of U.S. Highway 93 (except Boundary, Bonner, Kootenai, Benewah, Shoshone, Latah, Nez Perce, Lewis, Clearwater, and Idaho Counties); in the Oregon Counties of Baker and Malheur; in that portion of Montana and Wyoming in the Pacific Flyway, the daily bag and possession limit is 2 Canada geese and the season on Canada geese may not extend beyond January 1, 1977.

In that portion of Idaho lying east of U.S. Highway 93; in that portion of Colorado in the Pacific Flyway; in Utah except Washington County, the season on Canada geese may be no more than 72 days and may not extend beyond December 18, 1977.

In Arizona; in that portion of New Mexico in the Pacific Flway; in Clark and Lincoln Counties, Nevada; in Washington County, Utah; and in the Tehachapi waterfowl area of California, the season on Canada geese may be no more than 72 days. The daily bag and possession limit is 2 Canada geese and the season on Canada geese may not extend beyond January 1, 1978.

In that portion of California Fish and Game District 22 for which California selects the open season (that portion of District 22 lying outside the Colorado River area), the daily bag limit is 1 Canada goose with 2 in possession and the season on Canade geese may be no more than 72 days and may not extend beyond January 1, 1978.

In all States in the Flway, the daily bag and possession limits may include no more than 1 Ross' goose.

Between October 22, 1977, and February 22, 1978, States in this Flyway may select an open season on black brant of 93 days with daily bag and possession limits of 4 and 8 brant, respectively.

In Utah, Nevada and Montana, an open season for taking a limited number of whistling swans may be selected subject to the following conditions: (a) the season must run concurrently with the duck season; (b) in Utah, no more than 2,500 permits may be issued, authorizing each permittee to take 1 whistling swan; (c) in Nevada, no more than 500 permits may be issued, authorizing each permittee to take 1 whistling swan in Churchill County; (d) in Montana, no more than 500 permits may be issued authorizing each permittee to take 1 whistling swan in Teton County; (e) permits and correspondingly numbered metal locking seals must be issued by the appropriate State conservation agency on an equitable basis without charge.

Open seasons on common (Wilson's) snipe, coinciding with the duck season locally in effect, may be selected for States or portions of States in this Flyway. The daily bag and possession limits are 8 and 16, respectively.

SPECIAL FALCONRY SEASONS FRAMEWORKS

Any State that provides special falconry hunting seasons may select extended falconry seasons for taking certain migratory games birds in accordance with the following provisions:

1. Seasons must fall within the framework dates provided for selecting regular hunting seasons for the various groups of species (e.g. October 1–January 20 for waterfowl, etc.).

2. Season lengths for all permitted methods of hunting within a given area may not exceed 107 days for any species.

3. Hawking hours to be ½ hour before sunrise until sunset.

4. Daily bag and possession limits for waterfowl (ducks, geese, and mergansers) may not exceed 2 and 4 birds, respectively, singly or in the aggregate.

5. Daily bag and possession limits for certain other species (coots, gallinules, rails, snipe, woodcock, doves and pigeons only) may not exceed 4 and 8 birds, respectively, singly or in the aggregate.

6. States offering extended seasons shall evaluate and report to the Service the results of each falconry hunting season (regular and extended) each year.

Hunting by falconry during regular migratory game bird seasons is permitted in accordance with applicable regulations.

States selecting extended falconry seasons must inform the Service of seasons and other regulations and publish said regulations.

NOTE.—The Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 10, 1977.

KEITH M. SCHREINER,
Acting Director,
U.S. Fish and Wildlife Service.

CIVIL AERONAUTICS BOARD

[Docket 31031; Order 77-8-31]

KLM ROYAL DUTCH AIRLINES

Reduced Specific Commodity Rates

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 9th day of August, 1977.

By tariffs filed June 17, 1977, and effective July 17, 1977, KLM Royal Dutch Airlines (KLM) reduced the minimum weight requirement for specific commodities shipped loose under 14 commodity descriptions from 10,000 kilograms to 1,000 kilograms.[1] At the 99 cents per kilogram level formerly applicable only to the 10,000 kilogram shipments, the 1,000 kilogram rates are available from New York to Amsterdam and are justified by KLM as necessary in order to serve a larger segment of the cargo market.

In a complaint requesting suspension and investigation of the specific commodity rates (SCR's), Seaboard World Airlines, Inc. (Seaboard) maintains that the rates contravene two Board policies which require justification of the minimum weight reduction on the basis of demonstrable cost savings and admonish the carriers to rely less upon SCR's to move their transatlantic cargo traffic.[2] Furthermore, Seaboard contends that the rates are clearly uneconomic, dilutionary, anticompetitive, and predatory. The carrier argues that the 99 cents per kilogram level, which was reluctantly approved by the Board in Order 76-12-98 as part of an IATA North Atlantic rates package,[3] was based on the demonstrated cost savings of moving large-sized 10,000 kilogram shipments and is patently uneconomic for 1,000 kilogram shipments; and that the rates produce a yield per revenue ton mile (RTM) of only 24.7 cents, almost 20 percent below the average U.S. carrier RTM cost as submitted in their justification in support of the recent IATA North Atlantic rates package. Seaboard asserts that, aside from a statement that the rates would attract small shippers, KLM has made no showing to what extent the rates would generate more traffic and revenue. Rather, Seaboard believes the rates will spread to other destinations in Europe, as other carriers match for competitive reasons, with resultant wholesale revenue dilution, and estimates that its own potential dilution will be over $3.9 million based upon the carrier's 1976 traffic and revenue experience. In addition, mindful of recent Presidential statements on suspension of international fare and rate reductions, Seaboard argues that there are compelling circumstances at hand which require suspension of the rates: the staggering operating losses, estimated at $15 million in 1976, sustained by the three U.S.-flag carriers in their transatlantic freighter operations which clearly demonstrate that continued U.S.-flag freighter operations in the area are in jeopardy. Finally, Seaboard suggests KLM's rates have anticompetitive and predatory effects on all-cargo operations inasmuch as KLM, in addition to enjoying the usual cargo pricing advantage of being able to carry freight in the bellies of passenger aircraft, can carry large volumes of cargo on the main decks of some of its passenger aircraft as well. Thus, in effect, KLM is able to cross-subsidize its limited and generally unprofitable freighter operations with high yield passenger traffic.

Upon full consideration of the tariff filing, the complaint, and all other relevant matters, the Board has concluded that facts sufficient to warrant investigation or suspension of the rates have not been presented and, accordingly, the complaint will be dismissed.

Examination of the most recent data indicates that during the first quarter of 1977, Seaboard's scheduled service freight traffic produced an average yield of 23.62 cents per RTM, 1.06 cents below the 24.7 cents per RTM produced by KLM's specific commodity rate. Data for the same quarter indicate that Seaboard incurred a cost per available ton mile (ATM) of 19.75 cents, 4.93 cents below the expected yield from the rate.[4] Thus, the KLM rate produces a yield that is above Seaboard's own first quarter 1977 average yield and unit ATM costs. Extension of the rate to a larger segment of the cargo market should result in generation of added traffic. Accordingly, the complaint will be dismissed.

Accordingly, *it is ordered*, That the complaint of Seaboard World Airlines, Inc. in Docket 31031 be dismissed.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[5]

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-23490 Filed 8-12-77;8:45 am]

[1] Air Tariffs Corporation, Agent, C.A.B. No. 50, 3rd Revised Page 280. The specific commodity descriptions involved are those for Items 9701 through 9714 inclusive and are set forth elsewhere in the above tariff.

[2] Seaboard also suggests the rates be rejected for technical reasons inasmuch as each KLM specific commodity description includes a number of separate, but related, commodities, for which rates for 1,000 kilograms are published elsewhere in the tariff. Seaboard states that KLM's filing violates section 221.60 of the Board's Economic Regulations prohibiting publication of duplicate rates. However, we do not find that this is a basis for rejection of KLM's tariffs in this instance.

[3] C.A.B. 26095, R-1 through R-12, Docket 27573.

[4] Although the quarterly ATM cost figure includes costs attributable to Seaboard's transatlantic charter operations as well as its schedule transatlantic cargo services, we note Seaboard has argued that cargo charter flights are actually more costly to operate than are scheduled cargo flights.

[5] All Members concurred except Vice Chairman O'Melia who did not participate.

[Docket 30744]

J. M. RODGERS CO., INC.

Applications; Proposed Approval

Application of J. M. Rodgers Co., Inc., for international air freight forwarder authority; Application of J. M. Rodgers Co., Inc., for disclaimer of jurisdiction or approval of an acquisition of assets pursuant to section 408 of the Federal Aviation Act of 1958, as amended, Docket 30744.

Notice is hereby given, pursuant to the statutory requirements of section 408(b) of the Federal Aviation Act of 1958, as amended, that the undersigned intends to issue the attached order under delegated authority. Interested persons are hereby afforded a period of fifteen days from the date of this notice within which to file comments or request a hearing with respect to the action proposed in the order.

Dated at Washington, D.C., August 10, 1977.

JAMES A. SALTSMAN,
Acting Director, Bureau of Operating Rights.

Issued under delegated authority.

ORDER GRANTING APPROVAL

J. M. Rodgers Co., Inc. (Rodgers) requests a disclaimer of jurisdiction or, alternatively, approval without a hearing pursuant to section 408 of the Federal Aviation Act of 1958, as amended (the Act), with respect to its acquisition of a portion of the assets of P.I.E. Air Freight Forwarding, Inc. (P.I.E.), a currently authorized domestic and international air freight forwarder.

Rodgers, an independent ocean freight forwarder and an applicant for international air freight forwarding authority, has purchased the offices, facilities, goodwill and the services of P.I.E. at J.F.K. International Airport in New York City.

In support of the application, the applicant contends that the acquisition took place when Rodgers was neither an air carrier, a person controlling an air carrier, a common carrier[1] nor a person engaged in any other phase of aeronautics; that the assets acquired are not a substantial part of the properties of P.I.E. since the operations at J.F.K. produced only 6.5 percent of its shipments, 7.5 percent of the weight of its shipments, and 5.3 percent of its consolidations even though they amount to 11.33 percent of P.I.E.'s total assets. The applicant further contends that the acquisition will not create a monopoly or monopolies and thereby restrain competition or jeopardize another air carrier not a party to the purchase agreement. The applicant also contends that if the Board finds that the acquisition is subject to section 408 of the Act, that it should, nevertheless, find that the acquisition does not affect the control of an air carrier directly engaged in the opertion of aircraft in air transportation, and that the public interest does not require a hearing.

No comments or requests for a hearing have been received.

Upon consideration of the foregoing, it is concluded that upon receipt of air freight forwarder authority, Rodgers will be a noncertificated air carrier; that P.I.E. is a noncertificated air carrier; and that Rodgers' acquisition of 11.33 percent of P.I.E.'s assets is subject to section 408(a) (2) of the Act. However, it is further concluded that the transaction will not affect the control of an air carrier directly engaged in the operation of aircraft directly engaged in air transportation, will not tend to restrain competition, and does not result in creating a monopoly. Furthermore, no person disclosing a substantial interest in the proceeding is currently requesting a hearing, and it is concluded that the public interest does not require a hearing.

The transaction for which the approval is sought is similar to others which have been authorized by the Board and does not raise any new substantive issues.[2] Accordingly, it is concluded that the above-described sale transaction is not adverse to the public interest or otherwise in violation of the Act.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.3 and 385.13, it is found that the foregoing transaction should be approved under section 408(b) of the Act, without a hearing, pursuant to the third proviso thereof, and that to the extent not granted herein, the application should be dismissed.

Accordingly it is ordered that: 1. The subject acquisition of a substantial portion of the assets of P.I.E. Air Freight Forwarding, Inc. by J. M. Rodgers Co., Inc., be approved pursuant to the third proviso of section 408 (b) of the Act; and

2. Except to the extent not specifically granted herein, the application (in Docket 30744) be dismissed.

Jurisdiction in this proceeding is retained for the purpose of amending or revoking the approval granted herein, with or without a hearing, as the public interest may require.

Persons entitled to petition the Board for review or this order pursuant to the Board's regulations, 14 CFR 385.50, may file such petitions within 10 days of the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon the expiration of the above period unless within such period a petition for review thereof is filed or the Board gives notice that it will revelew this order on its own motion.

JAMES A. SALTSMAN,
Acting Director, Bureau of Operating Rights.

[FR Doc.77-23489 Filed 8-12-77;8:45 am]

[Docket 31161; Order 77-8-32]

TRANS WORLD AIRLINES, INC.

Transatlantic Specific Commodity

Adopted by the Civil Aeronautics Board at its offices in Washington, D.C. on the 9th day of August, 1977.

By tariff revisions[1] scheduled to become effective August 12, 1977, Trans World Airlines, Inc. (TWA), proposes to establish specific commodity container rates consisting of flat charges on essential oils (Item 1716), aromatic substances (Item 6053), and disposable plastic lighters (Item 9617) from Paris to New York; on cotton fabrics (Item 2120) and books and/or magazines (Item 7109) from Milan and Rome to New York; and on cigarette paper (Item 7024) from Barcelona and Madrid to New York. On a per-container basis, the proposed charges are about 5 percent above currently applicable general commodity container minimum charges and are subject to an expiry date of April 15, 1978. The proposed rates are similar to those previously proposed by TWA from London to New York, which became effective on May 15, 1977.

A complaint requesting suspension and investigation of these rates has been filed by Seaboard World Airlines, Inc. (Seaboard). Seaboard asserts that these rates are well below either TWA's or Seaboard's revenue ton-mile (RTM) costs and are therefore predatory since Seaboard, unlike TWA, cannot shift the costs of its cargo operations to other segments of its business. In addition, Seaboard states that TWA's generation claims for the rates are wildly speculative; that in support of its generation estimates, TWA has not even provided the Board with comparative shipping rate data; that the burden of demonstrating any rate's economic character is on its proponent; and that TWA's failure to produce preliminary results of the similar London-New York rates in support of the instant proposal is practically an admission of the uneconomic nature of such rates. Finally, Seaboard questions TWA's "need" to fill unused westbound B-747 belly capacity, since TWA has increased such capacity over last summer's levels. According to Seaboard, the redundant capacity is the direct result of an increase in TWA B-747 service, particularly between Milan and New York, and, hence, the problem is of TWA's own making.

In support of its filing and in answer to the complaint, TWA states that the instant proposal is essentially the same as the London-New York proposal which the Board declined to suspend[2]; that the proposed commodity descriptions are designed to generate new traffic by air while minimizing diversion, and Seaboard has made no specific allegation of diversion; that TWA's generation estimates can not be viewed as extravagant since they represent less than one additional container per day; and that TWA cannot produce data on the London-New York rates because implementation of those rates awaits United Kingdom government approval. TWA also asserts that a proper test of the rates' economic character is not whether revenues meet fully allocated operating costs, but whether there is a meaningful contribution to capacity costs, particularly since the proposed rates are promotional and designed to fill otherwise unused capacity. In this regard, TWA maintains that the proposed rates would recover fully allocated ground handling costs while making a substantial contribution to capacity costs and that, since TWA's added B-747 transatlantic capacity is "at least partially" attributable to passenger scheduling, the carrier should not be prevented from implementing rates designed to make the additional belly capacity productive.

Upon full consideration of the tariff filing, the carrier's justification, the complaint, the answer, and all other relevant matters, the Board has decided to dismiss the complaint and permit the filing to become effective.

The proposal has, according to TWA, the potential of attracting new traffic to air while minimizing dilution of current revenues. In this respect, it is significant that Seaboard has not alleged that the proposed rates will cause diversion from existing traffic, but instead has focused attention on TWA's estimates of generation. TWA has submitted data indicating that the proposed rates would be well above the noncapacity costs associated with handling such traffic and would make a contribution to the capacity costs which TWA will incur in any event. The extent to which these rates will contribute to capacity costs will, of course, be dependent on the rates' generative capability.

Information on file with the Board indicates that during the first quarter of 1977, TWA's westbound tonnage was only 76 percent of eastbound tonnage. Furthermore, the carrier's total transatlantic tonnage during this period represented a 19.7-percent decline from the first quarter of 1976, whereas TWA's transatlantic passenger traffic increased 8.7 percent over these periods. Hence, it appears reasonable to view TWA's capacity increases as being largely responsive to passenger demand. Inasmuch as the proposed rates will exceed noncapacity costs and thus have the potential of improving the financial position of the carrier by generating new revenues to air transport and of utilizing otherwise unused westbound capacity, we will permit them to become effective.

Accordingly, it is ordered that: The complaint of Seaboard World Airlines, Inc., in Docket 31161 is dismissed.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[3]

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the FEDERAL REGISTER.

Amended regulations issued under cited Act, (15 CFR 301) prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00275. Applicant: University of Miami, School of Medicine, P.O. Box 520875, Miami, Fla. 33152. Article: Flow Cytophotometer, Model ICP 21. Manufacturer: PHYWE A.G., West Germany. Intended use of article: The article is intended to be used for the rapid measurement of cytophysical and biomedical parameters of single cells by flow cytophotometric techniques. A variety of cells will be analyzed by this methodology including mouse primary and metastatic tumor, mouse ascites tumor, and human neoplastic cells. Normal lymphoid cell populations will also be studied. The objectives of these studies are to measure statistically significant changes in tumor cell populations at various times after innoculation and analyze quantitative antigenic differences in cell membranes of various lymphoid cell populations. Application received by Commissioner of Customs: July 20, 1977.

Docket Number: 77-00292. Applicant: University of Wisconsin-Oshkosh, Department of Physics and Astronomy, Oshkosh, Wis. 54901. Article: Plug-in Unit for CPS-II Pulsed NMR Spectrometer. Manufacturer: Spin Lock Ltd., Canada. Intended use of article: The article will be used in a CPS-II pulsed nuclear magnetic resonance spectrometer for the study of slow (<100MHz) molecular motion in biopolymer-water systems, tissues, viscous liquids and liquid crystals, and hydrogen-bonded and other nonmetallic solids. The plug-in unit, for operation at 36 MHz, is required for solids and other samples where the signal-to-noise ratio is relatively poor and or the nuclear resonance is broad, resulting in a short-lived (30$^{\mu}$ sec or less) nuclear free induction decay. In all cases to be studied nuclear relaxation times will be measured to determine the nature of low frequency motion of molecular groups in the material. This article will also be used for educational purposes in the following physics courses:

82-319 Intermediate Laboratory II
82-519 Graduate Laboratory
82-401 and 405 Independent Study
82-792 Research Techniques in Physics
82-795 Thesis

Application received by Commissioner of Customs: July 6, 1977.

Docket Number: 77-00298. Applicant: Naval Medical Research Institute, Bethesda, Md. 20014. Article: Electron Microscope, Model JEM-100CV (Standard Side Entry Type) and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for studies of biological specimens including bacteria, viruses, parasites, fungi, and other microorganisms. Some of the phenomena to be investigated will include:

a. Infectious disease—ultrastructural evaluation of the biological properties of the cell membrane of rickettsiae; ultrastructural evaluation of septic shock due to *Pseudomonas aeruginosa*.

b. Study of the effects of *in vivo* host immune response on migrating adult schistosomes, particularly alterations in surface membranes.

c. Study of the membrane turnover rates of schistosomes to gain information on shedding of surface antigens and membrane repair.

d. Ultrastructural localization of sporozoite antigens with immunocytochemical markers.

e. Localization and immunochemical study of exoerythrocytic stage antigens and their comparison to sporozoite antigens.

f. Immunological studies in trauma care research.

g. Ultrastructural evaluation of changes in hyperbaric medicine research.

Application received by Commissioner of Customs: July 11, 1977.

Docket Number: 77-00299. Applicant: Baylor College of Medicine, Dept. of Otorhinolaryngology & Communicative Science, Baylor College of Medicine, 6501 Fannin Street, Houston, Tex. 77030. Article: Electron Microscope, Model JEM-100CX and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used to study the ultrafine structure of normal, pathological and experimentally treated cells and tissue of the inner ear and related (adjacent) structures. In addition to those, the study will include the otologically related neural tissues thus auditory and vestibular phenomena not only in normal status but in diseased and/or experimental conditions, can be analytically studied. The article will also be used for future biological, para-medical (neuroscience) graduate students teaching. In addition, any resident physician (or research trainee) who pursues oto-neurological researches will have access to utilizing the scope. Application received by Commissioner of Customs: July 12, 1977.

Docket Number: 77-00301. Applicant: Methodist Hospital, 1265 Union Avenue, Memphis, Tenn., 38104. Article: Electron Microscope, Model EM 201 and Accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used for studies of human pathological tissues or specimens derived from human material, such as fluids, tissue cultures, and viral or bacterial cultures isolated from human sources with particular emphasis on tumors and immunological diseases.

Experiments will be conducted with the following objectives:

(1) To determine the exact classification or diagnosis in tumors where light microscopic study is inadequate and apply information to selection and evaluation of therapy,

(2) To determine causative agents in various infectious diseases for purposes of diagnosis and treatment,

(3) To establish diagnosis in metabolic disorders as basis for treatment as well as genetic counseling for parents and or patients, and

(4) Identification of immune complexes or other evidence of immunologically induced diseases for diagnostic and treatment purposes.

The article will also be used as an integral part of the residency program in Pathology to provide training essential to pathology residents for pathology board certification and use of technique that has become standard of practice in some areas.

Application received by commissioner of customs: July 14, 1977.

Docket Number: 77-00302. Applicant: Marquette University, Wehr Life Science Building, 530 N. 15th Street, Milwaukee, Wis. 53233. Article: M86 Combined Scanning Microinterferometer and Microdensitometer. Manufacturer: Vickers Instruments, Inc., United Kingdom. Intended use of article: The article is intended to be used for the measurement of amounts of DNA and proteins in individual cells in order to gain quantitative data on the behavior of genetic material during the growth and differentiation of fish oocytes, insect embryos, and two kinds of unicellular organisms, *Pediastrum* and *Oxytricha*. The instrument will also be used to measure DNA amounts in Feulgen-stained blood cell nuclei from unisexual and bisexual fishes of the genus *Poecilia* (molly fishes) in order to identify the diploid and triploid forms that comprise a breeding complex in nature with the bisexual Mexican molly fish. The role of polyploidy in speciation and evolution is a prime focus of studies on these fish. Additional studies will be made to develop cytochemical methods for sex identification of juvenile birds that lack obvious sexual dimorphism, for example, endangered species such as the Whooping crane or Puerto Rican parrot.

In addition, the article will be used in the course: Biology 295, Introduction to Cytophotometry and Biology 137 Experimental Cell Biology to provide a basic understanding of quantitative cytochemistry and its application to both basic and applied biomedical research. Application received by Commissioner of Customs: July 14, 1977.

Docket Number: 77-00303. Applicant: University of Chicago, 5801 South Ellis Avenue, Chicago, Ill. 60637. Article: Ultramicrotome, Model LKB 8800A and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of the ultrastructure of cellular and subcellular membranes in heart muscle cells under conditions of interest for the understanding and treatment of heart disease. Various forms of heart disease will be produced in rats and rabbits whose hearts will subsequently be examined by electron microscopy. The article will also be used in the course, "Pharmacological and Physiological Sciences 401," which trains graduate students working for their Ph.D. in the ultrastructural anlysis of heart muscle. Application received by Commissioner of Customs: July 14, 1977.

Docket Number: 77-00304. Applicant: National Institutes of Health, NINCDS, Medical Nuerology Branch, Bldg. 10, Room 10D20, Bethesda, Md. 20014. Article: Electron Microscope, Model EM 10A and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for studies of human muscle biopsies the objective of which is to delineate the diagnosis and ultimate cause of human neuromuscular diseases. In addition, the article will be used in training approximately 6 physician-investigators each year in the newest ultrastructure research of human neuromuscular diseases. Application received by Commissioner of Customs: July 14, 1977.

Docket Number: 77-00305. Applicant: Peter Bent Brigham Hospital, Department of Pathology, 721 Huntington Avenue, Boston, Mass. 02115. Article: Electron Microscope, Model JEM-100S. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for the study of ultrastructure of biological tissues, including kidney tumor and muscle biopsies for diagnostic purposes. The experiments to be conducted will involve pathogenesis of renal and vascular diseases with the objective of obtaining perfection of these techniques so new information related to renal and vascular diseases, tumors and muscle diseases can be investigated. The article will be used for instruction of residents and fellows in ultrastructure technique. Application received by Commissioner of Customs: July 18, 1977.

Docket Number: 77-00306. Applicant: New York State Department of Health, Division of Laboratories and Research, Empire State Plaza, Albany, N.Y. 12201. Article: Ultramicrotome, Model LKB 8800A and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for cutting alternate thin and thick sections of tumor tissues and other pathological tissues which will be investigated to aid diagnosis, typing and grading of disease states. The article will also be used as part of a training program for predoctoral and postdoctoral fellows (collaborative programs with Rennslaer Polytechnic Institute and Albany Medical College). The training program adds advanced ultrastructural analysis training to the training of medical students and research scientists. Application received by Commissioner of Customs: July 19, 1977.

Docket Number: 77-00307. Applicant: University of Wisconsin, 750 University Avenue, Madison, Wis. 53706. Article: Ultramicrotome, Model LKB 8800A and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for sectioning mammalian cells and microbial specimens of varying density and fragility. Investigations will include ultrastructural studies on normal and cancerous animal tissues, developmental studies on microbial systems, cyto and histochemical studies on enzyme and subcellular organelle localization in cells and tissues, membrane interactions of various cell types, and subcellular changes in cells induced by changes in their biochemical and physical environments. The objective pursued in the course of these investigations is to understand the distributions of protein in cell surfaces and the mechanisms by which hormones function in their interaction with the cell surface. Graduate students and postdoctoral fellows will learn the techniques of ultrastructure and cytochemistry through their research use. Application received by Commissioner of Customs: July 19, 1977.

Docket Number: 77-00308. Applicant: University of Nebraska, Lincoln, Nebr. 68588. Article: THR-1500 1.5 Meter Double Pass Czerny-Turner Monochromator. Manufacturer: Jobin-Yvon, France. Intended use of article: The article is intended to be used in the development of a stress modulation spectroscopy specifically adapted for the study of molecular crystals. Several problems will be surveyed to demonstrate the capabilities of the method. These will involve experiments to determine the critical points in the joint densities of states for the first singlet systems of napthalene, anthracene and tetracene. Dye crystals having very strong coupling will be studied with the goal of locating the critical points in the metallically reflecting region. Piezomodulated luminescence studies will be made to determine the effect of strain upon the migration and lifetime of triplet excitons, in order to prove the nature of lattice relaxation processes. The effect of strain on the fluorescence polarization ratio will be determined for both piezoemission and piezoaction spectra. To ascertain the effect of stress upon S_0 and S_n the piezoemission and Kramers-Kronig transformed piezoreflection spectra will be obtained and compared. Study on the interaction of strain with surface exciton states will be initiated. The emission studies also will be used to determine the effect of strain on defect emission and excimer emission. Known piezochromic and triboluminescent systems will be studied in an effort to locate the microscopic origin of these effects and to obtain more quantitative data. Application of uniaxial modulated stress to a cubic inorganic crystal in order to make assignment of electronic states by breaking degeneracies will also be undertaken. The dependence of the spectra of hydrogen-bonded crystals upon stress modulation will also be studied. Application received by Commissioner of Customs: July 20, 1977.

Docket Number: 77-00309. Applicant: Edgewater Hospital, 5700 North Ashland Avenue, Chicago, Ill. 60660. Article: Ultramicrotome, Model LKB 2128-010 and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to cut ultrathin sections from materials of biopsies collected by the surgeons in the institution. The biopsies are from

various organs such as lymph nodes, lung, eye, uterus, kidney, liver, bone marrow, and blood. Morphological examination of the various malignant and benign tumors and other pathologic lesions in humans will be conducted to help in the diagnosis of various diseases. The electron microscopic study of various human organs will contribute to the education of the medical staff, residents and medical students. Application received by Commissioner of Customs: July 20, 1977.

National Bureau of Standards

ADVISORY COMMITTEE FOR INTERNATIONAL LEGAL METROLOGY

Open Meeting

The Advisory Committee for International Legal Metrology will meet from 9:00 a.m. to 5:00 p.m. on Tuesday, September 13, 1977, and from 9:00 a.m. to 5:00 p.m. on Wednesday, September 14, 1977. The meeting will be held in Lecture Room 1107, Radio Building, National Bureau of Standards, Boulder, Colo.

The Committee was established in March, 1974 (39 FR 6136, 2-19-74), and renewed in March, 1976 (41 FR 12915, 3-29-76), to advise the Department through the Director, National Bureau of Standards (NBS), on technical and policy matters relating to NBS's assigned general responsibilities for the development of U.S. positions on technical issues arising in the International Organization of Legal Metrology (OIML). The Committee consists of approximately 40 members selected to ensure balanced representation among government, professional metrologists, national standards bodies, and industry and trade associations.

The Committee meeting is a prelude to United States participation in the OIML Presidential Council Meeting scheduled for September 27-29, 1977, in Paris, France. The agenda for the Advisory Committee meeting in Boulder, Colo., will include the following discussion items:

(1) Planning for the Sixth International Conference of Legal Metrology, tentatively scheduled in Washington, D.C. in 1980;

(2) Problems of quorum and voting procedures at meetings of the OIML International Conference and International Committee;

(3) Improvement in the presentation of OIML's financial documents;

(4) U.S. policy for private industry participation in OIML technical and plenary meetings;

(5) U.S. proposals for technical revision of OIML International Recommendations No. 1-19;

(6) U.S. proposals for amendments to certain OIML working procedures for Pilot and Reporting Secretariats;

(7) USSR proposal for the development of a new program in OIML dealing with the teaching of legal metrology;

(8) OIML proposal for initiation of international intercomparisons of primary standards in selected fields (i.e., mass, temperature, pressure); and,

(9) Establishing U.S. Technical Advisory Groups for important OIML Secretariats not administered by the U.S.

The meeting will be open to public observation; and a period will be set aside for oral comments or questions by the public which do not exceed ten minutes each. More extensive questions or comments should be submitted in writing before September 1. Other public statements regarding committee affairs may be submitted at any time before or after the meeting. Approximately 20 seats will be available for the public on a first-come first-served basis.

Copies of the minutes will be available on request 30 days after the meeting.

Inquiries may be addressed to the Committee Control Officer, Mr. David Edgerly, Office of International Standards, National Bureau of Standards, Washington, D.C. 20234, telephone: 301-921-3662.

Dated: August 9, 1977.

ERNEST AMBLER,
Acting Director, National Bureau of Standards.

National Oceanic and Atmospheric Administration

REGIONAL FISHERY MANAGEMENT COUNCIL CHAIRMEN

Meeting

The Director, National Marine Fisheries Service (NMFS) will meet with the Chairman of each of the eight Regional Fishery Management Councils created under the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265). This meeting will be held in the VIP Room of the Rodeway Inn, 7101 NE. 82d Avenue, Portland Oreg., on September 14-15, 1977. On September 14, the meeting is scheduled to begin at 10:00 a.m., and recess at 5:00 p.m. On September 15, the meeting is scheduled to commence at 8:00 a.m. and adjourn at 11:00 a.m. The participants at this meeting will discuss:

1. NMFS budgeting requirements and funding policies relating to Councils.
2. Definition of Council research requirements and potential sources or procedures for accomplishment.
3. Definition of fishery development opportunities and procedures for coordination of implementation between NMFS administrative policy and Council Fishery Management Plans (FMPs).
4. Design and review requirements for Fishery Management Plans (FMPs)
5. Fisheries management in territorial waters and its relation to Fishery Management Plans (FMPs).
6. Council role in regulation of foreign fishing, e.g., status of Preliminary Management Plans (PMPs), fee schedule, 1978 allocations, enforcement problems
7. Inter-Council and Council-NMFS communication.
8. National workshops as a means of resolving issues.
   a. Definition of optimum yield
   b. Concept of limited entry
9. Other appropriate issues.

This meeting will be open to the public on a first come-first serve basis. Seating will be available for approximately 30 members of the public. Public participation will be permitted to the extent time permits.

Dated: August 10, 1977.

WINFRED H. MEIBOHM,
Acting Deputy Director, National Marine Fisheries Service.

AIR QUALITY

Recommended Policy on Control of Volatile Organic Compounds

Correction

In FR Doc. 77-19385 appearing in the issue of Friday, July 8, 1977 on page 35314.

On page 35315 in the 1st column, under the heading "Discussion", the 2nd paragraph, the 9th and 10th line, the word, "substituton" should read, "substitution".

In the 2nd column, paragraph "1.", the 13th line, the word "new" should read "now".

In the 3rd column, paragraph "6.", the small type, the 1st line should read:

* * *

"* * * selective regulation of CFM uses * * *"

* * *

FEDERAL COMMUNICATIONS COMMISSION

RADIO TECHNICAL COMMISSION FOR MARINE SERVICES

Meetings

In accordance with Public Law 92-463, "Federal Advisory Committee Act," the schedule of future Radio Technical Commission for Marine Services (RTCM) meetings is as follows:

Special Committee No. 70 "Minimum Performance Standards (MPS)—Marine Loran-C Receiving Equipment"
Notice of 7th Meeting
Thursday, September 1, 1977—10 a.m. (All-day meeting).
Conference Room (second floor), U.S. Coast Guard Marine Inspection Office, Battery Park Building, Battery Park at South Ferry, New York, New York.

Technical Specs Working Group—Full-day Meeting, Augst 31, 10:00 a.m. Same location as September 1 meeting.

AGENDA

1. Call to Order; Chairman's Report.
2. Confirmation of Secretary; Adoption of Agenda.
3. Acceptance of SC-70 Summary Records.
4. Reports on Work Assignments.
5. Approval of Receiver Specifications.
6. Other Business.
7. Establishment of possible meeting date.

Captain Alfred E. Fiore, Chairman, SC-70, U.S. Merchant Marine Academy, Kings Point, New York 11024, Phone: (516) 482-8200

To comply with the advance notice requirements of Public Law 92-463, a comparatively long interval of time occurs between publication of this notice and the actual meeting. Consequently, there is no absolute certainty that the listed meeting room will be available on the day of the meeting. Those planning to attend the meeting should report to the room listed in the notice. If a room substitution has been made, the new meeting room location will be posted at the room listed in this notice.

Agendas, working papers, and other appropriate documentation for the meeting is available at that meeting. Those desiring more specific information may contact either the designated Chairman or the RTCM Secretariat. (Phone (202) 632-6490)

The RTCM has acted as a coordinator for maritime telecommunications since its establishment in 1947. Problems are studied by Special Committees and the final report is approved by the RTCM Executive Committee. All RTCM meetings are open to the public. Written statements ars preferred but by previous arrangement, oral presentations will be permitted within time and space limitations.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

FEDERAL ENERGY ADMINISTRATION

ISSUANCE OF DECISIONS AND ORDERS BY THE OFFICE OF EXCEPTIONS AND APPEALS

Week of June 13 Through June 17, 1977

Notice is hereby given that during the week of June 13 through June 17, 1977, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Exceptions and Appeals of the Federal Energy Administration. The following summary also contains a list of submissions which were dismissed by the Office of Exceptions and Appeals and the basis for the dismissal.

APPEALS

Central Hilight Unit; Campbell, Wyo.; FEA-1029,Crude Oil

The working interest owners of the Central Hilight Unit filed an Appeal of a Decision and Order issued to the firm by the FEA on October 8, 1976. *Central Hilight Unit*, 4 FEA Par. 83,138 (October 8, 1976). In the October 8 Decision, the FEA granted an exception which permitted the firm to charge upper tier ceiling prices for a portion of the crude oil which it would produce from the Central Hilight Unit. In its Appeal, Central Hilight contended that the level of relief calculated in the previous Decision was erroneous because $730,000 of the investment cost for new submersible pumps had been excluded, the level of crude oil production anticipated from a fuel conversion project had been overestimated, and the level of crude oil production from the Unit without any additional enhanced recovery activities had also been overestimated. Central Hilight contended that the level of exception relief should be increased to correct for the effect of these errors. Central Hilight also asserted that it was technically unable to comply with the requirement of the October 8 Order that it identify the incremental quantity of crude oil which would be produced as a result of a polymer waterflood project on the Unit. In considering the Central Hilight Appeal, the FEA concluded that adjustments to the previous level of exception relief should be made to correct for the factual errors which were found in the October 8 Decision. However, the FEA found that as a result of these adjustments and Central Hilight's delay in initiating the enhanced recovery investment program the firm's investment program would not be able to achieve the 15 percent internal rate of return contemplated in the October 8 Decision even if 100 percent of the incremental crude oil produced for the benefit of the working interest owners was permitted to be sold at exempt market price levels. However, in order to ensure that the FEA regulatory requirements would not operate as an impediment to Central Hilight's undertaking of the investment project, the FEA granted the firm exception relief to permit the sale of 100 percent of the incremental crude oil produced as a result of the investment program at market prices. However, since the exception relief approved for the firm was based on estimated production and cost data, the FEA stated that further reviews of the matter would be conducted and the level of exception relief would be adjusted based on actual data in order to permit the firm to obtain a 15 percent internal rate of return on its investment if a sufficient quantity of crude oil was produced. The FEA also simplified the reporting requirements specified in the October 8 Decision. The Central Hilight Appeal was therefore granted.

Gulf Oil Corp.; Tulsa, Okla.; FXA-1260, Crude Oil

Gulf Oil Corp. appealed from a Decision and Order in which the FEA denied the firm's request for exception relief from the provisions of 10 CFR, Part 212, Subpart D. *Gulf Oil Corp.*, 5 FEA Par. 83,083 (March 4, 1977). The Appeal, if granted, would have resulted in the rescission of the previous Order and the issuance of an order permitting Gulf to sell an additional amount of crude oil at upper tier ceiling prices. This amount of crude oil would be equal to the amount of the cumulative deficiency which accrued on five offshore leases in Gulf's South Timbalier Block Field in Louisiana as a result of a pipeline break in February 1976. In considering Gulf's Appeal, the FEA noted that Gulf was, in essence, requesting that the FEA modify the cumulative deficiency rule through the exceptions process so that it would not be applicable to any force majeure situation. The FEA observed that such a request involved a broad issue as to the most desirable means of attaining national energy policy objectives and would be more appropriately resolved in a rulemaking proceeding. Since Gulf failed to challenge the Decision's underlying factual determination that the firm had a sufficient economic incentive to repair the pipeline and to continue oil production from the South Timbalier Block Field even in the absence of exception relief, the FEA found that it had not shown that the March 4 denial of exception relief was erroneous Cf. *Union Oil Co. of California*, 4 FEA Par. 83,039 (August 6, 1976); aff'd 4 FEA Par. 80,592 (December 15, 1976). Accordingly, Gulf's Appeal was denied.

Petrolane, Inc.; Long Beach, Calif.; FXA-1173; Refined Petroleum Products

Petrolane, Inc., filed an Appeal from a Decision and Order which the FEA issued on September 24, 1976. *Class Exception—Retroactive Application of the Separate Inventories Amendment*, 4 FEA Par. 83,099 (September 24, 1976). In the September 24 Order, the FEA concluded that retroactive exception relief was not warranted on a class basis for all resellers of petroleum products which had calculated their cost of product in inventory by utilizing separate inventory computations prior to May 1, 1976. Petrolane's Appeal, if granted would have resulted in the issuance of an order declaring that the FEA Price Regulations permitted resellers to utilize separate inventory computations prior to May 1, 1976. In considering the Appeal, the FEA initially observed that the argument which Petrolane advanced in its Appeal—viz., that the regulations prior to May 1, 1976, were so ambiguous as to permit the use of separate inventory computations—had been discussed at length and rejected in the September 24 Decision. In this regard, the FEA reaffirmed its earlier finding that several elements of the FEA Price Regulations had indicated that firm-wide inventory computations were required. The FEA also found that contrary to Petrolane's contention, none of the Rulings or Decisions cited by the firm in its Appeal had permitted the use of separate inventory computations. The FEA pointed out that the firm-wide inventory rule was one of the principal means which has been used to assure that regional price anomalies are not experienced disproportionately by a small number of a firm's customers. The FEA further found that Petrolane had failed to substantiate its argument that the use of firm-wide inventory

cost calculations by large multi-region propane marketers would have resulted in price reductions which would have undermined the competitive structure of the propane marketing industry. It was also noted that even if firm-wide computations had resulted in some instances in significant price reductions, those instances would not in and of themselves demonstrate that the firm-wide inventory cost requirement was inconsistent with FEA's statutory objectives. Finally, the FEA determined that contrary to the firm's contentions, Petrolane had not received advice from FEA officials that the regulations permitted it to use separate inventory computations. Based on these considerations, the FEA denied the Petrolane Appeal.

Rock Island Refining Corp.; Indianapolis, Ind.; FEA-1153; Crude Oil

Rock Island Refining Corp. (Rock Island) filed an Appeal from a Decision and Order which the FEA issued to it on December 15, 1976. *Rock Island Ref. Corp.*, 4 FEA Par. 83,255 (December 15, 1976). The December 15 Decision denied an Application for Exception from the provisions of 10 CFR 211.67 in which Rock Island had requested that exception relief previously granted to the firm by the FEA be extended for an additional period of time. The Appeal, if granted, would result in the rescission of the December 15, 1976, Order and the issuance of a new Decision and Order granting exception relief to Rock Island. In considering Rock Island's Appeal, the FEA rejected the firm's contention that it be permitted to adjust the historical profitability which Rock Island had previously reported to the FEA to be utilized in evaluating the impact of the Entitlements Program on the firm. In considering the Rock Island Appeal the FEA also rejected the firm's contention that by including the operating results for the months of April and May 1976 in its analysis of Rock Island's request for exception relief the FEA was attempting to recapture benefits which it received as a result of Special Rule No. 6. The FEA also rejected Rock Island's contention that the firm should be permitted to recognize as an expense for its 1976 fiscal year the $2,642,065 of additional entitlements which the firm is required to purchase in order to refund excessive exception relief benefits that the FEA determined the firm received during 1975. The FEA pointed out that the $2,642,065 of additional entitlements which Rock Island is required to purchase is attributable solely to the firm's actual operating results from 1975 and should therefore not be considered as arising from its 1976 operations. The Rock Island Appeal was therefore denied.

Rock Island Refining Corp.; Indianapolis, Ind.; FXA-1072; Crude Oil

Rock Island Refining Corp. appealed from a Decision and Order which the Federal Energy Administration issued to it in November 5, 1976. *Beacon Oil Co., et al.*, 4 FEA Par. 87,024 (November 5, 1976). In the November 5 Decision and Order, the FEA determined on the basis of financial and operating data which Rock Island submitted that the firm had received an excessive measure of exception relief from its obligations under the Entitlements Program in 1975. Rock Island was accordingly required to purchase entitlements valued at $2,642,065 during the period November 1976 through October 1977 in order to return the excessive benefits which it received. The Appeal, if granted, would result in the rescission of that portion of the November 5 Order which imposes an entitlement obligation on Rock Island. In its Appeal, Rock Island contended that since section 403 of the Energy Policy and Conservation Act (EPCA) exempted small refiners from entitlement purchase obligations beginning with December 1975, the November 5 Order contravenes section 403 of the EPCA and is therefore invalid. In rejecting this claim, the FEA noted that the construction of section 403 of the EPCA which is reflected in the November 5 Decision comports with the terms of the statute, the legislative history underlying its adoption, and previous FEA interpretations. Rock Island also contended that the FEA did not have the authority to recapture exception relief which it previously granted unless a showing could be made that the decision to approve the exception relief was erroneous when it was made. In rejecting this contention, the FEA found that a similar argument had been fully considered and ultimately rejected in *Delta Refining Co.*, 5 FEA Par. 80,530 (January 26, 1977). Rock Island also argued that the manner in which the FEA established the standards which govern the evaluation of exception applications from the Entitlements Program submitted by small refiners violates the Administrative Procedure Act (APA). In this regard, the FEA noted that similar arguments with respect to the FEA's adoption of standards were fully considered and ultimately rejected in *EDG, Inc.*, 5 FEA Par. ------ (June 9, 1977). Since the determination reached in the *EDG* Decision with respect to the promulgation of the small refiner exception standards is equally applicable to Rock Island's case, its contentions were also rejected. Rock Island also requested that the FEA adjust the firm's historical operating results by deleting certain years from the seven year arithmetic average profit margin which the FEA generally utilizes in evaluating exception applications from the Entitlements Program submitted by small refiners. In considering the request, the FEA found that Rock Island had failed in at least one major respect to meet the criteria applied in previous cases where a firm's historical profitability in certain of its previous seven fiscal years had been excluded from the exceptions analysis. In addition, Rock Island objected to the FEA's use of the standards set forth in *Delta Ref. Co.*, 2 FEA Par. 83,275 (September 11, 1975) in determining that the firm was awarded an excessive measure of relief during 1975. In this regard the FEA determined that there was considerable merit to Rock Island's position. Therefore the FEA agreed to evaluate the exception relief granted to Rock Island in 1975 prior to the promulgation of the *Delta* standards. Finally, the FEA found that Rock Island's argument that the FEA had improperly recaptured a portion of the exception relief awarded to the firm in 1975 which actually represented a benefit conferred upon the firm pursuant to Special Rule No. 3 has considerable merit. The FEA therefore reduced the firm's entitlement purchase obligation specified in the November 5 Decision by $314,718. Rock Island's Appeal was denied in all other respects.

Tenneco Oil Co.; Houston, Tex.; FXA-1140; Crude Oil

Tenneco Oil Co. (Tenneco) filed an Appeal from a Decision and Order which the Federal Energy Administration issued to the firm on December 8, 1976. *Tenneco Oil Co.*, 4 FEA Par. 83,229 (December 8, 1976). In the December 8 Order the FEA determined that exception relief was necessary in order to provide Tenneco with an economic incentive to drill a replacement well on its Kopp Lease and thereby recover volumes of crude oil which would not otherwise be produced. The FEA therefore premitted Tenneco to sell a specified number of barrels of crude oil at upper tier prices in order to provide the firm with an economic incentive to make the investment in the replacement well. In its Appeal, Tenneco stated that it had inadvertently omitted state production and ad valorem taxes from the cost projections which it had submitted during the course of the exception proceeding and that the exception relief specified in the December 8 Order would accordingly not produce the 15 percent level rate of return on investment which the December 8 Order intended. Tenneco therefore requested that additional exception relief be granted to account for these costs. The FEA determined that the Tenneco submission did not satisfy the criteria for the granting of an appeal set forth in the FEA regulations and that the Tenneco Appeal should be denied. However, the FEA also determined that the data which Tenneco furnished in connection with its Appeal indicated that an additional amount of exception relief was necessary in order to achieve the objectives of the December 8 Decision. The FEA therefore recalculated the level of exception relief granted to Tenneco to permit the firm to sell a sufficient number of barrels of crude oil at upper tier ceiling prices to obtain a 15 percent internal rate of return on its investment in a replacement well on the Kopp Lease.

Tenneco Oil Co.; Washington, D.C.; FRA-1214; Motor Gasoline

Tenneco Oil Co. filed an Appeal from a Remedial Order which was issued to it by FEA Region VI on February 2, 1977. In that Remedial Order, the FEA found that during six months of the period between June 1974 and January 1976 Tenneco had sold motor gasoline at levels which exceeded the firm's maximum allowable prices calculated in accordance with 10 CFR 212.83. In order to remedy this violation, Tenneco was directed to refund $6,274,780 plus interest to identifiable customers and the refund $5,941,220 plus interest through a price reduction of $0.02 per gallon in its retail sales of gasoline. In its Appeal, Tenneco contended that the Remedial Order was erroneous because it does not take account of an oral interpretation which it allegedly received from Cost of Living Council officials. In considering this contention, the FEA observed that Tenneco previously raised this same argument in two prior submissions and that it had been fully considered and rejected by the FEA. Tenneco submitted no new evidence in support of this argument which warranted reconsideration of this issue. Tenneco also argued that the FEA erred in making its calculations of overcharges by assuming that Tenneco's use of the correct cost and quantity of purchased gasoline in computing its maximum permissible prices for motor gasoline would not change the other factors contained in the refiner's price formula. The FEA found that Tenneco provided no data to support this contention, and that the firm's mere suggestion that it might have been able to reallocate its increased product costs did not provide sufficient evidence to demonstrate that the Remedial Order was in error. Tenneco also contended that the Remedial Order is insufficiently precise to permit the firm to recalculate its base prices for gasoline for prior months, and that the firm should not be required to file revised cost allocation forms with the FEA until all other outstanding issues regarding the firm's pricing practices have been resolved. In rejecting these contentions, the FEA described the type of adjustments which Tenneco must make in recalculating its base prices and noted that Tenneco did not even contend that it would incur a burden in making the recalculations and refiling the required forms. The FEA also determined, however, that the Remedial Order contained certain computational er-

rors which should be corrected, and that the Remedial Order should be amended to expressly state that the 45 day period within which refunds must be made applies only to identifiable customers. Finally, the FEA determined that the Remedial Order should be amended to permit Tenneco to reflect certain product cost increases in its rollback price for gasoline during that period in which refunds were made. Based on these considerations, the FEA amended the Remedial Order accordingly and denied Tenneco's Appeal in all other respects.

Wagner Oils, Inc.; Fairborn, Ohio, FXA-1762, No. 2 Heating Oil

Wagner Oils, Inc. (Wagner Oils), appealed from a Decision and Order which the FEA issued to the firm on March 30, 1977. *Wagner Oils, Inc.*, 5 FEA Par. 83,127 (March 30, 1977). In the March 30 Decision the FEA had denied Wagner Oils' request for an exception from the requirement that it complete and file FEA Form P112-M-1, "No. 2 Heating Oil Supply/Price Monitoring Report" on a monthly basis. In considering the Wagner Oils Appeal, the FEA found that the firm had not submitted any factual data in support of its claim that the determination made in the prior Decision was erroneous. In particular, although Wagner Oils had twice been requested to supply data relating to the amounts of additional time and effort which its employees require to complete Form P112-M-1, the firm did not respond to either of those requests. It was therefore determined that since the Appeal filed by the firm was factually deficient it should be denied.

REQUESTS FOR EXCEPTION

Al Jones Oil Corp.; Jamaica, N.Y.; FEE-3856; Motor Gasoline

Al Jones Oil Corp. (Jones) filed an Application for Exception from the provisions of 10 CFR 211.9 which, if granted, would result in the issuance of an order establishing it as the base period supplier of motor gasoline at specified federal installations which it supplies pursuant to contracts awarded under the section 8(a) Program of the Small Business Administration. Jones would also be assigning a new supplier of motor gasoline to enable it to meet the supply requirements of those installations. Pursuant to section 8(a) of the Small Business Act of 1958, as amended, the SBA enters into contracts to supply petroleum products to various federal installations and assigns these contracts to eligible small businesses. In considering the Jone request, the FEA found that the firm had not shown that it was unable to obtain sufficient quantities of motor gasoline to meet its contractual obligations Jones' allegation that it might encounter supply problems in the future was unsupported and purely speculative at this time, and could not alone form an appropriate basis for exception relief. Moreover as a new wholesale purchaser which lacks a base period supplier, Jones may apply to the FEA to be assigned a base period supplier. Since Jones had not utilized this administrative procedure which is available to it, the requested exception relief was found to be premature. In addition, financial and operating data and projections submitted by Jones indicated that the firm expects to earn appreciable profits in 1977 whether or not it received exception relief. In view of these circumstances, Jones had not demonstrated that it would experience any hardship in the absence of exception relief, and its request for exception was denied.

Beacon Oil Co.; Hanford Calif.; FXE-4087; Crude Oil

Beacon Oil Co. (Beacon) filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlement Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of June 1977. In support of its exception request, Beacon submitted projected financial statements for its current fiscal year ending December 31, 1977, and projected monthly crude oil runs to stills and receipts of old, new, and imported crude oil for the fiscal year. In considering Beacon's exception request the FEA determined that as a result of Beacon's crude oil runs and receipts during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of June 1977. As a result of the projected entitlements cost which Beacon would incur during its current fiscal year, the firm's profit margin and return on invested capital would be below historical levels. Under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976) exception relief was therefore warranted. Accordingly, the FEA granted Beacon's Application for Exception relieving the firm of sufficient entitlement purchase obligations during the six month period June 1977 through November 1977 to account for its crude oil runs to stills and old oil receipts during the period April 1977 through September 1977 to permit Beacon to achieve its historical profit margin during the current fiscal year. However, the FEA noted that the relief approved to Beacon would be reevaluated if the firm requested an extension of exception relief beyond November 1977 and, as is the case with all Entitlements Program Exception decisions, at the conclusion of the firm's current fiscal year. The decision further noted that an adjustment will be made and Beacon will be required to purchase entitlements if it received excess benefits in the past because of a difference between the financial projections it submitted and the actual financial results which it achieves.

Brooks Exploration, Inc.; Denver Colo.; FEE-4114; Crude Oil

Brooks Exploration, Inc., filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D which if granted, would permit Brooks to sell all of the crude oil produced from the Kittelson No. 1 well (the Kittelson well) at upper tier ceiling prices. In considering the exception application, the FEA determined that the Kittelson well generated substantial levels of profits during 1976. The FEA therefore concluded that Brooks has an economic incentive to continue its crude oil production activities at the Kittelson well and therefore is not experiencing a gross inequity at the present time. The exception application was accordingly denied.

Edgington Oil Co., Inc.; Long Beach, Calif.; FXE-4084; Crude Oil

Edgington Oil Co., Inc. (Edgington), filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of June 1977. In support of its exception request, Edgington submitted projected financial statements for its current fiscal year ending December 31, 1977, and projected monthly crude oil runs to stills and receipts of old, new, and imported crude oil for the fiscal year. In considering Edgington's exception request the FEA determined that as a result of Edgington's crude oil runs and receipts during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of June 1977. As a result of the projected entitlements cost which Edgington would incur during its current fiscal year, the firm's profit margin and return on invested capital would be below historical levels. Under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976) exception relief was therefore warranted. Accordingly, the FEA granted Edgington's Application for Exception and relieved the firm of sufficient entitlements purchase obligations during the six month period June 1977 through November 1977 to permit Edgington to achieve its historical profit margin during the current fiscal year. However, the FEA noted that the relief approved to Edgington would be reevaluated if the firm requested an extension of exception relief beyond November 1977 and as is the case with all Entitlements Program Exception decisions at the conclusion of the firm's current fiscal year. The decision further noted that an adjustment will be made and Edgington will be required to purchase entitlements if it received excess benefits in the past because of a difference between the financial projections it submitted and the actual financial results which it achieves.

Hanover Management Co.; Dallas, Tex.; FXE-4184; Crude Oil

The Hanover Management Co. (Hanover) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in the extension of the exception relief previously granted to the firm and would thereby permit Hanover to continue to sell all of the crude oil produced from the Fruin "A" No. 1 Well (the Fruin well) for the benefit of the working interest owners at upper tier ceiling prices. *Hanover Management Co.*, 5 FEA Par. 83,068 (February 18, 1977). In considering the request, the FEA determined that the Fruin well was continuing to experience increasing operating costs and that in the absence of a continuation of exception relief the working interest owners would lack an economic incentive to maintain the production of crude oil from the well. In view of this determination and on the basis of the operating data which the firm submitted for the most recently completed fiscal period, Hanover was permitted to sell at upper tier ceiling prices 100 percent of the crude oil produced from the Fruin well for the benefit of the working interest owners.

B. J. Hickman; Kimball, Nebr.; Fee 4119, Crude Oil

B. J. Hickman filed an Application for Exception which, if granted, would permit him to determine the price of crude oil produced and sold in February 1974 and May 1975 from the J. R. Cross lease located in Banner County, Nebr. without regard to the current cumulative deficiencies which had accrued on that property. According to the Hickman submission those deficiences were the result of snowfalls during the preceding months which had temporarily interrupted the production of crude oil from the lease. In considering Hickman's exception request, the FETA found that the normal production of crude oil from the J. R. Cross lease has continued despit the existence of cumulative deficiencies in February 1974 and May 1975. The FEA therefore concluded that Hickman had not shown that his extraction efforts at the Cross lease would be endangered in any manner in the absence of exception relief. The FEA also concluded that Hickman had failed to demonstrate in this proceeding that the FEA regulatory program imposed burdens upon him which were disproportionate to those generally incurred by other crude oil producers. Hickman's exception request was therefore denied.

Donald Huhn, Louis Gais; Minerva, Ohio, Youngstown, Ohio; FEE-4077, FEE-4078, Motor Gasoline

Louis Gais (Gais) and Donald Huhn (Huhn) filed two separate Applications for Exceptions from the provisions of 10 CFR 211.9. The exception requests, if granted, would result in the issuance of orders by the FEA assigning to both Gais and Huhn a new supplier of motor gasoline to replace their base period supplier, Texaco, Inc. (Texaco). Both Gais and Huhn also requested that the Cross Oil Company (Cross) be designated as the new supplier. Since the Gais and Huhn submissions involved similar factual matters, and requested an identical result; they were consolidated for resolution in a single proceeding. In considering the Gais and Huhn applications, the FEA observed that both Gais and Huhn are currently able to purchase sufficient surplus product from Cross at the present time to satisfy all of their requirements for motor gasoline. The FEA therefore concluded that Gais and Huhn are not presently experiencing a serious hardship or a gross inequity as a result of adherence to their supplier purchaser realtionships with Texaco. Accordingly, the Applications for Exception were denied.

Husky Oil Co. of Delaware; Denver, Colo FXE-4085; Crude Oil

Husky Oil Co. of Delaware (Husky) filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of June 1977. In support of its exception request, Husky submitted projected financial statements for its current fiscal year ending December 31, 1977 and projected monthly crude oil runs to stills and receipts of old, new and imported crude oil for the fiscal year. In considering Husky's exception request the FEA determined that as a result of Husky's crude oil runs and receipts during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of June 1977. As a result of the projected entitlements cost which Husky would incur during its current fiscal year, the firm's profit margin and return on invested capital would be below historical levels. Under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976) exception relief was therefore warranted. Accordingly, the FEA granted Husky's Application for Exception relieving the firm of any entitlements purchase obligations during the six month period June 1977 through November 1977 to account for its crude oil runs to stills and old oil receipts during the period April 1977 through September 1977. However, the FEA noted that the relief approved to Husky would be reevaluated if the firm requested an extension of execption relief beyond November 1977 and, as is the case with all Entitlements Program Exception decisions at the conclusion of the firm's current fiscal year. The decision further noted that an adjustment will be made and Husky will be required to purchase entitlements if it received excess benefits in the past because of a difference between the financial projections it submitted and the actual financial results which it achieves.

Louis Kahan; Tulsa, Okla. FEE-4099, Crude Oil

Louis Kahan (Kahan) filed an Application for Execption from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit him to sell at upper tier prices the crude oil which he produces from the Mose Bean Lease in Seminole County, Okla. According to the Kahan submission, substantial repairs on pumping and tubing equipment must be made at the lease if crude oil production is to continue. In considering the Kahan Application, the FEA found that a substantial investment is necessary in order to repair the one well on the Mose Bean Lease, and that this investment would be uneconomic if the crude oil which would be produced from the property after the completion of the repairs were sold at lower tier ceiling prices. The material presented by Kahan also indicated that if the repairs were not undertaken substantial quantities of crude oil would not be recovered from the reservoir underlying the lease. On the basis of these findings, the FEA concluded that exception relief should be granted to the working interest owners which would provide a sufficient economic incentive to undertake that capital investment necessary to make the repairs. The FEA concluded that if Kahan were permitted to sell 13,382 barrels of crude oil which he produces for the benefit of the working interest at upper tier prices over the remaining two and one-half year life of the property, these objectives would be achieved.

Kalama Chemical, Inc.; Kalama, Wash., EPI 0120; Unfinished Toluene

Kalama Chemical, Inc., filed an Application for Exception from the provisions of 10 CFR 213.35(c) which, if granted, would permit it to import 259,925 barrels of unfinished toluene into PAD District V on a license fee-exempt basis during the current allocation period. In considering Kalama's exception request, the FEA determined that the firm is unable to obtain adequate suppliers of domestic toluene at competitive prices because of high land transportation costs and the unavailability of coastal tanker space. Consequently, it was found that the firm will have to import the full amount of toluene for which it has requested fee-exempt authority. The FEA also observed that Kalama is the only U.S. manufacturer of phenol which uses toluene rather than benzene or cumene as a petrochemical feedstock. Since benzene and cumene may be imported on a fee-free basis while toluene may not, the FEA concluded that the requirement that Kalama pay import fees for the toluene which it requires places the firm at a competitive disadvantage and results in an unfair distribution of the regulatory burdens which are imposed on Kalama and similarly situated firms. Accordingly, Kalama's exception request was granted.

Kern County Refinery, Inc.; Bakersfield, Calif.; FXE-4096; Crude Oil

Kern County Refinery, Inc. filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of June 1977. In support of its exception request, Kern submitted projected financial statements for its current fiscal year ending March 31, 1978 and projected monthly crude oil runs to stills and receipt of old, new and imported crude oil for the fiscal year. In considering Kern's exception request the FEA determined that as a result of Kern's crude oil runs and receipts during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of June 1977. As a result of the projected entitlements cost which Kern would incur during its current fiscal year, the firm's profit margin and return on invested capital would be below historical levels. Under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976) exception relief was therefore warranted. Accordingly, the FEA granted Kern's Application for Exception relieving the firm of any entitlements purchase obligations during the six month period June 1977 through November 1977 to account for its crude oil runs to stills and old oil receipts during the period April 1977 through September 1977 to permit Kern to achieve its historical profit margin during the current fiscal year. However, the FEA noted that the relief approved to Kern would be reevaluated if the firm requested an extension of exception relief beyond November 1977 and, as is the case with all Entitlements Program Exception decisions, at the conclusion of the firm's current fiscal year. The decision further noted that an adjustment will be made and Kern will be required to purchase entitlements if it received excess benefits in the past because of a difference between the financial projections it submitted and the actual financial results which it achieves.

Lunday-Thagard Oil Co., South Gate, Calif.; FXE-4086; Crude Oil

Lunday-Thagard Oil Co. (Lunday-Thagard) filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of June 1977. In support of its exception request, Lunday-Thagard submitted projected financial statements for its current fiscal year ending June 30, 1977 and projected monthly crude oil runs to stills and receipts of old, new and imported crude oil for the fiscal year. In considering Lunday-Thagard's exception request the FEA determined that as a result of Lunday-Thagard's crude oil runs and receipts during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of June 1977. As a result of the projected entitlements cost which Lunday-Thagard would incur during its current fiscal year, the firm's profit margin and return on invested capital would be below historical levels. Under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976) exception relief was therefore warranted. Accordingly, the FEA granted Lunday-Thagard's Application for Exception relieving the firm of any entitlements purchase obligations during the six month period June 1977 through November 1977 to account for its crude oil runs to stills and old oil receipts during the period April 1977 through September 1977 to permit Lunday-Thagard to achieve its historical profit margin during the current fiscal year. However, the FEA noted that the relief approved to Lunday-Thagard would be reevaluated if the firm requested an ex-

tension of exception relief beyond November 1977 and, as is the case with all Entitlements Program Exception decisions, at the conclusion of the firm's current fiscal year. The decision further noted that an adjustment will be made and Lunday-Thagard will be required to purchase entitlements if it received excess benefits in the past because of a difference between the financial projections it submitted and the actual financial results which it achieves.

W. N. McMurry; Casper, Wyo.; FEE-4030; Crude Oil

W. N. McMurry filed an Application for Exception from the provisions of 10 CFR, Part 212, which, if granted, would permit the firm to sell the crude oil produced from the Brabec and the Wagner Fredrickes Wells (the Wells) located on the West Sage Creek property, Park County, Wyo., at upper tier ceiling prices. In considering McMurry's Application, the FEA determined that the cost per barrel of producing crude oil from the Wells has increased significantly and now exceeds the lower tier ceiling price which McMurry is permitted to charge. As a consequence McMurry no longer has an economic incentive to continue to operate the Wells and if the McMurry property is abandoned a considerable amount of otherwise recoverable crude oil will be lost. On the basis of previous precedents involving similar factual situations, the FEA concluded that the application to McMurry of the lower tier ceiling price rule resulted in a gross inequity and that exception relief should be granted. In previous Decisions, the FEA has granted exception relief which permits a firm to reflect in its selling prices the increased operating costs per barrel incurred between the quarter which includes May 15, 1973 and the firm's most recently completed fiscal quarter. In considering the McMurry application however, the FEA determined that while it appeared that McMurry had no economic incentive to continue to produce crude oil from the Wells, the application of the precedent established in prior Decisions and described above would not provide the firm with a sufficient economic incentive to continue its operations at the Wells. The MEA therefore concluded that an alternative type of exception relief was necessary. Accordingly the FEA granted McMurry exception relief to permit the firm to reflect in its selling prices the difference between the cost of producing a barrel of crude oil during the 1973 calendar year and the projected cost of producing a barrel of oil during the calendar year ending December 31, 1977.

Mohawk Petroleum Corp., Inc.; Los Angeles, Calif.; FXE-4083; Crude Oil

Mohawk Petroleum Corp. (Mohawk) filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of June 1977. In support of its exception request, Mohawk submitted projected financial statements for its current fiscal year ending December 31, 1977 and projected monthly crude oil runs to stills and receipts of old, new and imported crude oil for the fiscal year. In considering Mohawk's exception request the FEA determined that as a result of Mohawk's crude oil runs and receipts during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of June 1977. As a result of the projected entitlements cost which Husky would incur during its current fiscal year, the firm's profit margin and return on invested capital would be below historical levels. Under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976) exception relief was therefore warranted. Accordingly, the FEA granted Mohawk's Application for Exception relieving the firm of any entitlements purchase obligations during the six month period June 1977 through November 1977 to account for its crude oil runs to stills and old oil receipts during the period April 1977 through September 1977 to permit Mohawk to achieve its historical return on invested capital during the current fiscal year. However, the FEA noted that the relief approved to Mohawk would be reevaluated if the firm requested an extension of exception relief beyond November 1977 and, as is the case with all Entitlements Program Exception decisions, at the conclusion of the firm's current fiscal year. The decision further noted that an adjustment will be made and Mohawk will be required to purchase entitlements if it received excess benefits in the past because of a difference between the financial projections it submitted and the actual financial results which it achieves.

Mull Drilling Co., Inc.; Wichita, Kans.; FEE-4138; Crude Oil

Mul Drilling Co., Inc. (Mull) filed an Application for Exception which if granted, would permit the firm to sell the crude oil which it produces from the UPRR Roth Lease (Roth Lease) without regard to the ceiling prices specified in 10 CFR, Part 212, Subpart D. In considering the firm's submission, the FEA determined that except for those months in which Mull incurred substantial repair expenses for its Reda pumps, the firm had operated the Roth Lease on a profitable basis and would continue to do so until at least November 1977. Therefore, the FEA determined that Mull had not demonstrated that exception relief was necessary in order to provide the firm with an economic incentive to continue its crude oil production activities at the Roth Lease. The FEA also concluded that the Reda pump repair expenses which Mull periodically incurred are capital expenditures rather than operating costs and that Mull should file another Application for Exception prior to making those expenditures if it can demonstrate that it has no economic incentive to make the repairs.

Navajo Refining Co.; Artesia, No. Mex.; FXE-4098; Crude Oil

Navajo Refining Co. (Navajo) filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of June 1977. In support of its exception request, Navajo submitted projected financial statements for its current fiscal year ending July 31, 1977 and projected monthly crude oil runs to stills and receipts of old, new and imported crude oil for the fiscal year. In considering Navajo's exception request the FEA determined that as a result of Navajo's crude oil runs and receipts during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of June 1977. As a result of the projected entitlements cost which Navajo would incur during its current fiscal year, the firm's profit margin and return on invested capital would be below historical levels. Under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976) exception relief was therefore warranted. Accordingly, the FEA granted Navajo's Application for Exception relieving the firm of any obligation to purchase entitlements during the six month period June 1977 through November 1977 to account for its crude oil runs to stills and old oil receipts during the period April 1977 through September 1977 to permit San Joaquin to achieve its historical profit margin during the current fiscal year. However, the FEA noted that the relief approved to San Joaquin would be reevaluated if the firm requested an extension of exception relief beyond November 1977 and, as is the case with all Entitlements Program Exception decisions, at the conclusion of the firm's current fiscal year. The decision further noted that an adjustment will be made and San Joaquin will be required to purchase entitlements if it received excess benefits in the past because of a difference between the financial projections it submitted and the actual financial results which it achieves.

San Joaquin Refining Co.; Newport Beach, Calif.; FXE-4102; Crude Oil

San Joaquin Refining Co. (San Joaquin) filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of June 1977. In support of its exception request, San Joaquin submitted projected financial statements for its current fiscal year ending April 30, 1978 and projected monthly crude oil runs to stills and receipts of old, new and imported crude oil for the fiscal year. In considering San Joaquin's exception request the FEA determined that as a result of San Joaquin's crude oil runs and receipts during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of June 1977. As a result of the projected entitlements cost which San Joaquin would incur during its current fiscal year, the firm's profit margin and return on invested capital would be below historical levels. Under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976) exception relief was therefore warranted. Accordingly, the FEA granted San Joaquin's Application for Exception relieving the firm of any entitlements purchase obligations during the six month period June 1977 through November 1977 to account for its crude oil runs to stills and old oil receipts during the period April 1977 through September 1977 to permit San Joaquin to achieve its historical profit margin during the current fiscal year. However, the FEA noted that the relief approved to Navajo would be reevaluated if the firm requested an extension of exception relief beyond November 1977 and, as is the case with all Entitlements Program Exception decisions, at the conclusion of the firm's current fiscal year. The decision further noted that an adjustment will be made and Navajo will be required to purchase entitlements if it received excess benefits in the past because of a difference between the financial projections it submitted and the actual financial results which it achieves.

Southland Oil Co.; Jackson, Miss.; FXE-4124; Crude Oil

Southland Oil Co. (Southland) filed an Application for Execption from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of June 1977. In support of its exception request, Southland submitted projected financial statements for its current fiscal year ending December 31, 1977 and projected monthly crude oil runs to stills and receipts of old, new and imported crude oil

for the fiscal year. In considering Southland's exception request the FEA determined that as a result of Southland's crude oil runs and receipts during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of June 1977 As a result of the projected entitlements cost which Southland would incur during its curent fiscal year, the firm's profit margin and return on invested capital would be below historical levels. Under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976) exception relief was therefore warranted. Accordingly, the FEA granted Southland's Application for Exception relieving the firm of any entitlements purchase obligations during the six month period June 1977 through November 1977 to account for its crude oil runs to stills and old oil receipts during the period April 1977 through September 1977 to permit Southland to achieve its historical profit margin during the current fiscal year However, the FEA noted that the relief approved to Southland would be reevaluated if the firm requested an extension of exception relief beyond November 1977 and, as is the case with all Entitlements Program Exception decisions, at the conclusion of the firm's current fiscal year. The decision further noted that an adjustment will be made and Southland will be required to purchase entitlements if it received excess benefits in the past because of a difference between the financial projections it submitted and the actual financial results which it achieves

Warrior Asphalt Co. of Alabama, Inc.; Tuscaloosa, Ala.; FXE-4139; Crude Oil

Warrior Asphalt Co. of Alabama, Inc. (Warrior) filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of June 1977. In support of its exception request, Warrior submitted projected financial statements for its current fiscal year ending March 31, 1978 and projected monthly crude oil runs to stills and receipts of old, new and imported crude oil for the fiscal year. In considering Warrior's exception request the FEA determined that as a result of Warrior's crude oil runs and receipts during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of June 1977. As a result of the projected entitlements cost which Warrior would incur during its current fiscal year, the firm's profit margin and return on invested capital would be below historical levels. Under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976) exception relief was therefore warranted. Accordingly, the FEA granted Warrior's Application for Exception relieving the firm of any entitlements purchase obligations during the six month period June 1977 through November 1977 to account for its crude oil runs to stills and old oil receipts during the period April 1977 through September 1977 to permit Warrior to achieve its historical profit margin during the current fiscal year. However, the FEA noted that the relief approved to Warrior would be reevaluated if the firm requested an extension of exception relief beyond November 1977 and, as is the case with all Entitlements Program Exception decisions, at the conclusion of the firm's current fiscal year. The decision further noted that an adjustment will be made and Warrior will be required to purchase entitlements if it received excess benefits in the past because of a difference between the financial projections it submitted and the actual financial results which it achieves

Whaleco Fuel Corp. Inc.; Brooklyn, N.Y. FPI-0112: Residual Fuel Oil No. 2 Fuel Oil

Whaleco Fuel Corp., Inc., filed an Application for Exception from the provisions of 10 CFR 213.35(c) which, if granted, would permit it to import, on a license fee-exempt basis, 500,000 barrels of No. 2 fuel oil and 1,250,000 barrels of residual fuel oil into PAD District I during the current allocation period. In considering Whaleco's exception request, the FEA found that the firm would be unable to obtain sufficient quantities of these fuels from domestic sources at competitive price levels to meet its supply requirements. Based on projections provided by Whaleco, it was found that the firm would have to import approximately 932,540 barrels of residual fuel oil and 260,810 barrels of No. 2 fuel oil during the allocation period. Whaleco's financial and operating data indicated that if the firm were required to absorb the cost of the license fees on these quantities of fuel oil, its already marginal financial position would deteriorate substantially. The FEA also found that the comparative market data provided by Whaleco indicated that the firm would be unable to increase its prices for No. 2 fuel oil and residual fuel oil to reflect the payment of license fees. The FEA concluded that since many of Whaleco's competitors pay no import fees on substantial quantities of the residual fuel oil which they import, in the absence of exception relief, Whaleco could well be forced to reduce or terminate its activities as an independent marketer. In view of these factors, Whaleco was granted an exception which permits it to import on a fee-exempt basis the quantities of residual fuel oil and No. 2 fuel oil which it projected it would have to import during the current allocation period.

Young Refining Corp.; Douglasville, Ga FXE-4103: Crude Oil

Young Refining Corp. (Young) filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of June 1977. In support of its exception request, Young submitted projected financial statements for its current fiscal year ending March 31, 1978 and projected monthly crude oil runs to stills and receipts of old, new and imported crude oil for the fiscal year. In considering Young's exception request the FEA determined that as a result of Young's crude oil runs and receipts during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of June 1977 As a result of the projected entitlements cost which Young would incur during its current fiscal year, the firm's profit margin and return on invested capital would be below historical levels. Under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976) exception relief was therefore warranted. Accordingly, the FEA granted Young's Application for Exception relieving the firm of any entitlements purchase obligations during the six month period June 1977 through November 1977 to account for its crude oil runs to stills and old oil receipts during the period April 1977 through September 1977. However, the FEA noted that the relief approved to Young would be reevaluated if the firm requested an extension of exception relief beyond November 1977 and, as is the case with all Entitlements Program Exception decisions, at the conclusion of the firm's current fiscal year. The decision further noted that an adjustment will be made and Young will be required to purchase entitlements if it received excess benefits in the past because of a difference between the financial projections it submitted and the actual financial results which it achieves

PETITION FOR SPECIAL REDRESS

Union Camp Corp., Atlanta, Ga.; FSG 0047: Coal Conversion

Union Camp Corp. (Union Camp) filed a Petition for Special Redress in which it requested that it be afforded an adjudicatory hearing with respect to a Notice of Intent (NOI) issued to the firm by the FEA pursuant to Section 2 of the Energy Supply and Environmental Coordination Act of 1974 (ESECA). Union Camp also requested that it be granted an extension of time in which to submit written comments regarding the NOI. In considering Union Camp's first request the FEA found that neither the Administrative Procedure Act nor ESECA required that an adjudicatory hearing be held in connection with the findings required to be made by Section 2 of ESECA. The FEA noted that ESECA merely required the FEA to afford interested persons an opportunity for oral and written presentations of data, views and arguments which the FEA had done. In its analysis of the second issue, the FEA noted that it had recently considered and rejected a similar request in *New England Power Co., Montaup Electric Co.*, 5 FEA Par. —— (May 26, 1977). The FEA determined that Union Camp had not submitted any legal arguments of factual information which distinguished its petition from the submissions filed by the firms in that case, and it noted that those applications had been denied. Accordingly, the Union Camp Petition for Special Redress was denied.

REQUESTS FOR MODIFICATION OR RESCISSION

Arizona Fuels Corp.; Salt Lake City, Utah; FMR-0105, Crude Oil

Arizona Fuels Corp. (Arizona Fuels) filed an Application for Modification of a Decision and Order which the FEA issued to it on January 28, 1977. *Arizona Fuels Corp.*, 5 FEA Par. 80,548 (January 28, 1977). In that determination, the FEA denied two Appeals which Arizona Fuels had filed from Decisions which had been previously issued to the firm on July 16, 1976 and on October 1, 1976. In the July 16 Order, the FEA approved prospective exception relief which relieved Arizona Fuels of a portion of its entitlement purchase obligations during the period May through October 1976. In the October 1 Order, the FEA denied an Application for Exception in which Arizona Fuels had requested that it be retroactively relieved of its obligation to purchase entitlements for the months of August and September 1975. In denying the two Appeals, the FEA observed that the firm could experience severe operating problems if it had to immediately consummate its outstanding entitlement obligations. Consequently, the Arizona Office of Compliance was directed to establish a payment program pursuant to which Arizona Fuels will be required to purchase the full $329,491.50 of its August and September 1975 entitlement purchase obligation by July 28, 1977. In its Application for Modification, Arizona Fuels alleged that certain factual material relating to the financial condition of the firm, which was not in existence at the time of the prior Appeal proceeding, has recently become available and that this material constitutes "significantly

changed circumstances" as that term is defined in 10 CFR 205.135. On the basis of this financial material, Arizona Fuels requested that the January 28 Order be modified to extend from six months to 36 months the period of time within which the firm must complete its purchases of August and September 1975 entitlements. In considering this request, the FEA observed that the new financial data submitted by Arizona Fuels was not significantly different from the data submitted by the firm in the previous Appeal proceeding. Accordingly, the FEA concluded that Arizona Fuels had failed to demonstrate that the circumstances upon which the January 28 determination was based had changed significantly and the Application for Modification which it filed was therefore denied.

Stephens and Cass; Dallas, Tex.; FMR–0108; Crude oil

Stephens and Cass (S&C) filed a request for modification of a May 20, 1977 Decision and Order in which the FEA stayed the provisions of a Remedial Order requiring S&C to implement price reductions on certain crude oil which it produces and sells in order to refund revenues received as a result from prior violations of the FEA Price Regulations. S&C requested in its Application for Modification that the May 20, 1977 Decision and Order be modified to eliminate the requirement that the amount of the price reductions required by the Remedial Order be deposited in an escrow account pending the FEA's determination on an Application for Exception which S&C submitted on April 26, 1977. In considering S&C's petitions, the FEA noted that the May 20 Stay Order had determined that S&C's economic viability would not be threatened if the refunds required by the Remedial Order were placed in escrow during the period of time S&C's Application for Exception is pending. The FEA concluded that the additional financial data which S&C had presented in support of its modification request did not indicate that the circumstances underlying the May 20 determination had changed in any significant respect. S&C's request for modification was accordingly denied.

SUPPLEMENTAL ORDERS

Sabre Refining, Inc.; Bakersfield, Calif.; FEX–0164; Crude oil

On May 20, 1977 the FEA issued a Supplemental Order to Sabre Refining, Inc. (Sabre) which determined that Sabre had received an excess amount of exception relief from the provisions of 10 CFR 211.67 (the Entitlements Program) for the firm's fiscal period ended October 31, 1976. Sabre Refining, Inc., 5 FEA Par. ——— (May 20, 1977). Sabre was therefore required to purchase entitlements equal in value to the excess amount of exception relief. In arriving at the May 20 determination the FEA had intended to review the exception relief granted to Sabre in accordance with the criteria set forth in Beacon Oil Co., 3 FEA Par. 83,209 (June 8, 1976). However, in that May 20 Supplemental Order the FEA reviewed the firm's exception relief for the fiscal period beginning May 1, 1976. Since that period omitted the month of April 1976, and therefore did not include the full portion of the firm's 1976 fiscal year that followed the rescission of Special Rule No. 6, the determination reached in the May 20 Supplemental Order was not in accordance with the criteria set forth in the Beacon Decision and was therefore erroneous. Since Sabre's 1976 fiscal year ended October 31, 1976 the FEA conducted another review of the exception relief which Sabre had been granted for its October 31, 1976 fiscal year. Based on that review the FEA determined that Sabre had received an excess measure of exception relief during the April through October 1976 period. Sabre was therefore required to purchase additional entitlements having a total value of $217,547 during the period June through November 1977.

Suburban Propane Gas Corp.; Whippany, N.J., FRX–0165; Crude oil

On May 25, 1977 the FEA issued a Decision and Order to Suburban Propane Gas Corporation (Suburban) staying the refund provisions of an April 25 Remedial Order. Suburban Propane Gas Corp., 5 FEA Par. ——— (May 25, 1977). The Stay was granted on the express condition that Suburban place the disputed funds into an escrow account pending a final determination on its Appeal of the Remedial Order. On June 10, 1977 Suburban advised the FEA that it did not intend to establish the escrow account specified in the May 25 Order. Since the escrow account was an express condition of the May 25 Stay Order the FEA determined that the Stay should be vacated.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Exceptions and Appeals of the Federal Energy Administration has issued Decisions and Orders granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The exceptions granted permit the firms involved to increase the prices of the production of the gas plants listed below to reflect certain non-product cost increases:

Company	Case No.	Plant	Amount of price increase, dollar/gallon
Atlantic Richfield Co.	FEE 4274	Adair	$.0262
	FEE-4275	Camrick	.0026
	FEE-4276	Elmwood	.0051
	FEE-4277	Fairway	.0051
	FEE-4278	Gillette	.0179
	FEE-4279	Headlee	.02144
	FEE-4280	Knox Bromide	.0260
	FEE-4281	Selling	.0009
	FEE-4282	Swanson River	.0323
	FEE-4283	West Seminole	.00974
	FEE-4332	Empire Abo	.0002
Breckinridge Gasoline Co.	FXE-4134	Elissville	.0863
	FXE-4135	Lodi	.13117
Continental Oil Co.	FEE-4285	Elk Basin	.0278
	FEE-4286	Kettlemen Hills	.0106
Gulf Oil Corp.	FXE-4131	Azalea	.0410
	FXE-4132	Milfay	.0758
	FXE-4133	Sand Hills	.0488
Marathon Oil Co.	FEE-3953	Camrick	.0272
	FEE-3954	Cotton Valley	.0274
	FEE-3955	Heyser	.1210
	FEE-3957	Knox	.0624
	FEE-3962	Stephens	.0465
Mobil Oil Corp.	FEE-4214	Bryans Mill	.0327
	FEE-4215	Hagist	.03468
	FEE-4216	Iowa	.0139
	FEE-4217	Levelland	.0068
	FEE-4218	Putnam Oswego	.0073
	FEE-4219	Wilcox	.0127
Phillips Petroleum Co.	FXE-4149	Cimarron	.0929
	FXE-4150	Puckett	.0335
	FXE-4151	Sooner No. 1	.07291
